Infotainment Radio Bolero Owner's Manual
Structure of this Owner's Manual (explanations)

This Owner's Manual has been systematically designed to make it easy for you to search for and obtain the information you require.

Chapters, table of contents and subject index
The text of the Owner's Manual is divided into relatively short sections which are combined into easy-to-read chapters. The chapter you are reading at any particular moment is always specified on the bottom right of the page.

The table of contents arranged according to chapter and the detailed subject index at the end of the Owner's Manual help you to rapidly find the information you are looking for.

Direction indications
All direction indications such as "left", "right", "front", "rear" relate to the direction of travel of the vehicle.

Units of measurement
All values are expressed in metric units.

Explanation of symbols
- Denotes a reference to a section with important information and safety advice in a chapter.
- Denotes the end of a section.
- Denotes the continuation of a section on the next page.
- Denotes a registered trademark.

Examples of the information listed in the Owner's Manual
Press the key menu → sound.

This information means that the menu button on the device must first be pressed, followed by the function key sound on the device screen, and then the menu should be confirmed by pressing the function key sound.

The "→" symbol indicates the next step.

Example of the menu, the available menus, menu items or functions.
- xyz - the first menu level
- xyz - the second menu level
- xyz - the third menu level
- xyz - the first menu level

Notes

WARNING
The most important notes are marked with the heading WARNING. These WARNING notes draw your attention to a serious risk of accident or injury.

CAUTION
A Caution note draws your attention to the possibility of damage to your vehicle (e.g. damage to gearbox), or points out general risks of an accident.

For the sake of the environment
An Environmental note draws your attention to environmental protection aspects. This is where you will, for example, find tips aimed at reducing your fuel consumption.

Note
A normal Note draws your attention to important information about the operation of your vehicle.
You have chosen a ŠKODA vehicle, which is fitted with an Infotainment Radio Bolero (hereafter called the unit) - we thank you for your confidence in us. The new operating concept allows you to configure vehicle settings and to operate some electronic systems centrally from the unit.

In addition to this Owner's Manual, please also carefully read the Vehicle Manual, because operation in accordance with these instructions is a prerequisite for proper use of the vehicle.

If you have any questions about your unit, please contact a ŠKODA Partner.

Your ŠKODA AUTO a.s. (hereinafter referred to as ŠKODA)

**Introductory information**

**Important notes**

- **Introduction**

This chapter contains information on the following subjects:

Declaration of conformity 4
Component protection 4
Touch screen 5

These operating instructions describe all possible equipment variants without identifying them as special equipment, model variants or market-dependent equipment.

Consequently, this vehicle does not need to contain all of the equipment components described in these operating instructions.

The level of equipment of your vehicle refers to your purchase contract of the vehicle. More information is available from the ŠKODA Partner where you bought the vehicle.

Please note that these instructions are meant only as an addendum to the information presented in the Vehicle Manual for your vehicle. Therefore, they can be used only in conjunction with the latest manual for this vehicle. For a detailed description of some functions listed in these instructions, see the Vehicle Manual for your vehicle.

The illustrations can differ in minor details from your device; they are only intended for general information.

**WARNING**

- Concentrate fully at all times on your driving! As the driver you are fully responsible for the operation of your vehicle.
- Only use the device in a way that you are in full control of your vehicle in every traffic situation – there is the risk of accidents!

**Declaration of conformity**

First read and observe the introductory information and safety warnings on page 4.

ŠKODA AUTO a.s. hereby declares that the ŠKODA Infotainment systems meet the basic requirements and additional provisions of Directive 1999/5/EC.

**Component protection**

First read and observe the introductory information and safety warnings on page 4.

Some electronic control units are factory-equipped with component protection. The component protection was developed as a protection mechanism for:

- Impairment of factory- or garage-fitted control units after installation in another vehicle (for example, after a theft);
- Impairment of components operated outside of the vehicle;
- The possibility of a legitimate installation or change of control units for repairs at a ŠKODA specialist garage.

When component protection is enabled, the following message appears on the display of the device: Component theft protection: the infotainment system is not fully available at present. Please switch on the ignition.

If the component protection does not activate by switching on the ignition, please contact a ŠKODA specialist garage.

---

1 Terms used » manual, chapter Preface.
touch screen

First read and observe the introductory information and safety warnings on page 4.

The unit is equipped with a so-called touch screen which can only be operated by the touch of a finger.

**CAUTION**

- The screen can be operated by a slight touch of a finger. Do not apply pressure to the screen - risk of damage!
- Do not use any objects to operate the screen - risk of damage!
- Do not use solvents such as benzene or turpentine for cleaning, since they may damage the screen surface.

**Note**

- Use a soft cloth and, if necessary, methylated spirits, to remove fingerprints from the screen. When doing so, ensure that you do not cause damage to other parts of the interior.
- It is not possible to operate the screen with your fingernails or while wearing gloves.
- Do not affix anything to the area of the unit below the screen. This could affect the functioning of the sensors for the zoom effect.
- To protect the screen, you can use a suitable screen protector for touchpads that does not affect its functionality.
- The brightness of the screen is adjusted automatically depending on the brightness of the interior lighting. The automatic setting can be adjusted manually » page 20.

![Equipment overview](Fig. 1) Description of the device

First read and observe the introductory information given on page 5.

**Description of the device**

- Switch device on/off, adjust volume
- Operation and confirmation
- Radio menu » page 23
- Media menu » page 28
- Mute

- PHONE - Phone menu » page 36

Introductory information 5
Switching the unit on/off

First read and observe the introductory information given on page 5.

Press the \( \text{\( \circ \) \}} \) knob to switch the device on or off.

When the device is switched on, the audio source and operating mode that were active before switching off the device will be restored.

If telephone mode was active before you switched off the unit and the ignition and Bluetooth® function is not switched on, the screen displays the message » page 37. Switch on the ignition or the Bluetooth® function » page 22.

If the vehicle key is pulled out of the ignition lock while the unit is switched on, the unit will switch off automatically. After switching on the ignition, the unit is turned on automatically.

If the device was switched off using the knob \( \text{\( \circ \) \}} \), then the device will not switch on automatically after switching on the ignition.

If your vehicle is fitted with the KESSY system, the device will switch off automatically after the engine has been turned off and the door opened. If you open the driver’s door before switching off the engine, the device will also switch off.

When the ignition is switched off, the device switches off automatically after approx. half an hour (discharge protection of the vehicle battery).

Adjusting volume

First read and observe the introductory information given on page 5.

Increase volume

Turn the \( \text{\( \circ \) \}} \) knob to the right.

Decrease volume

Turn the \( \text{\( \circ \) \}} \) knob to the left.

Muting

Press the \( \text{\( \circ \) \}} \) button or rotate the \( \text{\( \circ \) \}} \) knob and adjust the audio volume to 0.
Note

- The change in volume is displayed on the screen of the unit.
- When the sound is muted, the \( \mathbb{1} \) symbol appears in the display.
- Excessively high volumes can cause sound resonance in the vehicle.
Device operation

in the device screen

Introduction

This chapter contains information on the following subjects:

Operation ............................................................................ 8
Input screen with keyboard .................................................. 9
Input screen with numeric keyboard ....................................... 9

First and foremost, pay attention to the safety instructions » page 4, Important notes.

This chapter covers the instrument operation and the work with the touch screen and with various types of input keyboards.

Operation

First read and observe the introductory information given on page 8.

Screen areas which confirm a function or a menu are called “function keys”.

White or green function keys are active.

Greyed out function keys are not active.

Status line

In the main menu of some operating modes, the upper screen area contains a status line displaying time details and the external temperature, as well as information on the currently selected operating mode.

Function keys in the main menu

In the main menu of some operating modes, the lower screen area contains function keys with symbols for functions or menus. When you move your finger towards this screen area, the unit displays the names of the function keys alongside the symbols.

Explanation of graphic

A Currently selected menu
B - Return to the higher-level menu
C Function with “checkbox” ✓
D Scroll bar - Shows the position in the menu; touch the scroll bar to navigate the menu
E Menu item with “pop-up window” ▼

Selecting menu/menu item

› Drag your finger over the screen in the required direction
› Turn the menu knob 2 » Fig. 1 on page 5

If you make the selection by turning the menu knob 2, the currently selected menu is highlighted in green.

Confirming menu/menu item

› Touch the function key with your finger
› Press the menu knob 2

Returning to higher-level menu

Context-dependent

› By pressing ◄
› By pressing the relevant button next to the screen
› By touching the screen outside of the pop-up window with your finger

Switching function on/off with “checkbox”

Press the relevant function key

› ✓ or ◁ - Function is switched on
› □ or ○ - Function is switched off

Set value

› by touching the function keys with the symbols ▼/▲,◄/ ►, -/+ 
› Touch or move your finger over the scale
Input screen with keyboard

Enter name

Fig. 4 Input screen

Input screen with numeric keyboard

Enter telephone number

Fig. 5 Input screen with numeric keypad

First read and observe the introductory information given on page 8.

The input screen with keypad is used to input entries or find entries in the unit memory (e.g. phone contacts, addresses, etc.).

By pressing the keyboard function key on the input screen the required character appears in text line A.

Only those letters or symbols making up a logical entry will be available. Do not forget to enter a blank space for terms made up of more than one word, such as Lorem Ipsum. The entries can be entered without special characters (diacritics).

A search of the most relevant terms ensues as soon as letters are entered, so it is not necessary to enter the entire entry name.

Next to text line A, the number of matching entries is shown in function key B.

The numbers 1-99 indicate the quantity of matching entries that were found. If even more entries were found, ** is indicated instead of a number. If less than 6 entries were found, a list of the found entries opens automatically.

Description of the function keys

- Return to the higher-level menu
- Display the menu with selected contacts, information on the number of relevant contacts
- Delete characters in the entry line
- Change from upper case to lower case and vice versa
- Menu display with keys in the selected language, including diacritics » page 21
- Switch to numbers and special characters
- Switch to special characters
- Switch to letters
- Blank entry
- Confirmation of text entered into the entry line
- Direct entry of a phone number.

In the display of the instrument cluster

This chapter contains information on the following subjects:

Operate using the lever _______________ 10
multifunction steering wheel- radio/media _______________ 11
multifunction steering wheel- telephone _______________ 12
First and foremost, pay attention to the safety instructions » page 4, Important notes.

This chapter discusses operation of the device and its menus using the operating lever or the buttons on the multifunction steering wheel. Information regarding the device functions appear in the instrument cluster display.

The keys can only control the menu functions in the display of the instrument cluster.

**Note**

If the ignition and the side light are switched on, the buttons and dials on the multifunction steering wheel will also be illuminated.

---

**Operate using the lever**

First read and observe the introductory information given on page 9.

Activate the Main menu by pressing the rocker switch \[A\] » Fig. 6 for some time.

› The individual menu items can be selected with the \[A\] button.

› The selected item is confirmed by briefly pressing the \[B\] button.
First read and observe the introductory information given on page 9.

The information shown on the instrument cluster display (depending on the selected menu)
- **Radio**
  - current frequency band of the radio station;
  - currently playing station of the receivable radio stations in the given frequency band, if less than 5 are receivable;
  - if more than 5 stations can be received, a list of receivable radio stations is displayed with an option to choose one of them;
  - TP traffic announcements.
- **Media**
- **Name**

---

12 Device operation
Function of the phone calls in the instrument cluster display
Depending on the context, the following functions can be carried out in the instrument cluster display:

Incoming call
- Answer - Answer a call
- Reject - Reject a call
- Ignore - Ignore a call

Outgoing call
- Stop - End a call

Current call
- Hang up - End a call
- Mic. off - Microphone off
- Mic. on - Microphone on

Symbols in the instrument cluster display

<tr>
<td>●</td>
<td>A phone is connected to the device</td>
</tr>
<tr>
<td>☐</td>
<td>Missed calls (if there are several missed calls, the number of calls is shown next to the symbol)</td>
</tr>
</tbody>
</table>

This function is only supported by some mobile phones.

Call list
Only the call list can be displayed and used in the instrument cluster display.
If there are no entries in the call list, the following message appears in the instrument cluster display: No entries available.
The following symbols are displayed next to each entry in the call list.

Voice control

Introduction
This chapter contains information on the following subjects:

function requirements ........................................ 14
Switching on/off .................................................. 14
Operation .......................................................... 15
not recognizing a voice command .............................. 15
possibility of a new voice command input .................. 15
stop/restore voice command input ............................ 15
meaning of the symbols in the voice command description .......................................................... 15
General voice commands ....................................... 16
Radio menu ......................................................... 17
media menu ......................................................... 17
phone menu ......................................................... 18

First and foremost, pay attention to the safety instructions » page 4, Important notes.
To speed up handling of the device and dedicate yourself fully to driving, some device features may be operated by voice commands.
The voice control system can be operated either by the driver or by the front passenger.
WARNING

- Please pay attention to the traffic first and foremost! As the driver you are fully responsible for road safety. Only use the system so that you are in full control of your vehicle in every traffic situation - risk of accident!
- Do not use the voice control system in case of emergency, the voice may be distorted in stressful situations. In such circumstances a telephone connection may not be established or the connection may take too much time to complete. The emergency number should be dialled manually!

function requirements

First read and observe the introductory information and safety warnings on page 13.

Function requirements for voice control.

- The ignition is switched on.
- The device is switched on.
- No phone call is in progress.
- The parking aid is not active.

Requirements for optimum voice command recognition.

- Only give voice commands when the symbol is displayed on the device screen or in the information display.
- Speak with a normal tone of voice without intonation and excessive pauses.
- Avoid a bad pronunciation.
- Close doors, windows and the sliding roof, in order to prevent external disturbances affecting recognition of the voice commands.
- It is recommended to speak louder at higher speeds, so that the tone of your voice is louder than the increased surrounding noise.
- During voice control, limit additional noise in the vehicle, e.g. passengers talking at the same time.

Note

- During voice control, no navigation announcements and traffic announcements are played.
- Some voice commands must be spelled out when pronouncing depending on the selected language of communication, such as the Source Selection "SD" card one.

Switching on/off

First read and observe the introductory information and safety warnings on page 13.

Switching on voice control

- Briefly press the button on the unit.
- By briefly pressing the symbol key on the multifunction steering wheel.

Activation of voice control is indicated by an acoustic signal and the device screen will display a collection of basic voice commands for the current menu.

The menu display as well as the acoustic signal can be enabled or disabled » page 22.

Switching off voice control

- Press the button on the unit for a long time, or press it twice.
- Hold down or double press the symbol key on the multifunction steering wheel.
- Touch the screen with your fingers (any part of the screen with the exception of the function key).
- Press a button on the unit (with the exception of brief pressing of the button).
- Utter the voice command Cancel voice control.
Operation

First read and observe the introductory information and safety warnings 1 on page 13.

The voice control system can usually be operated through the method “say what you see.”

Utter the descriptions on the function keys highlighted in green. For example, the function key select no. can be accessed via the voice command “select number”.

Voice control settings » page 22.

Icons in the voice control menu

- The system plays an audio response
- The system is waiting for a voice command
- The voice command input is stopped » page 15
- The system detects a voice command

As long as the system is playing a voice output, it is not necessary to await the end of the message playback. The message can be stopped by briefly pressing the VOICE button or the icon button on the multifunction steering wheel. In this way the voice output is aborted and a new voice command is expected.

not recognizing a voice command

First read and observe the introductory information and safety warnings 1 on page 13.

If a voice command is not recognised, the system answers with Sorry? and you can give a new command.

If the system does not recognise the second voice command, the help message is provided again and you can give a new command.

If the system does not recognise the third voice command, the system plays the Voice control cancelled message and the dialogue is ended.

possibility of a new voice command input

First read and observe the introductory information and safety warnings 1 on page 13.

A voice command can only be changed or re-entered when the symbol is still displayed.

You do not have to wait until the voice command is recognized by the system.

By pressing the VOICE or the Symbol key on the steering wheel, the function of the voice command recognition is restored.

stop/restore voice command input

First read and observe the introductory information and safety warnings 1 on page 13.

In some menus, the procedure for entering voice commands can be stopped by turning the knob 2 » Fig. 1 on page 5.

The symbol displayed on the device screen or in the information display changes from to .

Restore entry

by pressing the function key with the symbol ;
by pressing the button VOICE on the unit;
by pressing the button on the multifunction steering wheel.

meaning of the symbols in the voice command description

First read and observe the introductory information and safety warnings 1 on page 13.

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Importance</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>

</tr>
<tr>
<td>&gt;</td>
<td>The system awaits the next voice command, for example, utter phone contacts and say the name of the desired contact, for example, Jan Novák.</td>
</tr>
</tbody>
</table>
The most important voice commands are displayed first and foremost. The system sometimes also detects synonyms. For example, to choose the service telephone of one of the contacts, the option **official office** or **business** can be uttered.

---

**General voice commands**

First read and observe the introductory information and safety warnings on page 13.

Voice control can be used in the menus radio, media and phone.

When you give the voice command **Help**, the unit displays a menu containing possible voice commands. Repeating the voice command **Help** will cause the unit to display the second part of the help menu, if applicable.

Entering general voice commands can always be expressed independently of the selected menu.

<table>

      - **Off** - Settings apply to the whole vehicle
      - **Front** - Optimised setting for the front occupants
      - **Driver** - Optimised setting for the driver
    - **CANTON Surround**: virtual Canton®-surround system (active during media playback)

**screen settings**

First read and observe the introductory information given on page 19.

Press the button **SETUP** → Display.
• Switch off display (in 10 seconds) - Activate/deactivate energy-saving mode for the display\(^{1}\)
• Brightness level: - Adjusts the brightness of the screen
  • Brightest - brightest level
  • Brighter - brighter level
  • Medium - medium level
  • Darker - darker level
  • Darkest - darkest level
• Confirmation tone - switches confirmation tone on/off when pressing a function surface
• Show clock in standby mode - Time and date displayed on the screen when the ignition is switched on and the unit is switched off

**time and date settings**

First read and observe the introductory information given on page 19.

› Press the button \(\text{SETUP} \rightarrow \) Time and date.

• Time: - Time settings
• Summer (DST) - Switches the summer time setting on/off
• Time zone: - Select the time zone
• Time format: - Set the time format
  • 12 h
  • 24 h
• Date: - Date settings
• Date format: - Set the date format
  • DD.MM.YYYY - Day - Month - Year
  • YYYY-MM-DD - Year - Month - Day
  • MM-DD-YYYY - Month - Day - Year

**keyboard settings**

First read and observe the introductory information given on page 19.

› Press the button \(\text{SETUP} \rightarrow \) Keypad.

• ABC - keys arranged alphabetically
• QWERTY - Arrangement of the keys as per the QWERTY system (in accordance with computer keyboard arrangement)

**Additional keypad language settings**

First read and observe the introductory information given on page 19.

› Press \(\text{SETUP} \rightarrow \) Additional keyboard languages.

In this menu, the keyboard character arrangement for the chosen language can be selected, and with this the option for fast entry of the characters used in the selected language.

A switch between the languages selected can ensue by pressing \(\rightarrow \) page 9 \(\rightarrow \) in the entry screen.

**Unit setup**

First read and observe the introductory information given on page 19.

› Press the button \(\text{SETUP} \rightarrow \) Units.

• Distance: - Distance units
  • \(\text{km}\) - Kilometres
  • \(\text{mi}\) - Miles
• Speed: - Speed units
  • \(\text{km/h}\) - Kilometres per hour
  • \(\text{mph}\) - Miles per hour

---

\(^{1}\) If after 10 seconds, the screen is not activated by approaching, touching the screen or operating the menu button \(\geq \) \(\rightarrow \) Fig. 1 on page 5 \(\rightarrow \), the screen turns black. You can switch the display back on again by approaching it with your hand, touching it, or operating the menu knob \(\geq \).
Temperature: - Temperature units
- °C - Degrees Celsius
- °F - Degrees Fahrenheit
Volume: - Volume units
- l - Litres
- gal (US) - Gallons (US)
- gal (UK) - Gallons (UK)
Consumption: - Consumption units
- l/100km - Litres per 100 kilometres
- km/l - Kilometres per litre
- mpg (US) - Miles per gallon (US)
- mpg (UK) - Miles per gallon (UK)
Gas consumption: - Gas consumption units
- kg/100km - Kilograms per 100 km
- km/kg - Kilometres per kilogram
- m³/100 km - Cubic metres per 100 kilometres
- km/m³ - Kilometres per cubic metre
Pressure: - Pressure units for tyre pressure
- kPa - Kilopascal
- bar - bar
- psi - Pounds per square inch

**Voice control settings**

First read and observe the introductory information given on page 19.

Press the button SETUP → Voice control.

- Dialogue style: Setting the dialogue style
  - Long: Long dialogue (the system plays complete acoustic messages)
  - Short: Short dialogue (the system shortens some acoustic messages or substitutes them with an acoustic signal)
- Display available commands: Switch on/off the menus containing basic voice commands when voice control is activated
- Voice control session start tone: Switch on/off the audible signal that is output when voice control is activated
- Voice control session end tone: Switch on/off the audible signal that is output when voice control is ended
- Input tone in voice dialogue: Switch on/off the audible signal that is output to signal that voice control is waiting for a command

**Bluetooth®-settings**

First read and observe the introductory information given on page 19.

Press the button SETUP → Bluetooth.

- Bluetooth: Bluetooth® function on/off
- Visibility: - Switch on/off the visibility of the Bluetooth® device for other devices
  - Visible: Visibility is always on
  - Hidden: Visibility is off
- At start-up: - Turns on visibility for 5 minutes after switching on the ignition or until the driving speed has exceeded 5 km/h
- Name: - Open the input screen with keyboard - Change the device name
- Paired devices: Display the list of paired Bluetooth® devices; connect or delete a paired device; delete the list of paired devices
- Delete all: - Delete all paired Bluetooth® devices
- Find devices: - Searches for available external devices with enabled Bluetooth® functions and activated visibility
- Bluetooth audio (A2DP/AVRCP): - Switch on/off the connection option for Bluetooth® profiles A2DP and AVRCP

22  device settings
Radio

Analogue radio reception

Introduction

This chapter contains information on the following subjects:

- main menu .................................................. 23
- Settings ...................................................... 24
- traffic programme ......................................... 25

First and foremost, pay attention to the safety instructions » page 4, Important notes.

Note

- Car parks, tunnels, tall buildings or mountains can disrupt the radio signal even causing it to fail completely.
- RDS (Radio Data System) is used to transmit programme IDs and additional services, thus enabling automatic station tracking, for example. In the event of sufficiently satisfactory reception, the suitable RDS radio stations will display the station name instead of the station frequency.
- In countries where the RDS (Radio Data System) function is not adequately supported, we recommend turning off the AF and RDS setting, otherwise they can affect the functionality of the radio.
- The AF (alternative frequency) function ensures that the best receivable frequency of the selected station is automatically and precisely set.
- PI - Program Identification presents a sender identification by means of a unique code. This code is not displayed and is used for channel and program recognition, e.g. in setting a different radio station.
- TP (traffic program identification) - Traffic information identification - the selected radio station broadcasts traffic information (TP signal).

A2DP and AVRCP are Bluetooth® profiles that support multimedia functions.

First read and observe the introductory information given on page 23.

The device makes the analogue radio reception of FM and AM frequencies possible. 15 presets (preset stations) are always available for each frequency band. These preset buttons are divided into three memory banks. A list of all available stations is also available.

Call up the main menu

› Press the button \( \text{RADIO} \).

Explanation of graphic

- \( \text{A} \) - Selected radio station
- \( \text{B} \) - Function keys used to select a station stored in the preset list (preset stations)
- \( \text{C} \) - Function keys to switch between the memory banks
- \( \text{D} \) - Function key used to select the frequency band
- \( \text{E} \) - Choosing a radio station from the list of available stations
- \( \text{F} \) - Manual station search using the function keys \( \uparrow \) and \( \downarrow \) or using the slider
- \( \text{G} \) - Changing channels in the list of available stations or between the stations stored in the preset buttons » page 24
- \( \text{H} \) - Radio settings

</tbody>
</table>

Settings

First read and observe the introductory information given on page 23.

Press the button (RADIO) → Ø.

- **Sound** - Sound Settings » page 20, sound settings
- **Scan** - Auto-play all stations in the current frequency band, each station for around five seconds. Press again to stop the auto-play function at the current radio station.
- **Arrow buttons** - Set the function of the station selection in radio mode
- **Preset list** - Switch to only stored stations
- **Station list** - Switches all stations currently in range for the selected frequency band
- **Traffic programme (TP)** - Switches traffic programme on/off
- **Delete presets** - Deletes the stored stations (preset buttons)
  -  - Delete a radio station (preset button)
  -  - Delete all - Deletes the stored stations (preset buttons)
- **Channel logos** - Select a channel, to which a logo is to be assigned; logo selection on the CD, SD card or USB disk 1), By selecting the logo it becomes associated with the selected station
- **Radio text** - Radio text display on/off

Advanced setup

- **Alternative frequency (AF)** - Switching on/off the search for alternative frequencies of the station currently being heard, when you turn off AF is displayed on the device screen
- **Radio Data System (RDS)** - Switches on/off the RDS function
- **RDS Regional**: - Switch on/off the automatic tracking of related regional stations
  - Fixed - Maintains the selected regional station continuously. When the signal is lost, another regional station must be set manually.
  - Automatic - Auto-selects the station with the best reception at the moment. If you lose reception the region, the unit will automatically set another available region.
- **Automatic saving of station logos** - Auto save the station logo according to the PI code of the radio station

1) The following image formats are supported: jpg, gif, png, bmp.
You can switch between banks with individual preset buttons using the function keys [C].

When you save the station to a station button, the station is also assigned a logo from the device memory, as long as the logo for this channel is available in the memory. (Applies only to FM).

Selecting a stored radio station from the preset list

To select a stored radio station from the preset list:

- In the radio menu press the function key for the desired preset button [B].

You can switch between banks with individual preset buttons using the function keys [C].

Select radio stations from the list of available stations

- In the radio menu press the function key [A] or [↓] and select the desired radio station. (The menu arrow keys: must be set to channel list » page 24).

- Update of the list of accessible stations (only in the AM frequency range)

If no list of available stations is available, the device will automatically search for radio stations.

Organize radio stations in the list of available stations

The station list can be organized as follows:

- Alphabet - alphabetic sorting
- Group - organizing according to the programme type of the radio station from the broadcasted PI code

Traffic programme

First read and observe the introductory information given on page 23.

The functionality of the traffic monitoring system is indicated on the screen by the letters TP.

While playing in Media mode, the last selected radio station continues to be received in the background if it supports traffic information. If a radio station is set that does not support TP, the most appropriate TP station is set automatically in the background to continuously receive traffic reports in the media.

If no traffic programme station can be found because, for example, radio reception is interrupted in general, then instead of TP, no TP will be displayed.

### Note

- Some radio stations misleadingly identify themselves as traffic programs. It is therefore not a device error that with such radio stations, no traffic news exist.

### Digital radio reception DAB

**Introduction**

This chapter contains information on the following subjects:

- Main menu .......................................................... 26
- Settings ................................................................. 26
- Operation ............................................................. 27
- Station information .................................................. 27

First and foremost, pay attention to the safety instructions » page 4, Important notes.

DAB (Digital Audio Broadcasting) is the digital transmission of radio programmes based on the DAB, DAB+ or DMB standards. It allows multiple stations to be transmitted in a single frequency in the form of a so-called ensemble. It also allows for the transmission of additional data and information (e.g. messages, sport, weather, warnings, etc.).
Main menu

**Fig. 13** DAB: Main menu

First read and observe the introductory information given on page 25.

The device allows for DAB digital radio reception. For DAB, 15 presets (preset buttons) are always available. These preset buttons are divided into three memory banks. A list of all receivable DAB station is also available. The device supports the reception of DAB traffic announcements.

Opening the main menu

Press the button RADIO → DAB.

Explanation of graphic

- **A** Selected DAB radio station
- **B** Function keys used to select a DAB radio station stored in the list (station buttons)
- **C** Function keys to switch between the memory banks
- DAB radio reception settings » page 26

Settings

The settings menu is identical to that of the analogue radio reception » page 24, Settings. The Advanced Settings menu is different.

Press the button RADIO → Advanced setup.

- **DAB traffic announcements** - Switches on/off DAB announcements
- **Other DAB announcements** - Switch on/off other announcements (e.g., warnings, regional weather, sports reports, financial news)
- **DAB - DAB station tracking** - Switch on/off automatic DAB station tracking in other groups
- **Automatic DAB - FM switching** - Switches on/off auto-switching from DAB to the FM frequency band if the DAB signal is lost
- **L-band** - Switches on/off the automatic DAB station search in L-band
- **Automatic saving of station logos** - Automatic association of the logo with station detected

**Note**

In regions without DAB coverage, the following symbol appears in the DAB menu.

Symbols in the display

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Importance</th>
</tr>
</thead>
<tbody>
<tr>
<td>🎧</td>
<td>Sound is muted</td>
</tr>
<tr>
<td>⭐️</td>
<td>A radio station from the list of available stations is a radio station from the preset list (under the station buttons)</td>
</tr>
<tr>
<td>🌟</td>
<td>Selected DAB radio station</td>
</tr>
<tr>
<td>🌡️</td>
<td>DAB signal is unavailable</td>
</tr>
<tr>
<td>📚</td>
<td>DAB radio station with slideshow</td>
</tr>
</tbody>
</table>

1) For the DAB radio reception in different countries, different frequency ranges are used. In some countries the DAB radio reception only in the so-called L-band (1452 - 1490 MHz). In other countries, the original frequencies of the TV broadcast, or their combinations with the L-band are used. If you have any problems with the DAB wireless reception it is necessary to ensure that the DAB Automatic tuning in L-band is on.
DAB programme tracking
If a DAB station is a member of several ensembles, when the signal is poor, the same station is searched in a different ensemble.

Auto-change DAB -FM
If the DAB signal is poor, the unit will try to find a corresponding FM station for the DAB station you are currently listening to.

For auto-change to work, the DAB and FM stations must send a sender ID.

While the station is being received via the FM frequency band, FM will appear next to the station name. When the corresponding DAB station is in range again, the FM display disappears.

If a DAB station is also not available in the FM frequency band due to poor reception, the radio will be switched to mute.

If you do not want automatic station change (e.g. when driving through tunnels, when reception may be lost temporarily), you can deactivate this function » page 26.

operation

First read and observe the introductory information given on page 25.

Station finding
› Press the button RADIO → .

Saving a radio station
› Set the desired radio station or press and hold the desired station in the list of available stations → press and hold the corresponding function key » Fig. 13 on page 26 until a beep is heard.

You can switch between banks with individual preset buttons using the function keys C.

When you save the station to a station button, the station is also assigned a logo from the device memory, as long as the logo for this channel is available in the memory.

Selecting a stored radio station from the preset list
› In the radio menu press the function key for the desired preset button .

You can switch between banks with individual preset buttons using the function keys C.

Select radio stations from the list of available stations
› In the radio menu press the function key  or  and select the desired radio station. (The menu arrow keys: must be set to channel list » page 24 ).

 المنطقة - Updating list of achievable stations
If no list of available stations is available, the device will automatically search for radio stations.

Example of a DAB station list
| XYZ  | - an ensemble of DAB stations |
| XYZ  | - DAB station with the name XYZ |
| XYZ  | - DAB station with the name XYZ which is currently not in range |
| XYZ  | - DAB station with the name XYZ which is currently only in range in the FM frequency band |
| XYZ  | - DAB station with the name XYZ which is currently only available in another ensemble of DAB stations |

Station information

First read and observe the introductory information given on page 25.

› Press the button RADIO → DAB → .

- Preset list - Display only stored DAB stations
- Station info. - Displays DAB station information (e.g., station name, group, or programme type) with accompanying text (radio text) and images
- Radio text - Display radio text
- Slide show - Display slideshow
This chapter contains information on the following subjects:

Main Menu .............................................................. 28
Media settings ......................................................... 29
operation ................................................................. 29
Title browser/folder list .............................................. 30

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The device allows you to play audio files in various formats » page 31 and to connect different source types.

When the source has been connected, the device starts to automatically play audio files in alphabetical order.

The unit can be operated: » page 8
> using the buttons on the unit;
> using the function keys on the unit screen;
> using the information display.

**WARNING**

- Never place external sources on the dashboard. These could be thrown into the passenger compartment during sudden driving manoeuvres, injuring the occupants.
- Never place external sources close to the airbags. They could be thrown into the passenger compartment when the airbags are deployed, injuring the occupants.

**CAUTION**

We recommend that you do not save any important data on CD media, Bluetooth® players, to an SD memory card or connected external sources. The ŠKODA Partner is not responsible for damage due to the loss of data stored on these storage devices.

**Main Menu**

First read and observe the introductory information and safety warnings on page 28.

The device supports audio files in the following formats: mp3, wma, wav, aac, m4a, m4b, mp4.

Only standard size audio CDs (CD-DA) and data CDs (CD-R, CD-RW) can be played in the internal drive.

---

11 If the screen is touched in the area of display of information for DAB stations, the screen only displays this information. If you touch the screen in the area of the displayed image, only images will be displayed on the screen.
Call up the main menu
Press the button MEDIA.

Explanation of graphic
A Information for the current file (e.g., artist, track title)
B Selected audio source/display of cover art provided that this exists in the file or folder being used (ID3-Tag)
C Display of track length and remaining time
D Select the source
E Select the file or folder from the list
Media settings » page 29

Media settings
First read and observe the introductory information and safety warnings on page 28.
Press the button MEDIA ➥ .

- Sound - Sound Settings » page 20, sound settings
- Mix/repeat/Scan including subfolders - Switches on/off playback of the tracks in modes mix/repeat/scan (random/repeat/auto-play) including subfolders of the current folder
- Bluetooth - Settings for the Bluetooth® function » page 22
- Video (files) - Set the parameters of the displayed video (brightness, colour, contrast, format, standard) from the file
- Video (iPod) - Set the parameters of the displayed video (brightness, colour, contrast, format, standard) from the iPod®, iPad® or iPhone® device » page 35
- Traffic programme (TP) - Switches traffic programme on/off
- External AUX device - Activate/deactivate the input of the external AUX audio source
- Safely Remove - safe removal / disconnection of the SD memory card or USB device
- SD Card 1
- USB 1

Operation
First read and observe the introductory information and safety warnings on page 28.

Requirements and Limitations

First read and observe the introductory information given on page 30.

The device has been tested with most products and media available on the markets. However, it is possible that some devices, media or files will be unreadable or unplayable.

Audio and video files are subject to copyright. Files that are protected by Digital Rights Management (DRM) technology cannot be played back by the media drive.

The more files, folders and playlists on a storage medium, the longer it will take to save the audio and video files. It is advantageous to create subfolders with files (e.g., by artist or album names) to save time when storing the data. During the import, it will take more time to store the data.

The name of the artist, the album and the title of the played file can be displayed if the information is available as a so-called ID3 tag. If no ID3 tag is available, only the folder name is displayed.

WMA files (Windows Media Audio) can only be played if the copyright is not additionally protected by the DRM procedure (Digital Rights Management). Such WMA data is not supported by the unit.

For a good playback, we recommend the use of a bit rate of at least 160 kb/s for compressed MP3 files. For audio files with variable bitrates, the indicated remaining playback time does not correspond to the actual remaining playback time.

The correct display of country-specific characters (e.g. ID3 tag information) cannot always be guaranteed.

Bluetooth®-player

First read and observe the introductory information given on page 30.

The device makes a wireless connection to the Bluetooth® player possible.

The pairing process of the Bluetooth® player with the unit » page 39.

A fast pairing process is possible if the Bluetooth® player supports it. If a PIN code is displayed on the screen of the Bluetooth® player or unit, confirm this code.

The media is started and operated via the portable player or via the unit, depending on the device used.

Note

- Note any pairing requests shown in the Bluetooth® player.
- You only need to enter the PIN code once. Bluetooth devices that have already been paired are connected to the unit automatically when they are in range.
- It is possible to pair several Bluetooth® players with the unit. However, only one player can be active at the same time.
- Bluetooth protocols A2DP and AVRCP (1.0 - 1.3) are supported.
- We recommend adjusting the volume on the portable player to the maximum level.
- The volume can also be adjusted by setting the input sensitivity of the device for Bluetooth® Player » page 20, sound settings
- The supported media functions are dependent on the type of Bluetooth® player used.

CD

First read and observe the introductory information given on page 30.

The CD slot is located in the glove box on the front passenger side.

Inserting/ejecting a CD

- Insert a CD, with the labelled side facing up, into the CD slot until it is automatically drawn in. Playback starts automatically.
- Press the symbol key – the CD is ejected.

If the ejected medium is not taken out within 10 seconds, it will be retracted again for safety reasons. However, the unit will not change to the CD source.
WARNING

The CD player is a laser product. On the manufacturing date, this unit was classified as a class 1 laser product in accordance with the national/international standards DIN EN 60825-1: 2008-05 and DHHS Rules 21 CFR, Subchapter J classified as a class 1 laser product. The laser used in this class 1 laser product is so weak that there is no risk of danger when operated correctly. This product is designed so that the laser is restricted to the inside of the unit. However, the installed laser could be classified in a higher class were the housing to be removed. For this reason, never remove the housing of the unit.

CAUTION

- Never insert CDs with the designation "Do not insert in drives without a drawer" into the internal drive or use "EcoDiscs" in the internal drive.
- After pressing the button there is a time delay of a few seconds before the CDs are ejected. During this time the lock in front of the CD slot is open.
- Be sure to wait until the CD has been fully ejected before you try to insert a new CD. Otherwise you can damage the drive inside the unit.
- If the CD has mechanical damage, is not readable or is inserted incorrectly, the following message is displayed: Error: CD. Check the CD and insert properly into the drive. If the message is displayed again, try using another CD or visit a ŠKODA specialist garage if necessary.
- Outside temperatures that are either too high or too low might cause the unit to be temporarily unavailable. The changer is equipped with a temperature switch to protect the inserted CD and the laser.
- If the inside temperature of the device is too high, no CDs will be accepted. The unit switches to the last active menu.
- Never use liquids such as petrol, paint thinner or record cleaner to clean the surface of the CD - this may cause damage.
- Never expose the CD to direct sunlight!
- Only write on the CD with appropriate writing tools.
- Do not stick anything to the CD!

Note

- Uneven or unsteady road surfaces and strong vibrations may cause the CD to jump.
- In cold weather or after rain showers, moisture (condensate) may deposit in the unit. This can lead to playback jumps or impair the play function. In that case, wait until the moisture has dissipated.
- Should a CD be dirty, never clean it in a circular motion, but instead work from the inside out. Use a soft, lint-free cloth. For heavy stains, we recommend that you clean the CD with a commercially available CD cleaner and allow it to dry.
- It is possible that CDs protected by copyright and home-made CDs will not be played back at all or only in certain circumstances.
- The national copyright laws that apply in your country must be observed.
- The CD player does not contain parts that need to be serviced or repaired. In the case of a defective CD player, visit a ŠKODA specialist garage.

SD memory card

Inserting an SD memory card
- Push the SD memory card into the memory card slot with the slanted edge to the right until it “locks into place”. Playback starts automatically.

Removing an SD memory card
- Depending on equipment fitted:
  - Press the button [SETUP] → Remove SD card 1 safely.
  - Press the inserted SD memory card. The SD memory card “jumps” into the eject position.
SD memory card empty or data not readable
If an SD memory card is inserted, on which no or no readable data is stored, then nothing is played back from the SD memory card.
Due to differing quality requirements from different card manufacturers, it is not always possible to guarantee the playback from SD memory cards.
It may not be possible to play some or all files on the SD memory card, or their playback may be limited.

⚠️ CAUTION
- Only use one-part SD memory cards. If using an SD memory card with an adapter (multipart SD memory cards), vehicle vibrations can cause the SD memory card can fall out of the adapter while driving, and individual card parts can remain stuck in the device.
- We recommend using SD memory cards of class 4 and higher. This guarantees the fastest possible access to the audio files.
- Always store the SD cards in suitable cases to protect them from dirt, dust and other forms of damage.

USB-, AUX Inputs

Fig. 20
USB and AUX inputs

First read and observe the introductory information given on page 30.

The device allows you to play audio files from USB storage devices, as well as external devices connected to the analogue AUX input.
The USB and AUX inputs are located above the storage compartment at the front of the centre console » Fig. 20.

A data carrier or system can be connected to the USB/AUX input either directly or via a connection cable from the ŠKODA range of original accessories.

Adjusting the playback volume of the source
Depending on the connected source, it is also possible to adjust the input sensitivity setting on the AUX input » page 20, sound settings.

AUX input
External audio sources connected to the AUX input cannot be operated from your device.
The standard 3.5 mm jack plug is used for the AUX input. If the external audio source does not have this jack plug, you must use an adapter.

USB input
External audio sources connected to the USB input cannot be operated from your device.

Before removing the USB device, proceed as follows:
- Press the button MENU → 📈 → Remove USB device safely.
Do not use USB extension cables or adapters. These can impair the function of the device.
USB hubs are not supported.
The USB input can be used to charge the batteries of most devices that allow charging via USB.

⚠️ CAUTION
The AUX input must only be used for audio sources!

ℹ️ Note
- If an external audio source is connected to the AUX input, which is equipped with an adapter for external power supply, the sound may be impaired. This depends on the quality of the adapter which is used.
- See the owner’s manual of the specific manufacturer for operating the external audio source.
First read and observe the introductory information given on page 30.

The device allows you to play audio and video files from an external, device connected to the MEDIA-IN input.

External sources such as iPod®, iPad® or iPhone®, connected to the MEDIA IN input, can be operated via your unit.

Extension cables to connect external sources are available from ŠKODA original accessories.

The unit starts charging the battery of the iPod®, iPhone® or iPad® device once the device is connected using the extension cable and provided that the ignition is switched on.

Sort tracks from a connected device (iPod®, iPad® or iPhone®)

› Video (only available if a red adapter is used) - Video playlists, films, music videos, TV shows, video podcasts, rented films.

› Music - Playlists, artists, albums, tracks, podcasts, genres, composers, audio books.

Video setup

› Press the button MEDIA →  → Video (iPod).

■ Screen – Adjust the brightness, contrast, and colour of the video (during playback in NTSC standard - option for colour adjustment)

■ Format: - Set the screen width/height ratio

AV standard: ³ - Video standard settings

■ Automatic - Automatic selection of standard

■ PAL - Select the coding standard for the PAL colour signal (phase alternating line)

■ NTSC - Select the coding standard for the NTSC colour signal (National Television System(s) Committee)

Note

■ Some options provided by iPod®, iPhone® or iPad® devices, such as the ability to rate tracks or add them to an "on-the-go" playlist, are not supported.

■ Some options provided by the iPod®, such as Cover Flow® or video playback, are only available when a red extension cable is used.

■ Consult the operating instructions for your iPod®, iPhone® or iPad® device for important information concerning its operation. We recommend that you regularly update the software of external sources.

■ The volume of the connected device can also be customized by adjusting the input sensitivity for the MEDIA IN input » page 20, sound settings.

³ The same standard must be selected in the external source. An incorrectly adjusted AV standard can result in inadequate playback quality. The unit outputs no picture at all, or only renders it in black and white.
Communication

Telephones and two-way radio systems

Introduction

This chapter contains information on the following subjects:

Main menu .................................................. 37
Settings ....................................................... 37
Problems with the Telephone function .................... 38
Phonebox .................................................... 38

The device allows for a wireless connection to the mobile phone. Your mobile phone can be operated from this unit.

First and foremost, pay attention to the safety instructions » page 4, Important notes.

ŠKODA permits the operation of mobile phones and two-way radio systems with a professionally installed external aerial and a maximum transmission power of up to 10 watts.

Please refer to a ŠKODA Service Partner for information about the possibilities of installing and operating mobile phones and two-way radio systems that have a transmission power of more than 10 W.

Operating mobile phones or two-way radio systems may interfere with the functionality of the electronic systems in your vehicle.

The reasons for this are as follows:

 › no external aerial;
 › incorrectly installed external aerial;
 › transmission power greater than 10 watts.

The Telephone menu is available when the following conditions are met:

✓ The ignition is switched on.
✓ The Bluetooth® function on the device is switched on.

After the device is switched on, the system attempts to connect to the most recently connected mobile phone.¹

⚠ WARNING

• The national legal regulations for using a mobile phone in a vehicle must be observed.
• If a mobile phone or a two-way radio system is operated in a vehicle without an external aerial or with an incorrectly installed external aerial, this can increase the strength of the electromagnetic field inside the vehicle.
• Two-way radio systems, mobile phones or mounts must not be installed on airbag covers or within the immediate deployment range of the airbags.
• Never leave a mobile phone on a seat, on the console panel or in another area from which it can be thrown during a sudden braking manoeuvre, an accident or a collision, as this poses a risk of injury.
• During air transport of the vehicle, the Bluetooth® function must be switched off by a specialist company.

⚠ CAUTION

The range of the Bluetooth® connection to the hands-free system is limited to the vehicle interior. The range is dependent on local conditions, e.g. obstacles between the devices and mutual interferences with other devices. If your mobile phone is in a jacket pocket, for example, this can lead to difficulties when establishing a connection with the device or transferring data.

⚠ Note

We recommend that the installation of mobile phones and two-way radio systems in a vehicle be carried out by a ŠKODA Service Partner.

¹ With some phones, it is necessary to set the connection to the device as “authorised” in order for the automatic connection to be successful. If this is not set, the system will prompt you for a confirmation each time you attempt to connect to the mobile phone.
First read and observe the introductory information and safety warnings on page 36.

Call up the main menu

Press the button TELEPHONE.

If a mobile phone is connected to the device, the telephone mode main menu is displayed » Fig. 22.

Explanation of graphic

Name of the mobile network provider
Name of the connected mobile phone/function key used to search for a mobile phone or list of paired mobile phones
Speed dial favourite telephone numbers » page 41
Direct entry of a phone number » page 41
Display the phonebook » page 42
Display the call list (if there are new calls, the number of missed calls is shown next to the symbol ) » page 43
Menu Settings Phone » page 37

Symbols in the display

This function is only supported by some mobile phones.

Settings

First read and observe the introductory information and safety warnings on page 36.

Press the button PHONE ➔.

Menu with the telephone menu settings

- Select telephone - Search for available telephones/list of paired telephones/select telephone
- Find telephone - Search for a mobile phone
- Bluetooth - Bluetooth settings » page 22
- User profile - User profile settings
  - Manage favourites - Assign function keys to allow speed dialling of contacts; you can also add and delete contacts here
  - Enter voicemail number here - Enter the phone number of the voicemail
  - Prefix: - Switch on/off the option to assign a prefix to a telephone number. Once this function is activated, the button for adding a prefix will be displayed with the symbol in some menus.
  - Enter here - Enter the prefix of a phone number
  - Sort by: - Sort the order of the phonebook
    - Surname - Sort by contact name
    - Forename - Sort by contact's first name
  - Import contacts. - Starts update of the phone book; the number of imported contacts and number of contacts stored in the phone is displayed
  - Delete other user profiles - Delete other user profiles (contacts, order of calls, call lists, speed dial buttons assigned to contacts)
  - Reverse order of call lists - Changes the order of calls in the call list from the oldest to the most recent calls, and vice versa
- Reminder: Don't forget mobile phone. - Switch on/off the reminder for a connected telephone when the ignition is switched off and the ignition key is removed (or the ignition is turned off and the driver's door opened in the case of vehicles with the KESSY system)
- **Select ring tone** - Selects the ring tone if the connected mobile phone does not support the in-band ringing function.\(^1\)
- **Show pictures for contacts** - Switch on/off the display of the image assigned to the contact in the mobile phone.\(^2\)

### Problems with the Telephone function

First read and observe the introductory information and safety warnings on page 36.

If there are problems with the availability of the network or with the Bluetooth® function, the following messages appear on the device display screen.

<table>
<thead>
<tr>
<th>Message</th>
<th>Importance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Network search...</td>
<td>The mobile phone searches for available GSM networks.</td>
</tr>
<tr>
<td>No network</td>
<td>The mobile phone is not connected to the GSM network.</td>
</tr>
<tr>
<td>The SIM card is not working. Please contact your network provider.</td>
<td>The mobile phone network operator has rejected the connection (e.g. not enough mobile phone credit, SIM card blocked, roaming not available).</td>
</tr>
<tr>
<td>(X) Bluetooth profile is currently unavailable.</td>
<td>Bluetooth® is switched off in the Setup menu. Select Yes to switch Bluetooth® on.</td>
</tr>
<tr>
<td>To use the Bluetooth function, please switch the ignition on.</td>
<td>Switch on the ignition.</td>
</tr>
<tr>
<td>Please switch on Bluetooth.</td>
<td>Switch on the Bluetooth® function.</td>
</tr>
<tr>
<td>No Bluetooth devices paired.</td>
<td>Connect the mobile phone with the device.</td>
</tr>
</tbody>
</table>

\(^1\) The in-band ringing function makes it possible to use the ring tone of your phone as the ring tone.
\(^2\) This function is only supported by some mobile phones.

---

![Phonebox](image)

**Phonebox**

First read and observe the introductory information and safety warnings on page 36.

The Phonebox amplifies the telephone signal. On the base plate there is an induction panel connected to the roof antenna. When the mobile phone is inserted into the Phonebox, the phone signal increases in strength by about 20%. This reduces the level of phone battery discharge and the electromagnetic radiation inside the vehicle.

**Inserting the mobile phone into the Phonebox**

- Press on the edge of the lid [A] in the direction of the arrow, and open the storage compartment.
- Place the mobile phone in the storage compartment [B] with its back on the induction panel.
- Press on the edge of the lid [A] in the opposite direction from the arrow, and close the storage compartment » [I].

The Phonebox cannot be used as an alternative to connecting the mobile phone with the device.

**WARNING**

For safety reasons, the storage compartment must always be closed when driving.
Connect to the device

Introduction

This chapter contains information on the following subjects:

Pairing procedure from the device 39
Pairing procedure from the mobile phone 40
Fast connection to another paired mobile phone 40
Automatic connection 40
Disconnection 41

First and foremost, pay attention to the safety instructions » page 4.

To connect a mobile phone with the device, the two devices must be paired. The pairing can be initiated from the device or from the mobile phone.

Prerequisites for successful pairing:

✓ The ignition is switched on.
✓ The Bluetooth® function for the mobile phone is switched on » page 22.
✓ The Bluetooth® function for the mobile phone is switched on.
✓ The visibility of the mobile phone is switched on » page 22.
✓ The visibility of the mobile phone is switched on.
✓ During the pairing process, no other mobile phone may be connected with the device.
✓ The devices are paired with each other » page 39.
✓ When pairing from the mobile phone, follow the instructions in the owner’s manual of the mobile phone.

The device is indicated as SKODA_BT_xyz in the Bluetooth® device to be connected. xyz is replaced with the last four symbols of the VIN code of your vehicle. You can change the name of the device » page 22.

Possible symbols in the list of found or paired devices

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Importance</th>
</tr>
</thead>
<tbody>
<tr>
<td>📞</td>
<td>Bluetooth® players (Bluetooth® profiles A2DP and AVRCP) *[a]</td>
</tr>
<tr>
<td>📞</td>
<td>Bluetooth® player connected to the unit via Bluetooth® profiles A2DP and AVRCP *[b]</td>
</tr>
</tbody>
</table>

*a HFP is a Bluetooth® profile that supports the functionality of the hands-free system.
*b A2DP and AVRCP are Bluetooth® profiles that support multimedia functions.

Note

The maximum number of paired devices is 20. If a new device is paired after the maximum number has been reached, the paired device that was least recently used will be automatically deleted.

Pairing procedure from the device

First read and observe the introductory information given on page 39.

Press the button PHONE.

Where the mobile phone has been paired but the automatic connection is unsuccessful, check that the mobile phone’s Bluetooth® function is switched on and that the device is visible.

Press the function key B » Fig. 22 on page 37 to check whether the Bluetooth® device is included in the list of paired devices.

If no mobile phone is connected to the device, the message Please find and connect a mobile telephone is displayed.

If a mobile phone is connected to the device, press the button B » Fig. 22 on page 37.

Press Find telephone.

At the end of the search, the display shows the message Device search finished.

At the end of the search, or even during the search, press the button Results.

The system displays a list of found Bluetooth® devices. (If you do not press the button Results, the system displays the list after 25 seconds).

Select the mobile phone that you want to pair.

Confirm the pairing request on the mobile phone.

Next, depending on the type of the mobile phone:
Enter the PIN code shown on the unit display into the mobile phone within 30 seconds or Confirm the PIN code shown on the display of the mobile phone in the unit and the mobile phone, within 30 seconds.

If the mobile phone supports the Bluetooth® profile A2DP or AVRCP, your mobile phone might prompt you to pair the phone as a Bluetooth® player.

If the search failed, check whether the prerequisites for a successful coupling have been fulfilled » page 4.

During the search, the system displays a list of function keys:

- ** Cancel the search
- ** Help - Display help
- ** Results - Display the search results as they become available. Here, you can select a found Bluetooth® device before the search has completed.

### Pairing procedure from the mobile phone

** First read and observe the introductory information given on page 39. **

When pairing from the mobile phone, follow the instructions in the owner's manual of the mobile phone.

- Have the mobile phone search for available Bluetooth® devices.
- Select the device in the list of Bluetooth® devices.

Depending on the type of the mobile phone:

- Enter a minimum 4 digit PIN code and confirm it;
- Within 30 seconds, enter the same PIN code on the screen of the unit or
- Confirm the PIN code shown on the unit screen in the mobile phone and the unit within 30 seconds.

You can cancel the pairing at any time by pressing **Cancel.**

### Fast connection to another paired mobile phone

** First read and observe the introductory information given on page 39. **

If you want to connect the device to another paired mobile phone, the existing connection does not have to be terminated. The connection to the existing mobile phone is automatically terminated by connecting to another mobile phone.

- In the PHONE main menu, press the function key **B** » Fig. 22 on page 37.

A list of up to four previously connected mobile phones will appear.

- Select the paired mobile phone to be connected with the device.
- Confirm the connection by pressing **Replace.**

If the desired mobile phone did not appear in the list of the four previously connected mobile phones and is not in the resulting list of paired devices, then the mobile phone must be paired with the device » page 39.

### Automatic connection

** First read and observe the introductory information given on page 39. **

After the device is switched on, the system attempts to connect

1) to the most recently connected mobile phone

2) If the connection cannot be established, the system will attempt to connect to other previously connected phones, one by one.

The message **connection being established automatically...** appears on the screen during the automatic connection process.

If the phone was not found, the message **Please search for and connect to a mobile telephone** appears on the screen.

---

1) Provided that the ignition and the Bluetooth® function are switched on.

2) With some phones, it is necessary to set the connection to the device as "authorised" in order for the automatic connection to be successful. If this is not set, the system will prompt you for a confirmation each time you attempt to connect to the mobile phone.
Disconnection

First read and observe the introductory information given on page 39.

The mobile phone connection with the device can be terminated as follows.
› By removing the ignition key (or switching off the ignition and opening the driver's door in vehicles with the KESSY system).
› By disconnecting the hands-free system or switching off the Bluetooth® function on the mobile phone.
› By switching off the Bluetooth® function in the unit » page 22.
› By disconnecting or deleting the paired device from the list of paired devices » page 22.

Telephone functions

Introduction

This chapter contains information on the following subjects:
- Speed dialling a phone number 41
- Direct entry of a phone number 41
- Phone book 42
- Call-lists 43
- Telephone conversation 43
- Conference 43

First and foremost, pay attention to the safety instructions » page 4.

Speed dialling a phone number

First read and observe the introductory information given on page 41.

You can use the speed dial function keys [C] » Fig. 22 on page 37 to dial previously assigned telephone numbers instantly.

There are five function keys available.

Assigning a phone number

› Press a function key for the speed dial [C] » Fig. 22 on page 37 that is not assigned.

The unit displays the phone book.

› If necessary, enter one of the contact numbers for the desired telephone contact.

You can also assign a phone number in the phone menu » page 37.

Selecting a stored speed dial

› Press the desired function key for the speed dial [C] » Fig. 22 on page 37.

Changing a stored speed dial

› Press the desired function key for the speed dial [C] » Fig. 22 on page 37 for longer.

The unit displays the phone book.

› If necessary, enter one of the contact numbers for the desired telephone contact.

You can also make the change in the phone menu » page 37.

Removing a phone number

› Press the symbol key [ ] User profile → Manage favourites.

› Press the function key for the speed dial.

Direct entry of a phone number

First read and observe the introductory information given on page 41.

› Press the button PHONE → 0.
A screen appears to enter the phone number » Fig. 24.

You can select the following functions:

- Delete the digit
- Dial the entered number
- Add a prefix if this option has been set in the phone settings » page 37
- Entering a number using the voice control » page 13

The input screen also functions as an alphanumeric keypad that you can use to search for contacts in the phonebook.

For example, if you enter 32, the unit will display contacts with the letter sequence DA, FA, EB, etc.

Select the desired contact by pressing the corresponding function key.

Phone book

First read and observe the introductory information given on page 41.

Press the button PHONE → .

The internal phonebook provides 2 000 free memory locations. Each contact can contain up to 5 telephone numbers.

Downloading and updating the phone book

Upon first connection of the mobile phone with the device, the system begins to download the phone book from the phone and from the SIM card into the memory of the control unit.

If the phonebook downloaded from the mobile phone contains more than 2 000 contacts, loading is stopped and the message Contacts not completely imported appears on the screen. Only the already downloaded contacts will be available.

The first 200 contacts along with the contact data, including the picture associated with the contact, are downloaded onto the device memory.

Each time the mobile phone has established a new connection with the device, the relevant phone book will be updated.

During the update, the phone book which was stored after the last completed update will be available. Newly stored telephone numbers are only shown after the updating has ended.

If an error occurs while loading the phone book, the message Import failed. Please try again and check whether the BT device (X) allows connections.

You can start the update manually with a function in the phone menu » page 37

Find contact

Press the button Find to open the input screen with keypad to search in the phonebook » page 9.

Select contact

Press the function key for the desired contact to dial the telephone number.

Where a contact contains several telephone numbers, the system displays a menu containing the telephone numbers for the contact.

Contact details

Press > to display the contact details.

---

1) If no number is entered, the last dialled number will be displayed after you press the symbol key .

2) If the addition of a prefix option is switched on, but the prefix is not entered in the phone settings, the last dialled number will be displayed in the input field after you press the symbol key . If the prefix has been defined and a number has been entered in the input line, the prefix will be added before the telephone number and the system will attempt to establish a connection when you press the symbol key .

3) Some mobile phones do not support downloading of contacts from the SIM card.

4) This function is only supported by some mobile phones.
Call-lists

First read and observe the introductory information given on page 41.

› Press the button PHONE → .

The system displays a call list » Fig. 25.

- Function key used to select the display
  - All - List of all calls
  - Missed - List of missed calls
  - Dialed Nos. - List of dialed numbers
  - Received calls - list of received calls

- Dial a number with a defined prefix » page 37, Settings
- Display the screen to input and adjust the telephone number before dialling
- Display the contact details

Press the function key for a desired contact or telephone number to start dialling.

Telephone conversation

First read and observe the introductory information given on page 41.

Outgoing call
While connecting, the screen displays the phone number or contact name.
Press to cancel the connecting process.

Incoming call
During the ring tone of the incoming call, the screen displays the phone number or contact name.

You can select the following functions:
- Answer the incoming call
- Ignore the incoming call (mute ring tone)
- Reject the incoming call
- Caller picture - Display caller details

Current call
During a current call, the screen displays the phone number or contact name and the call duration.
Depending on the context, you can select the following functions:
- Hold the call
- Switch off the microphone
- Switch on the microphone
- End the call
- Picture of caller or called party - Display caller details or details of the called party

Conference

First read and observe the introductory information given on page 41.

The conference is a shared call with between three and six participants.

Start a conference/invite additional participants
- During a call or conference, make the next call.
- During the new call, press .

During a conference
Depending on the context, you can select the following functions:
- Hold a conference - leave the conference temporarily (the conference continues in your absence)
- Return to the held conference
- Switch off the microphone
- Switch on the microphone
- End the conference
- Conference symbol - Display conference details

Conference details
During a conference, press the conference symbol to display a list of other conference participants.
Depending on your type of mobile phone, you can perform the following functions:

- Participants - Display details of participants
- / / - Talk to a participant separately of the conference
- - End the call to a conference participant
Vehicle systems

Vehicle settings

Introduction

This chapter contains information on the following subjects:

- Selecting driving mode ................................................................. 45
- Vehicle data ................................................................................. 46
- Auxiliary heater and ventilation .................................................. 47
- ESC system .................................................................................. 47
- Tyre .............................................................................................. 47
- Driver assistance ......................................................................... 48
- Parking and manoeuvring ............................................................ 48
- Light ............................................................................................. 48
- Mirrors and wiper ......................................................................... 49
- Opening and closing ..................................................................... 49
- Seats .............................................................................................. 50
- Multifunction display ................................................................. 50
- Service ......................................................................................... 50
- Restore factory settings ............................................................... 50
- Climatronic settings ................................................................. 51

First and foremost, pay attention to the safety instructions » page 4, Important notes.

Settings relating to the vehicle systems can only be made when the ignition is switched on.

Note

- The individual systems are described in the » Vehicle Owner’s Manual.
- For safety reasons, if any system functions are disabled, then some functions, such as parts of the ESC system, are automatically enabled again after switching the ignition off and on.
- When you press the button CAR, the system displays the last displayed menu from ➔.

Selecting driving mode

Fig. 26
Centre console: Button for selecting the driving mode

First read and observe the introductory information given on page 45.

The menu for selecting the driving mode allows you to set the vehicle to one of the three preset driving modes Normal, Sport and Eco, or to the driving mode Individual which allows individual settings.

If a driving mode other than Normal is selected, then the ➔ Fig. 26 symbol lights up on the button.

The currently selected driving mode is displayed in the info field in the main menu for the operating modes ➔ Fig. 31 on page 51 (top left).

Opening the main menu

- Press the button ➔.

- Normal - Activates Normal mode
- Cancel - Cancel the menu to select driving mode
- Information - Display the mode settings
- Sport - Activates Sport mode
- Cancel - Cancel the menu to select driving mode
- Information - Display the mode settings
- Eco - Activates the fuel-saving mode
- Cancel - Cancel the menu to select driving mode
- Information - Display the mode settings
- Individual - Activates the Individual mode
- Cancel - Cancel the menu to select driving mode
- Setup - Individual setting
- Steering: - Set the power steering characteristics
  - Normal - Normal
  - Sport - Sports
- **Engine**: Set the engine (drive) characteristics
  - **Normal** - Normal
  - **Sport** - Sports
  - **Eco** - Economical
- **ACC**: Set the vehicle acceleration when adaptive cruise control is activated
  - **Normal** - Normal
  - **Sport** - Sports
  - **Eco** - Economical
- **Dynamic bend light**: Set the characteristics of the adaptive headlights
  - **Normal** - Normal
  - **Sport** - Sports
  - **Eco** - Economical
- **Air conditioning**: Sets the Climatronic characteristics
  - **Normal** - Normal
  - **Eco** - Economical
- **Reset mode**: Sets the profile **Normal**

**Note**

If you do not operate the unit for longer than approx. 10 seconds in the “Select driving mode” menu, it will switch to the last selected menu or switch itself off.

**Vehicle data**

![Vehicle data](image)

**Fig. 27**  
**Travel data / vehicle status**

**First read and observe the introductory information given on page 45.**

- Press the button [CAR] → [ arrow].

**Explanation of graphic**

- **A** Distance travelled
- **B** Driving time
- **C** Average speed
- **D** Average fuel consumption
- **E** Approximate range
- **F** Range (if the estimated range is less than 300 km, the vehicle starts to approach the symbol: [ ])
- **G** Vehicle representation (the zones of the vehicle are shown in different colours, corresponding to any warning messages that occur. The warning messages are displayed once you touch vehicle)

- **Travel data** - Display Travel data → **Fig. 27**

You can display one of three trip memories on the screen:

- **Since start** - Driving data for the individual trip
- **Long-term** - Long-term driving data
- **Since refuelling** - Data since last refuelling

You can switch between the individual travel memories using [ ]/ [ ].
Conv. consumers - Display up to three consumers which have the largest share of fuel consumption and displays the fuel consumption to run all convenience consumers » Vehicle Owner’s Manual, chapter Driving and environment
Vehicle status - Displays vehicle status » Fig. 27 or tyre pressure monitoring information
Vehicle status - Displays vehicle status information
- ✓/ ✓ - No message/warning messages concerning the vehicle status including the number of messages (if there is only one message, only the warning message text is displayed)
- ○ - Display information about the status of the START-STOP system
Tire pressure check - a function of the tire pressure monitor » Fig. 28
- SET - Start a new calibration process

Switch between the individual menus using ◀/▶.

Note
For more information on the warning messages concerning the vehicle status and information on the START-STOP system, see the » Vehicle Owner’s Manual.

Auxiliary heater and ventilation

Set-up

A Departure time: Day and time when the vehicle is to be ready for use » Fig. 29
B Heating/ventilation: Set the operating mode
C Select the preset time, switch off the preset time
D Set the preset times 1 to 3 and the duration (10 - 60 minutes)
E When the heating or ventilation is running, the windows are highlighted in red or blue

Note
- Only one preset time can be active. The activated preset time will be deactivated again after it has started automatically. For the next start, activate one of the preset times.
- In the selection of the day in the preset time, there is an option between Sunday and Monday without the specified day. If this setting is made, the vehicle will be ready for use at the selected time, regardless of the current day.
- The system in operation switches off on expiration of the operating duration or can be deactivated by pressing the direct on/off button ⊳ or by using the radio remote control.
- If a different time is set » page 21, time and date settings, the activated preset time is automatically deactivated. The preset time must be reactivated.

ESC system

First read and observe the introductory information given on page 45.

Press the button CAR → ◀ Esc system.
Activated - Switch on all components of the ESC system
ASR off - Switch off the ASR system
ESC Sport - activation of ESC Sport

Tyre

First read and observe the introductory information given on page 45.

Press the button CAR → ⊳ tyre.
Tire pressure check - a function of the tire monitoring system
( ) SET - Start a new calibration process
Winter tyres - Sets the speed limit for winter tyres
Speed warning - Snow tyres speed warning on/off
Warning at - Sets the speed for the warning

Driver assistance

First read and observe the introductory information given on page 45.

Press the button [CAR] → [Driver assistance].

ACC (Automatic cruise control) - Sets the adaptive cruise control
Driving programme: - Set the vehicle acceleration when adaptive cruise control is activated
Normal - Normal
Sport - Sports
Eco - Economical
Last distance selected - Last selected distance on/off
Distance: - Set the distance monitoring to the vehicles ahead
Very close - Very small distance
Close - Small distance
Medium - Medium distance
Far - Large distance
Very far - Very large distance
Front Assist - Sets the assistant for monitoring the distance to the vehicles ahead
Active - Activate/deactivate the assistant
Advance warning - Activate/deactivate advance warning
Display distance warning - Activate/deactivate distance warnings
Lane Assist - Settings for Lane Assist
Active - Activate/deactivate the assistant
Adaptive lane guidance - Activate/deactivate adaptive lane guidance
Driver Alert System - Activate/deactivate the driver alert system
Proactive passenger protection - Activate/deactivate proactive passenger protection

Parking and manoeuvring

First read and observe the introductory information given on page 45.

Press the button [CAR] → [Parking and manoeuvring].

Explanation of graphic

A Switching on/off the acoustic parking aid
B Switching off the visual parking system
C Message: Look! Safe to move?
D Displays the selected lane depending on the steering angle
E An obstacle in the selected lane which is currently outside of the collision area is shown by the yellow segment.
F An obstacle appearing in the collision zone is shown as a red-coloured segment Do not proceed!
G An area without detected obstacles is shown as a transparent segment.
H An obstacle in the sensor range which lies outside of the collision area is shown by the white segment.

ParkPilot - Settings for the parking aid
Activate automatically - Activate/deactivate the compact parking aid display (when driving forward)
Front volume - Adjusts the volume of the front sensors
Front tone setting - Adjusts the tone of the front sensors
Rear volume - Adjusts the volume of the rear sensors

1 This can be set in the menu on vehicles with a travel mode option → page 45, Selecting driving mode.
- Rear tone setting - Adjusts the tone of the rear sensors
- Audio lowering: - Lower volume
  - Off - No lowering of the volume
  - Weak - Weak lowering of the volume
  - Medium - Medium lowering of the volume
  - Strong - Strong lowering of the volume

**Note**
- The compact display of the parking aid is shown automatically, e.g., for stop and go in a traffic jam if the distance to the obstacle becomes dangerously close.
- The compact display of the parking aid can be switched to a full screen view by touching the screen within the display.

**Light**

First read and observe the introductory information given on page 45.

- Press the button `CAR` → `®` → Light.
- **Light assistance** - Set the light assistance
- **Dynamic Light Assist** - Switch on/off the head light assist function
- **Switch-on time**: - Set the sensibility of the light sensor against the change in intensity of the ambient light
  - Early - High sensibility
  - Medium - Medium sensibility
  - Late - Low sensibility
- **Automatic headlight control in rain** - Activate/deactivate automatic headlight control in rain
- **Daytime running lights** - Activate/deactivate daytime running lights
- **Lane change flash** - Activate/deactivate lane change flashing
- **Travel mode**: - Travel mode on/off
  - R-hand traffic - For right-hand traffic
  - L-hand traffic - For left-hand traffic
- **Interior lighting** - Sets the interior lighting
- **Instrument/switch lighting** - Set the brightness of the instrument/switch lighting
- **Footwell lighting** - Sets the brightness of the footwell light
- **Coming/Leaving home function** - Setting the COMING HOME / LEAVING HOME-function
- **Coming home function** - Sets the period that the lights remain on after you leave the vehicle (0 - 30 seconds; 0 = function deactivated)
- **Leaving home function** - Sets the period that the lights remain on after you unlock the vehicle (0 - 30 seconds; 0 = function deactivated)

**Mirrors and wipers**

First read and observe the introductory information given on page 45.

- Press the button `CAR` → `®` → Mirrors and wipers.
- **Mirrors** - Adjusts the mirrors
  - **Synchronous adjustment** - Activate/deactivate synchronous mirror adjustment
  - **Lower while reversing** - Activate/deactivate the lowering of the front passenger mirror
  - **Fold in when parked** - Activate/deactivate folding the mirror via the remote control or by using the sensor in the handle (KESSY)
- **Wipers** - Adjusts the windshield wipers
  - **Automatic wiping in rain** - Activate/deactivate automatic windshield wiping in rain
  - **Automatic rear wiper** - Activate/deactivate automatic rear window wiping

**Opening and closing**

First read and observe the introductory information given on page 45.

- Press the button `CAR` → `®` → Opening and closing.
- **Window operation** - Window operation settings
  - **Conv. opening**: - Set the convenience opening feature
    - **All windows** - All windows
    - **Driver window** - Driver's window only
    - **Off** - Deactivates the convenience opening
- Central locking - Settings for opening and closing of doors
  - Door unlocking: - Set the door unlocking feature
    - All doors - All doors
    - Single door - Driver's door or driver's or passenger door with KESSY system
    - Driver side - Doors on the driver's side or on the driver's or passenger's side with KESSY system
  - Automatic locking - Activate/deactivate automatic locking when starting off
  - Acoustic confirmation - Activate/deactivate acoustic signals when locking/unlocking the vehicle with an anti-theft alarm system

Seats
First read and observe the introductory information given on page 45.

- Press the button 🗳️ → § → Seats.
  - Store seat position - Store the driver's seat position and exterior mirror position in the remote control key when locking the vehicle
  - Vehicle key activated - Activate/deactivate storing the driver's seat position and exterior mirror position when locking the vehicle

Multifunction display
First read and observe the introductory information given on page 45.

- Press the button 🗳️ → § → Multifunction display.
  - Current consumption - Switch on/off the display of current fuel consumption in the display of the instrument cluster
  - Average consumption - Switch on/off the display of average fuel consumption in the display of the instrument cluster
  - Refuel quantity - Switch on/off the display of refuel quantity in the display of the instrument cluster
  - Convenience consumers - Switch on/off the display of consumption by convenience consumers on/off in the display of the instrument cluster
  - Eco tips - Switch on/off the display of tips for economical driving in the display of the instrument cluster
  - Travelling time - Switch on/off the display of travelling time in the display of the instrument cluster

Service
First read and observe the introductory information given on page 45.

- Press the button 🗳️ → § → Service.
  - Vehicle number: - Display the vehicle identification number
  - Inspection: - Number of km/days remaining until the next service event
  - Oil change service: - Number of km/days remaining until the next oil change

Restore factory settings
First read and observe the introductory information given on page 45.

- Press the button 🗳️ → § → Factory settings.
  - All settings - All menu items
    - Driver assistance - Menu Driver assistance
    - Parking and manoeuvring - Menu Parking and manoeuvring
    - Light - Menu Light
    - Mirrors and wipers - Menu Mirrors and wipers
    - Opening and closing - Menu Opening and closing
    - Multifunction display - Menu Multifunction display
If one of the above menu items is selected, the system will ask you whether you really want to reset the settings.

- **Cancel** - Return to the higher-level menu
- **Reset** - Reset the settings

### Climatronic settings

![Fig. 31 Climatronic: Main menu]

First read and observe the introductory information given on page 45.

If Climatronic is switched on, the system displays the desired temperature for the driver’s side and front passenger side» Fig. 31. Depending on the desired temperature, the airflow from the air outlet vents is shown in blue (temperature under 22 °C) or red (temperature above 22.5 °C).

When using Climatronic in automatic mode, AUTO is shown on the screen.

**Call up the main menu**

- Press the button **SETUP** on the Climatronic control panel.

- **AC profile**: Set the Climatronic operating mode
- **ON/OFF**: Switches Climatronic on/off
- ✯ - Access the auxiliary heater and ventilation settings » page 47
- ◄ - Settings for Climatronic
- **AC profile**: Set the Climatronic operating mode
  - Light - Low power, quiet operation
  - Medium - Base power
  - Strong - High power
- **Automatic air recirculation** - Automatic recirculated air mode on/off
- **Automatic supplementary heater** - Quick interior heating on/off

**Note**

- If you do not operate the unit for longer than 10 seconds in the “Climatronic” menu and Climatronic was not switched on before the menu was opened, the unit will switch itself off.
- If you switch off the automatic mode of Climatronic by increasing or reducing the fan speed, the coloured display of the airflow from the air outlets will not be displayed.
