Infotainment Navigation Amundsen Owner's Manual
Structure of this Owner’s Manual (explanations)

This Owner’s Manual has been systematically designed to make it easy for you to search for and obtain the information you require.

Chapters, table of contents and subject index
The text of the Owner's Manual is divided into relatively short sections which are combined into easy-to-read chapters. The chapter you are reading at any particular moment is always shown at the bottom right of the page.
The Table of contents arranged according to chapter and the detailed Subject index at the end of the Owner's Manual help you to rapidly find the information you are looking for.

Direction indications
All direction indications such as “left”, “right”, “front”, “rear” relate to the direction of travel of the vehicle.

Units of measurement
All values are expressed in metric units.

Explanation of symbols

Denotes a reference to a section with important information and safety advice in a chapter.

Denotes the continuation of a section on the next page.

Denotes a registered trademark.

Examples of the information listed in the Owner's Manual
Press the button MENU → ® → Press Sound.
This information means that first the MENU button on the device and then the function key ® on the device screen is to be operate and then the menu is to be confirmed by pressing the function key Sound.
The "→" symbol indicates the next step.

Example of the menu, the available menus, menu items or functions.

- xyz - the first menu level
- xyz - the second menu level
- xyz - the third menu level
- xyz - the first menu level

Notes

WARNING
The most important notes are marked with the heading WARNING. These WARNING notes draw your attention to a serious risk of accident or injury.

CAUTION
A Caution note draws your attention to the possibility of damage to your vehicle (e.g. damage to gearbox), or points out general risks of an accident.

For the sake of the environment
An Environmental note draws your attention to environmental protection aspects. This is where you will, for example, find tips aimed at reducing your fuel consumption.

Note
A normal Note draws your attention to important information about the operation of your vehicle.
Preface

You have chosen a ŠKODA vehicle, which is fitted with the Infotainment Navigation Amundsen (hereafter called the unit) - we thank you for your confidence in us.

The new operating concept allows you to configure vehicle settings and to operate some electronic systems centrally from the unit.

In addition to this Owner's Manual, please also carefully read the Vehicle Manual, as operation in accordance with these instructions is a prerequisite for proper use of the vehicle.

If you have any questions about your unit, please contact a ŠKODA Partner.

Your ŠKODA AUTO a.s. (hereinafter referred to as ŠKODA)

Introductory information

Important notes

Introduction

This chapter contains information on the following subjects:

Declaration of conformity 4
Component protection 4

These operating instructions describe all possible equipment variants without identifying them as special equipment, model variants or market-dependent equipment.

Consequently, this vehicle does not need to contain all of the equipment components described in these operating instructions.

The level of equipment of your vehicle refers to your purchase contract of the vehicle. More information is available from the ŠKODA Partner where you bought the vehicle.

Please note that these instructions are meant only as a supplement to the information in the Owner’s Manual of your vehicle. Therefore, they can be used only in conjunction with the latest manual for this vehicle. For a detailed description of some functions listed in these instructions, see the Vehicle Manual for your vehicle.

The illustrations can differ in minor details from your unit; they are only intended for general information.

WARNING

- Concentrate fully at all times on your driving! As the driver you are fully responsible for the operation of your vehicle.
- Only use the unit in a way that leaves you in full control of your vehicle in every traffic situation – there is the risk of an accident.

WARNING (Continued)

- Adjust the volume to ensure that acoustic signals from outside, e.g. sirens from vehicles which have the right of way, such as police, ambulance and fire brigade vehicles, can be heard at all time.
- High volumes can cause hearing damage!

Declaration of conformity

Read and observe 1 on page 4 first.

ŠKODA AUTO a.s. hereby declares that the ŠKODA Infotainment systems meet the basic requirements and additional provisions of Directive 1999/5/EC with reference to radio equipment and telecommunications devices.

ŠKODA AUTO a.s. hereby declares that the “connection and the use of this communication device is granted by the Nigerian Communications Commission.”

Component protection

Read and observe 1 on page 4 first.

Some electronic control units are factory-equipped with component protection.

The component protection was developed as a protection mechanism for:

- impairment of factory- or garage-fitted control units after installation in another vehicle (for example, after a theft);
- impairment of components operated outside of the vehicle;
- the possibility of a legitimate installation or change of control units for repairs at a ŠKODA specialist garage.

When component protection is enabled, the following message appears on the unit’s display Component theft protection: the infotainment system is not fully available at present. Please switch on the ignition.

Please contact a ŠKODA Service Partner if component protection does not deactivate when the ignition is switched on.

1) Terms used » manual, chapter Preface.
Equipment overview

Introduction

This chapter contains information on the following subjects:

- Description of the device ........................................... 5
- Touch screen .......................................................... 11
- Switching the unit on/off ........................................... 5
- Unit menus ............................................................. 6
- Adjusting volume ....................................................... 6

First and foremost, pay attention to the safety instructions » page 4, Important notes.

Description of the device

Fig. 1 Description of the device

1 Switch unit on/off, adjust volume
2 Menu button for calls and confirmations

Touch screen

The unit is equipped with a so-called touch screen [11] » Fig. 1 on page 5 which can only be operated by the touch of a finger.

CAUTION
- The screen can be operated by a slight touch of a finger. Do not apply pressure to the screen - risk of damage!
- Do not use any objects to operate the screen - risk of damage!
- Do not use solvents such as benzene or turpentine for cleaning, since they may damage the screen surface.

Note
- Use a soft cloth and, if necessary, methylated spirits, to remove fingerprints from the screen. When doing so, ensure that you do not cause damage to other parts of the interior.
- It is not possible to operate the screen with your fingernails or while wearing gloves.
- Do not affix anything to the area of the unit below the screen. This could affect the operation of the sensors for the zoom function.
- You can use a touchscreen protector film that does not affect the touchscreen's functionality to protect it.
- The brightness of the screen is adjusted automatically depending on the brightness of the interior lighting. The automatic setting can be adjusted manually » page 18.

Switching the unit on/off

Press the [2] knob to switch the unit on or off.
When the unit is switched on, the audio source last active and the most recently selected menu before the unit was switched off will be restored.

If Telephone mode was active before you switched off the unit and the ignition and Bluetooth® function is not switched on, the screen displays the message » page 34. Switch on the ignition or the Bluetooth® function» page 19.

If the vehicle key is pulled out of the ignition lock while the unit is switched on, the unit will switch off automatically. After switching on the ignition, the unit is turned on automatically.

The unit will not be switched on automatically when the ignition is switched on if the unit was switched off using the knob.

The unit will switch off automatically after the engine is switched off and the door is opened if your vehicle is fitted with the KESSY system. The unit will switch off if you open the driver's door before switching off the engine.

When the ignition is switched off, the unit switches itself off automatically after approximately half an hour (prevents the vehicle battery being drained).

### Unit menus

![Unit menus](image)

**Call up the main menu**

› Press the button.

**Function keys in the MENU main menu**

› - Menu Radio » page 21

› - Menu Media » page 26

› - Tone settings » page 17

› - Unit settings » page 16

› - Vehicle systems settings » page 62

| - Navigation menu » page 43 |

| - Menu Telephone » page 33 |

### Adjusting volume

**Increase the volume**

› Turn the knob to the right.

**Reduce the volume**

› Turn the knob to the left.

**Muting**

› Set the volume to 0 using the knob.

**Note**

- The change in volume is displayed on the screen of the unit.
- High volumes can cause sound resonance in the vehicle.
- The car speakers may be damaged if the volume is set too loud or is distorted.
- The loudspeakers in the vehicle are designed for a power output of the device of 4x20 W.
- When equipped with a sound system, the speakers are adapted for a total power output from the amplifier of 570 W.
Unit operation

In the unit screen

Introduction

This chapter contains information on the following subjects:

Operation ........................................ 7
Input screen with keyboard ........................................ 8
Input screen with numeric keyboard ........................................ 8

First and foremost, pay attention to the safety instructions » page 4, Important notes.

This chapter covers the operation of the unit and working with the touchscreen and with various types of input keyboard.

Operation

![Fig. 3 Screen display]

Explanation of graphic

A Currently selected menu
B - Return to the higher-level menu
C Function with "checkbox" ✓
D Scroll bar - Shows the position in the menu; touch the scroll bar to navigate the menu
E Menu item with "pop-up window" ▼

Screen areas which confirm a function or a menu are called “function keys”.
White or green function keys are active.
Greyed out function keys are not active.

Proximity sensors

At the bottom of the device there are proximity sensors. When your hand approaches the screen, the device changes from display mode to operating mode and the available function keys are highlighted.

Status line

In the main menu of some operating modes, the upper screen area contains a status line displaying time details and the external temperature, as well as information on the operating mode currently selected.

Function keys in the main menu

In the main menu of some operating modes, the lower screen area contains function keys with symbols for functions or menus.

Selecting menu/menu item

› Drag your finger over the screen in the required direction
› Turn the menu knob [2] » Fig. 1 on page 5

If you make the selection by turning the menu knob [2], the currently selected menu is highlighted in green.

Confirming menu/menu item

› Touch the function key with your finger
› Press the menu knob [2]

Returning to higher-level menu

Context-dependent

› By pressing
› By pressing the relevant button next to the screen
› By touching the screen outside the pop-up window with your finger

Switching function on/off with "checkbox"

Press the relevant function key

✓ or ◯ - Function is switched on
☐ or ○ - Function is switched off

Set value

› by touching the function keys with the symbols ▼/▲,◄/►, - / +
› Touch or move your finger over the scale

Note

For some menus or menu items, the current setting is displayed, e.g. Distance: ... km or distance: ... mi.
The input screen with keypad is used to input entries or find entries in the unit memory (e.g. phone contacts, addresses, etc.).

**Description of the function keys**

- Return to the higher-level menu
- Display the menu with the contacts found, information on the number of relevant contacts
- Delete characters in the input line
- Change from upper case to lower case and vice versa
- Menu display with keys in the selected language, including diacritics » page 18
- Switch to numbers and special characters
- Switch to special characters
- Switch to letters
- Space
- Confirmation of text entered into the input line

Pressing the keyboard function key on the input screen places the character required in text line [A].

Only those letters or symbols reasonably used in an entry will be available during input. Do not forget to enter a space in terms made up of more than one word, such as Lorem Ipsum. The entries can be entered without special characters (diacritics).

The system begins searching for the most relevant terms as soon as letters are entered, so it is not necessary to enter the entire name.

In addition to the text line [A], the number of matching entries is shown in the function key [B].

The numbers 1-99 indicate the number of matching entries found. If even more entries were found, ** is indicated instead of a number. If less than 6 entries were found, a list of the found entries opens automatically.

**Input screen with numeric keyboard**

The input screen with keypad is used for number input in particular.

- Input screen in the **Telephone** menu » page 39.
- Input screen in the **Navigation** menu » page 50

**operation via the MAXI DOT display**

This chapter contains information on the following subjects:

- Operate with the control lever buttons
- Operating the audio using the buttons / dials on the multifunction steering wheel
- operation via the buttons / dials on the multifunction steering wheel - Telephone
- Operation with the buttons and wheels on the multifunction steering wheel - Navigation

**First and foremost, pay attention to the safety instructions » page 4, Important notes.**
Some of the device's features are also displayed in the MAXI DOT display. Depending on the equipment, these features can be operated as follows.

- With the buttons on the operating lever » page 9
- With the buttons and wheels on the multifunction steering wheel » page 9

Note
If the ignition and the side lights are switched on, the buttons and dials on the multifunction steering wheel will also be illuminated.

Operate with the control lever buttons

![Fig. 6 Buttons on the control lever](image)

Operating the audio using the buttons / dials on the multifunction steering wheel

![Fig. 7 Multifunction steering wheel: control buttons and wheels](image)

The separate menus and menu items displayed in the MAXI DOT display can be operated with the buttons on the control lever.

- Press and hold - open main menu
- Press briefly - select individual menu items or menus
- Press briefly - select menu item or menu

The information shown on the MAXI DOT display (depending on the menu selected)

- **Radio**
  - current frequency band of the radio station;
  - currently playing station of receivable radio stations in the given frequency band if less than 5 are receivable;
  - if more than 5 stations can be received, a list of receivable radio stations is displayed with an option to choose one of them;
  - TP traffic announcements.
- **Media**
  - Name

---

The display in the MAXI DOT is described in the » Manual, chapter Information system

### Voice control

**Introduction**

This chapter contains information on the following subjects:

Function requirements 13
Switching on/off 14
Help for voice control 14
Operation 14
Non-recognition of a voice command 15
Option to correct a voice command input 15
Stop/restore voice command input 15
Not in the voice commands included in the help section 15

First and foremost, pay attention to the safety instructions » page 4, Important notes.

Some equipment functions can be operated using voice commands. This accelerates the use of the device and increases comfort while driving.

Voice control can be used in the Radio, Media, Phone and Navigation menus.

The voice control system can be operated either by the driver or by the front passenger.

**WARNING**

- Please pay attention to the traffic first and foremost. As the driver you are fully responsible for road safety. Only use the system in a way that leaves you in full control of your vehicle in every traffic situation – there is the risk of an accident.
- Do not use the voice control system under stress or in an emergency. Your voice commands may not be recognized in such situations. In such circumstances it may not be possible to establish a telephone connection or the connection may take too much time to complete. The emergency number should be dialled manually.

**Function requirements**

Read and observe 1 on page 13 first.

Function requirements for voice control.
- The ignition is switched on.
- The unit is switched on.
- No phone call is in progress.
- The parking aid is not active.

Requirements for optimum voice command recognition.
- Only give voice commands when the symbol & appears.
- Speak with a normal tone of voice without intonation and excessive pauses.
- Avoid a bad pronunciation.
- Close doors, windows and the sliding roof, to prevent external disturbance affecting recognition of the voice commands.
- You are recommended to speak louder at higher speeds, so that the sound of your voice is not drowned out by the increased ambient noise.
- Limit additional noise in the vehicle, e.g. passengers talking at the same time, when you are using voice control.
CAUTION
For some languages voice control is not available. The device will notify the user of this via a text message which is displayed after setting the device language screen » page 16.

Note
- No navigation announcements or traffic announcements are played while you are using voice control.
- Some voice commands must be spelled out, depending on the language of communication selected, such as Card "S D" One source selection.

Switching on/off

Fig. 10  Multifunction steering wheel

Read and observe 1 on page 13 first.

Switching on voice control
› Briefly press the button [VOICE] on the device.
› Briefly press the symbol button [1] on the multifunction steering wheel.

Activation of voice control is indicated by an acoustic signal and the unit screen will display a collection of basic voice commands for the current menu.

The menu display and the acoustic signal can be enabled or disabled » page 19.

Switching off voice control
› Press the button [VOICE] on the device for a long time, or press it twice.
› Press the symbol button twice or press and hold [1] on the multifunction steering wheel.
› Touch the screen with your finger (any part of the screen with the exception of the function key with the symbol [4]).
› Pressing a button on the unit (except for a short press on the button [VOICE]).
› Say the Cancel voice dialogue voice command.

Help for voice control

Read and observe 1 on page 13 first.

Start introduction
When you give the voice command Start tutorial, the unit plays one of the seven parts of the voice control tutorial.

Individual parts of the introduction can be requested separately by the voice command Introduction part ... and numbers 1 through 7.

Help
When you give the voice command Help, the device displays a menu containing possible voice commands. In some cases repeating the Help voice command will bring up another part of the help section with a menu of additional voice commands.

The help section does not contain all possible commands.

Operation

Read and observe 1 on page 13 first.

The voice control system can usually be operated applying the "say what you see" method.

Announce the descriptions of the green highlighted function keys. For example, the function key Dial no. can be accessed through the voice command "Call number."

Voice control settings » page 19.

Icons in the voice control menu

A voice output is played
A voice command is awaited
A voice command entry is stopped » page 15
A voice command is recognized

As long as the system is playing a voice output, it is not necessary to await the end of the message playback. The message can be ended by briefly pressing the [VOICE] button or the symbol key [1] on the multifunction steering wheel. In this way the voice output is aborted and a new voice command is expected.

14  Familiarization with the unit
### Non-recognition of a voice command

Read and observe 1 on page 13 first.

If a voice command is not recognised, the system answers with *Pardon?* and you can give a new command.

If the system does not recognise the second voice command, the help message is provided again and you can give a new command.

If the system does not recognise the third voice command, the system plays the **Voice control cancelled** message and the dialogue is ended.

### Option to correct a voice command input

Read and observe 1 on page 13 first.

A voice command can be corrected, modified or re-entered by briefly pressing the [voice] button on the unit or the symbol key \( \circ \) on the multifunction steering wheel. However this is only possible if the symbol \( \circ \) appears.

You do not have to wait until the voice command is recognized by the system.

### Stop/restore voice command input

Read and observe 1 on page 13 first.

In some menus, the procedure for entering voice commands can be stopped by turning the knob \( 2 \) Fig. 1 on page 5.

The symbol displayed on the unit screen or in the information display then changes from \( \circ \) up \( \circ \).

**Restore input**

› by pressing the function key with the symbol \( \circ \);
› by briefly pressing the button [voice] on the multifunction steering wheel.
› by pressing the symbol key \( \circ \) on the multifunction steering wheel.

### Not in the voice commands included in the help section

Read and observe 1 on page 13 first.

The destination address must be defined by saying the town and street name and then the house number step-by-step in accordance with the system announcements. The navigation data must contain the house number.

The house number and a further address supplement in the form of a number can be said where necessary. The system will then offer the number combination it has found if the house number and the further address supplement, where appropriate, exists in the street entered.

  - **CANTON surround** - Virtual Canton® surround system (active during media playback)

### Screen settings

Press the button ![menu](menu) → ![pop-up](pop-up) → **Screen**.

- **Switch off screen (in 10 seconds)** - Activate/deactivate energy-saving mode for the display
- **Brightness** - Adjusts the brightness of the screen
  - **Brightest** - brightest level
  - **Brighter** - brighter level
  - **Medium** - medium level
  - **Darker** - darker level
  - **Darkest** - darkest level
- **Confirmation tone** - Switch on/off confirmation tone when a function key is pressed
- **Show clock in standby mode** - Time and date displayed on the screen when the ignition is switched on and the unit is switched off

### Time and date settings

Press the button ![menu](menu) → ![pop-up](pop-up) → **Time and date**.

- **Clock time source** - Type of time settings
  - **Manual** - Manual setting
  - **GPS** - Take the values from the GPS signal received
- **Time** - Time settings
  - **Summer (DST)** - Switches the summertime setting on/off
  - **Time zone** - Select the time zone
  - **Time format** - Set the time format
    - **12h**
    - **24h**
- **Date** - Date settings
  - **Date format** - Set the date format
    - **DD.MM.YYYY** - Day - Month - Year
    - **YYYY-MM-DD** - Year - Month - Day
    - **MM-DD-YYYY** - Month - Day - Year

### Keyboard settings

Press the button ![menu](menu) → ![pop-up](pop-up) → **Keypad**.

- **ABC** - keys arranged alphabetically
- **QWERTY** - Arrangement of the keys as per the QWERTY system (in accordance with computer keyboard arrangement)

### Additional keypad language settings

Press the button ![menu](menu) → ![pop-up](pop-up) → **More keypad languages**.

In this menu, the keyboard character layout for the chosen language can be selected, and with this the option for fast entry of the characters used in the selected language.

It is then possible to swap between the languages in the input screen showing a keyboard by pressing ![language](language) ➔ page 8.

---

1) If after 10 seconds, the screen is not activated by approaching, touching the screen or operating the menu button [2] → Fig. 1 on page 5, the screen turns black. You can switch the screen back on again by approaching it with your hand, touching it, or using menu knob [2].

---

18 Familiarization with the unit
Unit settings

- Press the button \( \text{MENU} \rightarrow \) \( \text{.fromString} \rightarrow \) Units.

- **Distance**: Distance units
  - \( \text{km} \) - Kilometres
  - \( \text{mi} \) - Miles

- **Speed**: Speed units
  - \( \text{km/h} \) - Kilometres per hour
  - \( \text{mph} \) - Miles per hour

- **Temperature**: Temperature units
  - \( ^{\circ}\text{C} \) - Degrees Celsius
  - \( ^{\circ}\text{F} \) - Degrees Fahrenheit

- **Volume**: Volume units
  - \( \text{l} \) - Litres
  - \( \text{gal (US)} \) - Gallons (US)
  - \( \text{gal (UK)} \) - Gallons (UK)

- **Consumption**: Consumption units
  - \( \text{l/100km} \) - Litres per 100 kilometres
  - \( \text{km/l} \) - Kilometres per litre
  - \( \text{mpg (US)} \) - Miles per gallon (US)
  - \( \text{mpg (UK)} \) - Miles per gallon (UK)

- **Gas consumption**: Gas consumption units
  - \( \text{kg/100km} \) - Kilograms per 100 km
  - \( \text{km/kg} \) - Kilometres per kilogram
  - \( \text{m}^3/100 \text{ km} \) - Cubic metres per 100 kilometres
  - \( \text{km/m}^3 \) - Kilometres per cubic metre

- **Pressure**: Pressure units for tyre pressure
  - \( \text{kPa} \) - Kilopascal
  - \( \text{bar} \) - bar
  - \( \text{psi} \) - Pounds per square inch

Voice control settings

- Press the button \( \text{MENU} \rightarrow \) \( \text{.fromString} \rightarrow \) Voice control.

- **Dialogue style**: Setting the dialogue style
  - **Long** - Long dialogue (the system plays complete acoustic messages)
  - **Short** - Short dialogue (the system shortens some acoustic messages or substitutes them with an acoustic signal)

- **Display available commands** - Switch on/off the menus containing basic voice commands when voice control is activated

- **Voice control session start tone** - Switch on/off the audible signal that is output when voice control is activated

- **Voice control session end tone** - Switch on/off the audible signal that is output when voice control is ended

- **Input tone in voice dialogue** - Switch on/off the audible signal that is output to signal that voice control is waiting for a command

Restore factory settings

- Press the button \( \text{MENU} \rightarrow \) \( \text{.fromString} \rightarrow \) Factory settings.

- **Restore factory settings** - Reset all factory settings

- **Sound** - Restore default settings for sound

- **Radio** - Restore default settings for radio

- **Vehicle** - Restore default settings for the vehicle systems

- **Telephone** - Restore default settings for phone

- **Media** - Restore default settings for media

- **Voice control** - Restore default settings for voice control

- **Navigation** - Restore default settings for navigation

- **Bluetooth** - Restore default settings for the Bluetooth® function

- **System** - Restore the system default settings

Bluetooth® settings

- Press the button \( \text{MENU} \rightarrow \) \( \text{.fromString} \rightarrow \) Bluetooth.

- **Bluetooth** - Switch on/off Bluetooth® function

- **Visibility**: Switch on/off the visibility of the Bluetooth® device for other devices
  - **Visible** - Visibility is always on
  - **Hidden** - Visibility is off

- **At start-up**: Turns on visibility for 5 minutes after switching on the ignition or until the driving speed has exceeded 5 km/h

- **Name** - Open the input screen with keyboard - Change the device name

- **Paired devices**: Display the list of paired Bluetooth® devices; connect or delete a paired device; delete the list of paired devices

- **Delete all**: Delete all paired Bluetooth® devices

- **Find devices**: Searches for available external devices with enabled Bluetooth® functions and activated visibility

- **Bluetooth audio (A2DP/AVRCP)** - Switch on/off the connection option for Bluetooth® profiles A2DP and AVRCP®
A2DP and AVRCP are Bluetooth® profiles that support multimedia functions.

1) AZDP and AVRCP are Bluetooth® profiles that support multimedia functions.

Familiarization with the unit
Audio

Radio

Operation

Introduction

This chapter contains information on the following subjects:

- Main Menu 21
- List of available stations 22
- Search for radio stations and save 22
- Search available stations (Scan) 23
- Station logos 23
- Traffic information 23
- Station information (DAB) 24

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The device allows analogue radio reception of FM and AM frequency ranges as well as DAB digital radio reception.

DAB digital radio reception allows multiple stations to be transmitted in a single frequency in the form of a so-called ensemble. It also allows for the transmission of additional data and information (e.g. messages, sport, weather, warnings, etc.).

CAUTION

- Car parks, tunnels, tall buildings or mountains can disrupt the radio signal even causing it to fail completely.
- For vehicles with disc antennas, if the discs are obscured with film or metal-coated stickers, you may experience interference.
- In countries where the RDS function is not supported sufficiently, we recommend turning off the RDS and AF functions. Otherwise, these settings can affect the functionality of the radio.

Main Menu

Fig. 13

Radio: Main menu

Read and observe on page 21 first.

Explanation of graphic » Fig. 13

- The selected radio station (frequency or identifier)
- Station keys
- Memory groups for the preset buttons
- Choice of radio waveband (FM / AM / DAB)

Changing station either in the list of available stations or the preset buttons depending on the menu Arrow buttons: » page 24, Settings

List of available stations » page 22

manual / semi-automatic station search » page 22

Information for radio station (DAB) » page 24

Radio settings

For each radio waveband (FM / AM / DAB) there are 15 preset buttons to which the radio stations can be saved. These preset buttons are divided into three memory groups.

Call up the main menu

Press the button.

Choose radio waveband

Press the button repeatedly.

or

Press the function key » Fig. 13, and select the desired area.
Information symbols in the display

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>

<td>AF alternative frequency is off (FM)</td>
</tr>
</tbody>
</table>

**List of available stations**

**Fig. 14** Typical list of available stations: FM / DAB

**Read and observe** on page 21 first.

The station with sufficient signal strength are shown in the **list of available stations**. The device searches for these stations automatically.

**Show stations list**

- In the **radio** menu press the function key ➔.

**Information symbols in the display**

<table>
<thead>
<tr>
<th>Symbol</th>

<td>Type of regional broadcast (FM)</td>
</tr>
<tr>
<td>❌</td>
<td>Signal is not available (DAB)</td>
</tr>
<tr>
<td>📀</td>
<td>Radio stations with slideshow (DAB)</td>
</tr>
</tbody>
</table>

**Update station list**

In the FM band the station list is continually updated automatically.

In AM and DAB bands update is performed manually by pressing the function key ⏯.

**Sort radio stations in the station list (FM) by** -

- Alphabet - alphabetical order according to channel name
- Group - Sort by transmitted program type

**Search for radio stations and save**

- **Read and observe** on page 21 first.

A radio station can also be searched and saved to a preset button.

**Automatic station search**

Automatically set stations are in the list of available stations.

**Semi-automatic station search**

- In the **radio** menu press the function key ⏯.
- Press the function key < or >.

The device scans the broadcasting range until the first receivable station is tuned.

**Manual station search**

- In the **radio** menu press the function key ⏯.
- Select the desired station using the function keys < / > or adjusted by moving the slider across the screen.

**Save radio station to a preset button**

- In the list of available stations and hold down.
- A list of station buttons [B] will be shown ➔ Fig. 13 on page 21.
- Press the preset button [B] to which you want to save the desired station.
- or
- Set the desired station manually or semi-automatically.
- Press and hold the corresponding function key [B] until you hear an acoustic signal.

You can switch between the groups of individual preset buttons using the function keys [C].
**Search available stations (Scan)**

Read and observe 1 on page 21 first.

This function plays all the available stations in succession for a few seconds each.

**Switching on**

› Press the menu knob 2 » Fig. 1 on page 5.

or

› In the radio menu press the function key ◀ → Press Scan.

**Switching off**

› Press the menu knob 2.

or

› press any function key in the device screen.

After switching off the function, the device plays the station at which the function was cancelled.

**Station logos**

Read and observe 1 on page 21 first.

The preset buttons 8 » Fig. 13 on page 21 can be associated with logos (images) of the radio station.

**Automatically save station logo (FM / DAB)**

› Before you store the radio station to a station button function key press in the Radio menu the function key ◀ → Advanced setup confirm.

› Activate the menu item Auto-save station logos » page 24, Advanced settings (FM) and » page 25, Advanced settings(DAB).

When you save the station to a preset button, the station is also assigned a logo from the device memory if it has been saved.

**Storing station logo manually**

A logo can be assigned manually to the previously stored station.

› The function key ◀ → Station logos

A menu with preset buttons for radio stations is displayed.

› Press the preset button for the station to which you wish to assign a logo.

A media menu (CD, SD card, USB) is displayed.

› Select the image in the preferred storage medium.

Selecting the image assigns it to the respective preset button.

**Note**

■ The following image formats are supported: jpg, gif, png, bmp.

■ We recommend a resolution of up to 500x500 pixels.

**Traffic information**

Read and observe 1 on page 21 first.

**Switching on/off**

› In the radio menu press the function key ◀.

› Enable or disable the menu item Traffic programme (TP).

**Traffic reports**

During a traffic announcement, the following menu is displayed.

› Cancel - The current traffic report is cancelled. The TP function remains activated.

› Deactivate - The current traffic report is cancelled and the TP function is switched off.

**Note**

■ Some radio stations misleadingly identify themselves as TP stations. It is therefore not a device error that with such radio stations, no traffic news exists.

■ During playback in the Media menu the traffic report is received by the last selected radio station.

■ Should this radio station not transmit traffic reports or the signal is not available, then the device automatically searches for a TP station.
Station information (DAB)

Fig. 15 Station information

Read and observe 1 on page 21 first.

DAB allows the transmission of various additional information. The display options for this information on the screen can be adjusted in the following menu.

› Press the function key in the Radio menu DAB ➞.

- Preset list - Display only saved DAB stations
- Station info. - Displays DAB station information, accompanying text (radio text) and images (e.g., artist name or programme and image type where these are broadcast)
- Radio text - Displays one radio text
- Slide show - Displays one image; the image will switch to full-screen view until you switch the screen back on by moving your hand towards it.

Note
If you touch the screen in the area where the accompanying text (radio text) is displayed, the screen will only display this information. If you touch the screen in the area of the displayed image, only images will be displayed on the screen.

Radio settings

Introduction

This chapter contains information on the following subjects:
Settings .......................................................................................................................... 24
Advanced settings (FM) ............................................................................................... 24
Advanced settings (DAB) ............................................................................................. 25

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The basic setting of the radio functions is the same for all broadcast areas. The Advanced setup menu item is different for FM and DAB. The AM broadcast area does not have this menu option.

Settings

› In the radio menu press the function key ☞.

- Sound - Sound settings » page 17, Sound settings
- Scan - Auto-play all stations in the current frequency band of each station for around 5 seconds.
- Arrow buttons: - Set the station select function in the Radio menu
  - Press list - only switch preset radio stations (Preset buttons)
  - Station list - Switch all stations currently in range for the selected frequency band
- Traffic programme (TP) - Switches traffic programme on/off
- Delete presets - Delete the stored stations (preset buttons)
- Delete a certain radio station (preset button)
- Delete all - Deletes the stored stations (preset buttons)
- Station logos - manual assignment of station logos » page 23
- Radio text - Switch the radio text display (FM and DAB) on/off
- Advanced setup - Another setting that is different depending on the selected waveband (FM and DAB)

Advanced settings (FM)

› Select the FM band in the Radio menu, and press the function key ☞ ➞ Advanced setup.

- Alternative frequency (AF) - Switching on/off the search for alternative frequencies of the station currently being played.AF off is displayed on the device screen when you switch off.
- Radio Data System (RDS) - Switch the RDS function on/off
RDS Regional: - Switch on/off the automatic tracking of related regional stations

- Fixed - The selected regional station is retained indefinitely. When the signal is lost, another regional station must be set manually.

- Automatic - Auto-selects the station with the best reception at the moment. If you lose reception the region, the unit will automatically set another available region.

- Auto-save station logos - Auto save the station logo according to the PI code of the radio station » page 23

Advanced settings (DAB)

- DAB traffic announcements - Switch on/off DAB announcements

- Other DAB announcements - Switch on/off other announcements (e.g., reports, regional weather, sports reports, financial news)

- DAB - DAB station tracking - Switch on/off automatic DAB station tracking in other station groups

- Automatic DAB - FM switching - Switch on/off auto-switching from DAB to the FM frequency band if the DAB signal is lost

- L-band - Switch on/off the automatic DAB station search in L-band

- Auto-save station logos - Automatic association of the logo with station detected » page 23

DAB programme tracking
If a DAB station is a member of several station groups, when the signal is poor, the same station is searched in a different station group.

Auto-change DAB - FM
If the DAB signal is poor, the unit will try to find a corresponding FM station for the DAB station you are currently listening to.

For auto-change to work, the DAB and FM stations must send a sender ID.

- While the station is received on the FM band, (FM) is displayed after the station name. When the relevant DAB station can be received again the marker disappears (FM).

- If a DAB station is also not available in the FM frequency band due to poor reception, the device will be switched to mute.

- If you do not want automatic station change (e.g. when driving through tunnels, when reception may be lost temporarily), you can deactivate this function.

L-band
Different frequency ranges are used for DAB radio reception in different countries. In some countries the DAB radio reception is only in the so-called L-band.

- If you have any problems with the DAB wireless reception check that DAB Automatic search in L-band is on.

- If there is no DAB radio reception in that country in the L-band, then it is better to leave it off this menu item. The channel scan is faster.
Media

Operation

Introduction

This chapter contains information on the following subjects:

Main menu .................................................. 26
Title-/Folder list .......................................... 26
Playback ...................................................... 27
Media settings ............................................. 27

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The device allows you to play audio files in various formats » page 28 from different data carriers and to connect different source types.

When the source has been connected, the device starts to automatically play audio files in alphabetical order.

Types of device operation » page 7.

The device via the controls.

Via the function keys in the device screen

Via the Maxi DOT display.

Main menu

Note

The function keys listed in the table are different depending on the currently selected menu screen.

### Media settings

Press the function key in the menu Media ".

- **Sound** - Sound settings » page 17, Sound settings
- **Mix/repeat/scan including subfolders** - switching the song playback including subfolders in the following modes Shuffle / Repeat / Automatic play
- **Bluetooth** - Settings for the Bluetooth® function » page 19
- **Video (iPod)** - Parameter settings for a video played by an Apple device (brightness, colour, contrast, format, standard) » page 31
- **Traffic programme (TP)** - Switches traffic programme on/off
- **External AUX device** - Enables / disables the AUX input
- **Remove safely** - safe removal of the connected data carrier
  - SD Card 1 - SD Memory Card 1
  - SD Card 2 - SD Memory Card 2
  - USB 1 - an input disk connected to the USB

### Signal sources

This chapter contains information on the following subjects:

- Supported sources and file formats 28
- Requirements and restrictions 28
- Bluetooth® player 29
- CD 29
- SD memory card 30
- USB-, AUX-inputs 30
- MEDIA IN input 31

---

a) Within 3 seconds after the start of the track playback.
b) 3 seconds after the start of playback of the track.
c) The longer the button is pressed, the faster the fast forward/reverse.
First and foremost, pay attention to the safety instructions » page 4, Important notes.

⚠️ WARNING

■ Never place signal sources close to airbags. Loose objects could hit a deployed airbag and injure occupants – danger of death!
■ Never place signal sources on the dashboard. Loose objects can be thrown forward during a sudden manoeuvre or in case of an accident and can injure the occupants.
■ Do not have signal sources in your hand or on your knees while driving. Loose objects can be thrown forward during a sudden manoeuvre or in case of an accident and can injure the occupants.
■ Always route the connection cable of the external signal source such that does not restrict you when driving.

⚠️ CAUTION

We recommend that you do not store any important data on CD media, Bluetooth® players, to an SD memory card or connected external devices. The ŠKODA Partner is not responsible for losses resulting from the loss of data stored on these media.

⚠️ Note

For some external devices, the setting of the output volume can be changed.

Supported sources and file formats

⚠️ Read and observe ⚠️ and ⚠️ on page 28 first.

Supported audio signal sources

| SD memory card | SD, SDHC, SDXC |
| CD drive | Audio CD (up to 80 min), CD-R and CD-RW (with a capacity of up to 700 MB) |
| USB devices | USB stick, USB MP3 player, HDD (without special software) |
| Specifications for USB devices | USB 1.x and 2.x or higher, supported by USB 2.x (the speed of data transmission then corresponds to the maximum speed of USB 2.x) Max. speed of 480 Mb/s |

Specification Bluetooth® player

| Bluetooth protocols | A2DP and AVRCP (1.0 - 1.3) |

Other external sources

| Portable player (e.g., iPod®, iPAD®, iPhone®, MTP player (MSC)) |

Formats of audio files

| File system | SD memory card | FAT16, VFAT, FAT32 |
| USB stick: | | |
| CD | ISO9660, Joliet (Level 1,2,3), UDF 1.x, UDF 2.x |

| Codec type (File formats) | MPEG-1/2 (Layer-3) | Windows Media Audio 7, 8 and 9 | MPEG-2/4 | WAV |
| File suffix | mp3 | wma | aac | wav |
| Playlists | m3u,pls,wpl,m3u8;asx |

| File properties | Bitrate | max. 320 kb/s |
| Sampling rate | max. 48 kHz |

Pictures on the album covers

| Image resolution up to 500x500 pixels (200 kb) (jpg, jpeg, png, bmp, gif), depending on the availability of album covers are displayed on the respective media |

⚠️ CAUTION

■ At the time of publication, the device has been tested with most products and media available in the various markets up to a size of max. 32 GB. However, it is possible that some external devices, media or files are unreadable or unplayable.
■ The GPT Standards (GUID Partition Table) method structured signal sources are not supported by the device.

Requirements and restrictions

⚠️ Read and observe ⚠️ and ⚠️ on page 28 first.

The name of the artist, the album and the title of the file being played can be displayed if the information is available as an ID3 tag. If no ID3 tag is available, only the folder name is displayed.
For a good playback, we recommend using MP3 compressed files at a bit rate of at least 160 kb/s.

For audio files with variable bitrates, the indicated remaining playback time does not correspond to the actual remaining playback time.

Files that are protected by Digital Rights Management (DRM) technology cannot be played back by the device.

**Bluetooth® player**

Read and observe  and  on page 28 first.

The device makes a wireless connection (coupling) to the Bluetooth® player possible.

For connecting follow the same instructions as for pairing the device with a telephone » page 36.

**Note**

- We recommend adjusting the volume on the portable player to the maximum level.
- The volume can also be adjusted by setting the input sensitivity of the device for the Bluetooth® player » page 17, Sound settings.
- The media functions supported depend on the Bluetooth® player concerned.

**CD**

Inserting/ejecting a CD

- Insert a CD into the CD slot with the label facing up until it is automatically drawn in. Playback starts automatically.
- Press the symbol button △ - the CD is ejected.

If the ejected disc is not taken out within 10 seconds, it will be retracted again for safety reasons. However, the unit will not change to the CD source.

**WARNING**

- The CD/DVD player is a laser product.
- On the manufacturing date, this unit was classified as a class 1 laser product in accordance with the national/international standards DIN EN 60825-1: 2008-05 and DHHS Rules 21 CFR, sub-chapter J. The laser used in this class 1 laser product is so weak that there is no risk of danger when operated correctly.
- This product is designed so that the laser is restricted to the inside of the unit. However, the installed laser could be classified in a higher class were the housing to be removed. For this reason, never remove the housing of the unit.

**CAUTION**

- Be sure to wait until the CD has been fully ejected before you try to insert a new CD. Otherwise you can damage the drive inside the unit.
- Insert into the CD drive only original audio CDs or standard CD-R and CD-RW discs.
- Do not stick anything to the CD!
- Outside temperatures that are either too high or too low might cause the unit to be temporarily unavailable. The unit switches to the last active menu.

**Note**

- After pressing the symbol button △ it takes a few seconds for the CD to be ejected.
- Poor or unpaved road surfaces and severe vibrations may cause the CD to jump.
- The device may be affected by damp (condensation) in cold or humid conditions. This can lead to playback jumps or impair the play function. Wait until the moisture has evaporated if this happens.
- If the CD is physically damaged, is not readable or is inserted incorrectly, the following message is displayed: Error: CD. Check the CD and insert properly into the drive.

**CD slot**

Read and observe  and  on page 28 first.

The CD slot is located in storage compartment on the passenger side external unit » Fig. 18.
It is possible under certain circumstances that copyright-protected CDs and home-burnt CDs will not be played back at all or only in a limited way.

The national copyright laws that apply in your country must be observed.

SD memory card

Insert the SD memory card

Push the SD memory card into the relevant memory card slot with the slanted edge to the right until it "locks into place". Playback starts automatically.

Remove the SD memory card

Press the button → → Remove SD card 1 safely or Remove SD card 2 safely.

Press the inserted SD memory card. The SD memory "card" is ejected to the output position.

Unreadable SD memory card

If there are no readable files on the SD memory card nothing will play.

Due to differing quality requirements from different card manufacturers, it is not always possible to guarantee the playback from SD memory cards.

Some files on the SD memory card or SD memory cards cannot be reproduced or their reproduction may be limited.

CAUTION

Only use SD cards in standard size. When using smaller SD card with the adapter the SD memory card can fall out while driving the vehicle due to vibrations from the adapter.

We recommend using class 4 SD memory cards and higher. This guarantees the fastest possible access to the audio files.

Always store the SD cards in suitable cases to protect them from dirt, dust and other forms of damage.

USB-, AUX-inputs

Read and observe 1 and 2 on page 28 first.

The device allows you to play audio files from USB storage devices, as well as external devices connected to the AUX input.

The USB and AUX inputs are located above the storage compartment at the front of the centre console » Fig. 20.

An external device can be connected to the USB/AUX input either directly or via a connection cable from the ŠKODA range of original accessories.

AUX input

External devices connected to the AUX input cannot be operated from your device.

The standard 3.5 mm jack plug is used for the AUX input. If the external devices do not have this jack plug, you must use an adapter.

Setting the volume control can be changed on the input sensitivity to the AUX input » page 17, Sound settings.
USB input
External audio sources connected to the USB input cannot be operated from your device.
Proceed as follows before removing the USB device:
› Press the button → Remove USB device safely.

Charge USB audio source
With the ignition on after connecting the USB audio source, the charging process is automatically started (applies for audio sources where charging via the USB connector is possible).
The charging efficiency can be different compared to the charging from the usual mains power supply. Connected audio sources can be supplied / loaded with a current of max. 500 mA.
Some connected audio sources may not be recognised and cannot be charged.
The charging of the connected audio source is automatically stopped after switching off the ignition.

**CAUTION**
¬ The AUX input must only be used for audio devices!
¬ If an external device is connected to the AUX input, which is equipped with an adapter for external power supply, the sound may be impaired. This depends on the quality of the adapter which is used.
¬ USB extension cables or adapters may affect the operation of the connected external device.
¬ USB hubs are not supported.

**Note**
When operating as well as connecting the external device, the respective operating instructions are to be observed.

---

**MEDIA IN input**

The device allows you to play audio and video files from an external, device connected to the MEDIA-IN input.
External sources, e.g. Apple devices, which are connected to the MEDIA IN input can be operated via the device.
Extension cables to connect external sources are available from ŠKODA original accessories.

**Sort tracks from a connected Apple device**
› Video (only available if a red-marked adapter is used) - Video playlists, films, music videos, TV shows, video podcasts, rented films.
› Music - Playlists, artists, albums, tracks, podcasts, genres, composers, audio books.

**Video setup**
› Press the button → Video (iPod) button.
¬ Screen – Adjust the brightness, contrast, and colour of the video (standard option for colour adjustment during playback in NTSC)
¬ Format: - Set the screen width/height ratio

---

Some options for the control of an external device may not be supported.
AV standard: 1) Video standard settings
- **Automatic** - Automatic selection of the standard
- **PAL** - Select the coding standard for the PAL colour signal (phase alternating line)
- **NTSC** - Select the coding standard of the NTSC color signal

**Note**
- Some control options for the Apple device, such as the rating of songs or the assignment of the title of an "on-the-go" playlists are not supported.
- Some control options for the Apple device or the video playback are supported only by using a red-marked extension lead.
- After switching the ignition off and on again, the video playback will not be restored from an Apple device.
- For safety reasons, the video display is switched off at speeds over 5 km/h. The unit continues to play the soundtrack.
- Setting the volume control can be changed on the input sensitivity to the MEDIA IN input » page 17, *Sound settings*.

---

1) The same standard must be selected in the external source. An incorrectly adjusted AV standard can result in inadequate playback quality. The unit outputs no picture at all, or only renders it in black and white.
Phone

Communication

Telephones and two-way radio systems

Introduction

This chapter contains information on the following subjects:

Introductory information 33
Main menu 34
Problems with the Telephone function 34
Phonebox 35
Settings 35

The Telephone menu is available when the following conditions are met.
✓ The ignition is switched on.
✓ The Bluetooth® function on the device is switched on.

After the device is switched on, the system attempts to connect to the most recently connected mobile phone.¹

If a telephone is connected to the device and the device is turned off, the connection to the phone is not dropped. The connection is lost after switching off the ignition (for vehicles with KESSY system after switching off the ignition and opening the driver’s door).

⚠️ WARNING (Continued)

■ Never leave a mobile phone on a seat, on the dashboard or anywhere, from which it can be thrown during a sudden braking manoeuvre, an accident or a collision - risk of injury. Use storage compartments with lid or the multimedia holder for safe storage » Vehicle Owner’s Manual, chapter Practical equipment.

■ Before transport of the vehicle by air, the Bluetooth® function must be switched off by a specialist company.

⚠️ CAUTION

■ In areas with no signal and possibly in tunnels, garages and subways a telephone conversation can be interrupted and no telephone connection can be established - not even in an emergency!

■ The range of the Bluetooth® connection to the hands-free system is limited to the vehicle interior. The range is dependent on local factors, e.g. obstacles between the devices and mutual interferences with other devices. If your mobile phone is in a jacket pocket, for example, this can lead to difficulties when establishing a connection with the device or transferring data.

Introductory information

Read and observe ⚠️ and ⚠️ on page 33 first.

The device allows for a wireless connection to the mobile phone. Your mobile phone can be operated from this unit.

ŠKODA permits the operation of mobile phones and two-way radio systems with a professionally installed external aerial and a maximum transmission power of up to 10 watts.

Please ask at a specialist workshop about installing and operating mobile phones and two-way radio systems that have a transmission power of more than 10 W.

Operating mobile phones or two-way radio systems may interfere with the functionality of the electronic systems in your vehicle.

⚠️ WARNING

■ The national regulations for using a mobile phone in a vehicle must be observed.

■ If a mobile phone or a two-way radio system is operated in a vehicle without an external aerial or an external aerial which has been installed incorrectly, this can increase the strength of the electromagnetic field inside the vehicle.

■ Two-way radio systems, mobile phones or mounts must not be installed on airbag covers or within the immediate deployment range of the airbags.

¹ With some phones, it is necessary to set the connection to the device as “authorised” in order for the automatic connection to be successful. If this is not set, the system will prompt you for a confirmation each time you attempt to connect to the mobile phone.
The reasons for this are as follows:
> no external aerial;
> external aerial incorrectly installed;
> transmission power greater than 10 watts.

**Note**
- We recommend that the installation of mobile phones and two-way radio systems in a vehicle be carried out by a specialist garage.
- The phone features depend on the mobile network operators and on the phone being used. Further information is available from the mobile network operator or refer to your phone manual.
- In signal-free areas reception can be interrupted or the call disconnected.
- Most modern electronic equipment is shielded from RF signals. In exceptional cases, electronic equipment may not be shielded against the RF signals and telephone service may be disrupted.

### Main menu

![Main menu image](image)

**Explanation of graphic**
- **A**: Name of the mobile network provider
- **B**: Click on name of the connected phone, press to open a list of paired phones
- **C**: Speed dial favourite telephone numbers » page 39
- **D**: Direct entry of a telephone number » page 39
- **E**: Display the telephone book » page 40
- **F**: Display of call list (if there are new missed calls, the symbol will appear with information about the number of missed calls) » page 41
- **G**: Menu settings for the Telephone » page 35

### Call up the main menu
Press the [PHONE] button.

If a mobile phone is connected to the device, the **Telephone** » Fig. 22 main menu is displayed.

### Symbols in the display

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Symbol" /></td>
<td>Charge status of the telephone battery</td>
</tr>
<tr>
<td><img src="image" alt="Symbol" /></td>
<td>Signal strength</td>
</tr>
<tr>
<td><img src="image" alt="Symbol" /></td>
<td>Roaming (before the name of the mobile network provider)</td>
</tr>
<tr>
<td><img src="image" alt="Symbol" /></td>
<td>Missed call</td>
</tr>
<tr>
<td><img src="image" alt="Symbol" /></td>
<td>Current call</td>
</tr>
</tbody>
</table>

*This function is only supported by some mobile phones.*

### Problems with the Telephone function

If there are problems with the availability of the network or with the Bluetooth® function, the following messages appear on the device display screen.

<table>
<thead>
<tr>
<th>Message</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Netw. search...</td>
<td>The mobile phone searches for available GSM networks.</td>
</tr>
<tr>
<td>No network</td>
<td>The mobile phone is not connected to the GSM network.</td>
</tr>
<tr>
<td>Rejected by network.</td>
<td>The mobile phone network operator has rejected the connection (e.g. not enough mobile phone credit, SIM card blocked, roaming not available).</td>
</tr>
<tr>
<td>To use the Bluetooth function, please switch the ignition on.</td>
<td>Switch on the ignition.</td>
</tr>
<tr>
<td>Please switch on Bluetooth.</td>
<td>Switch on the Bluetooth® function.</td>
</tr>
<tr>
<td>No Bluetooth devices paired.</td>
<td>Connect the mobile phone with the device.</td>
</tr>
</tbody>
</table>
At the bottom of the storage compartment in the front centre console there is an induction plate connected to the GSM roof antenna - the Phonebox.

**Function**
When the mobile phone is inserted into the Phonebox, the phone signal increases in strength by about 20%. This reduces the level of phone battery discharge and the electromagnetic radiation inside the vehicle.

**Inserting the mobile phone into the Phonebox**
- Press on the edge of the lid [A] in the direction of the arrow, and open the storage compartment.
- Place the mobile phone in the storage compartment [B] with its back on the induction panel.
- Pull on the edge of the lid [A] in the opposite direction to the arrow, and close the storage compartment.

The Phonebox cannot be used as an alternative to connecting the mobile phone with the device.

**WARNING**
For safety reasons, the storage compartment must always be closed when driving.

**CAUTION**
- Protective cases or cases around the mobile phone placed in the storage compartment may interfere with the phone signal strength.
- Metallic objects such as coins or keys under the mobile phone can affect the phone signal strength.
Select ring tone - Select the ring tone if the connected mobile phone does not support the in-band ringing function.
Show pictures for contacts - Switch on/off the display of the image assigned to the contact in the telephone.

Connect to the mobile phone

Introduction

This chapter contains information on the following subjects:
- Conditions for successful pairing
- Connect device with your mobile phone
- Pairing mobile phone with device
- Connection with another paired mobile phone
- Switch Bluetooth® profile on/off
- Clear mobile phone from the list of paired devices
- Disconnection

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The device is displayed in the telephone to be connected to as SKODA BT... is replaced with the last four symbols of the VIN code of your vehicle.
You can change the name of the device » page 19.

WARNING
The unit may require confirmation of certain features in the mobile phone when pairing. The pairing process therefore does not take place while driving - danger of accident!

Note
- The maximum number of phones registered is 20. When the maximum number of coupled telephones has been reached, the next one will cause the paired telephone that has not been used for the longest to be automatically deleted.
- In some countries, the use of phones with the Bluetooth® function may be restricted. Further information can be obtained from local authorities.

The range of the Bluetooth® connection to the hands-free system is restricted to the vehicle interior. This depends on local conditions and on interference with other devices.
When pairing from the mobile phone, follow the instructions in the owner’s manual of the mobile phone.

Conditions for successful pairing

Read and observe 1 on page 36 first.

To connect a mobile phone with the device, the two devices must be paired.

Prerequisites for successful pairing:
- The ignition is switched on.
- The Bluetooth® function for the mobile phone » page 19 is switched on.
- The visibility of the mobile phone is switched on » page 19.
- The paired phone to which the connection is being made must have no active connection to another mobile phone.

The pairing can be initiated from the device or from the mobile phone.

Connect device with your mobile phone

Read and observe 1 on page 36 first.

A phone is paired with the device

After switching on the unit, the system automatically attempts to connect to the last connected mobile phone.

While the connection is being created, the message in the device screen may vary depending on the phone type... Would you like to connect? And a menu will appear with the following function keys.

Connect - Pairing confirmation
Cancel - Cancel the pairing process

If the connection cannot be established the system will attempt to connect to other previously connected phones one by one.
If there is still no connection, start a phone search.

1) The in-band ringing function makes it possible to use the ring tone of your phone as the ring tone.
2) This function is only supported by some mobile phones.
There is no phone paired with the device.
After switching on the ignition, the message **Please search for and connect a mobile telephone.** appears in the device screen. A menu is also displayed with the following function keys.

- **Find telephone** - Search for available phones with activated Bluetooth® Function and visibility
- **G** - Open the settings menu » page 35, Settings

Press **Results** function key after completion of the search. It will display a list of discovered phones (the function key is also available during the search).

Select the phone you want from the list.

If the search fails, check that the conditions for successful pairing are met » page 36, **Conditions for successful pairing** and repeat the whole process.

**Pairing confirmation**
Depending on the phone's Bluetooth® version, pairing is confirmed in one of the following ways.

- In the device and the phone within 30 seconds, confirm the 6-digit PIN code on the device screen and the phone display.
- If necessary select in the phone the option of automatically connecting the phone to the device.

or

- Confirm the connection request in the telephone.
- Enter the 4-digit PIN code shown in the unit display into the mobile phone within 30 seconds.
- If necessary select in the phone the option of automatically connecting the phone to the device.

**Connection**
After successful connection, the device will display the message **... user is connected.** And the main **Phone** menu » Fig. 22 on page 34 is then displayed.

**Note**
If the mobile phone supports the Bluetooth® profile A2DP or AVRCP, your mobile phone might prompt you to pair the phone as a Bluetooth® player.

---

1) For devices with Bluetooth® v2.1 and later, the phone's quick coupling procedure (SSP Secure Simple Pairing) is used for pairing. This coupling method requires no PIN entered by the user.
2) The name of the device will be found in the Bluetooth® settings » page 19.
3) For devices with Bluetooth® v2.1 and later the rapid device pairing procedure (SSP Secure Simple Pairing) is used for pairing. This connection method requires no PIN entered by the user.
Connection with another paired mobile phone

Read and observe 1 on page 36 first.

If you want to connect the device to another paired mobile phone, the existing connection does not have to be terminated. The connection to the existing mobile phone is automatically terminated by connecting to another mobile phone.

In the Phone main menu, press the function key \[ \text{B} \] » Fig. 22 on page 34. A list of previously paired phones is displayed.

Select the paired mobile phone to be connected with the device. The message ... Replace this connection with ...?, is displayed in the device screen along with the following function keys.

Cancel - Quit the menu for telephone exchange
Replace - Connection to the selected phone

After successful connection, the device will display the message ... user is connected. and then the main menu » Fig. 22 on page 34 is displayed.

If the desired phone is not found in the list of previously paired phones, pair the phone with the device» page 36.

Switch Bluetooth \(^*\) profile on/off

Read and observe 1 on page 36 first.

Press \[ \text{a} \] Press → Bluetooth → Paired devices.

A list of paired devices is displayed.

Pressing the function key on the connected Bluetooth \(^*\) device opens a menu with possibly supported connection profiles on the selected device.

If you press the function key with the name and symbol of the connection profile depending on the context, the message ... Disconnect the profile - are you sure? appears in the device screen and a menu of function keys.

Disconnect - press the function key to switch off the selected profile.

or

Replace - If another phone is already connected to the device it is replaced by a new profile by pressing the function key of the existing profile.

In the device screen the message ... Connection with: ... connecting... is displayed and the selected Bluetooth \(^*\) profile is turned on.

In each menu, the profile change is cancelled by pressing the Cancel function key.

Possible profile symbols:

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>( \text{0} )</td>
<td>Devices that support the functionality of the hands-free system (Bluetooth(^*) profile HFP)(^a)</td>
</tr>
<tr>
<td>( \text{1} )</td>
<td>Devices that are connected to the device via Bluetooth(^*) profile HFP(^a)</td>
</tr>
<tr>
<td>( \text{2} )</td>
<td>Bluetooth(^<em>) players (Bluetooth(^</em>) profiles A2DP and AVRCP)(^b)</td>
</tr>
<tr>
<td>( \text{3} )</td>
<td>Bluetooth(^<em>) player connected to the unit via Bluetooth(^</em>) profiles A2DP and AVRCP(^b)</td>
</tr>
</tbody>
</table>

\(^a\) HFP is a Bluetooth\(^*\) profile which supports the functionality of the hands-free system.

\(^b\) A2DP and AVRCP are Bluetooth\(^*\) profiles which support multimedia functions.

If a Bluetooth \(^*\) device is already connected to the device via one of the profiles in that the profile has been switched on on another device, the profile of the active device ends and switches to the new selected device.

Only the newly selected profile is switched to. The other profiles remain connected to the original device.

Several phones (or Bluetooth \(^*\) devices) can be coupled to the device but only one can be actively connected via the HFP profile and one via the A2DP or AVRCP profile.

Clear mobile phone from the list of paired devices

Read and observe 1 on page 36 first.

The function key \[ \text{a} \] Press → Bluetooth → Paired devices.

A list of paired devices and the following function keys is displayed.

Delete all - Delete all the phones in the list of paired devices
Delete - Delete the desired telephone

After selecting one of the function keys, the following function keys are displayed.

Cancel - Cancels the delete process
Delete - Confirmation of the delete process
Disconnection

Read and observe 1 on page 36 first.

The connection of a mobile phone to the device can be disconnected in one of the following ways.

› By removing the ignition key (or switching off the ignition and opening the driver’s door in vehicles with the KESSY system).
› By disconnecting the device or switching off the Bluetooth® function on the mobile phone.
› By switching off the Bluetooth® function in the device » page 19, Bluetooth® settings.
› By removing the phone from the list of paired devices » page 38, Clear mobile phone from the list of paired devices.
› By switching off the Bluetooth® HFP profile » page 38, Switch Bluetooth® profile on/off.

Telephone functions

Introduction

This chapter contains information on the following subjects:

- Speed dialling a phone number 39
- Direct entry of a phone number 39
- Phone book 40
- Call-lists 41
- Telephone conversation 41
- Conference 41

First and foremost, pay attention to the safety instructions » page 4.

Speed dialling a phone number

You can use the speed dial function keys ▶ Fig. 22 on page 34 to dial previously assigned telephone numbers instantly.

There are five function keys available.

Assign telephone number to a contact

› Press a speed dial function key ▶ Fig. 22 on page 34 that is not assigned.

The unit displays the phone book.

Select assigned telephone number for a contact

› Press the desired function key to speed dial the phone number of a contact ▶ Fig. 22 on page 34.

Change assigned telephone number of a contact

› Press and hold down the desired speed dial function key ▶ Fig. 22 on page 34.

You can also make the change in the Telephone menu » page 35.

Remove phone number of a contact

› Press the symbol button → User profile → Press Manage favourites.

Direct entry of a phone number

» Fig. 24

A screen appears to enter the phone number » Fig. 24.

› Tap one of the contact numbers for the desired telephone contact.

The assignment of the contact telephone number to a function key for the speed dialling is also possible in the telephone menu settings » page 35.

You can also make the change in the Telephone menu » page 35.
You can select the following functions:

- Delete the digit
- *Dial the entered number*
- Add a prefix 1) if this option has been set in the telephone settings » page 35
- Entering a number using the voice control » page 13

**Mailbox** Select mailbox if its number is entered in the phone settings » page 35 or enter the number directly.

The input screen also functions as an alphanumeric keypad that you can use to search for contacts in the phonebook.

For example, if you enter 32, the unit will display contacts with the letter sequence DA, FA, EB, etc.

Select the desired contact by pressing the corresponding function key.

**Phone book**

› Press  the button.

The device phone book has up to 2000 free memory locations for imported phone contacts. Each contact can contain up to 5 telephone numbers.

The phone book can also be called during an ongoing call.

After successful pairing, the contacts are imported 2).

**Loading the directory**

Upon first connection of the mobile phone with the device, the system begins to download the phone book from the phone and from the SIM card 4) into the device memory 5). Depending on the number of contacts this may take several minutes to complete.

---

1) If not number is entered, the last dialled number will be displayed after you press the symbol key.

2) If the add-prefix option is switched on but the prefix is not entered in the phone settings, the last dialled number will be displayed in the input field after you press the symbol button. The last number dialled. If the prefix defined and a number is entered in the input line, press the symbol key to add the prefix is added in front of telephone number and connection starts.

3) In some phones you need to confirm import of contacts to the device.

4) Some mobile phones do not support downloading of contacts from the SIM card.

5) This function is only supported by some mobile phones.

If the phonebook downloaded from the mobile phone contains more than 2000 contacts, loading is stopped and the message **Contacts not completely imported** appears on the screen. Only contacts that have already loaded are available and these are in the menu.

The first 200 contacts along with the contact data, including the picture associated with the contact, are downloaded to the device memory 6).

If an error occurs while loading the phone book, the message **Import failed. Please try again and check whether the BT device ... allows connections.**

**Update phonebook**

Each time the mobile phone has established a new connection with the device, the relevant phonebook will be updated.

During the update, the phone book which was stored after the last completed update will be available. Newly stored telephone numbers are only shown after the updating has ended.

The update can be performed manually » page 35 Import contacts.

**Find contact**

Press the button *Find* to open the input screen with keypad to search in the phonebook » page 8.

**Select contact**

Press the function key with one of the displayed contacts to start dialing.

Where a contact contains several telephone numbers, the system displays a menu containing the telephone numbers for the contact.

**Contact details**

Press the function key with the symbol > the contact details are displayed.

Press the function key with the indicated phone numbers to start dialing.

Press the function key with the symbol and the contact will start the route guidance.
The call log displays information about telephone calls.

In the main menu, press the phone function key ➤ » Fig. 22 on page 34.

Explanation of graphic

A  Sorting the call list
  ➤ All - List of all calls
  ➤ Missed calls - List of missed calls
  ➤ Dialled nos. - List of dialled numbers
  ➤ Received calls - List of received calls
B  Dial a number with a defined prefix ➤ page 35, Settings
C  Processing the telephone number before dialing
D  Display the contact details

Press the function key for a desired contact or telephone number to start dialing.

Telephone conversation

Outgoing call
While connecting, the screen displays the phone number or contact name. And the following function can be selected:

- Stop dialing

Incoming call
During the ring tone of the incoming call, the screen displays the phone number or contact name. And the following functions can be selected:

Answer the incoming call
Mute the ringer
Restore ringer
Reject the incoming call
Display caller details

Current call
During a current call, the screen displays the phone number or contact name and the call duration. Depending on the context, the following functions can be selected:

Hold a call
Continue call
Deactivate the microphone
Activate the microphone
End call
Display caller details

Conference
The conference is a shared call with between three and six participants.

Start a conference/invite additional participants
➤ During a call or conference, make the next call.
_or_
➤ Press when receiving a new incoming call ➤ the button.

During a conference
During an ongoing conference call, the call duration is displayed on the screen. Depending on the context, the following functions can be selected:

Hold a conference - Leave the conference temporarily (the conference continues in your absence)
Return to the held conference
Deactivate the microphone
Activate the microphone
End a conference call
Meeting details

The button is only functional when the contact is stored in the phone book.
Conference details
During a conference, press the conference symbol to display a list of other conference participants. The following functions can be selected depending on the type of telephone:

- View participant details
- Talk to a participant separately from the conference
- End the call to a conference participant
Navigation

Description of the navigation system

Preface to navigation

Introduction

This chapter contains information on the following subjects:
Main menu 43
Navigation data 44

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The unit uses the GPS (Global Positioning System) satellite system for navigation. The satellite signal allows you to determine your current vehicle position.

If the unit is outside the range of the GPS satellite signal (e.g. in dense vegetation, in tunnels, parking garages, etc.), the unit navigates only with restrictions using on-vehicle sensors.

Navigation is done:
› by graphical instructions in the device screen and Maxi DOT display;
› via voice guidance.

The navigation unit can be operated:
› using the buttons on the unit » page 43;
› using the function keys in the unit screen » page 43;
› using voice control » page 13.
› on the MAXI DOT display » page 12.

WARNING

■ Information about traffic lights, stop and right of way signs, parking and stopping restrictions as well as lane constrictions and speed restrictions is not taken into account for navigation by the unit.
■ Always adjust the driving speed to the road, traffic and weather conditions.
■ The navigation announcement provided may vary from current situations, e.g. due to road works or out-of-date navigation data.
■ The volume should be adjusted to ensure that acoustic signals from outside, e.g. sirens from vehicles which have the right of way, such as police, ambulance and fire brigade vehicles, can be heard at all time.

CAUTION

In some countries, some unit features can no longer be selected when the vehicle is running faster than a certain speed. This is not a malfunction, but complies with the national legal regulations.

Main menu

Fig. 26 Main menu Navigation

Read and observe 1 and 2 on page 43 first.

Press NAV.

The last opened navigation menu opens.

If a menu other than the main menu » Fig. 28 on page 46 is opened, the main menu can be opened by pressing NAV again.

Function keys of the navigation menu:

<table>
<thead>
<tr>

</tr>
<tr>
<td></td>
<td>Setting the navigation menu » page 44</td>
</tr>
</tbody>
</table>
Navigation data

You received the SD memory card with navigation data together with the unit.

For the navigation system to function correctly, the card must be inserted in the SD2 slot » Fig. 27 for the entire navigation procedure.

Insert a memory card » page 30.

Data update

The navigation data should be updated at regular intervals.

Navigation data is subject to constant changes (such as new streets, changes of street names and house numbers), and this can become out of date over time. For this reason, the guidance may be inaccurate or incorrect.

For more information on updating the data, please visit the ŠKODA website or contact a ŠKODA Partner.

The version of the navigation data for maps can be found in the navigation settings → Version information.

Card has been damaged or lost

If the SD memory card with the navigation data has been damaged or lost, a new card can be obtained from ŠKODA original accessories. The navigation data can be loaded only on the original card.

Navigation settings

Introduction

This chapter contains information on the following subjects:

Main menu settings 44
Route options 44
Map 45
Fuel options 45
Navigation announcements 45
Advanced settings 45
Sort contacts, enter home address and delete destinations 46

First and foremost, pay attention to the safety instructions » page 4, Important notes.

Main menu settings

Call up the main menu

› In the Navigation main menu, press the button.

- Route options - Set the parameters for route calculation » page 44
- Map - Settings for the map display » page 45
- Fuel options - Select preferred fuel station, switch on/off reminder of low fuel level warning with the possibility to find the nearest fuel station » page 45
- Nav. announcement - Set navigation announcements » page 45
- Advanced setup - Display additional information » page 45
- Manage memory - Sort contacts, enter your home address, and delete destinations » page 46
- Import destinations - Import custom destinations previously prepared » page 53
- Version information - View the current version of the navigation data

Route options

› In the Navigation main menu, press → Route options

44 Navigation
- Suggest 3 alternative routes - Switch on/off manual selection of the route type (economical, fast, short) » page 57
- Route: - Automatic selection of the preferred route type (manual route selection is switched off)
  - Economical - Calculate the most economical route with shortest travelling time and distance travelled - displayed in green
  - Fast - Calculate the fastest route to the destination, even if a detour is necessary - displayed in red
  - Short - Calculate the shortest route to the destination, even if a longer travelling time is required - displayed in orange
- Dynamic route - Switch on/off dynamic route calculation using TMC traffic reports » page 59
- Avoid motorways - Switch on/off the use of motorways in the route calculation
- Avoid ferries and motorail trains - Switch on/off avoidance of ferries and motorail trains
- Avoid toll roads - Switch on/off the use of toll roads in the route calculation
- Avoid tunnels - Switch on/off the use of tunnels for which tolls have to be paid in the route calculation
- Avoid routes requiring toll stickers - Switch on/off the use of roads requiring road tax disk display (with a valid road tax disk) in the route calculation
- Available toll stickers - Displays the list of roads requiring road tax disk display

Map

- In the Navigation main menu, press ➤ Map.
  - Day/Night: - Selection of map display colour
    - Day - coloured
    - Night - in shades of grey
  - Automatic - Map with light or dark coloured background; the background changes once you turn on the lights (does not apply to daytime running lights)
  - Autozoom - Switch on/off the automatic zoom in/out of the map display while driving » page 47
  - Show traffic signs - Switch on/off the display of traffic signs
  - Select categories for POIs - Select POIs to be displayed in the map from a list of available POIs (max. 10 POIs) » page 55
  - Show brands for POIs - Switch on/off the display company logos at the POIs

Show favourites - Switch on/off the display of favourites
- Lane guidance - Switch on/off the display of a window with the recommended lane for complicated intersections » page 58

Fuelling options

- In the Navigation main menu, press ➤ Fuel options.
  - Select preferred fuel station - Selects your preferred fuel station brand (the selected station brand will be displayed on the first positions of the list of nearest fuel stations found)
  - Fuel warning - Switch on/off the display of the warning message for low on fuel Warning: fuel tank almost empty. Would you like to find a fuel station nearby? If the message appears in the unit screen, the system offers the following features:
    - Cancel - Close the window with the warning
    - Find - Search for the nearest fuel station

Navigation announcements

- In the Navigation main menu, press ➤ Nav. announcement.
  - Volume - Set the volume of the navigation announcements
  - No voice guidance during call - Switch on/off navigation announcements during a telephone call (using a phone connected to the hands-free system » page 33)

Advanced settings

- In the Navigation main menu, press ➤ Advanced setup.
  - Time display: - Select the time to be displayed in the status line
    - Time of arrival - displays the expected time to destination
    - Travelling time - Display the expected travelling time to the destination
  - Status line: Status line - Display information about your selected destination in the status line
    - Destination - Display information about the length and duration of the guidance to the destination
    - Stopover - Displays information about the length and duration of the guidance to the stopover
  - Note: national border crossed - Switch on/off the display of the information window with speed limits when crossing the national border
  - Demo mode - Switch on/off guidance in demo mode

Description of the navigation system 45
Define demo mode starting point - Enter the starting point for preliminary route calculation in demo mode
- Cancel - Cancel the entry
- Position - Select the current vehicle position as the starting point
- Address - Select an address as the starting point

Sort contacts, enter home address and delete destinations

➢ In the Navigation main menu, press Press → Manage memory

➢ Sort by:
- Sort contacts downloaded from a connected telephone
- Surname - Sort by contact name
- Name - Sort by contact first name
- Define home address - Display/enter/edit the home address
- Current position. Current position - Set the home address to the current position
- Address - Enter a new address » page 52. If the home address has already been entered, the following is displayed:
  - Reduces map display
  - Enlarges map display
  - Edit - Edit the home address
- Delete user data - Select the data to be deleted (the selected data is deleted by pressing Delete)
  - Last destinations - Delete the list of last destinations
  - Destination memory - Delete the list of stored destinations
  - Entered towns - Delete the list of entered towns
  - Home address - Delete the set home address
  - Flag destinations - Delete the flag destination

Map operation

Introduction

This chapter contains information on the following subjects:

Introductory information .......................................................... 46
Map display settings ................................................................. 46
Operation .................................................................................. 47
Traffic signs .............................................................................. 47

First and foremost, pay attention to the safety instructions » page 4, Important notes.
Operation

Moving the map
The map can be moved in any direction by touching it with your finger and
dragging it on the screen in the desired direction.

Changing the scale
› with the menu button [2] » Fig. 1 on page 5;
› by touching the screen with two fingers and pulling the fingers together or
apart

Function keys and map display symbols

<table>
<thead>
<tr>
<th>Button</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>☏</td>
<td>2D map display - the map rotates and the direction of travel arrow [C] » Fig. 28 on page 46 points to the top of screen, or the north is aligned with the top edge of the screen, and the arrow [C] shows the direction of travel</td>
</tr>
<tr>
<td>☥</td>
<td>3D map view - the direction of travel arrow [C] » Fig. 28 on page 46 points to the top of the screen (if the map scale is larger than 100 km, the map is aligned to the north).</td>
</tr>
<tr>
<td>☥</td>
<td>By touching, the map is aligned with the vehicle position (for example, the function key is displayed when moving the map)</td>
</tr>
<tr>
<td>☥</td>
<td>The number located below the symbol indicates the elevation</td>
</tr>
<tr>
<td>☥</td>
<td>By pressing the button, the map scale is reduced for a few seconds and then reset to the original scale (quick view)</td>
</tr>
<tr>
<td>☥</td>
<td>Display the manually set map scale</td>
</tr>
<tr>
<td>☥</td>
<td>Display the automatic map scale</td>
</tr>
<tr>
<td>☥</td>
<td>Switch auto-zoom on/off during route guidance. Active auto-zoom is indicated by a green symbol. If Autozoom is active, the map scale will change automatically, depending on the driven route (motorway trip: large map scale - city: small map scale)</td>
</tr>
</tbody>
</table>

Auto-zoom is only functional when the map is aligned with the vehicle position (the function key with symbol ☥ with the symbol).

Traffic signs

The traffic sign display can be switched on in the unit screen » page 45.
The system provides the option of displaying the traffic signs [B] » Fig. 28 on page 46 on the screen which are stored in the navigation data of the maps.

If the Traffic signs split screen is not switched on, only one traffic sign is displayed on the unit screen.

Switching on the traffic sign display function » page 45.

Only one traffic sign is displayed without the additional signs in the screen outside the split screen » page 49.

Extra window

Introduction

This chapter contains information on the following subjects:

Menus in extra window
Audio
Compass
Manoeuvre
Traffic signs
GPS

First and foremost, pay attention to the safety instructions » page 4, Important notes.

Menus in extra window

Depending on the context of the selected menus, additional information is displayed in the split screen.

Switching on
› In the Navigation main menu, press [NAV].
or
› In the Navigation main menu, press ☥ → Split screen.
The last opened split screen is displayed.
Switching off

› In the Navigation main menu, press  NAV.

or

› in the split screen on  the button.

or

› In the Navigation main menu, press  → Split screen.

Menus in the split screen

- Audio - Playback operation of the currently selected audio source » page 48
- Compass - Displays the current vehicle location in relation to the compass directions » page 48
- Manoeuv. - Display of the next or following navigation announcement (manoeuvre) » page 49
- Traffic - Display of traffic signs which are stored in the navigation data of the maps » page 49
- GPS - Displays the geographical coordinates of the current vehicle location » page 49

Audio

Fig. 29
Split screen: Audio

In the Audio split screen, the playback of the currently selected audio source can be operated » page 21.

Description of the function keys

<table>
<thead>
<tr>
<th>Button</th>
<th>Action</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Press</td>
<td>Play / pause: Playback is paused at the current location and the symbol changes to . Playback continues after re-tapping the play from this point</td>
</tr>
<tr>
<td></td>
<td>Press briefly (within 5 seconds of the start of playback of the track)</td>
<td>Plays the previous track from the start</td>
</tr>
<tr>
<td></td>
<td>Press briefly (5 seconds after the start of playback of the track)</td>
<td>Plays the current track from the start</td>
</tr>
<tr>
<td></td>
<td>Press button for a long period of timea</td>
<td>Fast-reverse of the track</td>
</tr>
<tr>
<td></td>
<td>Press briefly</td>
<td>Plays the next track from the start</td>
</tr>
<tr>
<td></td>
<td>Press button for a long period of timea</td>
<td>Fast-forward of the track</td>
</tr>
</tbody>
</table>

a) The longer the button is pressed, the faster the fast forward/reverse.

Compass

Fig. 30
Split screen: Compass

The Compass split screen displays the current vehicle position in relation to the compass.
Manoeuvre

The next or following navigation announcement (manoeuvre) is displayed in the Manoeuv. split screen.

Displayed information:
› Direction of the navigation instruction;
› Street name or street number of the current position;
› Street name or street number of the displayed navigation instruction;
› Distance to the city with the following navigation instruction including numeric indication of the remaining distance or graphically with decreasing bars of the navigation instruction.

Traffic signs

The Traffic signs split screen displays traffic signs.

Up to three traffic signs and three additional traffic signs can be displayed.

If the message No traffic signs available. is displayed in the split screen, the navigation data did not recognise any traffic sign or you are outside the range of the navigation data.

Further information » page 47.

GPS

The GPS (Global Positioning System) split screen displays information on the current geographical position of the vehicle.

Displayed information

- Longitude
- Latitude
- Elevation
- Satellites: Number of received/available satellites

1) In order to display the information regarding the geographical longitude and latitude of the current vehicle position, the GPS signal has to be received from at least three satellites.
2) To display information about elevation above sea level of the current vehicle position, the GPS signal of at least five satellites must be received. Also, the route guidance must not be running in demo mode.
Navigation

New destination entry

Introduction

This chapter contains information on the following subjects:

Destination entry options ........................................... 50
Address ........................................................................ 50
Map ............................................................................. 51

First and foremost, pay attention to the safety instructions » page 4, Important notes.

Destination entry options

Make sure that the destination has been entered correctly, for example, by checking that the destination is displayed in the map. Some names of places and other destinations can occur at several places.

Address

Explanation of graphic

- Country
- City / town
- Street
- Enter building number (the function key is enabled only after the street has been entered)
- Enter junction (the function key is enabled only after the street has been entered)
- Return to the higher-level menu
- Delete characters in the entry lines
- Switch to letters » page 8
- Switch to special characters
- Input a junction (crossroads)
- Confirmation of text entered into the entry line

- In the Navigation main menu, press \( \text{Options} \rightarrow \text{Address} \) button.

or

- In the Navigation main menu, press \( \text{New dest./stopover} \rightarrow \text{Options} \rightarrow \text{Address} \) button.

or

- In the Navigation main menu, press \( \text{Other POIs} \rightarrow \text{Address} \) button.
In the **Navigation** main menu, press → Other POIs → Options → Address.

Some address positions are already pre-filled with the data of the last destination.

The pre-filled positions can be adjusted by touching the item and then adjusting it in the input screen » page 8.

To start navigation, you need to enter country, city and street.

When entering the street, instead of a street name, it is possible to select the centre of the entered city by touching **Centre**. Then it is no longer necessary to enter the house number or junction.

Both the house number and also a further address supplement in the form of a number can be entered. The system displays a list of destinations found from combinations of the two numbers.

If the entered house number was not found, a menu opens to clarify the destination:

- **No house number** - Enter an address without a house number and display a menu with destination details
- **Nearest house number**: Confirmation of the proposed house number
- **Enter junction** - Open a menu with junctions with the selected street

If the address is entered correctly, destination details are displayed » page 60.

---

**Map**

![Map](image)

**Fig. 36  Destination entry in the map**

In the **Navigation** main menu, press → Other POIs → Options → On map.

or

In the **Navigation** main menu, press → New dest./stopover → Options → On map.

Entry on the map is also used for entering the search area for POIs » page 53.

In the **Navigation** main menu, press → Other POIs → Search area → Select on map → Edit.

The destination can be entered on the map by using the GPS coordinates or the crosshairs » Fig. 36.

**GPS coordinates**

The destination can be entered through the degrees of latitude and longitude (GPS coordinates).

By pressing the function button with the degree of latitude or longitude for the location, a menu appears with the specification option. Use the function keys with the symbol / . Touching the screen outside of the function buttons calls up a basic menu for entering the location on the map.

The crosshairs move to the coordinates entered, which allows for checking of the destination entered.

**Crosshairs**

The crosshairs show the position of the address which was previously entered.

The desired destination can be set by dragging your finger over the map to the centre of the crosshairs.

The contact point is moved into the crosshairs through the finger movement and at the same time the degrees of latitude and longitude are adjusted to the point entered.

The symbol displays the current map scale. This can be changed while the entry is being made » page 47.

The bottom of the screen displays the address or the longitude and latitude of the selected item.

**Confirm destination**

Confirm the destination by touching **OK**. Then the following items are displayed:
Entry of saved destinations

Introduction

This chapter contains information on the following subjects:

My destinations .......................................................... 52
Home address ............................................................ 52
Own destination (vCard) ............................................... 53

First and foremost, pay attention to the safety instructions » page 4, Important notes.

My destinations

The menu is used to select the type of destinations stored in the unit memory » Fig. 37.

Fig. 37 My destinations menu

1) This function is only supported by some mobile phones.
The home address is also available in the main navigation menu, by pressing the symbol key ~ Manage memory → Define home address.

**Own destination (vCard)**

You can import custom destinations in vCard format from an SD memory card, a CD/DVD or a USB storage device into the device.

› In the Navigation main menu, press ~ Import destinations.

A list of possible data import sources is displayed » page 26, Select signal source.

Select the source and confirm the menu item Import all vCards from this folder to start importing the data stored in vCard format into the device memory.

**POI**

📖 Introduction

This chapter contains information on the following subjects:

- Entry of a new POI .......................................................... 53
- Search area for POIs ...................................................... 53
- Find and select a POI .................................................... 54
- Quick select a POI .......................................................... 54
- Search selection near the location, destination, stopover and along the route .......................................................... 54
- Search near the entered address or near the point entered on the map .......................................................... 55

First and foremost, pay attention to the safety instructions » page 4, Important notes.
First select a search area for the POI.

In the main menu, to enter a new POI, press 1 » Fig. 38 on page 53.

Depending on the context, the following search options 2 » Fig. 38 on page 53 can be displayed.

**Find and select a POI**

The POIs are searched for in the selected search area » page 53.

**Search option: » Fig. 38 on page 53**

3. Search by the entered POI name » page 8
4. Search by the selected POI category » page 55

The menu with the found destinations is displayed when the search has finished. The menu is sorted by the distance to the specified search area and includes a maximum of 200 entries found.

Confirm a menu item to display details » page 60.

**Quick select a POI**

In the Navigation main menu, press / the button.

**Speed dial menu**

P   Car park
†   Restaurant
§   Fuel station

When you touch a menu item, a list of the nearest POIs in the selected category is displayed.

By selecting a menu item in the list of the selected POIs, the POI details is displayed.

**Explanation of graphic**

A  Near current location - Near current vehicle position
B  Near destination - Near the destination
C  Near stopover dest. - Search near the stopover
D  Along the route - Search along the route
E  Near address - Near the entered address
F  Select on map - Near the point entered on the map

Fig. 40 Search area for POIs

**Search selection near the location, destination, stopover and along the route**

A  Country
B  City
C  Street

The menu items displayed in the search area are for information only and cannot be changed.

The figure applies to the following search-area options near 1 » Fig. 38 on page 53.

- Near current location - Current position
- Near destination - Destination
- Near stopover dest. - Stopover
- Along the route - Route

Touch 3 or 4 » Fig. 38 on page 53 to start the POI search for the selected search area.

54  Navigation
Search near the entered address or near the point entered on the map

Fig. 41 POI search: near the entered address entered/near the entered map point

Explanation of graphic
- Country
- City
- Street
- touch to open a screen to enter a point on the map » page 51
- Country
- City
- Street

The figure applies to the following search area options » Fig. 38 on page 53.
- **Near address** - Searches in the vicinity of the entered address
- **Select on map** - Searches in the vicinity of the entered map point

The displayed menu items searched by address entry can be changed.

The menu items searched by map point entry are for information only and cannot be changed.

Touch 3 or 4 » Fig. 38 on page 53 to start the POI search for the selected search area.

---

**POI categories**

**Introduction**

This chapter contains information on the following subjects:

- **Car and travel** ........................................ 55
- **Dining and shopping** ................................. 56
- **Businesses and public facilities** ................... 56
- **Emergencies** ........................................... 56
- **Attractions and leisure** .............................. 56
- **Other destinations displayed in the map** .......... 56

**First and foremost, pay attention to the safety instructions » page 4, Important notes.**

The map screen can display symbols for the destination type name.

- **Select all** - Displays a list of all destinations in the search area, with the nearest POI listed at the top
- **Categories (alphabetical)** - Displays all POI categories in alphabetical order
  - **Car and travel**
  - **Dining and shopping**
  - **Companies and public services**
  - **Emergencies**
  - **Attractions and leisure**

### Route guidance

#### Introduction

This chapter contains information on the following subjects:

- Route calculation
- Graphic navigation instructions
- Navigation announcements
- Route
- Lane guidance

First and foremost, pay attention to the safety instructions » page 4, Important notes.
Route calculation

The route is calculated automatically according to the entered destination. The calculation takes the settings of the route options » page 44 (route type, dynamic route, etc.) into account.

The route is recalculated each time if you ignore driving recommendations or change the route. This process takes only a few seconds. Navigation announcements can only then be re-transmitted.

If Demo mode is switched on » page 45, a prompt appears asking whether you want the guidance to start in demo mode or normal mode.

The Demo mode displays a simulated drive to the destination entered. There is the option of travelling the calculated route "as a simulation" just on the screen.

If an alternative route option is set, function keys are displayed, following the calculation, for the route types with information on the route length and the expected travelling time.

Route type

- economical
- fast
- short

Selecting the route type will start route guidance.

If the option for alternative routes is disabled, the route is calculated and route guidance is started according to the preferred route » page 44.

It is possible to select a pre-calculated route before the calculation of the remaining routes is completed.

The unit tries to allow for continued guidance even if the navigation data is incomplete or there is no data at all for the given area (e.g., one-way streets, road types, etc.).

Interrupt and continue route guidance

If the ignition is switched off and on again and the key was left in the ignition (in vehicles with the KESSY system, when the ignition was switched off):

- Within 30 min - route guidance is continued taking into account the calculated route
- Between 30 and 120 min - the screen switches to "standby mode" (energy-saving mode of the screen); the unit screen displays the message Continue route guidance?; after you confirm the message, the route guidance continues using the calculated route
- After 120 min - route guidance is cancelled.

If ignition is switched off and on again and the key removed temporarily (in vehicles with the KESSY system, ignition switched off and the driver’s door opened):

- Within 10 min - route guidance is continued taking into account the calculated route
- Between 10 min and 120 min - the screen switches to "standby mode" (energy-saving mode of the screen); the unit screen displays the message Continue route guidance?; after you confirm the message, the route guidance continues using the calculated route
- After 120 min - route guidance is cancelled.

Graphic navigation instructions

The graphical navigation instructions are displayed:

- in the MAXI DOT display » page 12.
- in the split screen in the unit screen » page 49.

Navigation announcements

The device makes navigation announcements. The navigation announcements are started as soon as the route calculation is complete or a route type has been selected.

The navigation announcements are generated by the instrument system. The lawless clarity of the message (e.g., road or city name) cannot always be guaranteed.

Before turning, up to 3 recommendations are issued:

The last navigation announcement can be repeated:

- by pressing the menu knob [2] » Fig. 1 on page 5
- by pressing the dial [2] » Fig. 9 on page 12 on the multifunction steering wheel.

The timing of the navigation announcement is dependent on the type of road and the driving speed. For example, on motorways the first announcement is given about 2000 m (6000 ft) before the place where you want to exit the motorway.
During dynamic route guidance, the unit notifies the driver of traffic problems. When a new route is being calculated due to traffic problems, the announcement Calculating the route... sounds.

Set the output volume of the navigation announcements or mute it during a phone call » page 45.

**Route**

When there is a calculated route to the destination, the recommended route is displayed.

› In the Navigation main menu, press the button.

**The following menu is displayed:**

- **Stop route guidance** - Stops route guidance
- **New dest./stopover** - Enter a new destination or add a destination to the calculated route » page 50 or » page 60
- **Route information** - Display information about the destination and the calculated route (setup of information displayed » page 45)
  - □ - Arrival time at destination/stopover
  - ◇ - Remaining travelling time to destination or stopover
  - ◆ - Remaining travelling distance to destination or stopover
- **Store destination** - Stores the destination on the input screen » page 8
- **Route list** - Display the list of route sections
- **Congestion ahead** - If you hear of a traffic problem (e.g. congestion), you can enter this traffic problem manually. After entering, the device recalculates and provides an alternative route. Get traffic queue information by touching the scale, with ◇ or by turning the menu button on page 5.

**Lane guidance**

![Lane guidance](image)

The screen can display lane recommendations on a split screen in guidance mode at some intersections, highway junctions, multi-lane roads, or similar A » Fig. 42.

This split screen with the lane recommendation will be displayed only if information about the traffic area is available in the navigation data.

Switch function » page 45 on/off.

**Traffic reports**

- **Introduction**

This chapter contains information on the following subjects:

  - Operation ___________________________ 59
  - Switch dynamic route on/off ___________________________ 59
  - Detailed traffic reports ___________________________ 59

The road is getting busier. For this reason, information about the current road and traffic conditions will gain in importance.

TMC traffic reports are used to optimise the route during route guidance when there are traffic disruptions.

---

1) If the time of arrival or remaining travelling time is greater than 24 hours, ◇ is displayed inside the symbol.
The device can obtain this information by using the following facilities:

- Traffic TP in the FM frequency range  » page 23  .
- TP in the DAB frequency range
- TMC traffic report with dynamic adjustment of the current route option

For the correct TMC function, the following conditions are required:

- The vehicle is within range of the FM RDS-TMC.
- Adequate and uninterrupted signal reception of a traffic report station ¹  .
- Current navigation data in the device.

**Operation**

TMC (Traffic Message Channel) is a digital data service emitted by the radio station for continuous transmission of traffic information.

- Press [TRAFFIC] to display a list of traffic reports **Traffic report */...*/...**

Touch one of the traffic report entries to display traffic report details » page 59.

If a TMC traffic radio station is available for current location, the TMC traffic reports are updated continuously in the background. The station you are listening to does not have to be a TMC station.

The reception of TMC traffic reports is always switched on and cannot be turned off.

The accuracy of the dynamic route guidance depends on the transmitted traffic reports. The radio stations broadcasting this information are responsible for the content.

TMC traffic reports can only be evaluated and saved by the radio navigation system when navigation data are available for the driven area.

**Switch dynamic route on/off**

- In the **Navigation** main menu, press ➔ → **Route options** → **Dynamic route**.

Traffic reports influence dynamic route guidance by means of TMC reports when the **Dynamic route » page 44** function is switched on.

**Dynamic route switched on**

Information on traffic problems received via TMC which affect the route are displayed in the map by means of a coloured symbol (e.g., 🔄, 🖩, 🚸, etc.). Traffic problems, which do not affect the route, are displayed in the map by means of a grey symbol. The direction in which a traffic problem is found, is displayed by means of an arrow in the symbol.

**Dynamic route switched off**

You are not alerted to received traffic disruptions along your route and are guided through the traffic disruption by the radio navigation system. The traffic reports are updated automatically in the unit and displayed by pressing the button [TRAFFIC].

If one of the announced traffic disruptions lies along your route, you can also switch on the dynamic route guidance during the current route guidance or block the route manually » page 58.

**Note**

Making a diversion from a traffic jam based on TMC traffic reports may not always offer a time advantage, e.g. if the diversion route is also congested.

**Detailed traffic reports**

After pressing the [TRAFFIC] button, a screen appears with the following information:

- All function key - Display of all traffic reports
- Function key **Route** - Display of only the traffic reports on the current route
- Map showing the traffic obstruction
- Window with a description of traffic report:
  - Location of event location, accuracy depends on how up-to-date the navigation data is
  - Description of up to three events related to the respective information
  - Description of the direction with respect to the event
  - Probable duration of the event
  - Additional information, such as probable delay time
  - Information line, which reports on the currency of the message and the provider;
  - Symbol specifying the type of information
  - - zoom in window with described traffic obstruction

---

¹ For vehicles with disc antennas, if the discs are obscured with film or metal-coated stickers, you may experience interference.
Stopover

It is possible to add a stopover to the route during route guidance. Route guidance then occurs first to the stopover. After the stopover has been reached, route guidance is continued.

In the Navigation main menu, press \( \text{New dest./stopover} \) to open a menu for entering a new destination » page 50.

If route guidance is available, after entering the stopover the system displays the message *Would you like to add a new stopover destination or start direct route guidance?* and the following items:

- **Cancel** - Cancels the stopover destination input and destination guidance to the original destinations is continued
- **Replace** - The original stopover is replaced with the destination entered and destination guidance is initially undertaken to this destination while the final destination remains unchanged
- **Dir. r. guid.** - The destination entered is added as the final destination and the original destinations are replaced by this new destination

If you would like to use the stopover as the final destination and the original final destination as a stopover, then select the **Dir. r. guid.** input and then input the original final destination again as a stopover.

Destination details

The following information and functions are displayed in the destination details:

- Preview map with indication of the destination by means of the symbol \( \text{Destination icon} \)
- Detailed destination information
- \( \text{ Reduce preview map display} \)
- \( \text { Enlarge preview map display} \)

The following function keys are displayed, depending on the target type.

- **New destination or a destination stored in the list of last destinations**

The menu is closed by pressing \( \text{Step} \) if this destination is not in the destination memory.

- **Start** - Starts route calculation
- **Route opts.** - Displays a menu for setting the route parameters » page 44
- **Store** - Store the destination in the destination memory » page 8

Destination in destination memory

The menu is closed by pressing \( \text{Step} \) if this destination is in the destination memory or the favourites list.
- **Edit** - Edit the stored destination
  - **Favourite** - Add or remove the destination to/from the list of favourites
  - **Delete** - Delete the destination
  - **Store as** - Edit the name and then store the destination » page 8
  - **Route opts.** - Displays a menu for setting the route parameters » page 44
  - **Start** - Starts route calculation

**POI**
The menu is displayed:
- by touching the menu item in the list of found POIs;
- by touching the POI symbol on the map.

- **Dial No.** - Start a phone call 1) (if a phone is connected via Bluetooth® and the destination has been entered including the contact telephone number)
- **Start** - Start route calculation » page 57
- **Store** - Store the destination in the destination memory

In the POI details of the individual POIs can be found by tapping in the list of found POIs on or by finger motion across the screen.

**Home address**
The menu is displayed after the home address has been entered.
- **Store** - Save the home address in the unit memory

---

1) This function is only supported by some mobile phones.
Vehicle systems

Vehicle settings

Introduction

This chapter contains information on the following subjects:

Selection of travel mode (Driving Mode Selection) 62
Vehicle data 63
Auxiliary heater and ventilation 64
ESC-and ASR systems 64
Tires 64
Assistance systems 65
Parked and manoeuvring 66
Light 66
Mirrors and wiper 66
Openings and closing 66
Seats 66
Multifunction display 67
Service 67
Restore factory settings 67
Climatronic settings 67

First and foremost, pay attention to the safety instructions » page 4, Important notes.

Settings relating to the vehicle systems can only be made when the ignition is switched on.

Note

The individual systems are described in the » Vehicle Owner's Manual.
If the functions of some systems are disabled, some functions, such as parts of the ESC system, are switched on again automatically for security reasons, after switching the ignition off and on.

Selection of travel mode (Driving Mode Selection)

The menu for the selection of the driving mode allows you to select one of the driving modes (Normal, Sport, Eco, Individual).

If a driving mode other than Normal is selected, then the symbol or » Fig. 44 lights up in the button.

The currently selected driving mode is displayed in the info field in the main menus next to the icons » Fig. 49 on page 67 (top left).

Call up the main menu

Press the button or » Fig. 44.

- Normal - Activate Normal mode
- Cancel - Cancel the menu to select the driving mode
- Information - Information concerning the mode settings
- Normal - Normal
- Sport - Sports

First and foremost, pay attention to the safety instructions » page 4, Important notes.

Settings relating to the vehicle systems can only be made when the ignition is switched on.

Note

The individual systems are described in the » Vehicle Owner's Manual.
If the functions of some systems are disabled, some functions, such as parts of the ESC system, are switched on again automatically for security reasons, after switching the ignition off and on.
- **Engine**: Set the engine (drive) characteristics
  - **Normal** - Normal
  - **Sport** - Sports
  - **Eco** - Economical
- **ACC**: Set the vehicle acceleration when adaptive cruise control is activated
  - **Normal** - Normal
  - **Sport** - Sports
  - **Eco** - Economical
- **Dynamic bend light**: Set the characteristics of the adaptive headlights
  - **Normal** - Normal
  - **Sport** - Sports
  - **Eco** - Economical
- **Air conditioning**: Sets the Climatronic characteristics
  - **Normal** - Normal
  - **Eco** - Economical
- **Reset mode**: Setting for all menu items in the Individual mode to Normal
  - **Cancel** - Keep the current settings
  - **Reset** - Set all menu items to Normal

**Note**
If you do not operate the unit for longer than approx. 10 seconds in the "Select driving mode" menu, it will switch to the last selected menu or switch itself off.

---

### Vehicle data

![Vehicle data screenshot](image)

**Fig. 45  Driving data / vehicle status**

**Explanation of graphic**

- **A** Distance travelled
- **B** Driving time
- **C** Average speed
- **D** Average fuel consumption
- **E** Approximate range
- **F** Range (if the estimated range is less than 300 km, the vehicle starts to approach the symbol)
- **G** Vehicle representation (the zones of the vehicle are shown in different colours, corresponding to any warning messages that occur. The warning messages are displayed once you touch vehicle)

**Call up the main menu**

› Press the button ➤ ➤ ➤ ➤

- **Driving data** - Display travel data
  
  You can display one of three trip memories on the screen » Fig. 45.
  
  - **Since start** - Driving data for the individual trip
  - **Long-term** - Long-term driving data
  - **Since refuelling** - Data since last refuelling

Switching between the individual driving data storage locations can be done by using the function keys ➤ ➤ ➤ ➤

---

**Fig. 46  TPMS - Display example: the system indicates a tire pressure change on the rear right**

---

**Vehicle systems** 63
Convenience consumers - Displays up to three consumers which have the largest share of fuel consumption and displays the fuel consumption to run all convenience systems

Vehicle status - Displays vehicle status » Fig. 45 or tire pressure monitoring information

Vehicle status - Display vehicle status information
- ✓ - No message / ✓ - warning messages relating to vehicle status or number of messages (if there is only one message, one warning message text is displayed)
- 🚧 - Display information about the status of the START-STOP system
- TPMS - Function of the tire pressure monitor » Fig. 46
- ⊗ SET - Storage of the tire pressure values

Switching between the individual menus can be done by using the function keys ⬅ ➚ .

Note
After pressing the button 🚹 the last displayed view from the menu is shown ➚ .

Auxiliary heater and ventilation

Call up the main menu
› Press the button SETUP on the Climatronic control panel ➚ .

or
› Press the button 🚹 → ➚ .

Set-up
A Departure time: Day and time when the vehicle is to be ready for use » Fig. 47
B Heating/ventilation: Set the operating mode
C List of pre-selected times, activation / deactivation of the preset time
D Set the preset times 1 to 3 and the duration (10 - 60 minutes)
E when heating the windows are shown in red / with continuous aeration, the windows are shown in blue

› Only one preset time can be active. The activated preset time will be deactivated again after it has started automatically. For the next start, activate one of the preset times.
› The system in operation switches off on expiration of the operating duration or can be deactivated by pressing the icon III for direct on / off switching or via radio remote control.

Note
- In the selection of the day in the preset time, there is an option between Sunday and Monday without the specified day. If this position is selected, the vehicle will be ready for use at the selected time, regardless of the current day.
- If a different time is set » page 18, Time and date settings, the activated preset time is automatically deactivated. The preset time must be reactivated.

ESC-and ASR systems

› Press the button 🚹 → ➚ → ESC system:
- Activated - Switch on all components of the ESC system
- ASR off - Switch off the ASR system
- ESC sport - Activation of ESC Sport

Tires

› Press the button 🚹 → ➚ → Tyres:
- TPMS - Tire pressure monitoring function
- ⊗ SET - Storage of the tire pressure values
- Winter tyres - Set the speed limit for winter tires
- Speed warning - Snow tires speed warning on/off
- Warning at - Sets the speed for the warning
Assistance systems

Press the button ↘ ↗ Driver assistance.

- **ACC (adaptive cruise control)** - Sets the adaptive cruise control
- **Driving programme**: Set the vehicle acceleration when adaptive cruise control is activated
  - **Normal** - Normal
  - **Sport** - Sports
  - **Eco** - Economical
- **Last distance selected** - Last selected distance on/off
- **Distance**: Set the distance monitoring to the vehicles ahead
  - **Very close** - Very small distance
  - **Close** - Small distance
  - **Medium** - Medium distance
  - **Far** - Large distance
  - **Very far** - Very large distance
- **Front Assist** - Sets the assistant for monitoring the distance to the vehicles ahead
- **Active** - Activate/deactivate the assistant
- **Advance warning** - Activate/deactivate advance warning
- **Display distance warning** - Activate/deactivate distance warnings
- **Lane Assist** - Settings for Lane Assist
- **Active** - Activate/deactivate the assistant
- **Adaptive lane guidance** - Activate/deactivate adaptive lane guidance
- **Driver Alert System** - Activate/deactivate the driver alert system
- **Proactive passenger protection** - Activate/deactivate proactive passenger protection

Parking and manoeuvring

Press the button ↘ ↗ Parking and manoeuvring.

- **ParkPilot** - Settings for the parking aid
  - **Activate automatically** - Activate/deactivate the compact parking aid display (when driving forward)
  - **Front volume** - Adjust the volume of the beeps for obstacle detection in front
  - **Front tone setting** - Setting the pitch of the beeps for obstacle detection in front
  - **Rear volume** - Set the volume level of the beeps for the rear obstacle detection

---

This can be set in the menu on vehicles with travel mode selection option » page 62, Selection of travel mode (Driving Mode Selection).
**Rear tone setting** - Setting the pitch of the beeps for the rear obstacle detection

**Audio lowering:** - lowering the volume of the speakers (audio)
- **Off** - No volume reduction of the sound from speakers
- **Weak** - weak volume attenuation of sound from speakers
- **Medium** - medium volume attenuation of sound from speakers
- **Strong** - Strong volume attenuation of sound from speakers

**Note**
The compact display of the parking aid can be switched to a full screen view by touching the screen within the display.

### Light

› Press the button  →  → Light.

- **Light assistance** - Setting of outdoor lighting
- **Dynamic Light Assist** - Switch on/off the head light assist function
- **Switch-on time:** - Set the sensibility of the light sensor against the change in intensity of the ambient light
  - **Early** - High sensitivity
  - **Medium** - Medium sensitivity
  - **Late** - Low sensitivity
- **Automatic headlight control in rain** - Activate/deactivate automatic headlight control in rain
- **Daytime running lights** - Activate/deactivate daytime driving lights
- **Lane change flash** - Activate/deactivate lane change flashing
- **Travel mode:** - Travel mode on/off
  - **R-hand traffic** - For right-hand traffic
  - **L-hand traffic** - For left-hand traffic
- **Interior lighting** - Sets the interior lighting
- **Instrument/switch lighting** - Set the brightness of the instrument/switch lighting
- **Footwell lighting** - Set the brightness of the footwell light
- **Coming/Leaving Home function** - Set the COMING HOME/LEAVING HOME function
  - **Coming Home function** - Sets the period that the lights remain on after you leave the vehicle (0 - 30 seconds; 0 = function deactivated)
  - **Leaving Home function** - Sets the period that the lights remain on after you unlock the vehicle (0 - 30 seconds; 0 = function deactivated)

### Mirrors and wiper

› Press the button  →  → Mirrors and wipers.

- **Mirrors** - Adjust the mirrors
  - **Synchronous adjustment** - Activate/deactivate synchronous mirror adjustment
  - **Lower while reversing** - Activate/deactivate the lowering of the front passenger mirror
  - **Fold in when parked** - Activate/deactivate folding the mirror via the remote control key or by using the sensor in the handle (KESSY)
- **Wipers** - Adjust the windscreen wipers
  - **Automatic wiping in rain** - Activate/deactivate automatic automatic rear window wiping
  - **Automatic rear wiper** - Activate/deactivate automatic rear window wiping

### Opening and closing

› Press the button  →  → Opening and closing.

- **Window operation** - Window operation settings
  - **Conven. opening:** - Set the convenience opening feature
  - **All windows** - All windows
  - **Driver window** - Driver's window only
  - **Off** - Deactivate intelligent opening
- **Central locking** - Settings for opening and closing of doors
  - **Door unlocking:** - Set the door unlocking feature
  - **All doors** - All doors
  - **Single door** - Driver's door or driver's or passenger door with KESSY system
  - **Vehicle side** - Doors on the driver's side or on the driver's or passenger's side with KESSY system
- **Automatic locking** - Activate/deactivate automatic locking when starting off
- **Acoustic confirmation** - Activate/deactivate acoustic signals when locking/unlocking the vehicle with an anti-theft alarm system

### Seats

› Press the button  →  → Seats.
■ **Store seat position** - Save the driver's seat position and exterior mirror position in the remote control key when locking the vehicle

■ **Vehicle key activated** - Activate/deactivate storing the driver's seat position and exterior mirror position when locking the vehicle

### Multifunction display

➤ Press the button [□] → [痧] → **Multifunction display**.

In this menu it is possible to hide/show the appearance of the menu items in the instrument cluster multifunction display and reset the driving data.

■ **Current consumption** - Display of current fuel consumption on/off

■ **Average consumption** - Display of average fuel consumption on/off

■ **Refuel quantity** - Display of refuel quantity on/off

■ **Convenience consumers** - Display of fuel consumption of convenience consumers on/off

■ **Eco tips** - Display of tips for economical driving on/off

■ **Travelling time** - Display of travelling time on/off

■ **Distance** - Display of distance travelled on/off

■ **Average speed** - Display of average speed on/off

■ **Digital speed display** - Display of current speed on/off

■ **Speed warning** - Winter tyres warning on/off

■ **Oil temperature** - Oil temperature on/off

■ **Reset Since start driving data** - Reset the trip memory in the device screen and in the display of the instrument cluster

■ **Reset Long-term driving data** - Reset the long-term memory in the device screen and in the display of the instrument cluster

### Service

➤ Press the button [□] → [痧] → **Service**.

■ **Vehicle no.** - Display of the vehicle identification number

■ **Inspection: --- / ---** - Number of km/days remaining until the next service event

■ **Oil change service: --- / ---** - Number of km/days remaining until the next engine oil change

### Restore factory settings

➤ Press the button [□] → [痧] → **Factory settings**.

In this menu you have the possibility to reset the menu items in the settings of the vehicle systems to factory settings.

■ **All settings** - Restoration of the settings all menu items

■ **Driver assistance** - Restoration of the driver assistance menus

■ **Parking and manoeuvring** - Restoration of the Parking and manoeuvring menu items

■ **Light** - Restoration of the light menus

■ **Mirrors and wipers** - Restoration of the Mirrors and wipers menu

■ **Opening and closing** - Restoration of the Opening/closing menu items

■ **Multifunction display** - Restoration of the Multifunction display menus

If one of the above menu items is selected, the system will ask you whether you really want to restore the settings.

■ **Cancel** - Return to higher-level menu

■ **Reset** - Restore the settings

### Climatronic settings

In the Climatronic menu the system displays the desired temperature for the driver’s side and front passenger side » Fig. 49.

Depending on the desired temperature, the airflow from the air outlet vents is shown in blue (temperature under 22 °C) or red (temperature above 22.5 °C).

When using Climatronic in automatic mode, the lettering **AUTO** is shown on the screen.

**Call up the main menu**

➤ Press the button [□] on the Climatronic control panel.

■ **Air con. profile: ...** - Set the Climatronic operating mode

■ **ON/OFF** - Switches Climatronic on/off

■ - Set the auxiliary heater and ventilation » page 64
- Settings for Climatronic
  - **Air con. profile:** Set the Climatronic operating mode
    - **Light** - Low power, quiet operation
    - **Medium** - Base power
    - **Strong** - High power
  - **Automatic air recirculation** - Automatic recirculated air mode on/off
  - **Automatic supplementary heater** - Quick interior heating on/off
  - **Automatic windscreen heating** - Activates/deactivates the automatic windscreen heating

**Note**
- If you do not operate the unit for longer than 10 seconds in the "Climatronic" menu and Climatronic was not switched on before the Climatronic menu was opened, the unit will switch itself off.
- If you switch off the automatic mode of Climatronic by increasing or reducing the fan speed, the coloured display of the airflow from the air outlets will not be displayed.
