Infotainment Radio Bolero Owner's Manual
This Owner’s Manual has been systematically designed to make it easy for you to search for and obtain the information you require.

Chapters, table of contents and subject index
The text of the Owner’s Manual is divided into relatively short sections which are combined into easy-to-read chapters. The chapter you are reading at any particular moment is always specified on the bottom right of the page.

The Table of contents arranged according to chapter and the detailed Subject index at the end of the Owner’s Manual help you to rapidly find the information you are looking for.

Direction indications
All direction indications such as "left", "right", "front", "rear" relate to the direction of travel of the vehicle.

Units of measurement
All values are expressed in metric units.

Explanation of symbols
- denotes a reference to a section with important information and safety advice in a chapter.
■ denotes the end of a section.
► denotes the continuation of a section on the next page.
® denotes a registered trademark.

Examples of the information listed in the Owner’s Manual
Press the button Menu → 🎧 Sound.
This information means that first the Menu button on the device and then the function key 🎧 are to be operated on the device screen and is to be confirmed by pressing the Sound function key in the menu.

The "→" symbol indicates the next step.

Example of the menu, the available menus, menu items or functions.
- xyz - the first menu level
- xyz - the second menu level
- xyz - the third menu level
- xyz - the first menu level

Notes

WARNING
The most important notes are marked with the heading WARNING. These WARNING notes draw your attention to a serious risk of accident or injury.

CAUTION
A Caution note draws your attention to the possibility of damage to your vehicle (e.g. damage to gearbox), or points out general risks of an accident.

For the sake of the environment
An Environmental note draws your attention to environmental protection aspects. This is where you will, for example, find tips aimed at reducing your fuel consumption.

Note
A normal Note draws your attention to important information about the operation of your vehicle.
You have chosen a ŠKODA vehicle, which is fitted with an Infotainment Radio Bolero (hereafter called the unit) - we thank you for your confidence in us.
The new operating concept allows you to configure vehicle settings and to operate some electronic systems centrally from the unit.

In addition to this Owner's Manual, please also carefully read the Vehicle Manual, because operation in accordance with these instructions is a prerequisite for proper use of the vehicle.

If you have any questions about your unit, please contact a ŠKODA Partner.

This chapter contains information on the following subjects:

Declaration of conformity .................................................. 4
Component protection ....................................................... 4

These operating instructions describe all possible equipment variants without identifying them as special equipment, model variants or market-dependent equipment.

Consequently, this vehicle does not need to contain all of the equipment components described in these operating instructions.

The level of equipment of your vehicle refers to your purchase contract of the vehicle. More information is available from the ŠKODA Partner where you bought the vehicle.

Please note that these instructions are meant only as an addendum to the information presented in the Owner’s Manual of your vehicle. Therefore, they can be used only in conjunction with the latest manual for this vehicle. For a detailed description of some functions listed in these instructions, see the Vehicle Manual for your vehicle.

The illustrations can differ in minor details from your device; they are only intended for general information.

**WARNING**

- Concentrate fully at all times on your driving! As the driver you are fully responsible for the operation of your vehicle.
- Only use the device in a way that you are in full control of your vehicle in every traffic situation - there is the risk of accidents!

**WARNING (Continued)**

- Adjust the volume to ensure that acoustic signals from outside, e.g. sirens from vehicles which have the right of way, such as police, ambulance and fire brigade vehicles, can be heard at all time.
- High volumes can cause hearing damage.

**Declaration of conformity**

First read and observe the introductory information and safety warnings on page 4.

ŠKODA AUTO a.s. hereby declares that the ŠKODA Infotainment systems meet the basic requirements and additional provisions of Directive 1999/5/EC.

**Component protection**

First read and observe the introductory information and safety warnings on page 4.

Some electronic control units are factory-equipped with component protection. The component protection was developed as a protection mechanism for:

- impairment of factory- or garage-fitted control units after installation in another vehicle (for example, after a theft);
- impairment of components operated outside of the vehicle;
- the possibility of a legitimate installation or change of control units for repairs at a ŠKODA specialist garage.

When component protection is enabled, the following message appears on the display of the device Component theft protection: the infotainment system is not fully available at present. Please switch on the ignition.

If the component protection does not activate by switching on the ignition, please contact a ŠKODA specialist garage.

1) Terms used » manual, chapter Preface.
Equipment overview

Introduction

This chapter contains information on the following subjects:

- Description of the device ........................................ 5
- Touch screen ......................................................... 6
- Switching the unit on/off .......................................... 6
- Device menus ....................................................... 6
- Adjusting volume .................................................. 6

**First and foremost, pay attention to the safety instructions** » page 4, **Important notes**.

Description of the device

**Fig. 1 Description of the device**

- Switch unit on/off, adjust volume
- Operation and confirmation
- Radio menu » page 21
- Media menu » page 26
- Mute
- Phone menu » page 34
- Traffic news » page 23
- Voice control » page 13
- Unit settings » page 17
- Sound settings » page 18
- Settings of the vehicle system » page 44
- Displays the unit menus » page 6
- Touch screen » page 8

Touch screen

**First read and observe the introductory information given on page 5.**

The unit is equipped with a so-called touch screen which can only be operated by the touch of a finger.

**CAUTION**

- The screen can be operated by a slight touch of a finger. Do not apply pressure to the screen - risk of damage!
- Do not use any objects to operate the screen - risk of damage!
- Do not use solvents such as benzene or turpentine for cleaning, since they may damage the screen surface.
Note

- Use a soft cloth and, if necessary, methylated spirits, to remove fingerprints from the screen. When doing so, ensure that you do not cause damage to other parts of the interior.
- It is not possible to operate the screen with your fingernails or while wearing gloves.
- Do not affix anything to the area of the unit below the screen. This could affect the functioning of the sensors for the zoom effect.
- To protect the screen, you can use a suitable screen protector for touchpads that does not affect its functionality.
- The brightness of the screen is adjusted automatically depending on the brightness of the interior lighting. The automatic setting can be adjusted manually » page 18.

Switching the unit on/off

First read and observe the introductory information given on page 5.

› Press the knob to switch the device on or off.

When the device is switched on, the audio source and operating mode that were active before switching off the device will be restored.

If telephone mode was active before you switched off the unit and the ignition and Bluetooth® function is not switched on, the screen displays the message » page 35. Switch on the ignition or the Bluetooth® function » page 20.

If the vehicle key is pulled out of the ignition lock while the unit is switched on, the unit will switch off automatically. After switching on the ignition, the unit is turned on automatically.

If the device was switched off using the knob, then the device will not switch on automatically after switching on the ignition.

If your vehicle is fitted with the KESSY system, the device will switch off automatically after the engine has been turned off and the door opened. If you open the driver’s door before switching off the engine, the device will also switch off.

When the ignition is switched off, the device switches off automatically after approx. half an hour (discharge protection of the vehicle battery).

Device menus

First read and observe the introductory information given on page 5.

Call up the main menu
› Press the button MENU.

Function keys in the main MENU

- Radio » page 21
- Media » page 26
- Sound settings » page 18
- Unit settings » page 17
- Vehicle systems settings » page 44
- Phone menu » page 34

Adjusting volume

First read and observe the introductory information given on page 5.

Increase the volume
› Turn the knob to the right.

Reduce the volume
› Turn the knob to the left.

Muting
› Press the MUTE button or rotate the knob and adjust the audio volume to 0.
Note

- The change in volume is displayed on the screen of the unit.
- The following symbol appears in the display when the sound is muted.
- Excessively high volumes can cause sound resonance in the vehicle.
- The car speakers may be damaged if the volume is set too loud or is distorted.
- The loudspeakers in the vehicle are designed for a power output of the device of 4x20 W.
- When equipped with a sound system the speakers are matched for a total amplifier power output of 570 W.
Device operation

operate via the device screen

Introduction

This chapter contains information on the following subjects:

- Operation .................................................. 8
- Input screen with keyboard .................................. 9
- Input screen with numeric keyboard .......................... 9

First and foremost, pay attention to the safety instructions » page 4, Important notes.

This chapter covers the instrument operation and the work with the touch screen and with various types of input keyboards.

Operation

Fig. 3 Screen display

First read and observe the introductory information given on page 8.

Explanation of graphic

- Currently selected menu
- Return to the higher-level menu
- Function with "checkbox"

D Scroll bar - Shows the position in the menu; touch the scroll bar to navigate the menu
E Menu item with "pop-up window"

Screen areas which confirm a function or a menu are called "function keys".

White or green function keys are active.

Greyed out function keys are not active.

Proximity sensors

There are proximity sensors at the bottom of the device. If the screen is approached with the hand, the device changes the display mode to the operating mode and the function keys are highlighted.

Status line

In the main menu of some operating modes, the upper screen area contains a status line displaying time details and the external temperature, as well as information on the currently selected operating mode.

Function keys in the main menu

In the main menu of some operating modes, the lower screen area contains function keys with symbols for functions or menus.

Selecting menu/menu item

- Drag your finger over the screen in the required direction
- Turn the menu knob [2] » Fig. 1 on page 5

If you make the selection by turning the menu knob [2], the currently selected menu is highlighted in green.

Confirming menu/menu item

- Touch the function key with your finger
- Press the menu knob [2]

Returning to higher-level menu

Context-dependent

- By pressing ↖
- By pressing the relevant button next to the screen
- By touching the screen outside of the pop-up window with your finger

Switching function on/off with "checkbox"

Press the relevant function key

☑ or ☐ - Function is switched on
☐ or ☐ - Function is switched off
Set value

› by touching the function keys with the symbols ▼/ ▲, ◀/◀, - / +
› Touch or move your finger over the scale

Note

For some menus or menu items, the current setting is displayed, e.g. Distance: km or Distance: mi

Input screen with keyboard

The input screen with keypad is used to input entries or find entries in the unit memory (e.g. phone contacts, addresses, etc.).

Description of the function keys

- Return to the higher-level menu
- Display the menu with selected contacts, information on the number of relevant contacts
- Delete characters in the entry line
- Change from upper case to lower case and vice versa
- Menu display with keys in the selected language, including diacritics » page 19
- Switch to numbers and special characters
- Switch to special characters
- Switch to letters
- Blank entry
- Confirmation of text entered into the entry line

By pressing the keyboard function key on the input screen the required character appears in text line [A].

Only those letters or symbols making up a logical entry will be available. Do not forget to enter a blank space for terms made up of more than one word, such as Lorem Ipsum. The entries can be entered without special characters (diacritics).

A search of the most relevant terms ensues as soon as letters are entered, so it is not necessary to enter the entire entry name.

Next to text line [A], the number of matching entries is shown in function key [B].

The numbers 1-99 indicate the quantity of matching entries that were found. If even more entries were found, ** is indicated instead of a number. If less than 6 entries were found, a list of the found entries opens automatically.

Input screen with numeric keyboard

The input screen with keyboard is mainly used for entering numbers, eg in the phone menu » page 41.

Description of the function keys

- Return to the higher-level menu
- Delete characters in the entry line

First read and observe the introductory information given on page 8.
Operation via the Maxi DOT display

Introduction

This chapter contains information on the following subjects:

Operate using the buttons on the operating lever 10
operation via the buttons / dials on the multifunction steering wheel - Audio 11
operation via the buttons / dials on the multifunction steering wheel - Telephone 12

First and foremost, pay attention to the safety instructions » page 4, Important notes.

Some of the device’s features are also displayed in the MAXI DOT display. Depending on the equipment, these features can be operated as follows.

- With the buttons on the operating lever » page 10
- With the buttons and wheels on the multifunction steering wheel » page 11

Note

If the ignition and the side light are switched on, the buttons and dials on the multifunction steering wheel will also be illuminated.

---

1 The display in the MAXI DOT is described in the » Manual, chapter Information system

Operate using the buttons on the operating lever

First read and observe the introductory information given on page 10.

The separate menus and menu items displayed in the MAXI DOT display can be operated with the buttons on the control lever.

A Press and hold - open main menu
A Press briefly - select individual menu items or menus
B Press briefly - select menu item or menu
Each item in the Audio menu displayed in the MAXI DOT display can be operated with the buttons/wheels on the multifunction steering wheel.

### Buttons and wheels of the audio menu - Radio/Media

</tbody>
</table>

The sound is turned on again by pressing or turning wheel 2.
If the system plays audible messages in voice mode dialogues of the device, the volume of the audible message is affected.
Context-dependent selection.
Does not apply for AUX.

### Note

Vehicles with the CANTON® sound system equipment are fitted with a loudspeaker set including centre speaker and bass.

---

### Operation via the Buttons / Dials on the Multifunction Steering Wheel - Telephone

First read and observe the introductory information given on page 10.

Items in the MAXI DOT display telephone menu can be operated with the buttons / dials on the multifunction steering wheel.

---

### Buttons and Dials of the Telephone Menu

<table>
<thead>
<tr>
<th>Button/ Wheel</th>
<th>Action</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Press briefly</td>
<td>MUTE</td>
</tr>
<tr>
<td>1</td>

</tr>
</tbody>
</table>
### Telephone call function in the MAXI DOT display

Depending on the context, you can select the following functions.

**Incoming call**
- ![Answer](Answer) - Answer a call
- ![Reject](Reject) - Reject a call
- ![Ignore](Ignore) - Ignore a call

**Outgoing call**
- ![Stop](Stop) - End a call

**Current call**
- ![Hang up](Hang up) - End a call
- ![Mic. off](Mic. off) - Microphone off
- ![Mic. on](Mic. on) - Microphone on

### Symbols in the MAXI DOT display

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Charge status of the phone battery](Charge status of the phone battery)</td>
<td>Charge status of the phone battery(^\text{a)})</td>
</tr>
<tr>
<td>![Signal strength](Signal strength)</td>
<td>Signal strength(^\text{a)})</td>
</tr>
<tr>
<td>![A phone is connected to the device](A phone is connected to the device)</td>
<td>A phone is connected to the device</td>
</tr>
<tr>
<td>![Missed calls](Missed calls)</td>
<td>Missed calls (if there are several missed calls, the number of calls is shown next to the symbol)</td>
</tr>
</tbody>
</table>

\(^\text{a)}\) This function is only supported by some mobile phones.

### Call list

In the MAXI DOT display, only the call list can be displayed and used.

If the call list includes no entries, the following message appears in the MAXI DOT display: **No entries available.**

The following symbols are displayed next to each entry in the call list.
WARNING

- Please pay attention to the traffic first and foremost! As the driver you are fully responsible for road safety. Only use the system so that you are in full control of your vehicle in every traffic situation - risk of accident!
- Do not use the voice control system when under stress or in an emergency. Your Voice commands may not be recognized in such situations. In such circumstances a telephone connection may not be established or the connection may take too long to complete. The emergency number should be dialled manually!

function requirements

First read and observe the introductory information and safety warnings on page 13.

Function requirements for voice control.
- The ignition is switched on.
- The device is switched on.
- No phone call is in progress.
- The parking aid is not active.

Requirements for optimum voice command recognition.
- Only issue voice commands when the symbol is displayed on the device screen or appears in the information display. ❝ appears.
- Speak with a normal tone of voice without intonation and excessive pauses.
- Avoid a bad pronunciation.
- Close doors, windows and the sliding roof, in order to prevent external disturbances affecting recognition of the voice commands.
- It is recommended to speak louder at higher speeds, so that the tone of your voice is louder than the increased surrounding noise.
- During voice control, limit additional noise in the vehicle, e.g. passengers talking at the same time.

CAUTION

For some languages, there is no voice control available. The device indicates this fact via a text message that is displayed after setting the device language screen » page 17.

Note

- During voice control, no traffic announcements are played.
- Some voice commands must be spelled out when pronouncing depending on the selected language of communication, such as the Source Selection "SD" card one.

Switching on/off

First read and observe the introductory information and safety warnings on page 13.

Switching on voice control
- Briefly press the button (VOICE) on the unit.
- Briefly press the symbol key (1) on the multifunction steering wheel.

Activation of voice control is indicated by an acoustic signal and the device screen will display a collection of basic voice commands for the current menu.

The menu display as well as the acoustic signal can be enabled or disabled » page 20.

Switching off voice control
- Press the button (VOICE) on the unit for a long time, or press it twice.
- With a long or double press of the symbol key (1) on the multifunction steering wheel.
- Touch the screen with your fingers (any part of the screen with the exception of the function key (6)).
Press a button on the unit (with the exception of brief pressing of the button \( \text{VOICE} \)).

Utter the voice command **Cancel voice control**.

---

**Help for voice control**

First read and observe the introductory information and safety warnings 1 on page 13.

**Start introduction**

When you give the voice command **Start tutorial**, the unit plays one of the seven parts of the voice control tutorial.

Individual parts of the introduction can be called separately by issuing the voice command **introduction part** ... and the number 1 through 7.

**Help**

When you give the voice command **Help**, the unit displays a menu containing possible context dependent voice commands. In some cases issuing the voice command **help** again will cause another section of the help to be shown with further possible voice commands in a menu.

The help does not contain all possible commands.

---

**Operation**

First read and observe the introductory information and safety warnings 1 on page 13.

The voice control system can usually be operated through the method "say what you see."

Speak the descriptions of the function keys highlighted in green. For example, the function key **No. select call** can be accessed through the voice command "call number."

Voice control settings » page 20.

**Icons in the voice control menu**

- a voice output is played
- a voice command is awaited
- a voice command entry is stopped » page 15
- a voice command is recognized

---

As long as the system is playing a voice output, it is not necessary to await the end of the message playback. The message can be ended by briefly pressing the \( \text{VOICE} \) button or the button \( \text{VOICE} \) on the multifunction steering wheel. In this way the voice output is aborted and a new voice command is expected.

---

**not recognizing a voice command**

First read and observe the introductory information and safety warnings 1 on page 13.

If a voice command is not recognised, the system answers with **Pardon?** and you can give a new command.

If the system does not recognise the second voice command, the help message is provided again and you can give a new command.

If the system does not recognise the third voice command, the system plays the **Voice control cancelled** message and the dialogue is ended.

---

**override a voice command input**

First read and observe the introductory information and safety warnings 1 on page 13.

A voice command can be corrected, modified or re-entered by briefly pressing the \( \text{VOICE} \) button on the unit or the symbol \( \text{VOICE} \) on the multifunction steering wheel. However, this is only possible if the icon \( \text{VOICE} \) appears.

You do not have to wait until the voice command is recognized by the system.

---

**stop/restore voice command input**

First read and observe the introductory information and safety warnings 1 on page 13.

In some menus, the procedure for entering voice commands can be stopped by turning the knob 2 » Fig. 1 on page 5.

The symbol displayed on the unit screen or in the information display then changes from \( \text{VOICE} \) to \( \text{VOICE} \).
Restore entry
› by pressing the function key with the symbol ;
› by pressing the button VOICE on the unit;
› by pressing the symbol key  on the multifunction steering wheel.

Voice commands not included in the Help

First read and observe the introductory information and safety warnings  on page 13.

Voice commands to call menus, folders and directories in each menu.

setup menu

Introduction

This chapter contains information on the following subjects:

Main Menu .................................................. 17
Sound setup ............................................... 18
Screen settings ...................................... 18
time and date settings .................................. 19
keyboard settings ..................................... 19
Additional keypad language settings ................. 19
Unit setup ................................................ 19
Voice control settings ............................... 20
restore factory settings ............................... 20
Bluetooth®-settings ................................ 20

First and foremost, pay attention to the safety instructions » page 4, Important notes.

This chapter covers the basic settings of the device.

Additional settings are described in the individual menus

- Radio » page 24
- Media » page 27
- Phone » page 36
- Vehicle system settings » page 44

---

1) The correct display of country-specific characters (e.g. ID3 tag information) cannot always be guaranteed.
Sound setup

Fig. 11  Sound settings / Balance - fader settings

First read and observe the introductory information given on page 17.

Press the button [SOUND] or [SETUP] → activate Sound.

- **Volume** - Volume settings
  - **Traffic report** - sets the volume for the Traffic program alerts (TP)
  - **Voice control** - Sets the volume for the voice control
  - **Maximum switch-on volume** - Sets the maximum volume after switching on
  - **Volume adjustment** - Speed-dependent volume increase
  - **Telephone** - Sets the telephone volume
  - **iPod volume** - Sets the volume for the connected iPod
  - **Quiet** - Low volume
  - **Medium** - Medium volume
  - **Loud** - High volume
  - **AUX volume** - Sets the volume for the device connected via AUX
  - **Quiet** - Low volume
  - **Medium** - Medium volume
  - **Loud** - High volume

- **Bluetooth audio** - Sets the volume of the connected Bluetooth® device
  - **Quiet** - Low volume
  - **Medium** - Medium volume
  - **Loud** - High volume

- **Audio lowering** - Setting the reduction of the volume when the park distance control is active
  - **Off** - switches off
  - **Weak** - weak reduction
  - **Medium** - medium input sensitivity
  - **Strong** - strong reduction

- **Bass - Mid - Treble** - Sets the bass, mid and treble
- **Balance - Fader** - Sets the balance between left and right, front and rear
- **Confirmation tone** - Switch on/off confirmation tone when a function key is pressed
- **Subwoofer** - Subwoofer volume settings
- **CANTON advanced setup** - Setup of the Canton®-Sound system
  - **Select equaliser sound** - Equaliser settings
    - **Music** - Music
    - **Language** - Language
    - **Sound focus** - Set the sound perception for different zones in the vehicle interior
      - **Off** - Settings apply to the whole vehicle
      - **Front** - Optimised setting for the front occupants
      - **Driver** - Optimised setting for the driver
    - **CANTON surround** - virtual Canton®-surround system (active during media playback)

Screen settings

First read and observe the introductory information given on page 17.

Press the button [SETUP] → Screen.
Switch off screen (in 10 seconds) - Activate/deactivate energy-saving mode for the display

- Brightness: Adjusts the brightness of the screen
  - Brightest: brightest level
  - Brighter: brighter level
  - Medium: medium level
  - Darker: darker level
  - Darkest: darkest level

Confirmation tone - Switch on/off confirmation tone when a function key is pressed

Show clock in standby mode - Time and date displayed on the screen when the ignition is switched on and the unit is switched off

### Time and Date Settings

First read and observe the introductory information given on page 17.

- Press the button **SETUP** → Time and date.
  - Time: Time settings
  - Summer (DST): Switches the summer time setting on/off
  - Time zone: Select the time zone
  - Time format: Set the time format
    - 12h
    - 24h
  - Date: Date settings
  - Date format: Set the date format
    - DD.MM.YYYY: Day - Month - Year
    - YYYY-MM-DD: Year - Month - Day
    - MM-DD-YYYY: Month - Day - Year

### Keyboard Settings

First read and observe the introductory information given on page 17.

- Press the button **SETUP** → Keypad:
  - ABC: keys arranged alphabetically
  - QWERTY: Arrangement of the keys as per the QWERTY system (in accordance with computer keyboard arrangement)

### Additional Keypad Language Settings

First read and observe the introductory information given on page 17.

- Press **SETUP** → More keypad languages.

In this menu, the keyboard character arrangement for the chosen language can be selected, and with this the option for fast entry of the characters used in the selected language.

It is then possible to swap between the languages in the input screen showing a keyboard by pressing → page 9

### Unit Setup

First read and observe the introductory information given on page 17.

- Press the button **SETUP** → Units.
  - Distance: Distance units
    - km: Kilometres
    - mi: Miles
  - Speed: Speed units
    - km/h: Kilometres per hour
    - mph: Miles per hour

---

1) If after 10 seconds, the screen is not activated by approaching, touching the screen or operating the menu button [2] → Fig. 1 on page 5 the screen turns black. You can switch the display back on again by approaching it with your hand, touching it, or operating the menu knob [2].
**Voice control settings**

First read and observe the introductory information given on page 17.

› Press the button SETUP → Voice control.

- **Dialogue style:** Setting the dialogue style
  - **Long** - Long dialogue (the system plays complete acoustic messages)
  - **Short** - Short dialogue (the system shortens some acoustic messages or substitutes them with an acoustic signal)
- **Display available commands** - Switch on/off the menus containing basic voice commands when voice control is activated
- **Voice control session start tone** - Switch on/off the audible signal that is output when voice control is activated
- **Input tone in voice dialogue** - Switch on/off the audible signal that is output to signal that voice control is waiting for a command

---

**Bluetooth®-settings**

First read and observe the introductory information given on page 17.

› Press the button SETUP → Bluetooth.

- **Bluetooth** - Bluetooth® function on/off
- **Visibility** - Switch on/off the visibility of the Bluetooth® device for other devices
  - **Visible** - Visibility is always on
  - **Hidden** - Visibility is off
- **At start-up** - Turns on visibility for 5 minutes after switching on the ignition or until the driving speed has exceeded 5 km/h
- **Name** - Open the input screen with keyboard - change the device name
- **Paired devices** - Display the list of paired Bluetooth® devices; connect or delete a paired device; delete the list of paired devices
- **Delete all** - Delete all paired Bluetooth® devices
  - **Delete the paired Bluetooth® device**
- **Find devices** - Searches for available external devices with enabled Bluetooth® functions and activated visibility
- **Bluetooth audio (A2DP/AVRCP)** - Switch on/off the connection option for Bluetooth® profiles A2DP and AVRCP®

---

**Temperature** - Temperature units
- °C - Degrees Celsius
- °F - Degrees Fahrenheit

**Volume** - Volume units
- l - Litres
- gal (US) - Gallons (US)
- gal (UK) - Gallons (UK)

**Consumption** - Consumption units
- l/100km - Litres per 100 kilometres
- km/l - Kilometres per litre
- mpg (US) - Miles per gallon (US)
- mpg (UK) - Miles per gallon (UK)

**Gas consumption** - Gas consumption units
- kg/100km - Kilograms per 100 kilometre
- km/kg - Kilometres per kilogram
- m³/100 km - Cubic metres per 100 kilometres
- km/m³ - Kilometres per cubic metre

**Pressure** - Pressure units for tyre pressure
- kPa - Kilopascal
- bar - bar
- psi - Pounds per square inch

---

**Restore factory settings**

First read and observe the introductory information given on page 17.

› Press the button SETUP → Factory settings.

- **Restore factory settings** - Reset all factory settings
- **Sound** - Restore default settings for sound
- **Radio** - Restore default settings for radio
- **Vehicle** - Restore default settings for the vehicle systems
- **Telephone** - Restore default settings for phone
- **Media** - Restore default settings for media
- **Voice control** - Restore default settings for voice control
- **Bluetooth** - Restore default settings for the Bluetooth® function
- **System** - Restore the system default settings

---

**Bluetooth®-settings**

First read and observe the introductory information given on page 17.

› Press the button SETUP → Bluetooth.

- **Bluetooth** - Bluetooth® function on/off
- **Visibility** - Switch on/off the visibility of the Bluetooth® device for other devices
  - **Visible** - Visibility is always on
  - **Hidden** - Visibility is off
- **At start-up** - Turns on visibility for 5 minutes after switching on the ignition or until the driving speed has exceeded 5 km/h
- **Name** - Open the input screen with keyboard - change the device name
- **Paired devices** - Display the list of paired Bluetooth® devices; connect or delete a paired device; delete the list of paired devices
- **Delete all** - Delete all paired Bluetooth® devices
  - **Delete the paired Bluetooth® device**
- **Find devices** - Searches for available external devices with enabled Bluetooth® functions and activated visibility
- **Bluetooth audio (A2DP/AVRCP)** - Switch on/off the connection option for Bluetooth® profiles A2DP and AVRCP®
Radio

Operation

Introduction

This chapter contains information on the following subjects:

Main menu .................................................. 21
List of available stations .................................. 22
Search and store radio station ................. 22
Search the available stations (Scan) ............... 23
Station logos ............................................... 23
Traffic programme ..................................... 23
Station information (DAB) ...................... 24

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The device allows analogue radio reception of FM and AM frequency ranges as well as DAB digital radio reception.

The radio reception DAB allows multiple stations to be transmitted in a single frequency in the form of a so-called ensemble. It also allows for the transmission of additional data and information (e.g. messages, sport, weather, warnings, etc.).

Note

- Car parks, tunnels, tall buildings or mountains can disrupt the radio signal even causing it to fail completely.
- For vehicles with window antennas; if the windows are covered in foil or with metallic film stickers, reception interference may be experienced.
- In countries where the RDS function is not supported sufficiently, we recommend turning off the RDS and AF functions. Otherwise, these settings can affect the functionality of the radio.

A2DP and AVRCP are Bluetooth® profiles that support multimedia functions.
Press the function button [D] » Fig. 12 and select the desired range.

Information symbols in the display

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>TP</td>
<td>Traffic information station</td>
</tr>
<tr>
<td>no TP</td>
<td>Traffic signals are not available or the selected station is not a traffic information station</td>
</tr>
<tr>
<td>RDS OFF</td>
<td>RDS function is switched off (FM)</td>
</tr>
<tr>
<td>AF OFF</td>
<td>AF Alternative frequency is off (FM)</td>
</tr>
</tbody>
</table>

List of available stations

First read and observe the introductory information given on page 21.

All stations with sufficient reception which are available at the given location are in the list of available stations. The unit examines these stations automatically.

Show stations list
In the Radio main menu press the function key [3].

Information symbols in the display

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>⭐</td>
<td>Radio station from the list of available stations, which are stored under a preset button</td>
</tr>
<tr>
<td>⭐</td>
<td>Currently selected radio station</td>
</tr>
<tr>
<td>TP</td>
<td>Traffic information station</td>
</tr>
</tbody>
</table>

Update Channel List
The station list is updated automatically the FM band.
In the AM and DAB range manually update by pressing the function key [D].

Sorting the types of radio stations in the station list (FM)

- Alphabet - alphabetical order according to station name
- Group - Sort by broadcasted type program

Search and store radio station

First read and observe the introductory information given on page 21.

A radio station can also be searched for and stored under a preset button.

Automatic station search
Automatically set stations are in the list of available stations.

Semi-automatic station search
In the Radio menu press the function key [3].
Press the function key < or > .
The device scans the radio range until the first available station is tuned-in.

Manual station search
In the Radio menu press the function key [3].
Set the desired station using the function keys with the symbols < / > or by moving the slider across the screen.

Store radio stations under a preset button
Press and hold the desired station in the list of available stations. (A list of function keys [B] » Fig. 12 on page 21 will be displayed).
Press the preset button [B] as to where you want to save the desired station.
or
Set the desired station manually or semi-automatically.
Press and hold the desired station key [B] until you hear an acoustic signal.
You can switch between groups of individual preset buttons using the function keys C.

**Search the available stations (Scan)**

First read and observe the introductory information given on page 21.

This function shows all the receivable stations in succession, each for a few seconds.

**Switching on**
- Press the button 2 » Fig. 1 on page 5.
- or
- press the ⏯→ Scan button.

**Switching off**
- Press the button 2.
- or
- Press any function key in the device screen.

After switching off the function, the device receives the station at which the function was stopped.

**Station logos**

First read and observe the introductory information given on page 21.

With the preset buttons ✂ » Fig. 12 on page 21) the associated logos (images) of the radio station can be assigned.

**Store the station logo automatically (FM / DAB)**
- Before you save the radio station to a station button press the ⏯→ Advanced setup function key.
- Activate the menu item Auto-save station logos » page 25, Advanced settings and » page 25, Advanced settings (DAB).

when you save the station to a station button, the station is also assigned a logo from the device memory if the logo is available in the memory.

**Storing station logos manually**

For the previously stored stations a logo can be assigned manually.
- Press the function key ⏯→ Station logos.

A menu with preset buttons for radio stations is displayed.
- Press the station button for the station which is to be assigned a logo.

A menu for data media (CD, SD card, USB) is displayed.
- The desired image is to be selected in the corresponding data media.

Selecting the image causes this to be assigned to the corresponding station.

**Traffic programme**

First read and observe the introductory information given on page 21.

During playback in the media menu the traffic information from the last selected radio station is received.

If this radio station does not support traffic reports or the signal is not available, then the device automatically searches for a TP station.

**Switching on/off**
- Press the function key ⏯.
- Enable or disable the menu item Traffic programme (TP).

**Traffic reports**

During a traffic announcement, the following menu is displayed:
- Cancel - interruption of the current traffic report. The TP function remains activated.
- Deactivate - Exit the current traffic report and turn off the TP function.

**Note**

Some radio stations misleadingly identify themselves as traffic programs. It is therefore not a device error that with such radio stations, no traffic news exist.

*The following image formats are supported: jpg, gif, png, bmp.*

*We recommend a resolution of up to 500 x 500 pixels.*
Station information (DAB)

Fig. 14  Station information

Press RADIO → DAB → .

- Preset list - Display only stored DAB stations
- Station info. - Displays DAB station information, accompanying text (radio text) and images (e.g., artist name or programme and image type where these are broadcast)
- Radio text - Displays one radio text
- Slide show - Displays one image; the image will switch to full-screen view until you switch the screen back on by moving your hand towards it.

Note

If you touch the screen in the area where the accompanying text (radio text) is displayed, the screen will only display this information. If you touch the screen in the area of the displayed image, only images will be displayed on the screen.

Radio settings

Introduction

This chapter contains information on the following subjects:

- Settings ........................................... 24
- Advanced settings ...................................... 25
- Advanced settings (DAB) .................................. 25

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The basic setting of the radio functions is the same for all broadcasting ranges. The Advanced setup menu item is different for FM and DAB. The AM broadcasting range does not have this menu.

Settings

Press the button RADIO → .

Basic setting

- Sound - Sound setup » page 18, Sound setup
- Scan - Auto-play all stations in the current frequency band, each station for around 5 seconds.
- Arrow buttons: - Set the station select function in the Radio menu
- Preset list - only switches preset radio stations - preset buttons
- Station list - Switches all radio stations currently in range for the selected frequency band
- Traffic programme (TP) - Switches traffic programme on/off
- Delete presets - Deletes the stored stations (preset buttons)
  - Delete a certain radio station (preset button)
  - Delete all - Deletes the stored stations (preset buttons)
- Station logos - manual assignment of station logos » page 23
- Radio text - Switches the text display radio (FM and DAB)
- Advanced setup - Another setting that is different and dependent of the selected broadcasting (FM and DAB)
Advanced settings

First read and observe the introductory information given on page 24.

Advanced Settings for FM broadcasting range

- Advanced setup
  - **Alternative frequency (AF)** - Switching on/off the search for alternative frequencies of the station currently being heard, when you turn off AF off is displayed on the device screen
  - **Radio Data System (RDS)** - Switches on/off the RDS function
  - **RDS Regional**:
    - **Fixed** - Maintains the selected regional station continuously. When the signal is lost, another regional station must be set manually.
    - **Automatic** - Auto-selects the station with the best reception at the moment. If you lose reception the region, the unit will automatically set another available region.
  - **Auto-save station logos** - Auto save the station logo according to the PI code of the radio station » page 23

Advanced settings (DAB)

First read and observe the introductory information given on page 24.

Advanced settings for the DAB broadcasting range

- **Advanced setup**
  - **DAB traffic announcements** - Switches on/off DAB announcements
  - **Other DAB announcements** - Switch on/off other announcements (e.g., warnings, regional weather, sports reports, financial news)
  - **DAB - DAB station tracking** - Switch on/off automatic DAB station tracking in other station groups
  - **Automatic DAB - FM switching** - Switches on/off auto-switching from DAB to the FM frequency band if the DAB signal is lost
  - **L-band** - Switches on/off the automatic DAB station search in L-band
  - **Auto-save station logos** - Automatic association of the logo with station detected » page 23

DAB programme tracking
If a DAB station is a member of several station groups, when the signal is poor, the same station is searched in a different station group.

Auto-change DAB - FM
If the DAB signal is poor, the unit will try to find a corresponding FM station for the DAB station you are currently listening to.

For auto-change to work, the DAB and FM stations must send a sender ID.

- While the station is received on the FM band (FM) is displayed after the station name. The () marker disappears when the relevant DAB station can be received again (FM).
- If a DAB station is also not available in the FM band due to poor reception, the device will be switched to mute.
- If you do not want automatic station change (e.g. when driving through tunnels, when reception may be lost temporarily), you can deactivate this function.

L-band
For the DAB radio reception in different countries, different frequency ranges are used. In some countries the DAB radio reception only in the so-called L-band.

- If you have any problems with the DAB wireless reception it is necessary to ensure that the DAB Automatic tuning in L-band is on.
- If no DAB radio reception in the L-band is possible in the country, then it is better to leave this menu item switched off. This causes the channel scan to be faster.
First read and observe the introductory information given on page 26.

Call up the main menu
› Press the button \(\text{MEDIA}\).

Explanation of graphic
A Information for the current file (e.g., artist, track title)
B Selected signal source/display of cover art provided that this exists in the file being played (ID3 tag)
C Display of the playing time / remaining time and the playing time axis; a movement within the track (file) is possible by moving the slider or touching the desired location on the time axis
D Selection of the signal source

Track/folder list
\(\text{MEDIA}\) » page 27

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The device allows you to play audio files in various formats » page 28 and to connect different signal source types.

When the signal source has been connected, the device starts to automatically play audio files in alphabetical order.

Types of device operation » page 8.
› On the device with the operating elements.
› Using the function keys on the unit screen
› Via the Maxi DOT display.

Select signal source
The function key menu \(\text{D} \) » Fig. 15.

CD - Changes to an inserted CD » page 30
SD card 1 - Changes to a memory card inserted in SD 1 » page 31
USB - Changes to a data medium connected to the USB input » page 31
AUX - Changes to an external source connected to the AUX input » page 31
iPod - Changes to an iPod (iPhone, iPad) connected to the MEDIA IN input » page 32
BT audio - Changes to a Bluetooth\textsuperscript{®} player » page 29
First read and observe the introductory information given on page 26.

**Menu display**

Press the function key \( \equiv \).

**Explanation of graphic**

- **A** Displays the folder structure, function keys of higher-level folders
- **B** Function keys for the audio source playback » table on page 27
- **C** Track currently playing

**Note**

In the folder list there are max. 1000 files / folders displayed in alphabetical order.

### Playback

First read and observe the introductory information given on page 26.

The unit plays the files in alphabetical order.

**Description of the playback function keys**

<table>
<thead>
<tr>
<th>Button</th>
<th>Action</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>( \equiv / \equiv ) Press briefly</td>
<td>Plays the previous track from the start</td>
<td></td>
</tr>
<tr>
<td>( \equiv / \equiv ) Press briefly</td>
<td>Plays the current track from the start</td>
<td></td>
</tr>
</tbody>
</table>

### Media settings

First read and observe the introductory information given on page 26.

Press the button \( \text{MEDIA} \rightarrow \equiv \).
■ Sound - Sound setup » page 18, Sound setup
■ Mix/repeat/scan including subfolders - switching the song playback in the following modes (Shuffle / Repeat / Automatic play) including subfolders in the current folder
■ Bluetooth - Settings for the Bluetooth® function » page 20
■ Video (iPod) - Set the parameters for the video being played from an Apple device (brightness, colour, contrast, format, standard) » page 32
■ Traffic programme (TP) - Switches traffic programme on/off
■ External AUX device - Activate/deactivate the input of the external AUX audio source
■ Remove safely - safe removal / disconnection of the SD memory card or USB device
  ■ SD card 1
  ■ USB 1

Signal source

Introduction

This chapter contains information on the following subjects:

Supported sources and file formats 28
Requirements and Limitations 29
Bluetooth®-player 29
CD 30
SD memory card 31
USB-, AUX-Eingänge 31
MEDIA IN - input 32

First and foremost, pay attention to the safety instructions » page 4, Important notes.

WARNING

■ Never place external signal sources close to the airbags. Loose objects could hit a deployed airbag and injure occupants – danger of death!
■ Never place external signal sources on the console panel. Loose objects can be thrown forward during a sudden manoeuvre or in case of an accident and can injure the occupants or other road users.
■ Do not place external signal sources while driving in your hand or on your knees. Loose objects can be thrown forward during a sudden manoeuvre or in case of an accident and can injure the occupants or other road users.
■ Always route the connection cable of the external signal source such that it does not in any way restrict you when driving.

CAUTION

We recommend that you do not save any important data on CD media, Bluetooth® players, to an SD memory card or connected external signal sources. The ŠKODA Partner is not responsible for damage due to the loss of data stored on these storage devices.

Note

With some signal sources, the output level can be changed on this source.

Supported sources and file formats

First read and observe the introductory information and safety warnings on page 28.

Supported audio sources

#### Formats of audio files

- **File system**
  - SD memory card
  - USB flash drive
  - CD

- **Codec type (File formats)**
  - MPEG-1/2 (Layer-3)
  - Windows Media Audio 7, 8, 9 and 10
  - MPEG -2/4
  - FLAC, WAV, OGG

- **File suffix**
  - mp3
  - wma
  - asf
  - m4a
  - m4b
  - aac
  - flac
  - wav
  - ogg

- **Playlists**
  - m3u, pls, wpl, m3u8; asx

- **File properties**
  - **bit rate**
    - max. 320 kb/s
  - **sampling rate**
    - max. 48 kHz

- **Album covers**
  - (Pictures on the album covers)
  - Image resolution up to 500 x 500 pixels (200 kb) (jpg, jpeg, png, bmp, gif), depending on the availability of album covers they are displayed on the respective media.

### Requirements and Limitations

First read and observe the introductory information and safety warnings on page 28.

- The name of the artist, the album and the title of the played file can be displayed if the information is available as a so-called ID3 tag. If no ID3 tag is available, only the folder name is displayed.
- To ensure good playback, we recommend using a bit rate of at least 160 kb/s with compressed MP3 files.
- For audio files with variable bitrates, the indicated remaining playback time does not correspond to the actual remaining playback time.
- Files that are protected by Digital Rights Management (DRM) technology cannot be played back by the device.

First read and observe the introductory information and safety warnings on page 28.

The device makes a wireless connection (pairing) to the Bluetooth® player possible.

- The same instructions are to be followed as for the pairing of the device with a phone » page 37.

#### Note
- We recommend adjusting the volume on the portable player to the maximum level.
- The volume can also be adjusted by setting the input sensitivity of the unit for Bluetooth® player » page 18, Sound setup.
- The supported media functions are dependent on the type of Bluetooth® player used.

### Note
- At the time of publication, the device has been tested with most products and media available in the various markets. However, it is possible that some devices, media or files will be unreadable or unplayable.
First read and observe the introductory information and safety warnings \[\text{on page 28}].

The CD slot is located in the glove box on the front passenger side.

**Inserting/ejecting a CD**
- Insert a CD, with the labelled side facing up, into the CD slot until it is automatically drawn in. Playback starts automatically.
- Press the symbol button and the CD is ejected.

If the ejected medium is not taken out within 10 seconds, it will be retracted again for safety reasons. However, the unit will not change to the CD source.

**WARNING**
- The CD/DVD player is a laser product.
- On the manufacturing date, this unit was classified as a class 1 laser product in accordance with the national/international standards DIN EN 60825-1: 2008-05 and DHHS Rules 21 CFR, Subchapter J classified as a class 1 laser product. The laser used in this class 1 laser product is so weak that there is no risk of danger when operated correctly.
- This product is designed so that the laser is restricted to the inside of the unit. However, the installed laser could be classified in a higher class were the housing to be removed. For this reason, never remove the housing of the unit.

**CAUTION**
- Be sure to wait until the CD has been fully ejected before you try to insert a new CD. Otherwise you can damage the drive inside the unit.
- Only insert into the CD - drive original audio - CDs or standardised CD-Rs and CD-RWs.
- Do not stick anything to the CDs!
- Outside temperatures that are either too high or too low might cause the playback device to switch off temporarily. The unit switches to the last active menu.

**Note**
- After pressing the icon button \[\text{it takes a few seconds before the CD is ejected.}
- Uneven or unsteady road surfaces and strong vibrations may cause the CD to jump.
- Damp (condensation) may affect the device in cold weather or after showers. This can lead to playback jumps or impair the play function. In that case, wait until the moisture has dissipated.
- If the CD has mechanical damage, is not readable or is inserted incorrectly, the following message is displayed: Error: CD. Check the CD and insert properly into the drive.
- It is possible that CDs protected by copyright and home-made CDs will not be played back at all or only in certain circumstances.
- The national copyright laws that apply in your country must be observed.
**SD memory card**

![SD card slot](image)

First read and observe the introductory information and safety warnings on page 28.

The device makes it possible to play audio files from the SD memory card. The SD memory card slots are located in the storage compartment on the front passenger side.

**Insert the SD memory card**

- Push the SD memory card into the SD memory card slot with the cut-off edge to the front right until it "locks into place". Playback starts automatically.

**Remove the SD memory card**

Depending on equipment fitted:

- Press the button → Remove SD card 1 safely.
- Press the inserted SD memory card. The SD memory card "jumps" to the output position.

**SD memory card empty or data not readable**

If an SD memory card is inserted, on which no data or no readable data is stored, then nothing is played back from the SD memory card.

Due to differing quality requirements from different card manufacturers, it is not always possible to guarantee the playback from SD memory cards.

Some files on the SD memory card or the complete SD memory card cannot be played back or their reproduction may be limited.

---

**CAUTION**

- Only use SD cards in standard size. When using smaller SD card with the adapter the SD memory card may fall out or the adapter while driving the vehicle due to vibrations.
- We recommend using SD memory cards of class 4 and higher. This guarantees the fastest possible access to the audio files.
- Always store the SD cards in suitable cases to protect them from dirt, dust and other forms of damage.

---

**USB-, AUX-Eingänge**

![USB and AUX inputs](image)

First read and observe the introductory information and safety warnings on page 28.

The device allows you to play audio files from USB storage devices, as well as external devices connected to the analogue AUX input.

The USBand AUXinputs are located above the storage compartment at the front of the centre console » Fig. 19.

A data carrier or system can be connected to the USB/AUX input either directly or via a connection cable from the ŠKODA range of original accessories.

**AUX-Eingang**

External signal sources connected to the AUX input cannot be operated from your device.

The standard 3.5 mm stereo jack plug is used for the AUXinput. If the external audio source does not have this jack plug, you must use an adapter.

It is also possible to adjust the input sensitivity setting on the AUX input depending on the audio source connected » page 18, Sound setup.
USB input
External devices connected to the USB input can be operated from your device1). Before removing the USB device, proceed as follows:

› Press the button [MENU] →  → Remove USB device safely.

Do not use USB extension cables or adapters. This can impair the functioning of the connected signal source.

USB hubs are not supported.

⚠ CAUTION
The AUX input must only be used for audio sources!

ℹ️ Note
- If an external audio source is connected to the AUX input, which is equipped with an adapter for external power supply, the sound may be impaired. This depends on the quality of the adapter which is used.

First read and observe the introductory information and safety warnings 1) on page 28.

The device allows you to play audio files from an external, device connected to the MEDIA-IN input.

External sources such as Apple devices, connected to the MEDIA IN input, can be operated via your device.

Extension cables to connect external sources are available from ŠKODA original accessories.

Sort tracks from a connected Apple device
› Video (only available if a red adapter is used) - Video playlists, films, music videos, TV shows, video podcasts, rented films.
› Music - Playlists, artists, albums, tracks, podcasts, genres, composers, audio books.

Video setup
› Press the button [MEDIA] →  → Video (iPod).

- Screen - Adjust the brightness, contrast, and colour of the video (during playback in NTSC standard - option for colour adjustment)
- Format - Set the screen width/height ratio
- AV standard: 
  - Automatic - Automatic selection of standard
  - PAL - Select the coding standard for the PAL colour signal
  - NTSC - Select the coding standard for the NTSC colour signal

ℹ️ Note
- Some of the operating options of the Apple device, such as the rating of songs or the assignment of the title of an “on-the-go” playlists are not supported.
- Some of the operating options of the Apple device or the video playback are supported only by using an extension cord marked in red.
- The volume of the external device connected can also be adjusted by setting the input sensitivity for the MEDIA IN input. 

1) Some operating options on an external device may not be supported.
2) The same standard must be selected in the external source. An incorrectly adjusted AV standard can result in inadequate playback quality. The unit outputs no picture at all, or only renders it in black and white.
■ For safety reasons, the video display is switched off at speeds over 5 km/h. The
unit continues to play the soundtrack.
■ After power cycling the ignition, the video playback will not be restored from an
Apple device.
Communication

Telephones and two-way radio systems

Introduction

This chapter contains information on the following subjects:

- Introductory information .......................................................... 34
- Main menu ............................................................................. 35
- Problems with the Telephone function .................................. 35
- Phonebox ............................................................................... 36
- Settings .................................................................................. 36

The Telephone menu is available when the following conditions are met:

- The ignition is switched on.
- The Bluetooth® function on the device is switched on.

After the device is switched on, the system attempts to connect to the most recently connected phone.

If a telephone is connected to the device and the device is turned off, the connection is not dropped to the phone. The connection is lost after switching off the ignition (for vehicles with the system KESSY after switching off the ignition and opening the driver’s door).

WARNING

- The national legal regulations for using a mobile phone in a vehicle must be observed.
- If a mobile phone or a two-way radio system is operated in a vehicle without an external aerial or with an incorrectly installed external aerial, this can increase the strength of the electromagnetic field inside the vehicle.

CAUTION

- In areas with no signal and possibly in tunnels, garages and subways a phone conversation can be interrupted and no phone connection can be established - not even in an emergency!
- The range of the Bluetooth® connection to the hands-free system is limited to the vehicle interior. The range is dependent on local conditions, e.g. obstacles between the devices and mutual interferences with other devices. If your phone is in a jacket pocket, for example, this can lead to difficulties when establishing a connection with the device or transferring data.

Introductory information

First read and observe the introductory information and safety warnings on page 34.

The device allows for a wireless connection to the phone. Your phone can be operated from this unit.

ŠKODA permits the operation of phones and two-way radio systems with a professionally installed external aerial and a maximum transmission power of up to 10 watts.

Please ask at a specialist workshop about installing and operating phones and two-way radio systems that have a transmission power of more than 10 W.

---

With some phones, it is necessary to set the connection to the device as "authorised" in order for the automatic connection to be successful. If this is not set, the system will prompt you for a confirmation each time you attempt to connect to the phone.
Operating phones or two-way radio systems may interfere with the functionality of the electronic systems in your vehicle.

The reasons for this are as follows:
› no external aerial;
› incorrectly installed external aerial;
› transmission power greater than 10 watts.

**Note**
- We recommend that the installation of mobile phones and two-way radio systems in a vehicle be carried out by a specialist garage.
- The phone features are dependent on the mobile network operators, as well as the phone being used. Further information is available from the mobile network operator or to refer to the telephone manual.
- In signal-free areas the reception can be disturbed or a call will be disconnected.
- Most modern electronic equipment is shielded against high frequency signals. In exceptional cases, electronic equipment may not be shielded against high frequency signals of the telephone and service may be disrupted.

**Main menu**

![Fig. 21](image)

**Explanation of graphic**
- **A**: Name of the mobile network provider
- **B**: Name of the connected phone, press to open a list of paired phones
- **C**: Speed dial favourite telephone numbers » page 40
- **D**: Direct entry of a phone number » page 41

**Problems with the Telephone function**

First read and observe the introductory information and safety warnings on page 34.

If there are problems with the availability of the network or with the Bluetooth function, the following messages appear on the device display screen.

<table>
<thead>
<tr>
<th>Message</th>
<th>Importance</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Network search...</strong></td>
<td>The phone searches for available GSM networks.</td>
</tr>
<tr>
<td><strong>No network</strong></td>
<td>The phone is not connected to the GSM network.</td>
</tr>
<tr>
<td><strong>Rejected by network.</strong></td>
<td>The mobile phone network operator has rejected the connection (e.g. not enough mobile phone credit, SIM card blocked, roaming not available).</td>
</tr>
<tr>
<td><strong>To use the Bluetooth function, please switch the ignition on.</strong></td>
<td>Switch on the ignition.</td>
</tr>
</tbody>
</table>

**Symbols in the display**

<table>

<td>Current call</td>
</tr>
</tbody>
</table>

\[i\] This function is only supported by some phones.
Please switch on Bluetooth.

No Bluetooth devices paired.

Switch on the Bluetooth® function.

Connect the phone with the device.

Phonebox

At the bottom of the storage compartment in the front center console is an induction plate connected to a GSM roof antenna - the Phonebox.

Function

When the phone is inserted into the Phonebox, the phone signal increases in strength by about 20%. This reduces the level of phone battery discharge and the electromagnetic radiation inside the vehicle.

Inserting the phone into the Phonebox

- Press on the edge of the lid A in the direction of the arrow, and open the storage compartment.
- Place the phone in the storage compartment B with its back on the induction panel.
- Pull on the edge of the lid A in the opposite direction from the arrow, and close the storage compartment » B.

The Phonebox cannot be used as an alternative to connecting the phone with the device.

WARNING

For safety reasons, the storage compartment must always be closed when driving.

CAUTION

- Protective cases or cases around the phone placed in the storage compartment may interfere with the phone signal strength.
- Metallic objects such as coins or keys under the phone can affect the phone signal strength.

Settings

First read and observe the introductory information and safety warnings on page 34.

- Press the button PHONE Ø.

Menu with the telephone menu settings

- Select telephone - Search for available telephones/list of paired telephones/select telephone
- Find telephone - Search for a mobile phone
- Bluetooth - Bluetooth® settings » page 20
- User profile - User profile settings
  - Manage favourites - Assign function keys to allow speed dialling of contacts; you can also add and delete contacts here
  - Enter mailbox number - Enter the phone number of the voicemail
  - Prefix - Switch on/off the option to assign a prefix to a telephone number. Once this function is activated, the button for adding a prefix will be displayed with the symbol in some menus. Ø.
  - Enter here - Enter the prefix of a phone number
  - Sort by: - Sort the order of the phonebook
    - Surname - Sort by contact name
    - Name - Sort by contact first name
  - Import contacts - Starts update of the phone book; the number of imported contacts and number of contacts stored in the phone is displayed
  - Delete other user profiles - Delete up to three of the last connected user profiles (contacts, order of calls, call lists, speed dial buttons assigned to contacts)
Connect the device with the mobile phone

Introduction

This chapter contains information on the following subjects:

- Conditions for pairing
- Connect device with your mobile phone
- Pair the mobile phone with the device
- Connection with another paired mobile phone
- Switching on/off Bluetooth® profile
- Clear mobile phone from the list of paired devices
- Disconnection

First and foremost, pay attention to the safety instructions page 4, Important notes.

The device is shown in the telephone to be connected as SKODA_BT_....

... is replaced with the last four symbols of the VIN vehicle identification number of your vehicle.

You can change the name of the device page 20.

WARNING

The unit may require confirmation of certain features in the mobile phone when pairing. Do not carry out the pairing process while driving - there is danger of accidents!

Note

- The maximum number of phones that can be registered is 20. Upon reaching the maximum number and by pairing a new phone, the least recently used paired phone will automatically be deleted.
- In some countries, the use of the Bluetooth® function with phones can be restricted. Further information can be obtained from local authorities.
- The range of the Bluetooth® connection is restricted to the vehicle interior. This depends on local conditions and interference with other devices.
- When pairing from the mobile phone, follow the instructions in the owner's manual of the mobile phone.

Conditions for pairing

First read and observe the introductory information and safety warnings  on page 37.

To connect a phone with the device, the two devices must be paired.

Prerequisites for successful pairing:

- The ignition is switched on.
- The Bluetooth® function of the device page 20 for the mobile phone is switched on.
- The visibility of the mobile phone is switched on page 20.
- The visibility of the mobile phone is switched on.
- The mobile phone to be connected should not have an active connection to another mobile phone.

The pairing can be initiated from the device as well as from the mobile phone.

1) The in-band ringing function makes it possible to use the ring tone of your phone as the ring tone.

2) This function is only supported by some phones.
Connect device with your mobile phone

First read and observe the introductory information and safety warnings on page 37.

A telephone is paired with the device
After switching on the ignition the device attempts to connect to the last connected mobile phone.

During the connection process and depending on the phone type the message ... may be shown on the device screen Would you like to connect? and a menu will appear with the following function keys.
  > Connect - pairing confirmation
  > Cancel - end the pairing process

If the connection cannot be established, the device will then attempt to connect to other previously paired phones one by one.

If there is also no connection possible, then a phone search is to be started.

No phone is paired with the device
After switching on the ignition, the following message appears in the device screen Please search for and connect a mobile telephone. and a menu with the following function keys appear.
  > Find telephone - search for available phones with activated Bluetooth® function and visibility
  > - open the settings menu » page 36, Settings

Press after the completion of the search Results the function key, it will display a list of discovered phones (the function key is also available during the search).

Select the phone you want from the list.

If the search fails, check that the conditions for successful pairing are met » page 37, Conditions for pairing and repeat the whole process.

Pairing confirmation
Depending on the phone’s Bluetooth® version the pairing is to be confirmed in one of the following ways.

1) For devices with Bluetooth® v2.1 and later the phone quick pairing procedure (SSP Secure Simple Pairing) is used for pairing. This pairing method requires no PIN to be entered by the user.
2) For the name of the device, refer to the Bluetooth® settings » page 20.

Connection
After successful connection, the device will display the message ... user is connected., and then the main phone menu » Fig. 21 on page 35 is displayed.

Note
If the phone supports the Bluetooth® profile A2DP or AVRCP, your telephone display might prompt you to pair the phone as a Bluetooth® player.

Pair the mobile phone with the device

First read and observe the introductory information and safety warnings on page 37.

When pairing from the phone, follow the instructions in the owner’s manual of the phone.

> Have the phone search for available Bluetooth® devices.
> Select the device in the list of Bluetooth® devices.

While connecting, the message on the device screen ... Would you like to connect?, is displayed along with the following function keys.

Cancel - end the pairing process
Connect - confirmation of the pairing process
Depending on the phone's Bluetooth® version the pairing is to be confirmed in one of the following ways.

› In the device and the phone confirm within 30 seconds, the 6-digit PIN code displayed on the device screen and the phone display

› If necessary select in the phone the option for automatically connecting the phone to the device.

or

› Enter the device 4-16 digit PIN code.
› Enter the PIN code shown on the unit display into the phone within 30 seconds
› If necessary acknowledge the confirmation request in the phone.

If the device is not connected to any another phone, the following message ...

user is connected is shown on the device screen after successful connection and then the main phone menu » Fig. 21 on page 35 is displayed.

If another phone is connected to the device then only the pairing of the new phone is allowed, but the original phone remains connected.

### Connection with another paired mobile phone

First read and observe the introductory information and safety warnings on page 37.

If you want to connect the device to another paired phone, the current connection does not have to be terminated. The connection to the existing phone is automatically terminated by connecting to another mobile phone.

› In the main menu Telefon press the function key » Fig. 21 on page 35 .

It displays a list of previously paired phones.

› Select the paired phone to be connected with the device.

In the device screen, the message ... Replace this connection ... with? and following function keys are displayed.

› Cancel - end the menu for telephone change
› Replace - connection to the selected phone

After successful connection, the device will display the message ... user is connected., And then the main menu » Fig. 21 on page 35.

If the desired phone is not found in the list previously paired phones, then the phone with the device is paired » page 38.

### Switching on / off Bluetooth® profile

First read and observe the introductory information and safety warnings on page 37.

› Press → Bluetooth → Paired devices

It displays a list of paired devices.

Pressing the function key on the connected Bluetooth® device opens a menu with possible connection profiles supported on the selected device.

Pressing the function key with the name and symbol of the connection profile causes the context-dependent message to be shown on the device screen ...

Do you really want to separate the profile? and a menu of function keys.

› Disconnect - Press the function key to turn off the selected profile.

or

› Replace - If another phone is already connected to the device then pressing the function key causes the existing profile to be replaced by a new profile.

In the device screen the message ... Connecting with ... is displayed and the selected Bluetooth® Profile is turned on.

In each menu, the profile change is cancelled by pressing the Cancel function key.

### Possible profile icons:

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="symbol.png" alt="device icon" /></td>
<td>Devices that support the functionality of the hands-free system (Bluetooth® profile HFP)</td>
</tr>
<tr>
<td><img src="symbol.png" alt="profile icon" /></td>
<td>Devices that are connected to the device via Bluetooth® profile HFP</td>
</tr>
</tbody>
</table>

1) For devices with Bluetooth® v2.1 and later the device quick pairing procedure (SSP Secure Simple Pairing) is used for pairing. This connection method requires no PIN to be entered by the user.
Symbol | Meaning
--- | ---
 | Bluetooth® players (Bluetooth® profiles A2DP and AVRCP)\(^a\)
 | Bluetooth® player connected to the unit via Bluetooth® profiles A2DP and AVRCP\(^b\)

\(^a\) HFP is a Bluetooth® profile that supports the functionality of the hands-free system.
\(^b\) A2DP and AVRCP are Bluetooth® profiles that support multimedia functions.

If a Bluetooth® device is already connected to the device via one of the profiles, then switching on the profile in another device will cause the profile in the active device to end and be switched over to the newly selected device.

Only the newly selected profile is switched, the other profiles remain connected with the original device.

The device can be paired with several phones (or Bluetooth® devices), but only one can be active on the HFP profile and one on the A2DP profile and AVRCP be connected.

### Clear mobile phone from the list of paired devices

First read and observe the introductory information and safety warnings on page 37.

› Press the function key  → Bluetooth → Paired devices

A list of paired devices and the following function keys is displayed.

› **Delete all** - Delete all the phones in the list of paired devices
› **Delete** - Delete the desired phone

After selecting one of the function keys, the function keys are displayed.

› **Cancel** - Cancels the deletion
› **Delete** - delete confirmation

The device connected to the phone does not appear in the list of paired devices. In order to enable an deletion operation the connection between the phone and the device is first to be interrupt » page 40, Disconnection.

### Disconnection

First read and observe the introductory information and safety warnings on page 37.

The connection of a phone to the device can be disconnected in one of the following ways.

› By removing the ignition key (or switching off the ignition and opening the driver’s door in vehicles with the KESSY system).
› By disconnecting the hands-free system or switching off the Bluetooth® function on the phone.
› By switching off the Bluetooth® function on the device » page 20, Bluetooth® settings.
› By removing the phone from the list of paired devices » page 40, Clear mobile phone from the list of paired devices.
› By turning off the Bluetooth® HFP profile » page 39, Switching on / off Bluetooth® profile.

### Telephone functions

#### Introduction

This chapter contains information on the following subjects:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Speed dialling a phone number of a contact</td>
<td>40</td>
</tr>
<tr>
<td>Direct entry of a phone number</td>
<td>41</td>
</tr>
<tr>
<td>Phone book</td>
<td>42</td>
</tr>
<tr>
<td>Call-lists</td>
<td>42</td>
</tr>
<tr>
<td>Telephone conversation</td>
<td>43</td>
</tr>
<tr>
<td>Conference</td>
<td>43</td>
</tr>
</tbody>
</table>

First and foremost, pay attention to the safety instructions » page 4.

#### Speed dialling a phone number of a contact

First read and observe the introductory information given on page 40.

You can use the speed dial function keys [C] » Fig. 21 on page 35 to dial previously assigned telephone numbers of a contact instantly.
There are five speed dial buttons available.

**Assign a telephone number to a contact**
- Press a function key for the speed dial [C] » Fig. 21 on page 35 that is not assigned.

The unit displays the phone book.
- If necessary, enter one of the contact numbers for the desired telephone contact.

The assignment of the telephone number of a contact to a function key for the speed dial is also in the settings of the phone menus » page 36 possible.

**Select an assigned telephone number of a contact**
- Press the desired function key to speed dial the phone number of a contact [C] » Fig. 21 on page 35.

**Change the assigned telephone number of a contact**
- Press the desired function key for the speed dial [C] » Fig. 21 on page 35 for longer.

The unit displays the phone book.
- If necessary, enter one of the contact numbers for the desired telephone contact.

The telephone number of a contact is assigned to the selected function key for speed dialling.

**Select the desired contact by pressing the corresponding function key.**

**Remove phone number of a contact**
- Press the symbol button [ ] → User profile → Manage favourites.
- Press the function key for the speed dial. By confirming the menu item Delete the telephone number of a contact on the selected function key is removed for quick dialling.

---

**Direct entry of a phone number**

A screen appears to enter the phone number » Fig. 23.

**You can select the following functions:**
- Delete the digit
- Dial the entered number
- Add a prefix if this option has been set in the phone settings » page 36
- Entering a number using the voice control » page 13

**Mailbox** Select the mailbox if the mailbox number is entered in the phone settings » page 36 or directly enter the number

The input screen also functions as an alphanumeric keypad that you can use to search for contacts in the phonebook.

For example, if you enter 32, the unit will display contacts with the letter sequence DA, FA, EB, etc.

Select the desired contact by pressing the corresponding function key.

---

1) If no number is entered, the last dialled number will be displayed after you press the symbol key [ ].
2) If the addition of a prefix option is switched on, but the prefix is not entered in the phone settings, the last dialled number will be displayed in the input field [ ] after you press the symbol button. If the code is defined in the input line and a number is entered, by pressing the symbol key [ ] the added code is entered before the phone number and connection starts.
Phone book

First read and observe the introductory information given on page 40.

› Press .

Up to 2000 free memory locations for imported phone contacts are available in the phone book of the device. Each contact can contain up to 5 telephone numbers.

The phone book can also be called up during an ongoing call. After successful pairing, the contacts are imported .

Loading the directory

Upon first connection of the phone with the device, the system begins to import the phone book from the phone and from the SIM card into the memory of the device. Depending on the number of contacts this may take several minutes to complete.

If the directory import from the phone contains more than 2000 contacts, loading is stopped and the message Contacts not completely imported. appears on the screen. Only those contacts already loaded are available, these are in the menu .

The first 200 contacts along with the contact data, including the picture in the phone associated with the contact, are downloaded onto the device memory .

If an error occurs while loading the phone book, the message Import failed. Please try again and check whether the BT device... allows connections.

Update directory

Each time the phone has established a new connection with the device, the relevant phone book will be updated.

During the update, the phone book which was stored after the last completed update will be available. Newly stored telephone numbers are only shown after the updating has ended.

The update can be performed manually » page 36 Import contacts.

---

Find contact

Press the button Find to open the input screen with keypad to search in the phonebook » page 9.

Select contact

Pressing the function key with one of the contacts displayed causes the choice to start.

Where a contact contains several telephone numbers, the system displays a menu containing the telephone numbers for the contact.

Contact details

Pressing the function key with the symbol > the contact details are displayed.

Pressing the function key with the indicated phone numbers causes the choice to start.

Pressing the function key with the symbol and the contact starts the route guidance.

---

Call-lists

Fig. 24 Call lists

The call log displays information about telephone calls.

› Press in the main menu, the Phone function key » Fig. 21 on page 35.

---

1) In some phones, a confirmation for importing contacts to the device is required.

2) Some phones do not support downloading of contacts from the SIM card.

3) This function is only supported by some phones.
Explanation of graphic

A Sorting the call list
  › All - List of all calls
  › Missed calls - list of missed calls
  › Dialled nos. - List of dialled numbers
  › Received calls - list of received calls

B Dial a number with a defined prefix » page 36, Settings

C Processing the telephone number before dialling

D Display the contact details

Press the function key for a desired contact or telephone number to start dialling.

**Telephone conversation**

First read and observe the introductory information given on page 40.

### Outgoing call

While connecting, the screen displays the phone number or contact name. And the following function can be chosen:

- Exit choice

### Incoming call

During the ring tone of the incoming call, the screen displays the phone number or contact name. And the following functions can be selected:

- answer the incoming call
- ignore the incoming call (mute ring tone)
- reject the incoming call
- Contact picture 1) - display caller details

### Current call

During a current call, the screen displays the phone number or contact name and the call duration. Depending on the context, the following functions can be selected:

- Hold a call
- Deactivating the microphone
- Activating the microphone

### Conference

First read and observe the introductory information given on page 40.

The conference is a shared call with between three and six participants.

**Start a conference/invite additional participants**

- During a call or conference, make the next call.
  - or
  - With a new incoming call press \*\*\* .

**During a conference**

During an ongoing conference call, the call duration is displayed on the screen. Depending on the context, the following functions can be selected:

- Hold a conference - leave the conference temporarily (the conference continues in your absence)
- Return to the held conference
- Deactivating the microphone
- Activating the microphone
- Ending a conference call
- Conference call image - Display conference details

**Conference details**

During a conference, press the conference symbol to display a list of other conference participants. The following functions can be selected depending on the type of telephone:

- View participant details
- \*\*\* Talk to a participant separately of the conference
- End the call to a conference participant

---

1) The button is only functional when the contact is stored in the phone book.
Vehicle systems

Vehicle settings

Introduction

This chapter contains information on the following subjects:

Selecting driving mode ............................................. 44
Vehicle data ................................................................. 45
Auxiliary heater and ventilation ................................ 46
ESC system ................................................................. 47
Tyre ........................................................................... 47
Driver assistance ....................................................... 47
Parking and manoeuvring ....................................... 47
Light ........................................................................... 48
Mirrors and wiper ..................................................... 48
Opening and closing ................................................ 49
Seats .......................................................................... 49
Multifunction display ............................................. 49
Service ........................................................................ 49
Restore factory settings ........................................ 50
Climatronic settings ................................................ 50

First and foremost, pay attention to the safety instructions » page 4, Important notes.

Settings relating to the vehicle systems can only be made when the ignition is switched on.

Note

- The individual systems are described in the » Vehicle Owner's Manual.
- For safety reasons, if any system functions are disabled, then some functions, such as parts of the ESC system, are automatically enabled again after switching the ignition off and on.
- When you press the button CAR, the system displays the last displayed menu .

Selecting driving mode

Fig. 25 Button for selecting the driving mode Octavia, Octavia Combi / Octavia RS, Octavia Combi RS

First read and observe the introductory information given on page 44.

The menu for selecting the driving mode allows you to set the vehicle to one of the three preset driving modes Normal, Sport and Eco, or to the driving mode Individual which allows individual settings.

If a driving mode other than Normal is selected, then the symbol  or  » Fig. 25 lights up on the button.

The currently selected driving mode is displayed in the info field in the main menu for the operating modes » Fig. 30 on page 50 (top left).

Call up the main menu

Press the button CAR or  » Fig. 25.

- Normal - Activates Normal mode
- Cancel - Cancel the menu to select the driving mode
- Information - Display the mode settings
- Sport - Activates Sport mode
- Cancel - Cancel the menu to select the driving mode
- Information - Display the mode settings
- Eco - Activates the fuel-saving mode
- Cancel - Cancel the menu to select the driving mode
- Information - Display the mode settings
- **Individual** - Activates the Individual mode
- **Cancel** - Cancel the menu to select the driving mode
- **Setup** - Individual setting
  - **Steering**: Set the power steering characteristics
    - **Normal** - Normal
    - **Sport** - Sports
  - **Engine**: Set the engine (drive) characteristics
    - **Normal** - Normal
    - **Sport** - Sports
    - **Eco** - Economical
  - **ACC**: Set the vehicle acceleration when adaptive cruise control is activated
    - **Normal** - Normal
    - **Sport** - Sports
    - **Eco** - Economical
  - **Dynamic bend light**: Set the characteristics of the adaptive headlights
    - **Normal** - Normal
    - **Sport** - Sports
    - **Eco** - Economical
  - **Air conditioning**: Sets the Climatronic characteristics
    - **Normal** - Normal
    - **Eco** - Economical
  - **Reset mode**: Sets the profile **Normal**

**Note**

If you do not operate the unit for longer than approx. 10 seconds in the “Select driving mode” menu, it will switch to the last selected menu or switch itself off.
Range (if the estimated range is less than 300 km, the vehicle starts to approach the symbol: ⬤)

Vehicle representation (the zones of the vehicle are shown in different colours, corresponding to any warning messages that occur. The warning messages are displayed once you touch vehicle)

- **Driving data** - Display travel data » Fig. 26
  You can display one of three trip memories on the screen:
  - **Since start** - Driving data for the individual trip
  - **Long-term** - Long-term driving data
  - **Since refuelling** - Data since last refuelling

Change between the individual travel data storage locations with ◀/▶.

- **Convenience consumers** - Displays up to three devices which use the largest share of fuel and displays the fuel consumption required to run all conv. consumers » Vehicle Owner’s Manual, chapter Commercial driving and environmental compatibility

- **Vehicle status** - Displays vehicle status » Fig. 26 or tyre pressure monitoring information
  - **Vehicle status** - Displays vehicle status information
    - ◀/▶ - No message/warning messages relating to vehicle status or number of messages (if there is only one message, one warning message text is displayed)
    - ◀/▶ - Display information about the status of the START-STOP system
  - **TPMS** - function of the tire pressure monitor » Fig. 27
  - ◀/▶ - Start a new calibration process

Switch between the individual menus with ◀/▶.

**Note**

For more information on the warning messages concerning the vehicle status and information on the START-STOP system, see the » Vehicle Owner’s Manual.

---

**Auxiliary heater and ventilation**

**Fig. 28  Auxiliary heater: Main menu/set preset time**

First read and observe the introductory information given on page 44.

Press the button [CAR]/[SETUP] on the Climatronic unit → III.

**Set-up**

- **A** Departure time: Day and time when the vehicle is to be ready for use » Fig. 28
- **B** Heating/ventilation: Set the operating mode
- **C** Select the preset time, switch off the preset time
- **D** Set the preset times 1 to 3 and the duration (10 - 60 minutes)
- **E** When the heating or ventilation is running, the windows are highlighted in red or blue

**Note**

- Only one preset time can be active. The activated preset time will be deactivated again after it has started automatically. For the next start, activate one of the preset times.
- In the selection of the day in the preset time, there is an option between Sunday and Monday without the specified day. If this setting is made, the vehicle will be ready for use at the selected time, regardless of the current day.
- The system in operation switches off on expiration of the operating duration or can be deactivated by pressing the direct on/off icon III or by using the radio remote control.
- If a different time is set » page 19, *time and date settings*, the activated preset time is automatically deactivated. The preset time must be reactivated.
ESC system

First read and observe the introductory information given on page 44.

› Press the button \textit{CAR} \rightarrow \textit{ESC system}:  
  - \textbf{Activated} - Switch on all components of the ESC system  
  - \textbf{ASR off} - Switch off the ASR system  
  - \textbf{ESC sport} - activation of ESC Sport

Tyre

First read and observe the introductory information given on page 44.

› Press the button \textit{CAR} \rightarrow \textit{Tyres}.  
  - \textbf{TPMS} - Tyre pressure monitoring system  
  - \textbf{SET} - Start a new calibration process  
  - \textbf{Winter tyres} - Sets the speed limit for winter tyres  
  - \textbf{Speed warning} - Snow tyres speed warning on/off  
  - \textbf{Warning at} - Sets the speed for the warning

Driver assistance

First read and observe the introductory information given on page 44.

› Press the button \textit{CAR} \rightarrow \textit{Driver assistance}.  
  - \textbf{ACC (adaptive cruise control)} - Set the adaptive cruise control  
  - \textbf{Driving programme}: - Set the vehicle acceleration when adaptive cruise control is activated\footnote{This can be set in the menu on vehicles with a travel mode option \textit{\textup{\textbullet{page} 44, Selecting driving mode}}.}  
    - \textbf{Normal} - Normal  
    - \textbf{Sport} - Sports  
    - \textbf{Eco} - Economical  
  - \textbf{Last distance selected} - Last selected distance on/off

- \textbf{Distance}: - Set the distance monitoring to the vehicles ahead  
- \textbf{Very close} - Very small distance  
- \textbf{Close} - Small distance  
- \textbf{Medium} - Medium distance  
- \textbf{Far} - Large distance  
- \textbf{Very far} - Very large distance  
- \textbf{Front Assist} - Sets the assistant for monitoring the distance to the vehicles ahead  
- \textbf{Active} - Activate/deactivate the assistant  
- \textbf{Advance warning} - Activate/deactivate advance warning  
- \textbf{Display distance warning} - Activate/deactivate distance warnings  
- \textbf{Lane Assist} - Settings for Lane Assist  
- \textbf{Active} - Activate/deactivate the assistant  
- \textbf{Adaptive lane guidance} - Activate/deactivate adaptive lane guidance  
- \textbf{Driver Alert System} - Activate/deactivate the driver alert system  
- \textbf{Proactive passenger protection} - Activate/deactivate proactive passenger protection

Parking and manoeuvring

\textbf{Fig. 29} Screen display of the visual parking system

\textbf{Explanation of graphic}

- \textbf{A} - Switching on/off the acoustic parking aid  
- \textbf{B} - Switching off the visual parking system
Message: Look! Safe to move?
Displays the selected lane depending on the steering angle
An obstacle in the selected lane which is currently outside of the collision area is shown by the yellow segment.
An obstacle appearing in the collision zone is shown as a red-coloured segment. Do not proceed!
An area without detected obstacles is shown as a transparent segment.
An obstacle in the sensor range which lies outside of the collision area is shown by the white segment.

Press the button CAR → LANE → Parking and manoeuvring.

- **ParkPilot** - Settings for the parking aid
  - **Activate automatically** - Activate/deactivate the compact parking aid display (when driving forward)
  - **Front volume** - Adjusts the volume of the front sensors
  - **Front tone setting** - Adjusts the tone of the front sensors
  - **Rear volume** - Adjusts the volume of the rear sensors
  - **Rear tone setting** - Adjusts the tone of the rear sensors
  - **Audio lowering** - Volume reduction
    - **Off** - No lowering of the volume
    - **Weak** - Weak lowering of the volume
    - **Medium** - Medium lowering of the volume
    - **Strong** - Strong lowering of the volume

Note
- The compact display of the parking aid is shown automatically, e.g., for stop and go in a traffic jam if the distance to the obstacle becomes dangerously close.
- The compact display of the parking aid can be switched to a full screen view by touching the screen within the display.

Press the button CAR → LANE → Light.

- **Light assistance** - Set the light assistance
- **Dynamic Light Assist** - Switch on/off the head light assist function
- **Switch-on time** - Set the sensibility of the light sensor against the change in intensity of the ambient light
  - **Early** - High sensibility
  - **Medium** - Medium sensibility
  - **Late** - Low sensibility
- **Automatic headlight control in rain** - Activate/deactivate automatic headlight control in rain
- **Daytime running lights** - Activate/deactivate daytime running lights
- **Lane change flash** - Activate/deactivate lane change flashing
- **Travel mode** - Travel mode on/off
  - **R-hand traffic** - For right-hand traffic
  - **L-hand traffic** - For left-hand traffic
- **Interior lighting** - Sets the interior lighting
- **Instrument/switch lighting** - Set the brightness of the instrument/switch lighting
- **Footwell lighting** - Sets the brightness of the footwell light
- **Coming/Leaving home Fct.** - Set the COMING HOME / LEAVING HOME function
  - **Coming Home function** - Sets the period that the lights remain on after you leave the vehicle (0 - 30 seconds; 0 = function deactivated)
  - **Leaving Home function** - Sets the period that the lights remain on after you unlock the vehicle (0 - 30 seconds; 0 = function deactivated)

Press the button CAR → LANE → Mirrors and wipers.

- **Mirrors** - Adjusts the mirrors
  - **Synchronous adjustment** - Activate/deactivate synchronous mirror adjustment
  - **Lower while reversing** - Activate/deactivate the lowering of the front passenger mirror
  - **Fold in when parked** - Activate/deactivate folding the mirror via the remote control or by using the sensor in the handle (KESSY)
- **Wipers** - Adjusts the windscreen wipers
  - **Automatic wiping in rain** - Activate/deactivate automatic windscreen wiping in rain
  - **Automatic rear wiper** - Activate/deactivate automatic rear window wiper
Opening and closing

First read and observe the introductory information given on page 44.

Press the button $\text{CAR}$ → $\uparrow$ → Opening and closing.

- Window operation - Window operation settings
  - Conven. opening - Set the convenience opening feature
  - All windows - All windows
  - Driver window - Driver's window only
  - Off - Deactivates the convenience opening
- Central locking - Settings for opening and closing of doors
  - Door unlocking - Set the door unlocking feature
  - All doors - All doors
  - Single door - Driver's door or driver's or passenger door with KESSY system
  - Vehicle side - Doors on the driver's side or on the driver's or passenger's side with KESSY system
- Automatic locking - Activate/deactivate automatic locking when starting off
- Acoustic confirmation - Activate/deactivate acoustic signals when locking/unlocking the vehicle with an anti-theft alarm system

Seats

First read and observe the introductory information given on page 44.

Press the button $\text{CAR}$ → $\uparrow$ → Seats

- Store seat position - Store the driver's seat position and exterior mirror position in the remote control key when locking the vehicle
- Vehicle key activated - Activate/deactivate storing the driver's seat position and exterior mirror position when locking the vehicle

Multifunction display

First read and observe the introductory information given on page 44.

Press the button $\text{CAR}$ → $\uparrow$ → Multifunction display.

- Current consumption - Switch on/off the display of current fuel consumption in the display of the instrument cluster
- Average consumption - Switch on/off the display of average fuel consumption in the display of the instrument cluster
- Refuel quantity - Switch on/off the display of refuel quantity in the display of the instrument cluster
- Convenience consumers - Switch on/off the display of consumption by convenience consumers on/off in the display of the instrument cluster
- Eco tips - Switch on/off the display of tips for economical driving in the display of the instrument cluster
- Travelling time - Switch on/off the display of travelling time in the display of the instrument cluster
- Distance - Switch on/off the display of distance travelled in the display of the instrument cluster
- Average speed - Switch on/off the display of average speed in the display of the instrument cluster
- Digital speed display - Switch on/off the display of current speed in the display of the instrument cluster
- Speed warning - Switch on/off the display of speed warning in the display of the instrument cluster
- Oil temperature - Switch on/off the display of oil temperature in the display of the instrument cluster
- Coolant temperature - Switch on/off the display of coolant temperature in the display of the instrument cluster
- Reset Since start driving data - Reset the single-trip memory in the device screen and in the display of the instrument cluster
- Reset Long-term driving data - Reset the long-term memory in the device screen and in the display of the instrument cluster

Service

First read and observe the introductory information given on page 44.

Press the button $\text{CAR}$ → $\uparrow$ → Service.

- Vehicle no.: - Display the vehicle identification number
- Inspection: --- / --- - Number of km/days remaining until the next service event
- Oil change service: --- / ---- Number of km/days remaining until the next oil change
**Restore factory settings**

First read and observe the introductory information given on page 44.

Press the button CAR → ➤ Factory settings.

- **All settings** - All menu items
- **Driver assistance** - Menu Driver assistance
- **Parking and manoeuvring** - Menu Parking and manoeuvring
- **Light** - Menu Light
- **Mirrors and wipers** - Menu Mirrors and wipers
- **Opening and closing** - Menu Opening and closing
- **Multifunction display** - Menu Multifunction display

If one of the above menu items is selected, the system will ask you whether you really want to reset the settings.

- **Cancel** - Return to higher-level menu
- **Reset** - Reset the settings

---

**Climatronic settings**

First read and observe the introductory information given on page 44.

If Climatronic is switched on, the system displays the desired temperature for the driver's side and front passenger side » Fig. 30. Depending on the desired temperature, the airflow from the air outlet vents is shown in blue (temperature under 22 °C) or red (temperature above 22.5 °C).

When using Climatronic in automatic mode, **AUTO** is shown on the screen.

---

**Call up the main menu**

Press the button **SETUP** on the Climatronic control panel.

- **Air con. profile**:... - Set the Climatronic operating mode
- **ON/OFF** - Switches Climatronic on/off
- **Ventilation and exhaust**: - Access the auxiliary heater and ventilation settings » page 46
- **Factory settings** - Settings for Climatronic

**Note**

- If you do not operate the unit for longer than 10 seconds in the "Climatronic" menu and Climatronic was not switched on before the menu was opened, the unit will switch itself off.
- If you switch off the automatic mode of Climatronic by increasing or reducing the fan speed, the coloured display of the airflow from the air outlets will not be displayed.
