Infotainment Radio Swing
Operating instructions
Structure of this Owner's Manual (explanations)

This Owner's Manual has been systematically designed to make it easy for you to search for and obtain the information you require.

Chapters, table of contents and subject index

The text of the Owner's Manual is divided into relatively short sections which are combined into easy-to-read chapters. The chapter you are reading at any particular moment is always specified on the bottom right of the page.

The Table of contents arranged according to chapter and the detailed Subject index at the end of the Owner's Manual help you to rapidly find the information you are looking for.

Direction indications

All direction indications such as "left", "right", "front", "rear" relate to the direction of travel of the vehicle.

Units of measurement

All values are expressed in metric units.

Explanation of symbols

Denotes a reference to a section with important information and safety advice in a chapter.

Denotes the end of a section.

Denotes the continuation of a section on the next page.

Denotes a registered trademark.

Examples of the information listed in the Owner's Manual

Press the button -> Sound.

This information indicates that you must first press the button and then select and confirm the menu.

The "→" symbol indicates the next step.

Example of the menu, the available menus, menu items or functions.

- The first menu level
- The second menu level
- The third menu level
- The first menu level

Notes

WARNING

The most important notes are marked with the heading WARNING. These WARNING notes draw your attention to a serious risk of accident or injury.

CAUTION

A Caution note draws your attention to the possibility of damage to your vehicle (e.g. damage to gearbox), or points out general risks of an accident.

For the sake of the environment

An Environmental note draws your attention to environmental protection aspects. This is where you will, for example, find tips aimed at reducing your fuel consumption.

Note

A normal Note draws your attention to important information about the operation of your vehicle.
You have chosen a ŠKODA vehicle, which is fitted with an Infotainment Radio Swing (hereafter called the unit) - we thank you for your confidence in us.
The new operating concept allows you to configure vehicle settings and to operate some electronic systems centrally from the unit.

In addition to this Owner's Manual, please also carefully read the Vehicle Manual, because operation in accordance with these instructions is a prerequisite for proper use of the vehicle.

If you have any questions about your device, please contact a ŠKODA Partner.

Your ŠKODA AUTO a.s. (hereinafter referred to as ŠKODA)

This chapter contains information on the following subjects:

Declaration of Conformity .................................................. 4
Warning messages ............................................................ 4

This Owner’s Manual describes all possible equipment variants without identifying them as special equipment, model variants or market-dependent equipment.

Consequently, this vehicle does not need to contain all of the equipment components described in this Owner’s Manual.

The level of equipment of your vehicle refers to your purchase contract of the vehicle. More information is available from the ŠKODA Partner1 where you bought the vehicle.

This guide is meant only as a supplement to the information contained in the operating instructions of the vehicle. Therefore, they can be used only in conjunction with the latest manual for this vehicle. For a detailed description of some functions listed in these instructions, see the Vehicle Manual for your vehicle.

The illustrations can differ in minor details from your unit; they are only intended for general information.

**WARNING**
- Concentrate fully at all times on your driving! As the driver you are fully responsible for the operation of your vehicle.
- Only use the device in a way that ensures that you are in full control of your vehicle in every traffic situation - there is a risk of accident!
- Adjust the volume to ensure that acoustic signals from outside, e.g. sirens from vehicles which have the right of way, such as police, ambulance and fire brigade vehicles, can be heard at all time.
- High volumes can cause hearing damage.

---

1) Terms used » manual, chapter Preface.
Warning: battery low. Please start the engine or switch off the infotainment system. - The vehicle battery is low, it is recommended to switch off the device or to start the engine.

Battery almost empty. The Infotainment system will be switched off. - The vehicle battery is discharged, the unit switches itself off.

Operating temperature not maintained. The Infotainment system will be switched off. - The device temperature is too low or too high, the device switches itself off.

Unit overview

Introduction

This chapter contains information on the following subjects:

Description of the device 5
Touch screen 6
Switching the unit on/off 6
Adjusting volume 6

First and foremost, pay attention to the safety instructions » page 4, Important notes.

This chapter deals with the unit, the unit’s buttons and their functions. It also covers switching the unit on and off, the main menus and adjusting the volume on the unit.

Description of the device

1 - Control for switching on/off; volume adjustment
2 - Menu button for calls and confirmations
3 - Menu Radio » page 16
4 - Menu Media » page 20
5 - Depending on equipment fitted
   › Mute - Mute
   › Telephone - Menu Telephone » page 27
6 - Unit settings » page 12
7 - Sound settings » page 13
8 - Vehicle systems settings » page 37
9 - SD memory card slot » page 25
10 - Touch screen » page 7
**Touch screen**

The unit is equipped with the so-called resistive (pressure / resistance) touch screen.

The function keys on the screen can be operated by a light finger pressure to the screen surface.

---

**CAUTION**

- The screen can only be operated by a slight touch of a finger. With too much pressure, the screen can be damaged.
- Do not use any objects to operate the screen, which could damage the screen surface.
- Solvent based cleaners can damage the screen surface.
- Use a soft cloth and, if necessary, methylated spirits, to remove fingerprints from the screen. When doing so, ensure that you do not cause damage to other parts of the interior.

---

**Note**

- To protect the screen, a suitable protective film for touch screens can be used.
- The brightness level can be set » page 13, Screen settings .

---

**Switching the unit on/off**

› The unit is switched on or off by briefly pressing the on/off knob ③.

When the device is switched on, the audio source and operating mode that were active before switching off the device will be restored.

If Telephone mode was active before you switched off the unit and the ignition and Bluetooth® function is not switched on, the screen displays the message » page 28, Problems with the Telephone function. Switch on the ignition or the Bluetooth® function» page 14, Bluetooth® settings .

If the vehicle key is pulled out of the ignition lock while the unit is switched on, the unit will switch off automatically. After switching on the ignition, the unit is turned on automatically.

If the device was switched off using the ③ knob, then the device will not switch on automatically after switching on the ignition.

The unit will switch off automatically after the engine is switched off and the door is opened if the vehicle is fitted with the KESSY system. If you open the driver's door before switching off the engine, the device will also switch off.

When the ignition is switched off, the device switches off automatically after approx. half an hour (discharge protection of the vehicle battery).

---

**Adjusting volume**

**Increase the volume**

› Turn the ③ knob to the right.

**Reduce the volume**

› Turn the ③ knob to the left.

**Muting**

› Press the key Mute or turn the knob ③ to the left and set the volume to 0.

If something is being played over the media at the time of reducing the volume with the adjustment knob ③ to 0 then what is being played over the media is paused.

---

**CAUTION**

- High volumes can cause sound resonance and sound distortion in the vehicle.
- The car speakers may be damaged if the volume is set too loud.

---

**Note**

- The change in volume is displayed on the screen.
- The following symbol appears in the display when the sound is muted : ．
- The speakers in the vehicle are matched for the power output of the device.
Introduction

This chapter contains information on the following subjects:

- Operation ........................................... 7
- Alphanumeric with keyboard .......................... 8
- Numerical keyboard .................................. 8

First and foremost, pay attention to the safety instructions » page 4, Important notes.

This chapter covers the instrument operation and the work with the touch screen and with various types of input keyboards.

Operation

<table>
<thead>
<tr>

<td></td>
</tr>
</tbody>
</table>

Function keys

Screen areas which confirm a function or a menu are called “function keys”.

Function keys with a white background are active and selectable.

Function keys with a green background represent currently selectable functions or menus.

Function keys with a grey background are inactive and therefore not selectable.

Status line

In some menus a status bar located at the top of the screen shows the time and outdoor temperature along with other information.

Selecting menu/menu item/function

- Drag your finger over the screen in the required direction
- Turn the menu knob [2] » Fig. 1 on page 5.

Confirming menu/menu item/function

- Touch the function key with your finger
- Press the menu knob [2].

Returning to higher-level menu

- by pressing the function key ☐.
- By pressing the relevant button next to the screen;
- By touching the screen outside of the "pop-up window" with your finger.

Open submenu of a function

- by pressing the function key ∨ opens a "pop-up window" with a function menu.

Switching function on/off with "checkbox"

- ☑ or ☐ - Function is switched on
- ☐ or ☑ - Function is switched off

Set value

- Is achieved by touching the function keys with the symbols ∨ ∧ < > +.
- By touching or moving your finger over the scale.

Note

For some menus or menu items, the current setting is displayed, e.g. Distance: Km ... or distance: ... mi.
In the function key the number of matching selected entries will be displayed. A list of related items the characters entered will be opened by pressing this button.

The numbers 1-99 indicate the quantity of matching entries that were found. If more than 99 entries are found, then instead of a number the symbols are shown . If less than 4 entries are found, a list of the found entries is shown automatically.

### Numerical keyboard

![Input screen with numeric keypad](image)

The numerical keyboard is mainly used for entering numbers, e.g., in the phone menu. 

### Description of the numerical keyboard

- **A** - Input line
- **↑** - Return to the higher-level menu
- **gni** - Delete characters in the entry line
- **→** - Toggle upper case to lower case and vice versa
- **ABC** - Switch to letters

### Operation through the MAXI DOT display

**Introduction**

This chapter contains information on the following subjects:

- Operate with the control lever buttons
- Operating the audio menu using the buttons / dials on the multifunction steering wheel
- Operation of the telephone menu via the buttons / dials on the multifunction steering wheel

First and foremost, pay attention to the safety instructions.
Some of the device's features are also displayed in the MAXI DOT display. Depending on the equipment they can be operated with the lever or the buttons / dials on the multifunction steering wheel.

**Note**
The buttons and wheels on the multifunction steering wheel will also be lit if the ignition and the side light are switched on.

---

### Operate with the control lever buttons

**Fig. 5**
Buttons on the control lever

### Operating the audio menu using the buttons / dials on the multifunction steering wheel

**Fig. 6**
Multifunction steering wheel - Audio menu

The separate menus and menu items displayed in the MAXI DOT display can be operated as follows with the buttons on the control lever.

**Functions of the buttons on the control lever**

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

---

The information displayed in MAXI DOT display

- **Radio**
  - current radio station frequency band.
  - currently playing station of receivable radio stations in the given frequency band if less than 5 are receivable.
  - if more than 5 stations can be received, a list of receivable radio stations is displayed with an option to choose one of them.
  - TP traffic announcements.

- **Media**
  - Title.

---

The display in the MAXI DOT is described in the » Manual, chapter Information system.

</tr>
</tbody>
</table>

<sup>a</sup> The sound is turned on again by pressing wheel 2 or turning wheel 2.

Telephone call function in the MAXI DOT display

Depending on the context, you can select the following functions:

- **Incoming call**
  - Answer - Accepting a call
  - Reject - Rejecting a call
  - Ignore - Muting the ring tone

- **Outgoing call**
  - Cancel - Ending the call

- **Current call**
  - Hang up - Ending the conversation
  - Mic. off - Switch off the microphone
  - Mic. on - Switching on the microphone
  - Private - Speakerphone off (call playback by means of the telephone)

- **Hands-free** - Switch on speakerphone (voice playback means of the device)

Symbols in MAXI DOT display

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Charge status of the telephone battery&lt;sup&gt;a&lt;/sup&gt;</td>
</tr>
<tr>
<td></td>
<td>Signal strength&lt;sup&gt;a&lt;/sup&gt;</td>
</tr>
<tr>
<td>🌐</td>
<td>A phone is connected to the unit</td>
</tr>
<tr>
<td>🕔</td>
<td>Missed calls (if there are several missed calls, the number of calls is shown next to the symbol)</td>
</tr>
<tr>
<td>🌐</td>
<td>Roaming (before the name of the mobile network provider)&lt;sup&gt;a&lt;/sup&gt;</td>
</tr>
</tbody>
</table>

<sup>a</sup> This function is only supported by some telephones.

Call list

In the MAXI DOT display, only the call list can be displayed and used.

If the call list includes no entries, the following message appears in the MAXI DOT display:

**No entries available.**

The following symbols are displayed next to each entry in the call list:

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>🌐</td>
<td>Incoming call</td>
</tr>
<tr>
<td>🌐</td>
<td>Outgoing call</td>
</tr>
<tr>
<td>🕔</td>
<td>Missed call</td>
</tr>
</tbody>
</table>
Note
The buttons and wheels on the multifunction steering wheel will also be lit if the ignition and the side light are switched on.

Unit settings

Setup menu

Introduction
This chapter contains information on the following subjects:

Main Menu .......................... 12
Sound settings ..................................... 13
Screen settings ..................................... 13
Time and date settings ............................. 14
Keyboard settings .................................. 14
Additional keypad language settings .................. 14
Unit settings .................................... 14
Restore factory settings .......................... 14
Bluetooth® settings .............................. 14
System Information ............................. 15

First and foremost, pay attention to the safety instructions » page 4, Important notes.

This chapter covers the basic settings of the device.

Additional settings are described in the individual menus

- Volume » page 6
- Radio » page 19
- Media » page 23
- Telephone » page 28
- Vehicle system settings » page 37

Main Menu

The basic parameters for the unit can be set from the Main menu.

Call up the main menu
Press the button.

- Sound - Sound setup » page 13
- Screen - Screen settings » page 13
- **Time and date** - Time and date settings » page 14
- **Language** - Set the unit language
- **Keypad** - Keypad display for text entry » page 14
- **More keypad languages** - Setting of available keyboard languages in the input screens » page 14
- **Units** - Unit settings » page 14
- **Remove SD card safely** - Safe removal of the SD storage card
- **Remove USB safely** - Safe removal of USB or iPod device
- **Factory settings** - Restore to factory settings » page 14
- **Bluetooth** - Settings for the Bluetooth® function » page 14
- **System information** - Displays system information » page 15
- **Copyright** - Information on licences and copyrights are only available in English

### Sound settings

#### Fig. 8 Sound settings / volume ratio

Press the button (SOUND) or the button (SETUP) → Sound.

- **Volume** - Volume settings
  - **Max. switch-on volume** - Sets the maximum volume after switching on
  - **Announcements** - Sets the volume for the traffic program alerts (TP)
  - **Speed-dep. vol. adjust.** - Speed-dependent volume adaptation
  - **Lower. entertain.** - Setting for the voice control volume » page 40
  - **Telephone** - Setting for the telephone and ringer volume

- **AUX volume** - AUX volume - Setting for the volume of the device connected through AUX
  - **Quiet** - Low volume
  - **Medium** - Medium volume
  - **Loud** - High volume

- **BT audio** - Setting for the volume of the connected Bluetooth® device
  - **Quiet** - Low volume
  - **Medium** - Medium volume
  - **Loud** - High volume

- **iPod** - Setting for the volume for the connected iPod
  - **Quiet** - Low volume
  - **Medium** - Medium volume
  - **Loud** - High volume

- **Balance - Fader** - Sets the balance between left and right, front and rear » Fig. 8

- **Bass - Mid - Treble** - Sets the bass, mid and treble » Fig. 8

- **Confirmation tone** - Switch on/off confirmation tone when a function key is pressed

### Screen settings

Press the button (SETUP) → Screen.

- **Screen off (in 10 s)** - Activate/deactivate energy-saving mode for the display
  - **Brightness** - Adjusts the brightness of the screen
  - **Brightest** - Brightest level
  - **Brighter** - Brighter level
  - **Medium** - Medium level
  - **Darker** - Darker level
  - **Darkest** - Darkest level

- **Confirmation tone** - Switch on/off confirmation tone when a function key is pressed

- **Show clock in stdby mode** - Time and date displayed on the screen when the ignition is switched on and the unit is switched off

---

1) The correct display of country-specific characters (e.g. ID3 tag information) can not always be guaranteed.

2) If after 10 seconds, the screen is not activated after touching the screen or by pressing or turning the menu button (2) in Fig. 1 on page 5, the screen is black.
Time and date settings

- Press the button \( \text{SETUP} \rightarrow \) Time and date.

- **Time:** - Time settings
  - **12h**
  - **24h**
  - **Summer time:** - Switches the summer time setting on/off
- **Date:** - Date settings
  - **Date format:** - Set the date format
    - \( \text{dd.mm.yy} \) - Day - Month - Year
    - \( \text{mm-dd-yy} \) - Month - Day - Year

Keyboard settings

- Press the button \( \text{SETUP} \rightarrow \) Keypad.

- **ABC** - keys arranged alphabetically
- **QWERTY** - Arrangement of the keys as per the QWERTY system (in accordance with computer keyboard arrangement)

Additional keypad language settings

- Press the button \( \text{SETUP} \rightarrow \) More keypad languages.

In this menu, the availability of the keyboard language for the chosen keyboard can be selected, and with this the option for fast entry of the characters used in the selected language.

Switching between the languages chosen takes place by pressing the function key \( \text{F1} \rightarrow \) page 8.

Unit settings

- Press the button \( \text{SETUP} \rightarrow \) Units.

- **Distance:** - Distance units
  - \( \text{km} \) - Kilometres
  - \( \text{mi} \) - Miles
- **Speed:** - Speed units
  - \( \text{km/h} \) - Kilometres per hour
  - \( \text{mph} \) - Miles per hour
- **Temperature:** - Temperature units
  - \( ^{\circ}\text{C} \) - Degrees Celsius
  - \( ^{\circ}\text{F} \) - Degrees Fahrenheit
- **Volume:** - Volume units
  - \( \text{l} \) - Litres
  - \( \text{gal (US)} \) - Gallons (US)
  - \( \text{gal (UK)} \) - Gallons (UK)
- **Consumption:** - Fuel consumption units
  - \( \text{l/100km} \) - Litres per 100 kilometres
  - \( \text{km/l} \) - Kilometres per litre
  - \( \text{mpg (US)} \) - Miles per gallon (US)
  - \( \text{mpg (UK)} \) - Miles per gallon (UK)
- **CNG consump.:** - CNG consumption units
  - \( \text{kg/100km} \) - Kilograms per 100 km
  - \( \text{km/kg} \) - Kilometres per kilogram
  - \( \text{m}^{3}/100\text{km} \) - Cubic metres per 100 kilometres
  - \( \text{km/m}^{3} \) - Kilometres per cubic metre
- **Pressure:** - Pressure units for tyre pressure
  - \( \text{kPa} \) - Kilopascal
  - \( \text{bar} \) - Bar
  - \( \text{psi} \) - Pounds per square inch

Restore factory settings

- Press the button \( \text{SETUP} \rightarrow \) Factory settings.

- **All settings/data** - menu to restore all settings
- **Reset all** - Reset all factory settings
- **Individual settings** - menu for the recovery of individual settings
  - **Radio** - Restore default settings for radio
  - **Media** - Restore default settings for media
  - **Vehicle** - Restore default settings for the vehicle systems
  - **Sound** - Restore default settings for sound
  - **System** - Restore the system default settings
  - **Telephone** - Restore default settings for phone

Bluetooth® settings

- Press the button \( \text{SETUP} \rightarrow \) Bluetooth.
- **Bluetooth** - Switch on/off Bluetooth® function
- **Visibility** - Switch on/off the visibility of the Bluetooth® device for other devices
  - **Visible** - Visibility is always on
  - **Hidden** - Visibility is off
- **1st name** - option for renaming the Unit
- **Paired devices** - Display the list of paired Bluetooth® devices; connect or delete a paired device; delete the list of paired devices
  - **All** - Delete all paired Bluetooth® devices
  - ** Cancel ** - Delete the selected paired Bluetooth® device
- **Find devices** - Searches for available external devices with enabled Bluetooth® functions and activated visibility
- **BT audio (A2DP/AVRCP)** - Switch on/off the connection option for Bluetooth® profiles A2DP and AVRCP

**System Information**

› Press the button ➔ → **System information**.

- **Update software** - the function key for the software update
- **Bluetooth**: ... - Version number of the Bluetooth® software
- **Device part number**: ... - Part number of the unit
- **Hardware**: ... - Hardware used
- **Software**: ... - Software version

**Bluetooth® - update**

For more information on device updates is available from a ŠKODA service partner.

For smooth function and connection of the latest phone types it is recommended to update the Bluetooth® device software regularly.

---

³ A2DP and AVRCP are Bluetooth® profiles that support multimedia functions.
Radio

Operation

Introduction

This chapter contains information on the following subjects:

Main menu 16
List of available stations 17
Search and select available stations 18
Save radio station 18
Search available stations (Scan) 18
Traffic programme 19

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The device allows analogue radio reception of FM and AM frequency ranges as well as DAB digital radio reception.

Radio reception DAB allows multiple stations to be transmitted in a single frequency in the form of an ensemble or group. It also allows for the transmission of additional data and information (e.g. messages, sport, weather, warnings, etc.).

CAUTION

■ Car parks, tunnels, tall buildings or mountains can interfere with the radio signal even causing it to fail completely.
■ For vehicles with window antennas do not stick foil or metal coated stickers to the window as this can lead to interference.
■ In countries where the RDS function is not supported sufficiently, we recommend turning off the AF and RDS function. Otherwise, these settings can affect the functionality of the radio.

Main menu

1. Read and observe 1 on page 16 first.

Main Menü - Information and function keys » Fig. 9

A The selected radio station (frequency or identifier)
B Station keys
C Choice of radio range (FM / AM / DAB)
D Choice of storage groups in the selected broadcasting ranges (e.g. FM1, FM2 or FM3)

Changing stations either in the list of available stations or the station buttons depending on the settings of the menu Arrow buttons: » page 19, Settings

Manual / semi-automatic station search » page 18
Radio Text display
Menu Settings Radio

Call up the main menu

Press the button.

Choose broadcasting range

Press the button repeatedly.

or

Press the function button C » Fig. 9, and select the desired range.
Information symbols in the display

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Importance</th>

</thead>
<tbody>
<tr>
<td>TP</td>
<td>Traffic information station</td>
</tr>
<tr>
<td>no TP</td>
<td>Traffic information signals are not available or the selected station is not a traffic information station</td>
</tr>
<tr>
<td>†</td>
<td>Signal is not available (DAB)</td>
</tr>
</tbody>
</table>

Note
If a continuous change of a displayed station name occurs, then it is possible to fix the current station name by pressing on the screen for a while in the station range [A] » Fig. 9.

List of available stations

![Example, the list of available stations: FM / DAB](image)

Read and observe [A] on page 16 first.

The station with sufficient signal strength are shown in the list of available stations. The device examines these stations automatically.

Show stations list
➢ In the main menu Radio turn the menu knob [2] » Fig. 1 on page 5.

List of available stations - information symbols and function keys

- [A] PTY filter (FM and DAB)
- [★] Radio station, which is stored under a preset button
- [○] Currently selected radio station
- [TP] Traffic information station
- [מוסיקה] Type of program being broadcast (FM)
- [R2] Type the regional broadcast (FM)
- [†] Signal is not available (DAB)
- [☐] Update the station list (AM and DAB)

Update the list of stations
In the FM band the station list is continually updated automatically.
In AM and DAB bands update is performed manually by pressing the function key [☐].

PTY- filter
The station indicated in the station list FM and DAB can be filtered according to the type of program.
➢ Press the function key [A] switch and select one of the following program types:
- [✓] All
- [✓] News
- [✓] Culture
- [✓] Music
- [✓] Sport
- [✓] Special

Sort the stations in the station list
The FM station list can be sorted depending on the setting of the menu item Sort stations: » page 19, Advanced Settings (FM).

The AM station list is sorted according to the frequency of the received station.
The DAB station list, can be sorted depending on the setting of the menu item Kind of stat. list: » page 19, Settings.

1) Applies with activated RDS function » page 19, Advanced Settings (FM).
2) Applies to selected global type of the station list » page 19, Settings.
Search and select available stations

Read and observe 1 on page 16 first.

Select station from the list of available stations

A radio station from the list of available stations can be selected in one of two ways.

› Press the function key in the Radio main menu < or > press the top of the screen.

or

› In the main menu Radio turn the menu knob 2 » Fig. 1 on page 5.

The list of available stations is opened » page 17.

› Select the desired station.

Manual station search

› Press the function key in the Radio main menu 3.

It current frequency range appears in the scale.

Set the desired station in one of the following ways.

› press the function key < or > press at the top of the screen (change to the next available station).

› press the function key < or > press at the bottom of the screen (movement on the scale of the frequency range).

› turn the menu button 2 » Fig. 1 on page 5 (movement on the scale of the frequency range).

› Move the slider on the scale of the frequency range by touching with the finger.

Close the menu for manual searching by pressing the menu button 2.

Save radio station

Read and observe 1 on page 16 first.

For each broadcasting ranges there are 12 preset buttons to store the radio stations. These preset buttons are divided into three memory groups.

A radio station can be stored in the device memory in one of the following ways.

Save station from the main menu Radio

› In the main menu Radio press and hold the desired station button B » Fig. 9 on page 16 until you hear an acoustic signal.

If a station was already stored in the desired position it is replaced with the new station.

Save station from the station list

› In the list of available stations » page 17 press the function key of the desired station longer.

A list of the station keys is shown as well as a list of the functions keys for the storage groups.

› Select a storage group.

› Press the station button. The station is stored in the selected position.

Automatic storage of the strongest stations under preset buttons (AutoStore)

› Press and hold the key 4 for 10 seconds.

The unit automatically stores stations with the strongest signal in four preset buttons the first storage group in each frequency range.

Search available stations (Scan)

Read and observe 1 on page 16 first.

This function plays all the receivable stations in the current frequency range in succession for a few seconds each.

Turn on search

› Press the menu knob 2 » Fig. 1 on page 5.

or

› Press the function key in the Radio main menu 5 → Press Scan.

Turn off search

› Press the menu knob 2.

or

› press the function key SCAN.

or

› press any function key in the device screen.
After switching off the function, the device plays the station at which the function was cancelled.

**Traffic programme**

Read and observe on page 16 first.

The function allows the reception of traffic information.

**Switching on/off**

› Press the function key in the Radio main menu ➤ Fig. 9 on page 16.
› Enable or disable the menu item Traffic program (TP).

**Current traffic reports**

During a traffic announcement, the following menu is displayed.

› Cancel - interruption of the current traffic report. The TP function remains activated.
› Deactivate - Exit the current traffic report and turn off TP function.

During playback in the media menu the traffic information from the last selected radio station is received.

Should this radio station not transmit traffic reports or the signal is not available, then the device automatically searches for a TP station.

**Note**

Some radio stations misleadingly identify themselves as traffic programs. It is therefore not a device fault when there is no traffic news with these stations.

**Radio settings**

**Introduction**

This chapter contains information on the following subjects:

- Settings ➤ page 19
- Advanced Settings (FM) ➤ page 19
- Advanced Settings (DAB) ➤ page 20

First and foremost, pay attention to the safety instructions ➤ page 4, Important notes.

The basic setting of the Radio menu functions is the same for all broadcast ranges.

The Advanced settings menu is different for FM and DAB. The AM broadcast range does not have this menu.

**Settings**

› Press the function key in the Radio main menu ➤ Fig. 9 on page 16.

- Scan - Automatic play of each receivable station for a few seconds each
- Arrow buttons: - Set the station select function in the Radio menu
  - Preset list - switching only the stations stored under preset buttons
  - Stations - Switches all radio stations currently in range for the selected frequency range
- Traffic program (TP) - Switches traffic programme on/off
- Radio text 1 - Radio text display on/off
- Kind of stat. list: 2 - Sort types of radio stations in the station list (FM)
  - Hierarchical - station sorting according to their assigned parent station groups (Ensemble) - Tree structure of the list
  - Global - alphanumeric station sorting with the filtering ability according to the transmitted program type ➤ page 17, PTY- filter
- Delete presets - Delete the stations stored under preset buttons
  - ○ - Delete a particular radio station
  - ○ Delete All - Delete all stored stations
- Advanced settings - other settings which are different depending on the selected broadcasting range

**Advanced Settings (FM)**

› Select the FM band in the Radio menu, and press the function key ➤ Advanced settings.

- RDS Regional: - Switch on/off the automatic tracking of related regional stations
  - Automatic - Auto-selects the station with the best reception at the moment. If you lose reception the region, the unit will automatically set another available region.
  - Fixed - Maintains the selected regional station continuously. When the signal is lost, another regional station must be set manually.

---

1 Applies only to the FM and DAB broadcasting range.
2 Applies only to the DAB broadcasting range.
■ Alternative frequency (AF) - Search for alternative frequencies of the station currently being listened to on/off
■ Radio Data System (RDS) - Switches on/off the RDS function
■ Sort stations - Sort types of radio stations in the station list (FM)
  ▪ Group - Sort by transmitted program type
  ▪ ABC - alphabetical order according to station name

### Advanced Settings (DAB)

- In the main menu press the DAB Radio range and the function key `→` Advanced settings.
- DAB traffic messages - Switch on/off DAB announcements
- Other DAB messages - Switch on/off other announcements (e.g., warnings, regional weather, sports reports, financial news)
- DAB station tracking - Switching the DAB Automatic program tracking in other station groups (Ensemble)
- Auto. DAB - FM switching - Switches on/off auto-switching from DAB to the FM frequency band if the DAB signal is lost

### DAB station tracking

If a DAB station is a member of several sender groups, when the signal is poor, the same station is searched in a different sender groups (Ensemble).

#### Auto-change DAB - FM

If the DAB signal is poor, the unit will try to find a preset FM station for the DAB station you are currently listening to.

For auto-change to work, the DAB and FM stations must send a sender ID.

- While the station is being received on the FM band, (FM) is displayed after the station name. The () marker disappears when the relevant DAB station can be received again (FM).
- If a DAB station is also not available in the FM band due to poor reception, the device will be switched to mute.
- If you do not want automatic station change (e.g. when driving through tunnels, when reception may be lost temporarily), you can deactivate this function.

---

1) Only valid for some countries.

▌ Folder
▌ Playlist
▌ Playback of the selected title
▌ Stopped track playback
▌ Repeated title playback

Appears on the title icon ▶, then the title cannot be played. By pressing the function key, the cause is displayed (e.g., DRM protection, unsupported format, etc.).

Pressing a function key for playing B displays the main menu Media » Fig. 12.

Playlist
The playlists are not played automatically and must be manually chosen from the folders and title lists. The playlists contain only a playing order of the tracks and will not play, as long as the items are not stored on the audio source.
Note

- In the folders and title lists a directory max. of 1000 entries is displayed depending on the date of creation. The entries are arranged alphabetically.
- The availability of folders and title lists depends on the connection speed and the size of the audio source to be connected.

Multimedia database

In the multimedia database the title properties are sorted according to categories.

For some Apple devices connected via USB, the multimedia database is displayed instead of the folders and title lists.

Viewing multimedia database

Press the function key in the menu Media.

Categories of multimedia database - function keys » Fig. 13

- Short press - selection of the parent folder / Long press - select of the audio source » page 24
- Track lists - Sorted by the track title
- Artists - Sorted by artist's name
- Albums - Sorted by album name
- Tracks - Sorted by the track title
- Podcasts - Sorted by the Podcast names
- Genres - Sorted by the genre type
- Composers - Sorted by the composer names
- Audiobooks - Sorted by the audiobook names

Playback

The device plays the titles in alphabetical order.

Function keys for playback:

<table>

Audio sources

Introduction

This chapter contains information on the following subjects:

Select audio source ________________________________ 24
Supported audio sources and file formats ________________________________ 24

First and foremost, pay attention to the safety instructions » page 4, Important notes.

⚠️ WARNING

- Never place audio sources close to the airbags. Loose objects could hit a deployed airbag and injure occupants – danger of death!
- Never place audio sources on the dashboard. Loose objects can be thrown forward during a sudden manoeuvre or in case of an accident and injure the occupants.
- Do not hold audio sources while driving in your hand or on your knees. Loose objects can be thrown forward during a sudden manoeuvre or in case of an accident and can injure the occupants.
- Always route the connection cable of the audio source such that it does not restrict you when driving.

⚠️ CAUTION

We recommend that you do not save any important data on CD memory cards, Bluetooth® players or connected devices. The ŠKODA Partner is not responsible for damage due to the loss of data stored on these audio sources.

The display playback time axis is not supported by some audio sources.
Select audio source

The choice of the audio source can be done
» by repeatedly pressing the button MEDIA.
» in the main menu after pressing the function key A » Fig. 14 - A.
» in the folders and title lists » Fig. 12 on page 21 and in the multimedia database » Fig. 13 on page 22 after holding down the function key for a while B » Fig. 14 - B.

Menu for the audio source
☐ SD card - inserted SD memory card » page 25
☐ USB - USB flash drive or a USB device » page 25
☐ BT audio - coupled Bluetooth® player » page 24
☐ AUX - a device connected to the AUX input » page 26

By pressing a function key with the audio source name the playback of titles available starts.

Supported audio sources and file formats
☐ Read and observe I and II on page 23 first.

Supported audio sources

<table>

<td>max. 48 kHz</td>
</tr>
</tbody>
</table>

Prerequisites and restrictions

For a good playback, we recommend using files with a low level of compression (for example, a bit rate of at least 160 kb / s or higher compressed MP3 files).

Files that are protected by Digital Rights Management (DRM) technology cannot be played back by the device.

At the time of publication, the device has been tested with most audio sources available in the various markets. However, it is possible that some audio sources or files will be unreadable or unplayable.

Bluetooth® player

☐ Read and observe I and II on page 23 first.

The device allows you to play audio files from a connected Bluetooth® Player.

The Bluetooth® player and the device can be connected using the A2DP or AVRCP audio profile.
For connecting follow the same instructions as for pairing the device with a telephone » page 29.

If an Apple device is connected as a Bluetooth® player at the same time as a USB device the Bluetooth®-player will then be separated » page 24.

The following message text appears in the device screen The device is connected using Bluetooth and a USB connection. This is not supported. Bluetooth audio is switching off.

### Note
- We recommend setting the maximum output level of the Bluetooth® Player.
- The volume can be adjusted by setting the input sensitivity of the unit for Bluetooth® player » page 13, Sound settings.
- Some operator options of the Bluetooth® player via the device may not be supported and are dependent on the Bluetooth® player being used.

### SD memory card

Read and observe 1 and 2 on page 23 first.

The device makes it possible to play audio files from the SD memory card.

The SD memory card slot is located below the screen » Fig. 1 on page 5.

#### Inserting an SD memory card

- Push the SD memory card into the available slot with the cut edge to the front right until it "locks into place".

The play function starts automatically after inserting the SD card.

#### Removing an SD memory card

- Press the button → Remove SD card safely.
- Press the inserted SD memory card. The SD memory card "jumps" into the eject position.

After popping out the SD memory card, playback will start from the last played audio source. If this source is not available, the device switches to the Radio menu.

#### Unreadable SD memory card

If there are no readable files on the SD memory card nothing will play.

### USB input

Read and observe 1 and 2 on page 23 first.

The USB input is located above the storage box of the front centre console » Fig. 15.

The USB input can be an external device and can be connected directly or via a connection cable from the ŠKODA original accessories.

Some external devices connected to the USB input can be operated from this device.

#### Connect the USB device

The play function starts automatically after connecting the USB audio source.
If an Apple device is connected as a Bluetooth® player at the same time as a USB device the Bluetooth® - player will then be separated » page 24.

Disconnect USB device
Press the function key in the menu Media ➔ Remove USB safely.
After disconnecting the USB audio source, playback will start from the last played audio source. If this source is not available, the device switches to the Radio menu.

Loading USB device
With the ignition on after connecting the USB device, the charging process is automatically started (applies for devices where charging via the USB connector is possible).
The charging efficiency can be different compared to the charging from the usual mains power supply.
Some connected devices may not be recognised and cannot be charged.
The charging of the connected device is automatically stopped after switching off the ignition.

⚠️ CAUTION
- USB extension cables or reducers may affect the operation of the connected external device.
- A video playback is not supported.

Note
When operating as well as connecting the external device, the respective operating instructions are to be observed.

AUX - input
Read and observe 1 and 2 on page 23 first.
The AUX input is located above the storage box of the front centre console » Fig. 15 on page 25.
The AUX input can be an external device and can be connected via a connection cable from the ŠKODA original accessories.
A external device connected to the AUX input cannot be operated from this unit.

Connecting AUX audio sources
The standard 3.5 mm stereo jack plug is used for the AUX input. If the external devices do not have this jack plug, you must use an adapter.
After connecting the AUX audio source, the source must be manually selected for playback from this source » page 24.

Disconnect AUX audio source
After disconnecting the auxiliary audio source is no automatic change to another audio source takes place.

⚠️ CAUTION
- The AUX input must only be used for audio devices!
- If an external device is connected to the AUX input, which is equipped with an adapter for external power supply, the sound may be impaired. This depends on the quality of the adapter which is used.

Note
- The volume can be adjusted by setting the input sensitivity of the connected AUX audio source » page 13, Sound settings.
- The AUX input can be used for the enabled / disabled selection of the source » page 23, Media settings.
This chapter contains information on the following subjects:

- Main menu
- Problems with the Telephone function
- Settings

First and foremost, pay attention to the safety instructions ➔ page 4.

The device allows for a wireless connection to the telephone. Your telephone can be operated from the device.

The Telephone menu is available when the following conditions are met.

- The ignition is switched on.
- The Bluetooth® function on the device is switched on.

**WARNING**

- The national legal regulations for using a mobile phone in a vehicle must be observed.
- The operation of mobile phones without connection to the external antenna can lead to an increase in the strength of the electromagnetic field inside the vehicle.
- No objects such as mobile phone mounts, etc. must be attached to the covers of the airbag modules or be located within their immediate vicinity.
- Never leave a telephone in the deployment area of an airbag, on a seat, on the dash panel or in another area, from which it can be thrown during a sudden braking manoeuvre, an accident or a collision - there is a risk of injury. There are storage compartments with lids and if necessary there is the multimedia storage compartments to hold this ➔ Vehicle owner’s manual, chapter Transport and practical equipment.
- Before transport of the vehicle by air, the Bluetooth® function must be switched off by a specialist company.

**CAUTION**

- In areas with no signal and possibly in tunnels, garages and subways a telephone conversation can be interrupted and no telephone connection can be established - not even in an emergency!
- We recommend that the installation of communication equipment in a vehicle be carried out by a specialist firm.

**Note**

- The range of the telephone connection to the device using the Bluetooth® profile is limited to the vehicle interior. The range is dependent on local conditions, e.g. obstacles between the devices and mutual interferences with other devices. If your telephone is in a jacket pocket, for example, this can lead to difficulties when establishing a connection with the device or transferring data.
- The functionality of the telephone is dependent on the mobile operator and the phone being used. Further information is available from the mobile operator or to refer to the manual of the telephone.

**Main menu**

- Read and observe  and  on page 27 first.

**Main menu description**

- **A** Name of the mobile provider
- **B** Name of the connected phone / open a list of up to 20 previously paired phones ➔ page 31
- **C** Speed dial favourite telephone numbers ➔ page 33
- **D** Direct entry of a phone number ➔ page 33
- **E** Display the telephone book ➔ page 34
Display of call list (there are new missed calls, the icon will appear here with the information about the number of missed calls) » page 35

Menu settings Telephone » page 28

Call up the main menu

Press the (home) button.

If a telephone is connected to the device, the telephone mode main menu is displayed » Fig. 16.

<tr>
<td>To use the Bluetooth function, please switch the ignition on.</td>
<td>Switch on the ignition » page 29, conditions for coupling.</td>
</tr>
</tbody>
</table>

Message | Meaning
---|---
Please switch on Bluetooth. | Switch on the Bluetooth® function.
Please connect a mobile telephone. | Connect the telephone with the device » page 29, Connect to the device to the mobile telephone.
Telephone not available. | There is a problem with the Telephone function of the device consult a ŠKODA service partner.
Telephone is currently unavailable. | A Bluetooth® device problem, consult a ŠKODA service partner.
Unknown network. | A problem with the identification of the mobile operator. The telephone did not provide any information regarding the mobile operator. Reconnect the mobile telephone if necessary perform a restart of the device.

Switch off the ignition for a few minutes and remove the ignition key (for vehicles with the KESSY system switch off the ignition and open the driver’s door). The device performs a restart. Turn the ignition on and reconnect your phone. If the problem persists consult a ŠKODA service partner.

Settings

Read and observe ❗ and ❗ on page 27 first.

Press the button (home) ➔ (settings) » Fig. 16 on page 27.

- **Select telephone** - Search for available telephones/list of paired telephones/ select telephone
- **Find** - search for available phones
- **Bluetooth** - Bluetooth® settings » page 14
- **User profile** - User profile settings
  - **Manage favourites** - Assign function keys to allow speed dialling of contacts; you can also add and delete quick contacts here
  - **Prefix** - Switch on/off the option to assign a prefix to a telephone number. Once this function is activated, the button for adding a prefix to a telephone number will be displayed with the symbol in some menus.
  - **Enter here** - prefix for a phone number (if the function Prefix: is on)
Connect to the device to the mobile telephone

Introduction

This chapter contains information on the following subjects:

- conditions for coupling ........................................ 29
- Connect the device to the telephone ......................... 29
- Connect the mobile telephone with the device .......... 30
- Connection with another paired mobile telephone ...... 31
- Bluetooth® - connection profile ............................. 31
- Delete the telephone from the list of paired devices ...... 32
- Disconnection ......................................................... 32

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The device is displayed in the telephone to be connected to as SKODA BT ...  
... is replaced with the last four characters of the vehicle identification number of your vehicle.

You can change the name of the device » page 14, Bluetooth® settings.

WARNING

The device may require confirmation of certain features in the telephone when pairing. Therefore do not carry out the pairing process while driving - there is danger of accidents!

Note

- The maximum number of phones registered is 20 Coupling a new phone after reaching the maximum number causes the least recently used coupled telephone to be automatically replaced.
- In some countries the connection via the Bluetooth® function, may be limited. Further information can be obtained from local authorities.
- The range of the Bluetooth® signal to the system is restricted to the vehicle interior. The signal can be affected by other equipment or obstacles, such as luggage.

conditions for coupling

Read and observe ! on page 29 first.

To connect a telephone with the device, the two devices must be paired.

Prerequisites for successful pairing:

✓ The ignition is switched on.
✓ The Bluetooth® function of the device » page 14 and the telephone is switched on.
✓ The visibility of the device is switched on » page 14.
✓ The visibility of the telephone is switched on.
✓ The phone is within range of the Bluetooth® signal.

The pairing can be initiated from the device or from the telephone.

Connect the device to the telephone

Read and observe ! on page 29 first.

A telephone is paired with the device

After switching on the ignition, the device attempts to automatically connect to the last connected telephone.

During the connection setup and depending on the telephone type the device screen displays may show ... Would you like to connect? and a menu will appear with the following function keys.

1 This function is only supported by some telephones.
2 Some telephones do not support downloading of contacts from the SIM card.
3 The in-band ringing function makes it possible to use the ring tone of your telephone as the ring tone.
Connect - pairing confirmation
Cancel - stops the coupling process

If the connection cannot be established, the device will then attempt to connect to other previously paired telephones one by one.

If there is also no connection, then a telephone search is to be started.
If the telephone to be connected has an active connection to another device, then coupling occurs, but no connection is made.

No telephone is paired with the device
After switching on the ignition, on the device screen the message Please connect a mobile telephone. appears and a menu with the following function keys.

Find telephone - search for available telephones with activated Bluetooth® function and visibility
Paired devices - Opens a list of paired phones when a phone was already paired with the device
O - Opening of the settings menu » page 28, Settings

After pressing the function key Find telephone the list is incrementally updated and displayed until the search for Bluetooth® devices is completed (after about 1 min.).

Select the telephone you want from the list BT devices.
If the search fails, check that the conditions for successful pairing are met » page 29, conditions for coupling and repeat the whole process. Press the function key Find.

Pairing confirmation
Depending on the telephone's Bluetooth®, conformation is in one of the following ways.

Confirm the 6-digit PIN code displayed on the device screen and the telephone display within 30 seconds on both the device and the telephone.

or

Confirm the connection request in the telephone.
Enter the 4 digit PIN code shown on the unit display into the telephone within 30 seconds.

Connection
After successful connection, the main menu Telephone appears » Fig. 16 on page 27.
In some phones, a confirmation regarding the downloading of the contacts in the device memory is necessary. If no confirmation takes place on the phone regarding the downloading of the contacts, then is no downloading of contacts takes place.

Note
- During the pairing process the option in the phone to remember the password for the next automatic connection can be selected.
- If the telephone supports the Bluetooth® profile A2DP or AVRCP, your telephone display may prompt you to pair the telephone as a Bluetooth® player.

Connect the mobile telephone with the device

Read and observe on page 29 first.

When pairing from the telephone, follow the instructions in the owner's manual of the telephone.

Have the telephone search for available Bluetooth® devices.
Select the device in the list of Bluetooth® devices.

The following message is shown in the device screen during pairing ... Would you like to connect?, and the following function keys are displayed.

Connect - confirmation of the coupling process
Cancel - stops the coupling process

Depending on the telephone's Bluetooth®, conformation is in one of the following ways.

1. For devices with Bluetooth® v2.1 and later the telephone quick pairing procedure (SSP Secure Simple Pairing) is used for pairing. This pairing method does not require the user to enter a PIN.
2. The input and confirmation of the PIN code is not possible while driving.
3. This function is only supported by some telephones.
4. A2DP and AVRCP are Bluetooth® profiles that support multimedia functions.
5. For the name of the device refer to the Bluetooth® settings » page 14.
Confirm the 6-digit PIN code displayed on the device screen and the telephone display within 30 seconds on both the device and the telephone.

If required select the option in the telephone for automatically connecting the telephone to the device.

or

Enter the 4-16 digit PIN code into the device.
Enter the PIN code shown on the device display into the telephone within 30 seconds.

If required acknowledge the confirmation request with the telephone.

After successful connection, the main menu **Telephone** appears » Fig. 16 on page 27.

If the device is connected to another phone via the HFP-profile, then only the coupling of the new phone takes place. The original phone remains connected.

With free connection via the A2DP and AVRCP profile the phone with the device connects automatically with this profile as a Bluetooth® player » page 24.

### Connection with another paired mobile telephone

Read and observe 1 on page 29 first.

If you want to connect the device to another paired telephone, the current connection does not have to be terminated. The connection to the existing telephone is automatically terminated by connecting to another telephone.

In the menu press the **Telephone** function key » Fig. 16 on page 27.

It displays a list of previously paired telephones.

Select the paired telephone to be connected with the device.

If the coupling conditions » page 29 for the selected phone are met, the message in the device screen *Replace this connection with ...?* appears along with the following function keys.

---

1) For devices with Bluetooth® v2.1 and later the device quick pairing procedure (SSP Secure Simple Pairing) is used for pairing. This connection method does not require the user to enter a PIN.

2) The input and confirmation of the PIN code is not possible while driving.

3) A2DP and AVRCP are Bluetooth® profiles that support multimedia functions.

4) HFP is a Bluetooth® profile that supports the functionality of the hands-free system.

5) A2DP and AVRCP are Bluetooth® audio profiles that support multimedia functions.

---
Replace - replace the connection with the new device to be connected
Cancel - Cancel the replacement connection

After confirming the connection is made to the selected device. Only the newly selected profile will be replaced the other profiles remain connected to the original device.

**Fast switching of the HFP connection**

By pressing the function key [B] on page 27 a list of paired devices is displayed.

After pressing the function key with the name of the paired device, the message in device screen ... Replace this connection with ...? appears along with the following function keys.

Replace - replace the connection by the selected paired device (when available)
Cancel - Cancel the replacement connection

After confirming the connection is made to the selected device via the HFP profile. The connection via the audio profile remains unchanged.

**Disconnection**

Press in the menu the Telephone function key ☑ → Bluetooth → Paired devices.

A list of paired devices is displayed.

By pressing the green icon for the profile, the message in the device screen ... Disconnect the profile - are you sure? is displayed along with the following function keys.

Disconnect - Disconnect connection
Cancel - Cancel the disconnection

**Delete the telephone from the list of paired devices**

Press in the menu the Telephone function key ☑ → Bluetooth → Paired devices.

A list of paired devices and the following function keys are displayed.

All - Delete all the telephones in the list of paired devices
Delete - delete confirmation
Cancel - Cancels the deletion

Disconnection

Read and observe ☑ on page 29 first.

The connection of a telephone to the device can be disconnected in one of the following ways.

By removing the ignition key (or switching off the ignition and opening the driver's door in vehicles with the KESSY system).
By switching off the Bluetooth® function on the device » page 14, Bluetooth® settings.
By switching off the Bluetooth® function on the telephone.
By the separation of the connection in the telephone.
By removing the telephone from the list of paired devices » page 32, Delete the telephone from the list of paired devices.
By turning off the Bluetooth® HFP profile » page 31, Bluetooth® - connection profile.
By turning off the connected phone.
By the moving of the phone outside the Bluetooth® signal range.

If a telephone is connected to the device and the device is turned off, the connection to the telephone is not lost. The connection is only lost after switching off the ignition (for vehicles with the system KESSY after switching off the ignition and opening the driver's door).

**Telephone functions**

**Introduction**

This chapter contains information on the following subjects:

- Speed dialling a phone number __________________________ 33
- Directly enter a telephone number __________________________ 33
- List of telephone contacts __________________________ 34
- Call lists __________________________ 35
- Telephone conversation __________________________ 35

First and foremost, pay attention to the safety instructions » page 4.
Speed dialling a phone number

By pressing a function key for speed dialling → Fig. 16 on page 27 an immediate choice of pre-assigned phone number is possible.

There are four function keys for speed dialling available.

The management of the shortcut keys can be done in the Telephone menu → User profile → Manage favourites.

Assigning a phone number

› Operate a function key for the speed dial → Fig. 16 on page 27 that is not assigned.

The unit displays the telephone book.

› If necessary, enter one of the contact numbers for the desired telephone contact.

The selected phone number is assigned to a function key for speed dialling.

Selecting a stored speed dial

› Operate the desired function key for the speed dial telephone number → Fig. 16 on page 27.

Changing a stored speed dial

› The assigned function key for speed dialling → Fig. 16 on page 27 for about 2 s.

The unit displays the telephone book.

› If necessary, enter one of the contact numbers for the desired telephone contact.

The selected phone number is assigned to a function key for speed dialling.

Removing a phone number

› In the Telephone menu → User profile → Manage favourites.

› Press the function key for the relevant speed dial.

By confirming the function Delete the phone number is removed.

Directly enter a telephone number

» Fig. 17 Direct entry of a phone number

Press in the menu the Telephone function key → Fig. 16 on page 27.

A screen appears for the entry of the telephone number » Fig. 17.

Menu for entering the phone number

A Input line
Delete characters in the entry line
Dial the entered number
Entering a prefix:

The function key with the symbol (Mailbox option) is not supported by the device.

Entering a phone number

Entering the phone number follows, whereby the function keys with the number are operated sequentially.

By pressing the function key the telephone number is dialled.

By pressing the function key the telephone number is dialled using the prefix.

Enter the last number dialled

If there are no figures entered for the phone number, the function key is displayed or the last number dialled.

By pressing the function key the telephone number is dialled.

By pressing the function key the telephone number is dialled using the prefix.

1 The function key for the code appears only with active preset function » page 28, Settings.
Search for a contact in the list

The input screen » Fig. 17 also functions as an alphanumeric keypad that you can use to search for contacts in the phonebook.

For example, if you enter 32, the unit will display contacts with the letter sequence DA, FA, EB, etc.

On the right side next to the numerical keyboard a list of contacts found from the directory appears according to the lettered specified. By pressing the corresponding function key for the respective contact the dialling starts.

Enter the code

Typing the prefix can be performed in the following ways.

› By pressing the function key (the dialling of the entered phone number with the prefix starts).
› By entering of characters or numbers (e.g. + or 00 and the like a prefix character is inserted in line A).

The prefix may, for example be for international calls, phone calls via a virtual mobile network operator, or distinguishing between business and private calls.

If the contact number contains a prefix, pressing the function key causes a further prefix to be added before the number and the connection starts. The phone number contains at this time two prefixes and a phone call is not initiated.

List of telephone contacts

Press in the menu the Telephone function key » Fig. 16 on page 27.

A list of telephone contacts is A » Fig. 18 shown.

The device telephone book contains up to 2000 free memory locations for imported telephone contacts. Each contact can contain up to 5 telephone numbers.

The list of phone contacts can also be called during an ongoing call.

Select contact

Pressing the function key with one of the displayed contacts starts the selection 1).

If a contact contains several telephone numbers, the system displays a menu containing the telephone numbers for this contact after pressing the function key.

Pressing the function key with one of the indicated telephone numbers starts the dialling 1).

Contact details

By pressing the function key in the list of phone contacts A the contact details B » Fig. 18 are displayed.

By pressing the function key in the contact details a window for editing the phone number of the contact is displayed before dialling.

Pressing the function key with one of the indicated telephone numbers starts the dialling 1).

Find contact

By pressing the function key A » Fig. 18 Find the keyboard for entering the contact search is opened in the telephone book » page 8, Alphanumeric with keyboard.

By pressing the function key for the selected contact, the dialling is started 1).

Invite list

Upon first connection of the telephone with the device, the system begins to download the telephone book from the telephone and from the SIM card 2) into the device memory 3). Depending on the number of contacts this may take several minutes to complete.

1) A phone call can be made if no other call is active.
2) Some telephones do not support downloading of contacts from the SIM card.
3) With some telephones a confirmation for importing contacts to the device is necessary.
The number of imported contacts can be checked in the function key » page 28 Imp. contacts.

Depending on the context, the number for the number of contacts imported has the following meaning.

› During the import - xxxx / yyyy - Number of currently imported contacts into the device memory / number of contacts in the phone.
› After importing - xxxx/2000 - number of contacts imported, that include at least one telephone number / 2000 (highest possible number of imported contacts in the device memory).

If the imported list of telephone contacts from the telephone contains more than 2000 contacts, loading is stopped and the message Contacts not fully imported. appears on the screen. Only the already downloaded contacts will be available.

If an error occurs while loading the list, the message Import failed. Please try again and check whether ... allows connections.

Refresh list
Each time the telephone has established a new connection with the device, the relevant telephone contacts will be updated.

During the update, the list which was stored after the last completed update will be available. Newly stored telephone numbers are only shown after the updating has ended.

The update can be done manually » page 28, Settings by pressing the function key Imp. contacts.

The system displays a call list.

Description of the function keys

A  Open the call list
  › All - All calls listed (max. 120 calls)
  › Missed - List of missed calls (up to 40 calls)
  › Dialed - List of dialed numbers (up to 40 calls)
  › Received - List of received calls (up to 40 calls)
B  Start dialling the selected telephone contact or phone number
  › Display the contact details » page 34

After each completed telephone call the call list is updated, and information is downloaded from the phone. With some phones the transfer of time related information referencing the telephone call is not supported. The call list does then not necessarily correspond to reality.

Telephone conversation

Outgoing call
While connecting, the screen displays the phone number or contact name. And the following function can be selected.

   Exit choice

Incoming call
During an incoming call, the screen displays the phone number or contact name. And the following functions can be selected.

   Answer the incoming call
   Mute the ringer
   Restore ringer
   Reject the incoming call

Current call
During a current call, the screen displays the phone number or contact name and the call duration. Depending on the context, the following functions can be selected.

   Switch call to the telephone (private call)
   Toggles the call to the device
   Deactivate the microphone
   Activate the microphone
   End call

Call lists

The system displays a call list.

Description of the function keys

A  Open the call list
  › All - All calls listed (max. 120 calls)
  › Missed - List of missed calls (up to 40 calls)
  › Dialed - List of dialed numbers (up to 40 calls)
  › Received - List of received calls (up to 40 calls)
B  Start dialling the selected telephone contact or phone number
  › Display the contact details » page 34

After each completed telephone call the call list is updated, and information is downloaded from the phone. With some phones the transfer of time related information referencing the telephone call is not supported. The call list does then not necessarily correspond to reality.

Telephone conversation

Outgoing call
While connecting, the screen displays the phone number or contact name. And the following function can be selected.

   Exit choice

Incoming call
During an incoming call, the screen displays the phone number or contact name. And the following functions can be selected.

   Answer the incoming call
   Mute the ringer
   Restore ringer
   Reject the incoming call

Current call
During a current call, the screen displays the phone number or contact name and the call duration. Depending on the context, the following functions can be selected.

   Switch call to the telephone (private call)
   Toggles the call to the device
   Deactivate the microphone
   Activate the microphone
   End call

Press in the menu the Telephone function key » Fig. 16 on page 27.
During an ongoing call, it is possible by pressing the function key \[\text{a} \] to send the key tone (DTMF), if required the contact can be sent by key tone by pressing the function key Contact as DTMF. After confirmation a list of available contacts is opened.
First and foremost, pay attention to the safety instructions » page 4, Important notes.

Settings relating to the vehicle systems can only be made when the ignition is switched on.

Note
- The individual systems are described in the » Vehicle Owner's Manual.
- For safety reasons, if any system functions are disabled, then some functions, such as parts of the ESC system, are automatically enabled again after switching the ignition off and on.
- **Engine**: Set the engine (drive) characteristics
  - Normal - Normal
  - Sport - Sports
  - Eco - Economical

- **ACC**: Set the vehicle acceleration when adaptive cruise control is activated
  - Normal - Normal
  - Sport - Sports
  - Eco - Economical

- **Cornering light**: Set the characteristics of the adaptive headlights
  - Normal - Normal
  - Sport - Sports
  - Eco - Economical

- **Air conditioning**: Set the characteristics of Climatronic
  - Normal - Normal
  - Eco - Economical

- **Reset mode**: Setting for all menu items in the *Individual* mode to *Normal*
  - Cancel - Keep the current settings
  - Reset - Set all menu items to *Normal*

**Note**

If you do not operate the unit for longer than approx. 10 seconds in the "Select driving mode" menu, it will switch to the last selected menu or switch itself off.

**Vehicle data**

- **Distance travelled**
- **Driving time**
- **Average speed**
- **Average fuel consumption**
- **Approximate range**

1) For vehicles with CNG drive the approximate range with gasoline and CNG is displayed separately.

**Displaying vehicle data**

Press the button \(\text{←} \rightarrow \text{→} \) on the screen.

- **Since start** - Driving data for the individual trip
- **Long-term** - Long-term driving data
- **Since refuelling** - Data since last refuelling

Switching between the individual driving data storage locations can be done by using the function keys \(\text{←} \rightarrow \).
■ **Conv. cons.** Displays up to three consumers which have the largest share of fuel consumption and displays the fuel consumption to run all convenience systems.

■ **Veh. status** - Displays vehicle status » Fig. 21 or tyre pressure monitoring information.
  - **Veh. status** - Displays vehicle status information.
    - ✔ - No message / ✏ **Announcements** - warning messages relating to vehicle status or number of messages (if there is only one message, one warning message text is displayed).
  - ☢ **Start-st.** - Display information about the status of the START-STOP system.
  - **Tyre Press. Loss Indicator** - Tyre pressure monitoring function » Fig. 22

Switching between the individual menus can be done by using the function keys ➷ ◄.

### Note
- After pressing the button ☢, the last displayed view from the menu is shown ➷ ➷.

#### Auxiliary heater and ventilation

![Auxiliary heater](image)

**Fig. 23**  Auxiliary heater: Main menu/set preset time

**Call up the main menu**
- Press the button ☢ on the Climatronic control panel ➷.
- or
- Press the button ☢ ➷.

**Main Menu - Information and function keys** » Fig. 23

| A | Departure time: Day and time when the vehicle is to be ready for use |
| B | Heating/ventilation: Set the operating mode |
| C | List of pre-selected times, activation / deactivation of the preset time |
| D | Set the preset times 1 to 3 and the duration (10 - 60 minutes) |
| E | When heating the windows are shown in red / with continuous aeration, the windows are shown in blue |

- Only one preset time can be active. The activated preset time will be deactivated again after it has started automatically. For the next start, activate one of the preset times.
- The system in operation switches off on expiration of the operating duration or can be deactivated by pressing the icon ☢ for direct on / off switching or via radio remote control.

#### Note
- In the selection of the day in the preset time, there is an option between Sunday and Monday without the specified day. If this setting is selected, the vehicle will be ready for use at the selected time, regardless of the current day.
- If a different time is set » page 14, *Time and date settings*, the activated preset time is automatically deactivated. The preset time must be reactivated.

#### ESC-and ASR systems
- Press the button ☢ ➷ ➷ ➷ ➷ ➷ ➷ ESC system.
  - **Activated** - Switch on all components of the ESC system
  - **ASR off** - Switch off the ASR system
  - **ESC Sport** - activation of ESC Sport

#### Tyre
- Press the button ☢ ➷ ➷ ➷ ➷ ➷ ➷ Tyres.
  - **Tyre Press. Loss Indicator** - Tyre pressure monitoring function
  - ☢ **SET** - Start a new calibration process
  - **Winter tyres** - Sets the speed limit for winter tyres
  - **Speed warning** - Snow tyres speed warning on/off
  - **Warning at** - Sets the speed for the warning

#### Assistance systems
- Press the button ☢ ➷ ➷ ➷ ➷ ➷ ➷ Driver assistance.

**Vehicle systems** 39
- **ACC (adaptive cruise control)** - Sets the adaptive cruise control
  - **Driving program**: Set the vehicle acceleration when adaptive cruise control is activated
    - **Normal** - Normal
    - **Sport** - Sports
    - **Eco** - Economical
  - **Last distance selected** - Switch last selected distance on/off
  - **Distance**: Set the distance monitoring to the vehicles ahead
    - **Very close** - Very small distance
    - **Close** - Small distance
    - **Medium** - Medium distance
    - **Far** - Large distance
    - **Very far** - Very large distance
  - **Front Assist** - Sets the assistant for monitoring the distance to the vehicles ahead
    - **Active** - Activate/deactivate the assistant
    - **Advance warning** - Activate/deactivate advance warning
    - **Display distance warning** - Activate/deactivate distance warnings
    - **Lane Assist** - Settings for Lane Assist
    - **Active** - Activate/deactivate the assistant
    - **Adaptive lane guidance** - Activate/deactivate adaptive lane guidance
    - **Driver Alert System** - Activate/deactivate the driver alert system
    - **Proactive pass. protection** - Activate/deactivate proactive passenger protection

**Parking and manoeuvring**

- **ParkPilot** - Settings for the parking aid
  - **Active** - Activate/deactivate the parking aid
  - **Activate automatically** - Activate/deactivate the compact parking aid display (when driving forward)
  - **Front volume** - Adjust the volume of the beeps for obstacle detection in front
  - **Front tone setting** - Setting the pitch of the beeps for obstacle detection in front
  - **Rear volume** - Set the volume level of the beeps for the rear obstacle detection
  - **Rear tone setting** - Setting the pitch of the beeps for the rear obstacle detection
  - **Lower. entertain.** - lowering the volume of the speakers (audio)

**Light**
- **Press the button** - **Light.**

---

1) This can be set in the menu on vehicles with a travel mode option » page 37, Selection of travel mode (Driving Mode Selection).
Background lighting - Sets the interior lighting
Instrument lighting - Set the brightness of the instrument/switch lighting
Footwell lighting - Sets the brightness of the footwell light
Light assistance - Setting of outdoor lighting
Light Assist - Switch on/off the head light assist
Switch-on time: - Set the sensibility of the light sensor against the change in intensity of the ambient light
Early - High sensibility
Medium - Medium sensibility
Late - Low sensibility
Aut. headlight contr. (rain) - Activate/deactivate automatic headlight control in rain
Daytime running lights - Activate/deactivate daytime running lights
Comfort turn signal - Activate/deactivate lane change flashing
Travel mode: - Travel mode on/off
Left - For right-hand traffic
Right - For left-hand traffic
"Coming/leaving home" - Setting the COMING HOME / LEAVING HOME-function
"Coming home funct." - Set the period that the lights remain on after you leave the vehicle (0 - 30 seconds; 0 = function deactivated)
"Leaving home fnct." - Set the period that the lights remain on after you unlock the vehicle (0 - 30 seconds; 0 = function deactivated)

Mirrors and wiper
Press the button → Mirrors and wipers.
Mirrors - Adjusts the mirrors
Synchronous adjustment - Activate/deactivate synchronous mirror adjustment
Lowering (reverse) - Activation / deactivation of the lowering of the passenger's side mirror
Fold in (when parked) - Activate/deactivate folding the mirror via the remote control key or by using the sensor in the handle (KESSY)
Wipers - Adjusts the windscreen wipers
Automatic wiping (rain) - Activate/deactivate automatic windscreen wiping in rain
Automatic rear wiper - Activate/deactivate automatic rear window wiping

Opening and closing
Press the button → Opening and closing.
Window operation - Window operation settings
Conven. open.: - Set the convenience opening feature
All - All windows
Driver - Driver's window only
Off - Deactivates the convenience opening
Central locking - Settings for opening and closing of doors
Door unlock.: - Set the door unlocking feature
All - All doors
Single door - Driver's door or driver's or passenger door with KESSY system
Side - Doors on the driver's side or on the driver's or passenger's side with KESSY system
Automatic locking - Activate/deactivate automatic locking when starting off
Acoustic confirmation - Activate/deactivate acoustic signals when locking/unlocking the vehicle with an anti-theft alarm system

Seats
Press the button → Seats.
Store seat position - Store the driver's seat position and exterior mirror position in the remote control key when locking the vehicle
Vehicle key activated - Activate/deactivate storing the driver's seat position and exterior mirror position when locking the vehicle

Instrument cluster (multifunction display)
Press the button → Instrument cluster
In this menu it is possible to hide/show the appearance of the menu items in the instrument cluster multifunction display and reset the trip data.
Current consumption - Display of current fuel consumption on/off
Average consumption - Display of average fuel consumption on/off
Refuel quantity - Display of refuel quantity on/off
Convenience consumers - Display of fuel consumption of convenience consumers on/off
Eco tips - Display of tips for economical driving on/off
Travelling time - Display of travelling time on/off
Distance - Display of distance travelled on/off
Average speed - Display of average speed on/off
Digital speed display - Display of current speed on/off
Speed warning - Winter tyres warning on/off
Oil temperature - Oil temperature on/off
Coolant temperature - Coolant temperature on/off
Reset Since start data - Reset the single-trip memory in the device screen and in the display of the instrument cluster
Reset Long-term data - Reset the long-term memory in the device screen and in the display of the instrument cluster

Time, date and unit setting

➢ Press [CAR] → Time and date.
Description of the time and date settings » page 14.
➢ Press the button [CAR] → Units.
Description of unit settings » page 14.

Service

➢ Press the button [CAR] → ⬤ → Service button.
VIN: ... - Display the vehicle identification number
Inspection: --- or --- - Number of km/days remaining until the next service event
Oil change service: --- or --- - Number of km/days remaining until the next oil change

Restore factory settings

➢ Press the button [CAR] → ⬤ → Factory settings.
In this menu you have the possibility to reset the menu items in the settings of the vehicle systems to factory settings.

➢ All settings - Restoration of the settings all menu items
➢ Individual settings
➢ Driver assistance - Restoration of the driver assistance menus
➢ Parking and manoeuvring - Restoration of the Parking and manoeuvring menu items
➢ Light - Restoration of the light menus

Mirrors and wipers - Restoration of the Mirrors and wipers menu
Opening and closing - Restoration of the Opening/closing menu items
Instrument cluster - Restoration of the instrument cluster menu

If one of the above menu items is selected, the system will ask you whether you really want to restore the settings.
➢ Cancel - Return to higher-level menu
➢ Reset - Restore the settings

Climatronic settings

In the Climatronic menu the system displays the desired temperature for the driver's side and front passenger side » Fig. 25.
Depending on the desired temperature, the airflow from the air outlet vents is shown in blue (temperature under 22 °C) or red (temperature above 22.5 °C).
When using Climatronic in automatic mode, the lettering AUTO is shown on the screen.

Call up the main menu
➢ Press the button [CAR] on the Climatronic control panel.

➢ Profile: light - Low power operation of the air conditioning, quiet operation
➢ Profile: medium - Basic operating performance of the air conditioning
➢ Profile: strong - Intensive operating performance of the air conditioning
➢ On/Off - Switches Climatronic on/off
➢ ☀ - Set the auxiliary heater and ventilation » page 39
➢ ⬤ - Settings for Climatronic
➢ Air con. profile: - See climate profile (light, medium, intensive.)
➢ Automatic air recirculation - Automatic re-circulated air mode on/off
➢ Automatic auxiliary heater - Quick interior heating on/off
➢ Autom. window heating - Activates/deactivates the automatic windscreen heating
Note

- If you do not operate the unit for longer than 10 seconds in the "Climatronic" menu and Climatronic was not switched on before the menu was opened, the unit will switch itself off.
- If you switch off the automatic mode of Climatronic by increasing or reducing the fan speed, the coloured display of the airflow from the air outlets will not be displayed.
