Structure of this Owner’s Manual (explanations)

This Owner’s Manual has been systematically designed to make it easy for you to search for and obtain the information you require.

Chapters, table of contents and subject index
The text of the Owner’s Manual is divided into relatively short sections which are combined into easy-to-read chapters. The chapter you are reading at any particular moment is always specified on the bottom right of the page.

The Table of contents arranged according to chapter and the detailed Subject index at the end of the Owner’s Manual help you to rapidly find the information you are looking for.

Direction indications
All direction indications such as “left”, “right”, “front”, “rear” relate to the direction of travel of the vehicle.

Units of measurement
All values are expressed in metric units.

Explanation of symbols
Denotes a reference to a section with important information and safety advice in a chapter.
Denotes the continuation of a section on the next page.
Denotes a registered trademark.

Examples of the information listed in the Owner’s Manual
Press the button   →  → Press Sound.
This information means that the first the button  on the device and then the function key  on the device screen is to be operate and then the menu is to be confirmed by pressing the function key Sound.

The “→” symbol indicates the next step.

Example of the menu, the available menus, menu items or functions.
- xyz - the first menu level
- xyz - the second menu level
- xyz - the third menu level
- xyz - the first menu level

Notes

WARNING
The most important notes are marked with the heading WARNING. These WARNING notes draw your attention to a serious risk of accident or injury.

CAUTION
A Caution note draws your attention to the possibility of damage to your vehicle (e.g. damage to gearbox), or points out general risks of an accident.

For the sake of the environment
An Environmental note draws your attention to environmental protection aspects. This is where you will, for example, find tips aimed at reducing your fuel consumption.

Note
A normal Note draws your attention to important information about the operation of your vehicle.
Preface

You have chosen a ŠKODA vehicle, which is fitted with an Infotainment Radio Bolero (hereafter called the unit) - we thank you for your confidence in us.
The new operating concept allows you to configure vehicle settings and to operate some electronic systems centrally from the unit.
In addition to this Owner's Manual, please also carefully read the Vehicle Manual, because operation in accordance with these instructions is a prerequisite for proper use of the vehicle.
If you have any questions about your unit, please contact a ŠKODA Partner.
Your ŠKODA AUTO a.s. (hereinafter referred to as ŠKODA)

Introduction

This chapter contains information on the following subjects:

Declaration of conformity 4
Component protection 4

These operating instructions describe all possible equipment variants without identifying them as special equipment, model variants or market-dependent equipment.

Consequently, this vehicle does not need to contain all of the equipment components described in these operating instructions.

The level of equipment of your vehicle refers to your purchase contract of the vehicle. More information is available from the ŠKODA Partner where you bought the vehicle.

Please note that these instructions are meant only as an addendum to the information presented in the Owner’s Manual of your vehicle. Therefore, they can be used only in conjunction with the latest manual for this vehicle. For a detailed description of some functions listed in these instructions, see the Vehicle Manual for your vehicle.

The illustrations can differ in minor details from your device; they are only intended for general information.

⚠️ WARNING

- Concentrate fully at all times on your driving! As the driver you are fully responsible for the operation of your vehicle.
- Only use the device in a way that you are in full control of your vehicle in every traffic situation - there is the risk of accidents!
- Adjust the volume to ensure that acoustic signals from outside, e.g. sirens from vehicles which have the right of way, such as police, ambulance and fire brigade vehicles, can be heard at all time.
- High volumes can cause hearing damage.

Declaration of conformity

Read and observe on page 4 first.

ŠKODA AUTO a.s. hereby declares that the ŠKODA Infotainment systems meet the basic requirements and additional provisions of Directive 1999/5/EC with reference to radio equipment and telecommunications devices.

ŠKODA AUTO a.s. hereby declares that the "connection and the use of this communication device is granted by the Nigerian Communications Commission."

Component protection

Read and observe on page 4 first.

Some electronic control units are factory-equipped with component protection.

The component protection was developed as a protection mechanism for:

- impairment of factory- or garage-fitted control units after installation in another vehicle (for example, after a theft);
- impairment of components operated outside of the vehicle;
- the possibility of a legitimate installation or change of control units for repairs at a ŠKODA specialist garage.

When component protection is enabled, the following message appears on the display of the device Component theft protection: the infotainment system is not fully available at present. Please switch on the ignition.

If the component protection does not activate by switching on the ignition, please contact a ŠKODA specialist garage.

Equipment overview

Introduction

This chapter contains information on the following subjects:

Description of the device 5
Touch screen 5
Switching the unit on/off 5

Terms used » manual, chapter Preface.
First and foremost, pay attention to the safety instructions » page 4, Important notes.

Description of the device

1. Switch unit on/off, adjust volume
2. Menu button for calls and confirmations
3. Menu Radio » page 19
4. Menu Media » page 24
5. Depending on equipment fitted:
   - Mute - Muting
   - Menu Telephone » page 31
6. Depending on equipment fitted:
   - Traffic news » page 21
   - Voice control » page 12

Touch screen

The unit is equipped with a so-called touch screen which can only be operated by the touch of a finger.

CAUTION

- The screen can be operated by a slight touch of a finger. Do not apply pressure to the screen - risk of damage!
- Do not use any objects to operate the screen - risk of damage!
- Do not use solvents such as benzene or turpentine for cleaning, since they may damage the screen surface.

Note

- Use a soft cloth and, if necessary, methylated spirits, to remove fingerprints from the screen. When doing so, ensure that you do not cause damage to other parts of the interior.
- It is not possible to operate the screen with your fingernails or while wearing gloves.
- Do not affix anything to the area of the unit below the screen. This could affect the functioning of the sensors for the zoom effect.
- To protect the screen, you can use a suitable screen protector for touchpads that does not affect its functionality.
- The brightness of the screen is adjusted automatically depending on the brightness of the interior lighting. The automatic setting can be adjusted manually » page 16.

Switching the unit on/off

Press the knob to switch the device on or off.

When the device is switched on, the audio source and operating mode that were active before switching off the device will be restored.
If **Telephone** mode was active before you switched off the unit and the ignition and Bluetooth® function is not switched on, the screen displays the message » page 32. Switch on the ignition or the Bluetooth® function» page 18.

If the vehicle key is pulled out of the ignition lock while the unit is switched on, the unit will switch off automatically. After switching on the ignition, the unit is turned on automatically.

If the device was switched off using the knob then the device will not switch on automatically after switching on the ignition.

If your vehicle is fitted with the KESSY system, the device will switch off automatically after the engine has been turned off and the door opened. If you open the driver's door before switching off the engine, the device will also switch off.

When the ignition is switched off, the device switches off automatically after approx. half an hour (discharge protection of the vehicle battery).

---

### Adjusting volume

#### Increase the volume

› Turn the knob to the right.

#### Reduce the volume

› Turn the knob to the left.

#### Muting

› Press the button or turn the icon knob and adjust the audio volume to 0.

### Note

- The change in volume is displayed on the screen of the unit.
- The following symbol appears in the display when the sound is muted.
- Excessively high volumes can cause sound resonance in the vehicle.
- The car speakers may be damaged if the volume is set too loud or is distorted.
- The loudspeakers in the vehicle are designed for a power output of the device of 4x20 W.
- When equipped with a sound system the speakers are matched for a total amplifier power output of 570 W.

---

### Device menus

![Device menus](image)

**Call up the main menu**

› Press the button.

**Function keys in the main MENU**

- **Menu Radio** » page 19
- **Menu Media** » page 24
- **Menu Tone settings** » page 16
- **Menu Unit settings** » page 15
- **Menu Vehicle systems settings** » page 41
- **Menu Telephone** » page 31

6 Introductory information
Device operation
operate via the device screen

Introduction
This chapter contains information on the following subjects:
Operation 7
Input screen with keyboard 8
Input screen with numeric keyboard 8

First and foremost, pay attention to the safety instructions » page 4, Important notes.
This chapter covers the instrument operation and the work with the touch screen and with various types of input keyboards.

Operation

Explanation of graphic
A Currently selected menu
B - Return to the higher-level menu
C Function with "checkbox"
D Scroll bar - Shows the position in the menu; touch the scroll bar to navigate the menu
E Menu item with "pop-up window"

Screen areas which confirm a function or a menu are called "function keys".
White or green function keys are active.
Greyed out function keys are not active.

Proximity sensors
There are proximity sensors at the bottom of the device. If the screen is approached with the hand, the device changes the display mode to the operating mode and the function keys are highlighted.

Status line
In the main menu of some operating modes, the upper screen area contains a status line displaying time details and the external temperature, as well as information on the currently selected operating mode.

Function keys in the main menu
In the main menu of some operating modes, the lower screen area contains function keys with symbols for functions or menus.

Selecting menu/menu item
» Drag your finger over the screen in the required direction
» Turn the menu knob » Fig. 1 on page 5
If you make the selection by turning the menu knob » Fig. 1 on page 5, the currently selected menu is highlighted in green.

Confirming menu/menu item
» Touch the function key with your finger
» Press the menu knob

Returning to higher-level menu
Context-dependent
» By pressing
» By pressing the relevant button next to the screen
» By touching the screen outside of the pop-up window with your finger

Switching function on/off with "checkbox"
Press the relevant function key
» ✓ or ☐ - Function is switched on
» ☐ or ☐- Function is switched off

Set value
» by touching the function keys with the symbols ▼/ ▲, ◀/▶, - / +
» Touch or move your finger over the scale

Note
For some menus or menu items, the current setting is displayed, e.g. Distance: ... km or distance: ... mi.
The input screen with keypad is used to input entries or find entries in the unit memory (e.g. phone contacts, addresses, etc.).

**Description of the function keys**

- Return to the higher-level menu
- Display the menu with selected contacts, information on the number of relevant contacts
- Delete characters in the entry line
- Change from upper case to lower case and vice versa
- Menu display with keys in the selected language, including diacritics » page 17
- Switch to numbers and special characters
- Switch to special characters
- Switch to letters
- Blank entry
- Confirmation of text entered into the entry line

By pressing the keyboard function key on the input screen the required character appears in text line [A].

Only those letters or symbols making up a logical entry will be available. Do not forget to enter a blank space for terms made up of more than one word, such as Lorem Ipsum. The entries can be entered without special characters (diacritics).

A search of the most relevant terms ensues as soon as letters are entered, so it is not necessary to enter the entire entry name.

Next to text line [A], the number of matching entries is shown in function key [B].

The numbers 1-99 indicate the quantity of matching entries that were found. If even more entries were found, ** is indicated instead of a number. If less than 6 entries were found, a list of the found entries opens automatically.

The input screen with keyboard is mainly used for entering numbers, eg in the phone menu » page 38.

**Description of the function keys**

- Return to the higher-level menu
- Delete characters in the entry line

**Operation via the Maxi DOT display**

This chapter contains information on the following subjects:

- Operate with the control lever buttons
- Operation via the buttons / dials on the multifunction steering wheel - Audio
- Operation via the buttons / dials on the multifunction steering wheel - Telephone

First and foremost, pay attention to the safety instructions » page 4, Important notes.
Some of the device's features are also displayed in the MAXI DOT display\(^1\). Depending on the equipment, these features can be operated as follows.

- With the buttons on the operating lever » page 9
- With the buttons and wheels on the multifunction steering wheel » page 9

**Note**

If the ignition and the side light are switched on, the buttons and dials on the multifunction steering wheel will also be illuminated.

---

**Operate with the control lever buttons**

![Fig. 6 Buttons on the control lever](image)

Each item in the **Audio** menu displayed in the MAXI DOT display can be operated with the buttons/wheels on the multifunction steering wheel.

---

The separate menus and menu items displayed in the MAXI DOT display can be operated with the buttons on the control lever.

- Press and hold - open main menu
- Press briefly - select individual menu items or menus
- Press briefly - select menu item or menu

---

The information shown on the MAXI DOT display (depending on the menu selected)

- **Radio**
  - current frequency band of the radio station;
  - currently playing station of the receivable radio stations in the given frequency band, if less than 5 are receivable;
  - if more than 5 stations can be received, a list of receivable radio stations is displayed with an option to choose one of them;
  - TP traffic announcements.
- **Media**
  - Name

---

\(^1\) The display in the MAXI DOT is described in the » Manual, chapter *Information system*
### Buttons and wheels of the audio menu - Radio/Media

Telephone call function in the MAXI DOT display

Depending on the context, you can select the following functions.

Incoming call
- ☑ Answer - Answer a call
- ☑ Reject - Reject a call
- ☑ Ignore - Ignore a call

Outgoing call
- ☑ Stop - End a call

Current call
- ☑ Hang up - End a call
- ☑ Mic. off - Microphone off
- ☑ Mic. on - Microphone on

</table>

### Voice control

**Introduction**

This chapter contains information on the following subjects:

- function requirements
- Switching on/off
- Help for voice control
- Operation
- not recognizing a voice command
- override a voice command input
- stop/restore voice command input
- Voice commands not included in the Help

**First and foremost, pay attention to the safety instructions** » page 4, *Important notes.*

Some equipment functions can be operated using voice commands. Thus, the use of the device is accelerated and increased comfort while driving.

Voice control can be used in the menus **radio, media** and **phone**.

The voice control system can be operated either by the driver or by the front passenger.

**WARNING**

- Please pay attention to the traffic first and foremost! As the driver you are fully responsible for road safety. Only use the system so that you are in full control of your vehicle in every traffic situation - risk of accident!
- Do not use the voice control system when under stress or in an emergency. Your Voice commands may not be recognized in such situations. In such circumstances a telephone connection may not be established or the connection may take too long to complete. The emergency number should be dialled manually!

### Function requirements

- **Read and observe** ✪ on page 12 first.

**Function requirements for voice control.**

- The ignition is switched on.
- The device is switched on.
- No phone call is in progress.
- The parking aid is not active.

**Requirements for optimum voice command recognition.**

- **Only issue voice commands when the symbol is displayed on the device screen or appears in the information display.** ✪.
- Speak with a normal tone of voice without intonation and excessive pauses.
- Avoid a bad pronunciation.
- Close doors, windows and the sliding roof, in order to prevent external disturbances affecting recognition of the voice commands.
- It is recommended to speak louder at higher speeds, so that the tone of your voice is louder than the increased surrounding noise.
- During voice control, limit additional noise in the vehicle, e.g. passengers talking at the same time.

**CAUTION**

For some languages, there is no voice control available. The device indicates this fact via a text message that is displayed after setting the device language screen » page 15.
Note
- During voice control, no traffic announcements are played.
- Some voice commands must be spelled out when pronouncing depending on the selected language of communication, such as the Source Selection "SD card one.

Switching on/off

Fig. 9  Multifunction steering wheel

Read and observe 1 on page 12 first.

Switching on voice control
- Briefly press the \( \text{VOX} \) button on the device.
- Briefly press the symbol key \( \text{1} \) on the multifunction steering wheel.

Activation of voice control is indicated by an acoustic signal and the device screen will display a collection of basic voice commands for the current menu. The menu display as well as the acoustic signal can be enabled or disabled » page 17.

Switching off voice control
- Press the \( \text{VOX} \) button on the device for a long time or press it twice.
- With a long or double press of the symbol key \( \text{1} \) on the multifunction steering wheel.
- Touch the screen with your fingers (any part of the screen with the exception of the function key \( \text{4} \)).
- Press a button on the device (except for a short pressing of the \( \text{VOX} \) button).
- Utter the voice command Cancel voice control.

Help for voice control

Read and observe 1 on page 12 first.

Start introduction
When you give the voice command Start tutorial, the unit plays one of the seven parts of the voice control tutorial. Individual parts of the introduction can be called separately by issuing the voice command introduction part ... and the number 1 through 7.

Help
When you give the voice command Help, the unit displays a menu containing possible context dependent voice commands. In some cases issuing the voice command help again will cause another section of the help to be shown with further possible voice commands in a menu.

The help does not contain all possible commands.

Operation

Read and observe 1 on page 12 first.

The voice control system can usually be operated through the method “say what you see.”

Speak the descriptions of the green highlighted function keys out loud. For example, the function key Dial no. can be accessed through the voice command “Call number.”

Voice control settings » page 17.

Icons in the voice control menu
- a voice output is played
- a voice command is awaited
- a voice command entry is stopped » page 14
- a voice command is recognized

As long as the system is playing a voice output, it is not necessary to await the end of the message playback. The message can be ended by briefly pressing the \( \text{VOX} \) button or the symbol key \( \text{1} \) on the multifunction steering wheel. In this way the voice output is aborted and a new voice command is expected.
not recognizing a voice command

Read and observe 1 on page 12 first.

If a voice command is not recognised, the system answers with Pardon? and you can give a new command.

If the system does not recognise the second voice command, the help message is provided again and you can give a new command.

If the system does not recognise the third voice command, the system plays the Voice control cancelled message and the dialogue is ended.

override a voice command input

Read and observe 1 on page 12 first.

A voice command can be corrected, modified or re-entered by briefly pressing the \( \text{Voice} \) button on the device or the symbol key \( \text{Voice} \) on the multifunction steering wheel. However, this is only possible if the icon \( \text{Voice} \) is displayed.

You do not have to wait until the voice command is recognized by the system.

stop/restore voice command input

Read and observe 1 on page 12 first.

In some menus, the procedure for entering voice commands can be stopped by turning the knob \( \text{2} \) Fig. 1 on page 5.

The symbol displayed on the unit screen or in the information display then changes from \( \text{Voice} \) on \( \text{Voice} \).

Restore entry

- by pressing the function key with the symbol \( \text{Voice} \);  
- by pressing the \( \text{Voice} \) button on the device;  
- by pressing the symbol key \( \text{Voice} \) on the multifunction steering wheel.

---

Voice commands not included in the Help

Read and observe 1 on page 12 first.

Voice commands to call menus, folders and directories in each menu.

<table>

14 Device operation
This chapter contains information on the following subjects:

Main Menu ........................................................................................................................................ 15
Sound setup ..................................................................................................................................... 16
Screen settings ................................................................................................................................. 16
time and date settings ....................................................................................................................... 17
keyboard settings ............................................................................................................................... 17
Additional keypad language settings ................................................................................................. 17
Unit setup ......................................................................................................................................... 17
Voice control settings ....................................................................................................................... 17
restore factory settings ..................................................................................................................... 18
Bluetooth®-settings .......................................................................................................................... 18

First and foremost, pay attention to the safety instructions » page 4, Important notes.

This chapter covers the basic settings of the device.

Additional settings are described in the individual menus

- Radio » page 22
- Media » page 25
- Phone » page 33
- Vehicle system settings » page 41

The correct display of country-specific characters (e.g. ID3 tag information) cannot always be guaranteed.
Sound setup

Press the [SOURCE] button or the [SETUP] → Sound button.

- **Volume** - Volume settings
  - **Traffic report** - sets the volume for the Traffic program alerts (TP)
  - **Voice control** - Sets the volume for the voice control
  - **Maximum switch-on volume** - Sets the maximum volume after switching on
  - **Volume adjustment** - Speed-dependent volume increase
  - **iPod volume** - Sets the volume for the connected iPod (on the MEDIA input)
    - **Quiet** - Low volume
    - **Medium** - Medium volume
    - **Loud** - High volume
  - **AUX volume** - Sets the volume for the device connected via AUX
    - **Quiet** - Low volume
    - **Medium** - Medium volume
    - **Loud** - High volume
  - **Bluetooth audio** - Sets the volume of the connected Bluetooth® device
    - **Quiet** - Low volume
    - **Medium** - Medium volume
    - **Loud** - High volume
  - **Audio lowering** - Setting the reduction of the volume when the park distance control is active
    - **Off** - switches off
    - **Weak** - weak reduction
  - **Bass - Mid - Treble** - Sets the bass, mid and treble
  - **Balance - Fader** - Sets the balance between left and right, front and rear
  - **Confirmation tone** - Switch on/off confirmation tone when a function key is pressed
  - **Subwoofer** - Subwoofer volume settings
  - **CANTON advanced setup** - Setup of the Canton®-Sound system
    - **Select equaliser sound** - Equaliser settings
      - **Music** - Music
      - **Language** - Language
    - **Sound focus** - Set the sound perception for different zones in the vehicle interior
      - **Off** - Settings apply to the whole vehicle
      - **Front** - Optimised setting for the front occupants
      - **Driver** - Optimised setting for the driver
  - **CANTON surround** - virtual Canton®-surround system (active during media playback)

Screen settings

Press the [SETUP] → Screen button.

- **Switch off screen (in 10 seconds)** - Activate/deactivate energy-saving mode for the display
  1) If after 10 seconds, the screen is not activated by approaching, touching the screen or operating the menu button [2] → Fig. 1 on page 5 the screen turns black. You can switch the display back on again by approaching it with your hand, touching it, or operating the menu knob [2].
  - **Brightness** - Adjusts the brightness of the screen
    - **Brightest** - brightest level
    - **Brighter** - brighter level
    - **Medium** - medium level
    - **Darker** - darker level
    - **Darkest** - darkest level
  - **Confirmation tone** - Switch on/off confirmation tone when a function key is pressed
  - **Show clock in standby mode** - Time and date displayed on the screen when the ignition is switched on and the unit is switched off

1) If after 10 seconds, the screen is not activated by approaching, touching the screen or operating the menu button [2] → Fig. 1 on page 5 the screen turns black. You can switch the display back on again by approaching it with your hand, touching it, or operating the menu knob [2].
time and date settings

› Press the (Setup) → Time and date button.

■ Time: - Time settings
■ Summer (DST) - Switches the summer time setting on/off
■ Time zone: - Select the time zone
■ Time format: - Set the time format
  - 12h
  - 24h
■ Date: - Date settings
■ Date format: - Set the date format
  - DD.MM.YYYY - Day - Month - Year
  - YYYY-MM-DD - Year - Month - Day
  - MM-DD-YYYY - Month - Day - Year

keyboard settings

› Press the (Setup) → Keypad: button.

■ ABC - keys arranged alphabetically
■ QWERTY - Arrangement of the keys as per the QWERTY system (in accordance with computer keyboard arrangement)

Additional keypad language settings

› Press the (Setup) → More keypad languages button.

In this menu, the keyboard character arrangement for the chosen language can be selected, and with this the option for fast entry of the characters used in the selected language.

It is then possible to swap between the languages in the input screen showing a keyboard by pressing (Setup) → page 8.

Unit setup

› Press the (Setup) → Units button.

■ Distance: - Distance units
  - km - Kilometres
  - mi - Miles

Speed: - Speed units
■ km/h - Kilometres per hour
■ mph - Miles per hour

Temperature: - Temperature units
■ °C - Degrees Celsius
■ °F - Degrees Fahrenheit

Volume: - Volume units
■ l - Litres
■ gal (US) - Gallons (US)
■ gal (UK) - Gallons (UK)

Consumption: - Consumption units
■ l/100km - Litres per 100 kilometres
■ km/l - Kilometres per litre
■ mpg (US) - Miles per gallon (US)
■ mpg (UK) - Miles per gallon (UK)

Gas consumption: - Gas consumption units
■ kg/100km - Kilograms per 100 km
■ km/kg - Kilometres per kilogram
■ m³/100 km - Cubic metres per 100 kilometres
■ km/m³ - Kilometres per cubic metre

Pressure: - Pressure units for tyre pressure
■ kPa - Kilopascal
■ bar - bar
■ psi - Pounds per square inch

Voice control settings

› Press the (Setup) → voice control system button.

■ Dialogue style: - Setting the dialogue style
■ Long - Long dialogue (the system plays complete acoustic messages)
■ Short - Short dialogue (the system shortens some acoustic messages or substitutes them with an acoustic signal)

■ Display available commands - Switch on/off the menus containing basic voice commands when voice control is activated

■ Voice control session start tone - Switch on/off the audible signal that is output when voice control is activated

■ Voice control session end tone - Switch on/off the audible signal that is output when voice control is ended

■ Input tone in voice dialogue - Switch on/off the audible signal that is output to signal that voice control is waiting for a command
**restore factory settings**

› Press the **Set** → Factory settings button.

- **Restore factory settings** - Reset all factory settings
- **Sound** - Restore default settings for sound
- **Radio** - Restore default settings for radio
- **Vehicle** - Restore default settings for the vehicle systems
- **Telephone** - Restore default settings for phone
- **Media** - Restore default settings for media
- **Voice control** - Restore default settings for voice control
- **Bluetooth** - Restore default settings for the Bluetooth® function
- **System** - Restore the system default settings

**Bluetooth®-settings**

› Press the **Set** → Bluetooth button.

- **Bluetooth** - Bluetooth® function on/off
- **Visibility**: - Switch on/off the visibility of the Bluetooth® device for other devices
  - **Visible** - Visibility is always on
  - **Hidden** - Visibility is off
- **At start-up** - Turns on visibility for 5 minutes after switching on the ignition or until the driving speed has exceeded 5 km/h
- **Name**: - Open the input screen with keyboard - Change the device name
- **Paired devices** - Display the list of paired Bluetooth® devices; connect or delete a paired device; delete the list of paired devices
- **Delete all** - Delete all paired Bluetooth® devices
- **Delete** - Delete the paired Bluetooth® device
- **Find devices** - Searches for available external devices with enabled Bluetooth® functions and activated visibility
- **Bluetooth audio (A2DP/AVRCP)** - Switch on/off the connection option for Bluetooth® profiles A2DP and AVRCP

---

1) A2DP and AVRCP are Bluetooth® profiles that support multimedia functions.
Radio

Operation

Introduction

This chapter contains information on the following subjects:

Main menu ................................................................. 19
List of available stations ........................................... 20
Search and store radio station .................................... 20
Search the available stations (Scan) .......................... 21
Station logos ............................................................... 21
Traffic programme ..................................................... 21
Station information (DAB) .......................................... 22

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The device allows analogue radio reception of FM and AM frequency ranges as well as DAB digital radio reception.

The radio reception DAB allows multiple stations to be transmitted in a single frequency in the form of a so-called ensemble. It also allows for the transmission of additional data and information (e.g. messages, sport, weather, warnings, etc.).

⚠️ CAUTION

▪ Car parks, tunnels, tall buildings or mountains can disrupt the radio signal even causing it to fail completely.
▪ For vehicles with window antennas; if the windows are covered in foil or with metallic film stickers, reception interference may be experienced.
▪ In countries where the RDS function is not supported sufficiently, we recommend turning off the RDS and AF functions. Otherwise, these settings can affect the functionality of the radio.

Read and observe 1 on page 19 first.

Main menu

Fig. 12

Radio: Main menu

- Call up the main menu
  › Press the button.

- Choose the broadcasting range
  › Press the button repeatedly.
  or
  › Press the function button D » Fig. 12 and select the desired range.
Information symbols in the display

</table>

List of available stations

**Fig. 13** Example of the list of available stations: FM / DAB

Read and observe on page 19 first.

The station with sufficient signal strength are shown in the list of available stations. The unit examines these stations automatically.

Show stations list

- In the **radio** menu press the function key ``.

</tbody>
</table>

Update Channel List

In the FM band the station list is continually updated automatically.

In AM and DAB bands update is performed manually by pressing the function key ``.

Sorting the types of radio stations in the station list (FM)

- **Alphabet** - alphabetical order according to station name
- **Group** - Sort by broadcasted type program

Search and store radio station

Read and observe on page 19 first.

A radio station can also be searched for and stored under a preset button.

Automatic station search

Automatically set stations are in the list of available stations.

Semi-automatic station search

- In the **radio** menu press the function key ``.
- The function key `` or ``.

The device scans the broadcasting range until the first receivable station is tuned.

Manual station search

- In the **radio** menu press the function key ``.
- Select the desired station using the function keys `` or `` or adjusted by moving the slider across the screen.

Store radio stations under a preset button

- Press the desired station in the list of available stations and hold down.

A list of station button `B` will be displayed » Fig. 12 on page 19.
- Press the preset button `B` as to where you want to save the desired station.

or

- Set the desired station manually or semi-automatically.
- Press and hold the desired station key `B` until you hear an acoustic signal.

You can switch between groups of individual preset buttons using the function keys `C`.
**Search the available stations (Scan)**

Read and observe on page 19 first.

This function shows all the receivable stations in succession, each for a few seconds.

**Switching on**

› Press the menu knob \[2\] » Fig. 1 on page 5.

or

› In the radio menu press the function key \[\] → Press Scan.

**Switching off**

› Press the menu knob \[2\].

or

› press any function key in the device screen.

After switching off the function, the device plays the station at which the function was cancelled.

---

**Station logos**

Read and observe on page 19 first.

The present buttons \[8\] » Fig. 12 on page 19 can be linked to logos (images) of the radio stations.

**Store the station logo automatically (FM / DAB)**

› Before you store the radio station to a station button function key press in the Radio menu the function key \[\] Press → Advanced settings.

› Activate the menu item Auto-save station logos » page 22, Advanced settings and » page 23, Advanced settings (DAB).

when you save the station to a station button, the station is also assigned a logo from the device memory if the logo is available in the memory.

**Storing station logos manually**

For the previously stored stations a logo can be assigned manually.

› Press the function key \[\] Press → Station logos.

A menu with preset buttons for radio stations is displayed.

› Press the station button for the station which is to be assigned a logo.

A menu for data media (CD, SD card, USB) is displayed.

› The desired image is to be selected in the corresponding data media.

Selecting the image causes this to be assigned to the corresponding station.

**Note**

- The following image formats are supported: jpg, gif, png, bmp.
- We recommend a resolution of up to 500 x 500 pixels.

---

**Traffic programme**

Read and observe on page 19 first.

**Switching on/off**

› In the radio menu, press the function key \[\] .

› Enable or disable the menu item Traffic programme (TP).

**Traffic reports**

During a traffic announcement, the following menu is displayed.

› Cancel - interruption of the current traffic report. The TP function remains activated.

› Deactivate - Exit the current traffic report and turn off the TP function.

**Note**

- Some radio stations misleadingly identify themselves as traffic programs. It is therefore not a device error that with such radio stations, no traffic news exist.
- During playback in the media menu the traffic information from the last selected radio station is received.
- Should this radio station not transmit traffic reports or the signal is not available, then the device automatically searches for a TP station.
Station information (DAB)

Fig. 14 Station information

Read and observe on page 19 first.

This DAB allows the transmission of various additional information. The display options for this information on the screen can be adjusted in the following menu.

› Press the function key in the Radio menu DAB ．
  ▪ Preset list - Display only stored DAB stations
  ▪ Station info. - Displays DAB station information, accompanying text (radio text) and images (e.g., artist name or programme and image type where these are broadcast)
  ▪ Radio text - Displays one radio text
  ▪ Slide show - Displays one image; (the image will switch to full-screen view until you switch the screen back on by moving your hand towards it)

Note

If you touch the screen in the area where the accompanying text (radio text) is displayed, the screen will only display this information. If you touch the screen in the area of the displayed image, only images will be displayed on the screen.

Radio settings

Introduction

This chapter contains information on the following subjects:

Settings ........................................................................................................... 22
Advanced settings ......................................................................................... 22
Advanced settings (DAB) ................................................................................ 23

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The basic setting of the radio functions is the same for all broadcasting ranges. The Advanced setup menu item is different for FM and DAB. The AM broadcasting range does not have this menu.

Settings

› In the radio menu, press the function key ．
  ▪ Sound - Sound settings » page 16, Sound setup
  ▪ Scan - Auto-play all stations in the current frequency band, each station for around 5 seconds.
  ▪ Arrow buttons: - Setting the station select function in the Radio menu
    ▪ Preset list - only switch preset radio stations (Preset buttons)
    ▪ Station list - Switches all radio stations currently in range for the selected frequency band
  ▪ Traffic programme (TP) - Switches traffic programme on/off
  ▪ Delete presets - Deletes the stored stations (preset buttons)
    ▪ Delete a certain radio station (preset button)
    ▪ Delete all - Deletes the stored stations (preset buttons)
  ▪ Station logos - manual assignment of station logos » page 21
  ▪ Radio text - Switches the text display radio (FM and DAB)
  ▪ Advanced setup - Another setting that is different depending on the selected waveband (FM and DAB)

Advanced settings

› Select the FM band in the Radio menu, and press the function key ．→ Advanced setup.

  ▪ Alternative frequency (AF) - Switching on/off the search for alternative frequencies of the station currently being heard, when you turn off AF off is displayed on the device screen
  ▪ Radio Data System (RDS) - Switches on/off the RDS function
RDS Regional: Switch on/off the automatic tracking of related regional stations
  - Fixed - Maintains the selected regional station continuously. When the signal is lost, another regional station must be set manually.
  - Automatic - Auto-selects the station with the best reception at the moment. If you lose reception the region, the unit will automatically set another available region.
  - Auto-save station logos - Auto save the station logo according to the PI code of the radio station » page 21

Advanced settings (DAB)

- Select the DAB band in the Radio menu, and press the function key Press → Advanced setup.

  - DAB traffic announcements - Switches on/off DAB announcements
  - Other DAB announcements - Switch on/off other announcements (e.g., warnings, regional weather, sports reports, financial news)
  - DAB - DAB station tracking - Switch on/off automatic DAB station tracking in other station groups
  - Automatic DAB - FM switching - Switches on/off auto-switching from DAB to the FM frequency band if the DAB signal is lost
  - L-band - Switches on/off the automatic DAB station search in L-band
  - Auto-save station logos - Automatic association of the logo with station detected » page 21

DAB programme tracking
If a DAB station is a member of several station groups, when the signal is poor, the same station is searched in a different station group.

Auto-change DAB -FM
If the DAB signal is poor, the unit will try to find a corresponding FM station for the DAB station you are currently listening to.

For auto-change to work, the DAB and FM stations must send a sender ID.

- While the station is received on the FM band (FM) is displayed after the station name. The () marker disappears when the relevant DAB station can be received again (FM).
- If a DAB station is also not available in the FM band due to poor reception, the device will be switched to mute.
- If you do not want automatic station change (e.g. when driving through tunnels, when reception may be lost temporarily), you can deactivate this function.

L-band
For the DAB radio reception in different countries, different frequency ranges are used. In some countries the DAB radio reception only in the so-called L-band.

- If you have any problems with the DAB wireless reception it is necessary to ensure that the DAB Automatic tuning in L-band is on.
- If no DAB radio reception in the L-band is possible in the country, then it is better to leave this menu item switched off. This causes the channel scan to be faster.
This chapter contains information on the following subjects:

- Main menu
- Track/folder list
- Playback
- Media settings

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The device allows you to play audio files in various formats » page 26 from different data carriers and to connect different source types.

When the signal source has been connected, the device starts to automatically play audio files in alphabetical order.

Types of device operation » page 7.
- On the device with the operating elements.
- Using the function keys on the unit screen
- Via the Maxi DOT display.

Main menu

Fig. 15

Media: Main menu

Call up the main menu
- Press the \[\text{Menu}\] button.

Explanation of graphic

- Information for the current track / file (e.g., artist, track title)
- Selected signal source/display of cover art provided that this exists in the file being played (ID3 tag)
- Playback timeline (With details of the playing time and remaining playing time of the track). A movement within the track is possible by moving the slider or touching the desired location on the time axis.

Select signal source

The function key menu \[\text{D} \] » Fig. 15.

- CD - Changes to an inserted CD » page 27
- SD card 1 - Changes to a memory card inserted in SD 1 » page 28
- USB - Switch to a disk connected to the USB input » page 29
- AUX - changes over to an external audio source connected to the AUX input » page 29
- iPod - changes over to an Apple device connected to the MEDIA IN input » page 30
- BT audio - Changes to a Bluetooth® player » page 27

Track/folder list

Menu display
- Press the function key in the menu Media \[\equiv\].
Explanation of graphic
A Displays the folder structure, function keys of higher-level folders
B Function keys for playback from the audio source » table on page 25
C Track currently playing

1 Note
In the title / folder list a maximum of 1000 files / folders are displayed alphabetically.

Playback
The unit plays the files in alphabetical order.

Description of the playback function keys

<table>
<thead>
<tr>

</table>

<sup>a</sup> Within 3 seconds after the start of the track playback.
<sup>b</sup> After about 3 seconds after the start of playback of the track.
<sup>c</sup> The longer the button is pressed, the faster the fast forward/reverse.

Function scan
The scan function can be operated as follows.
▷ Pressing the function key SCAN » table on page 25 on and off.
▷ Switching on and off by pressing the menu button 2 » Fig. 1 on page 5.
▷ By switching to a different file / signal source or by pressing one of the function keys for playback.

1 Note
The function keys listed in the table are different depending on the currently selected menu screen.

Media settings
▷ Press the function key in the menu Media ©.
- Sound - Sound settings » page 16, Sound setup
- Mix/repeat(scan including subfolders) - switching the song playback including subfolders in the following modes Shuffle / Repeat / Automatic play
- Bluetooth - Settings for the Bluetooth® function » page 18
- Video (iPod) - Parameter settings for a video played by an Apple device (brightness, colour, contrast, format, standard) » page 30
- Traffic programme (TP) - switches traffic programme on/off
- External AUX device - Enables / disables the AUX input
- Remove safely - safe removal of the connected data carrier
  - SD Card 1 - SD Memory Card 1
  - USB 1 - an input disk connected to the USB

Signal source

Introduction
This chapter contains information on the following subjects:
- Supported sources and file formats ___________________________ 26
- Requirements and Limitations ________________________________ 27
- Bluetooth®-player __________________________________________ 27
- CD ______________________________________________________ 27
- SD memory card ____________________________________________ 28
- USB-, AUX-Eingänge ______________________________________ 29
- MEDIA IN - input __________________________________________ 30
First and foremost, pay attention to the safety instructions » page 4, Important notes.

**WARNING**
- Never place external signal sources close to the airbags. Loose objects could hit a deployed airbag and injure occupants – danger of death!
- Never place external signal sources on the console panel. Loose objects can be thrown forward during a sudden manoeuvre or in case of an accident and can injure the occupants.
- Do not place external signal sources while driving in your hand or on your knees. Loose objects can be thrown forward during a sudden manoeuvre or in case of an accident and can injure the occupants.
- Always route the connection cable of the external signal source such that it does not in any way restrict you when driving.

**CAUTION**
- We recommend that you do not store any important data on CD media, Bluetooth® players, to an SD memory card or connected external devices. The ŠKODA Partner is not responsible for damage due to the loss of data stored on these storage devices.

**Note**
For some external devices, the setting of the output volume can be changed.

**Supported sources and file formats**

Read and observe ▶ and ◀ on page 26 first.

| Pictures on the album covers | Image resolution up to 500 x 500 pixels (200 kb) (jpg, jpeg, png, bmp, gif), depending on the availability of album covers they are displayed on the respective media |

**CAUTION**
- At the time of publication, the device has been tested with most products and media available in the various markets up to a size of max. 32 GB. However, it is possible that some external devices, media or files are unreadable or unplayable.
- The GPT Standards (GUID Partition Table) method structured signal sources are not supported by the device.
**Requirements and Limitations**

Read and observe 1 and 2 on page 26 first.

The name of the artist, the album and the title of the played file can be displayed if the information is available as a so-called ID3 tag. If no ID3 tag is available, only the folder name is displayed.

For good playback, we recommend, at a bit rate of at least 160 kb/s using compressed MP3 files.

For audio files with variable bitrates, the indicated remaining playback time does not correspond to the actual remaining playback time.

Files that are protected by Digital Rights Management (DRM) technology cannot be played back by the device.

**Bluetooth®-player**

Read and observe 1 and 2 on page 26 first.

The device makes a wireless connection (pairing) to the Bluetooth® player possible.

- For connecting follow the same instructions as for pairing the device with a telephone » page 34.

**Note**

- We recommend adjusting the volume on the portable player to the maximum level.
- The volume can also be adjusted by setting the input sensitivity of the unit for Bluetooth® player » page 16, Sound setup.
- The supported media functions are dependent on the type of Bluetooth® player used.

**CD**

Read and observe 1 and 2 on page 26 first.

The CD slot is located in the storage compartment on the passenger side external unit » Fig. 17.

**Inserting/ejecting a CD**

- Insert a CD, with the labelled side facing up, into the CD slot until it is automatically drawn in. Playback starts automatically.
- Press the symbol button △ - the CD is ejected.

If the ejected medium is not taken out within 10 seconds, it will be retracted again for safety reasons. However, the unit will not change to the CD source.

**WARNING**

- The CD/DVD player is a laser product.
- On the manufacturing date, this unit was classified as a class 1 laser product in accordance with the national/international standards DIN EN 60825-1: 2008-05 and DHHS Rules 21 CFR, Subchapter J classed as a class 1 laser product. The laser used in this class 1 laser product is so weak that there is no risk of danger when operated correctly.
- This product is designed so that the laser is restricted to the inside of the unit. However, the installed laser could be classified in a higher class were the housing to be removed. For this reason, never remove the housing of the unit.
CAUTION

- Be sure to wait until the CD has been fully ejected before you try to insert a new CD. Otherwise you can damage the drive inside the unit.
- Only insert into the CD - drive original audio - CDs or standardised CD-Rs and CD-RWs.
- Do not stick anything to the CDs!
- Outside temperatures that are either too high or too low might cause the playback device to switch off temporarily. The unit switches to the last active menu.

Note

- After pressing the icon button ▲, it takes a few seconds for the CD to be ejected.
- Uneven or unsteady road surfaces and strong vibrations may cause the CD to jump.
- Damp (condensation) may affect the device in cold weather or after showers. This can lead to playback jumps or impair the play function. In that case, wait until the moisture has dissipated.
- If the CD has mechanical damage, is not readable or is inserted incorrectly, the following message is displayed: Error: CD. Check the CD and insert properly into the drive.
- It is possible that CDs protected by copyright and home-made CDs will not be played back at all or only in certain circumstances.
- The national copyright laws that apply in your country must be observed.

SD memory card

Read and observe 1 and 2 on page 26 first.

The device makes it possible to play audio files from the SD memory card.

The SD slot is located in storage compartment on the passenger side external unit » Fig. 18.

Insert the SD memory card

1. Push the SD memory card into the relevant memory card slot with the slanted edge to the right until it “locks into place”. Playback starts automatically.

Remove the SD memory card

1. Press the ▲ ▼ → Remove SD card 1 safely button.
2. Press the inserted SD memory card. The SD memory card “jumps” to the output position.

Unreadable SD memory card

If there are no readable files on the SD memory card nothing will play.

Due to differing quality requirements from different card manufacturers, it is not always possible to guarantee the playback from SD memory cards.

Some files on the SD memory card or the complete SD memory card cannot be played back or their reproduction may be limited.

CAUTION

- Only use SD cards in standard size. When using smaller SD card with the adapter the SD memory card may fall out or the adapter while driving the vehicle due to vibrations.
- We recommend using SD memory cards of class 4 and higher. This guarantees the fastest possible access to the audio files.
- Always store the SD cards in suitable cases to protect them from dirt, dust and other forms of damage.
USB-, AUX-Eingänge

Read and observe 1 and 2 on page 26 first.

The device allows you to play audio files from USB storage devices, as well as external devices connected to the AUX input.

The USB and AUX inputs are located above the storage compartment at the front of the centre console » Fig. 19.

An external device can be connected to the USB/AUX input either directly or via a connection cable from the ŠKODA range of original accessories.

**AUX-Eingang**
External devices connected to the AUX input cannot be operated from your device.

The standard 3.5 mm stereo jack plug is used for the AUX input. If the external devices do not have this jack plug, you must use an adapter.

Setting the volume control can be changed on the input sensitivity to the AUX input » page 16, Sound setup.

**USB input**
External devices connected to the USB input can be operated from your device.

Before removing the USB device, proceed as follows:

> Press the button \[\text{MENU}\] \[\rightarrow\] \[\text{\textcopyright}\] \[\rightarrow\] Remove USB device safely.

---

1) Some operating options on an external device may not be supported.

**Charge USB audio source**

With the ignition on after connecting the USB audio source, the charging process is automatically started (applies for audio sources where charging via the USB connector is possible).

The charging efficiency can be different compared to the charging from the usual mains power supply. Connected audio sources can be supplied / loaded with a current of max. 500 mA.

Some connected audio sources may not be recognised and cannot be charged.

The charging of the connected audio source is automatically stopped after switching off the ignition.

**CAUTION**

- The AUX input must only be used for audio devices!
- If an external device is connected to the AUX input, which is equipped with an adapter for external power supply, the sound may be impaired. This depends on the quality of the adapter which is used.
- USB extension cables or adapters may affect the operation of the connected external device.
- USB hubs are not supported.

**Note**

When operating as well as connecting the external device, the respective operating instructions are to be observed.
Read and observe 1 and 2 on page 26 first.

The device allows you to play audio files from an external, device connected to the MEDIA-IN input.

External sources such as Apple devices, connected to the MEDIA IN input, can be operated via your device.

Extension cables to connect external sources are available from ŠKODA original accessories.

Sort tracks from a connected Apple device

- Video (only available if a red adapter is used) - Video playlists, films, music videos, TV shows, video podcasts, rented films.
- Music - Playlists, artists, albums, tracks, podcasts, genres, composers, audio books.

Video setup

- Press the button [MEDIA] → [ ] → Video (iPod) button.
- Screen – Adjust the brightness, contrast, and colour of the video (during playback in NTSC standard - option for colour adjustment)
- Format - Set the screen width/height ratio
- AV standard: 1) Video standard settings
  - Automatic - Automatic selection of standard
  - PAL - Select the coding standard for the PAL colour signal
  - NTSC - Select the coding standard for the NTSC colour signal

Note

- Some of the operating options of the Apple device, such as the rating of songs or the assignment of the title of an "on-the-go" playlists are not supported.
- Some of the operating options of the Apple device or the video playback are supported only by using an extension cord marked in red.
- After power cycling the ignition, the video playback will not be restored from an Apple device.
- For safety reasons, the video display is switched off at speeds over 5 km/h. The unit continues to play the soundtrack.
- Setting the volume control can be changed on the input sensitivity to the MEDIA IN input » page 16, Sound setup.

1) The same standard must be selected in the external source. An incorrectly adjusted AV standard can result in inadequate playback quality. The unit outputs no picture at all, or only renders it in black and white.
Communication

Telephones and two-way radio systems

Introduction

This chapter contains information on the following subjects:

- Introductory information
- Main menu
- Problems with the Telephone function
- Phonebox
- Settings

The Telephone menu is available when the following conditions are met.

- The ignition is switched on.
- The Bluetooth® function on the device is switched on.

After the device is switched on, the system attempts to connect to the most recently connected phone. If a telephone is connected to the device and the device is turned off, the connection is not dropped to the phone. The connection is lost after switching off the ignition (for vehicles with the system KESSY after switching off the ignition and opening the driver’s door).

If a telephone is connected to the device and the device is turned off, the connection is not dropped to the phone. The connection is lost after switching off the ignition (for vehicles with the system KESSY after switching off the ignition and opening the driver’s door).

⚠️ WARNING

- The national legal regulations for using a mobile phone in a vehicle must be observed.
- If a mobile phone or a two-way radio system is operated in a vehicle without an external aerial or with an incorrectly installed external aerial, this can increase the strength of the electromagnetic field inside the vehicle.
- Two-way radio systems, mobile phones or mounts must not be installed on airbag covers or within the immediate deployment range of the airbags.

Read and observe 1 and 2 on page 31 first.

The device allows for a wireless connection to the phone. Your phone can be operated from this unit.

ŠKODA permits the operation of phones and two-way radio systems with a professionally installed external aerial and a maximum transmission power of up to 10 watts.

Please ask at a specialist workshop about installing and operating phones and two-way radio systems that have a transmission power of more than 10 W.

Operating phones or two-way radio systems may interfere with the functionality of the electronic systems in your vehicle.

1 With some phones, it is necessary to set the connection to the device as “authorised” in order for the automatic connection to be successful. If this is not set, the system will prompt you for a confirmation each time you attempt to connect to the phone.
The reasons for this are as follows:
› no external aerial;
› incorrectly installed external aerial;
› transmission power greater than 10 watts.

### Note

- We recommend that the installation of mobile phones and two-way radio systems in a vehicle be carried out by a specialist garage.
- The phone features are dependent on the mobile network operators, as well as the phone being used. Further information is available from the mobile network operator or to refer to the telephone manual.
- In signal-free areas the reception can be disturbed or a call will be disconnected.
- Most modern electronic equipment is shielded against high frequency signals. In exceptional cases, electronic equipment may not be shielded against high frequency signals of the telephone and service may be disrupted.

### Main menu

![Fig. 21](image)

**Operator**

- **A** Name of the mobile network provider
- **B** Name of the connected phone, press to open a list of paired phones
- **C** Speed dial favourite telephone numbers » page 37
- **D** Direct entry of a telephone number » page 38
- **E** Display the telephone book » page 38
- **F** Display of call list (if there are new missed calls, the icon will appear here with the information about the number of missed calls) » page 39
- **G** Menu settings for the Telephone » page 33

Read and observe 1 and 2 on page 31 first.

### Explanation of graphic

<table>
<thead>
<tr>
<th>Symbol</th>

\(^a\) This function is only supported by some phones.

### Problems with the Telephone function

- **Read and observe 1 and 2 on page 31 first.**

If there are problems with the availability of the network or with the Bluetooth\(^\circledR\) function, the following messages appear on the device display screen.

<table>
<thead>
<tr>
<th>Message</th>
<th>Importance</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Network search...</strong></td>
<td>The phone searches for available GSM networks.</td>
</tr>
<tr>
<td><strong>No network</strong></td>
<td>The phone is not connected to the GSM network.</td>
</tr>
<tr>
<td><strong>Rejected by network.</strong></td>
<td>The mobile phone network operator has rejected the connection (e.g. not enough mobile phone credit, SIM card blocked, roaming not available).</td>
</tr>
<tr>
<td><strong>To use the Bluetooth function, please switch the ignition on.</strong></td>
<td>Switch on the ignition.</td>
</tr>
<tr>
<td><strong>Please switch on Bluetooth.</strong></td>
<td>Switch on the Bluetooth(^\circledR) function.</td>
</tr>
<tr>
<td><strong>No Bluetooth devices paired.</strong></td>
<td>Connect the phone with the device.</td>
</tr>
</tbody>
</table>
At the bottom of the storage compartment in the front center console is an induction plate connected to a GSM roof antenna roof - the Phonebox.

**Function**
When the phone is inserted into the Phonebox, the phone signal increases in strength by about 20%. This reduces the level of phone battery discharge and the electromagnetic radiation inside the vehicle.

**Inserting the phone into the Phonebox**
› Press on the edge of the lid [A] in the direction of the arrow, and open the storage compartment.
› Place the phone in the storage compartment [B] with its back on the induction panel.
› Pull on the edge of the lid [A] in the opposite direction from the arrow, and close the storage compartment » [F].

The Phonebox cannot be used as an alternative to connecting the phone with the device.

**WARNING**
For safety reasons, the storage compartment must always be closed when driving.

**CAUTION**
- Protective cases or cases around the phone placed in the storage compartment may interfere with the phone signal strength.
- Metallic objects such as coins or keys under the phone can affect the phone signal strength.

**Settings**

Read and observe [I] and [I] on page 31 first.

› Press the button ![](/static/phonebox.png) → ![](/static/phonebox.png) .

- **Select telephone** - Search for available telephones/list of paired telephones/select telephone
- **Find telephone** - Search for a mobile phone
- **Bluetooth** - Bluetooth® settings » page 18
- **User profile** - User profile settings
- **Manage favourites** - Assign function keys to allow speed dialling of contacts; you can also add and delete contacts here
- **Enter mailbox number** - Enter the phone number of the voicemail
- **Prefix** - Switch on/off the option to assign a prefix to a telephone number. Once this function is activated, the button for adding a prefix will be displayed with the symbol in some menus.
- **Enter here** - Enter the prefix of a phone number
- **Sort by**: - Sort the order of the telephone book
  - **Surname** - Sort by contact name
  - **Name** - Sort by contact first name
- **Import contacts** - Starts update of the telephone book; the number of imported contacts and number of contacts stored in the phone is displayed
- **Delete other user profiles** - Delete up to three of the last connected user profiles (contacts, order of calls, call lists, speed dial buttons assigned to contacts)
- **Reminder: Remember your mobile** - Switch on/off reminder for a connected telephone when the ignition is switched off and the ignition key is removed (or the ignition is turned off and the driver's door opened in the case of vehicles with the KESSY system)
- **Select ring tone** - Selects the ring tone if the connected phone does not support the in-band ringing function
- **Show pictures for contacts** - Switch on/off the display of the image assigned to the contact in the telephone

### Connect the device with the mobile phone

#### Introduction

This chapter contains information on the following subjects:

- Conditions for pairing
- Connect device with your mobile phone
- Pair the mobile phone with the device
- Connection with another paired mobile phone
- Switching on/off Bluetooth profile
- Clear mobile phone from the list of paired devices
- Disconnection

First and foremost, pay attention to the safety instructions » page 4, Important notes.

The device is displayed in the telephone to be connected to as SKODA BT ... is replaced with the last four symbols of the VIN vehicle identification number of your vehicle.

You can change the name of the device » page 18.

### WARNING

The unit may require confirmation of certain features in the mobile phone when pairing. Do not carry out the pairing process while driving - there is danger of accidents!

### Note

- The maximum number of paired phones is 20. When the maximum number of paired telephones has been reached, the next one will cause the paired telephone that has not been used for the longest to be automatically deleted.
- In some countries, the use of the Bluetooth function with phones can be restricted. Further information can be obtained from local authorities.

#### Conditions for pairing

- **Read and observe 1 on page 34 first.**

To connect a phone with the device, the two devices must be paired.

### Prerequisites for successful pairing:

- The ignition is switched on.
- The Bluetooth function of the device » page 18 for the mobile phone is switched on.
- The visibility of the mobile phone is switched on » page 18.
- The mobile phone to be connected should not have an active connection to another mobile phone.

The pairing can be initiated from the device as well as from the mobile phone.

#### Connect device with your mobile phone

- **Read and observe 1 on page 34 first.**

A telephone is paired with the device

After switching on the ignition the device attempts to connect to the last connected mobile phone.

During the connection process and depending on the phone type the message ... **may be shown on the device screen Would you like to connect?** and a menu will appear with the following function keys.

- **Connect** - pairing confirmation
- **Cancel** - end the pairing process

If the connection cannot be established, the device will then attempt to connect to other previously paired phones one by one.

If there is also no connection possible, then a phone search is to be started.

---

1 The in-band ringing function makes it possible to use the ring tone of your phone as the ring tone.
2 This function is only supported by some phones.
**No phone is paired with the device**

After switching on the ignition, the following message appears in the device screen **Please search for and connect a mobile telephone**, and a menu with the following function keys appear.

- Find telephone - search for available phones with activated Bluetooth® function and visibility
- - open the settings menu » page 33, Settings

Press after the completion of the search **Results** the function key, it will display a list of discovered phones (the function key is also available during the search).

Select the phone you want from the list.

If the search fails, check that the conditions for successful pairing are met » page 34, Conditions for pairing and repeat the whole process.

**Pairing confirmation**

Depending on the phone’s Bluetooth® version the pairing is to be confirmed in one of the following ways.

- In the device and the phone confirm within 30 seconds, the 6-digit PIN code displayed on the device screen and the phone display 1).
- If necessary select in the phone the option for automatically connecting the phone to the device.

or

- In the telephone confirm the connection request.
- Enter the 4 digit PIN code shown on the unit display into the phone within 30 seconds
- If necessary select in the phone the option for automatically connecting the phone to the device.

**Connection**

After successful connection, the device will display the message **... user is connected.**, and then the main phone menu » Fig. 21 on page 32 is displayed.

---

1) For devices with Bluetooth® v2.1 and later the phone quick pairing procedure (SSP Secure Simple Pairing) is used for pairing. This pairing method requires no PIN to be entered by the user.

2) For the name of the device, refer to the Bluetooth® settings » page 18.

3) For devices with Bluetooth® v2.1 and later the device quick pairing procedure (SSP Secure Simple Pairing) is used for pairing. This connection method requires no PIN to be entered by the user.
If another phone is connected to the device then only the pairing of the new phone is allowed, but the original phone remains connected.

**Connection with another paired mobile phone**

- Read and observe on page 34 first.

If you want to connect the device to another paired phone, the current connection does not have to be terminated. The connection to the existing phone is automatically terminated by connecting to another mobile phone.

- In the main menu Telefon press the function key [B] » Fig. 21 on page 32.

It displays a list of previously paired phones.

- Select the paired phone to be connected with the device.

In the device screen, the message *Replace this connection* ... with? and following function keys are displayed.

- **Cancel** - end the menu for telephone change
- **Replace** - connection to the selected phone

After successful connection, the device will display the message *... user is connected.*, And then the main menu » Fig. 21 on page 32.

If the desired phone is not found in the list previously paired phones, then the phone with the device is paired » page 34.

**Switching on / off Bluetooth® profile**

- Read and observe on page 34 first.

It displays a list of paired devices.

Pressing the function key on the connected Bluetooth® device opens a menu with possible connection profiles supported on the selected device.

Pressing the function key with the name and symbol of the connection profile causes the context-dependent message to be shown on the device screen ... *Do you really want to separate the profile?* and a menu of function keys.

- **Disconnect** - Press the function key to turn off the selected profile.

or

- **Replace** - If another phone is already connected to the device then pressing the function key causes the existing profile to be replaced by a new profile.

In the device screen the message *... Connecting with ...* is displayed and the selected Bluetooth® Profile is turned on.

In each menu, the profile change is cancelled by pressing the **Cancel** function key.

**Possible profile icons:**

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="icon" alt="HFP" /></td>
<td>Devices that support the functionality of the hands-free system (Bluetooth® profile HFP)</td>
</tr>
<tr>
<td><img src="icon" alt="HFP" /></td>
<td>Devices that are connected to the device via Bluetooth® profile HFP</td>
</tr>
<tr>
<td><img src="icon" alt="A2DP" /></td>
<td>Bluetooth® players (Bluetooth® profiles A2DP and AVRCP)</td>
</tr>
<tr>
<td><img src="icon" alt="A2DP" /></td>
<td>Bluetooth® player connected to the unit via Bluetooth® profiles A2DP and AVRCP</td>
</tr>
</tbody>
</table>

a) HFP is a Bluetooth® profile that supports the functionality of the hands-free system.

b) A2DP and AVRCP are Bluetooth® profiles that support multimedia functions.

If a Bluetooth® device is already connected to the device via one of the profiles, then switching on the profile in another device will cause the profile in the active device to end and be switched over to the newly selected device.

Only the newly selected profile is switched, the other profiles remain connected with the original device.

The device can be paired with several phones (or Bluetooth® devices), but only one can be active on the HFP profile and one on the A2DP profile and AVRCP be connected.

**Clear mobile phone from the list of paired devices**

- Read and observe on page 34 first.

A list of paired devices and the following function keys is displayed.

- **Delete all** - Delete all the phones in the list of paired devices
- **Delete** - Delete the desired telephone

After selecting one of the function keys, the function keys are displayed.
Disconnection

Read and observe on page 34 first.

The connection of a phone to the device can be disconnected in one of the following ways:

- By removing the ignition key (or switching off the ignition and opening the driver’s door in vehicles with the KESSY system).
- By disconnecting the hands-free system or switching off the Bluetooth® function on the phone.
- By switching off the Bluetooth® function on the device » page 18, Bluetooth®-settings.
- By removing the phone from the list of paired devices » page 36, Clear mobile phone from the list of paired devices.
- By turning off the Bluetooth® HFP profile » page 36, Switching on/off Bluetooth® profile.

Telephone functions

Introduction

This chapter contains information on the following subjects:

- Speed dialling a phone number of a contact 37
- Direct entry of a phone number 38
- Phone book 38
- Call-lists 39
- Telephone conversation 39
- Conference 39

First and foremost, pay attention to the safety instructions » page 4.

Speed dialling a phone number of a contact

You can use the speed dial function keys » Fig. 21 on page 32 to dial previously assigned telephone numbers of a contact instantly.

There are five speed dial buttons available.

Assign a telephone number to a contact

Press a function key for the speed dial [C] » Fig. 21 on page 32 that is not assigned.

The unit displays the phone book.

- If necessary, enter one of the contact numbers for the desired telephone contact.

The assignment of the contact telephone number to a function key for the speed dialling is also possible in the telephone menu settings » page 33.

Select an assigned telephone number of a contact

Press the desired function key to speed dial the phone number of a contact [C] » Fig. 21 on page 32.

Change the assigned telephone number of a contact

Press the desired function key for the speed dial for longer.

The unit displays the phone book.

- If necessary, enter one of the contact numbers for the desired telephone contact.

The telephone number of a contact is assigned to the selected function key for speed dialling.

You can also make the change in the Telephone menu » page 33.

Remove phone number of a contact

Press the symbol button → User profile → Press manage favourites.

Press the function key for the speed dial. By confirming the menu item Delete the telephone number of a contact on the selected function key is removed for quick dialling.
Direct entry of a phone number

Press the button.

A screen appears to enter the phone number » Fig. 23.

You can select the following functions:

- Delete the digit
- Dial the entered number
- Add a prefix if this option has been set in the telephone settings » page 33
- Entering a number using the voice control » page 12

Mailbox: Select the mailbox if the mailbox number is entered in the phone settings » page 33 or directly enter the number

The input screen also functions as an alphanumeric keypad that you can use to search for contacts in the phonebook.

For example, if you enter 32, the unit will display contacts with the letter sequence DA, FA, EB, etc.

Select the desired contact by pressing the corresponding function key.

---

Phone book

Press the button.

Up to 2000 free memory locations for imported phone contacts are available in the phonebook of the device. Each contact can contain up to 5 telephone numbers.

The phonebook can also be called up during an ongoing call.

After successful pairing, the contacts are imported.

Loading the directory

Upon first connection of the phone with the device, the system begins to import the phone book from the phone and from the SIM card into the memory of the device. Depending on the number of contacts this may take several minutes to complete.

If the directory import from the phone contains more than 2000 contacts, loading is stopped and the message Contacts not completely imported appears on the screen. Only those contacts already loaded are available, these are in the menu.

The first 200 contacts along with the contact data, including the picture in the phone associated with the contact, are downloaded onto the device memory.

If an error occurs while loading the phonebook, the message Import failed. Please try again and check whether the BT device ... allows connections.

Update directory

Each time the phone has established a new connection with the device, the relevant phonebook will be updated.

During the update, the phonebook which was stored after the last completed update will be available. Newly stored telephone numbers are only shown after the updating has ended.

---

1) If no number is entered, the last dialed number will be displayed after you press the symbol key.
2) If the addition of a prefix option is switched on, but the prefix is not entered in the phone settings, the last dialed number will be displayed in the input field or the last number dialed. If the code is defined in the input line and a number is entered, by pressing the symbol key the prefix is added in front of telephone number and connection starts.
3) In some phones, a confirmation for importing contacts to the device is required.
4) Some phones do not support downloading of contacts from the SIM card.
5) This function is only supported by some phones.
The update can be performed manually \(\text{page 33}\) \textbf{Import contacts.}

**Find contact**
Press the button \textbf{Find} to open the input screen with keypad to search in the phonebook \(\text{page 8}\).

**Select contact**
Pressing the function key with one of the contacts displayed causes the choice to start.
Where a contact contains several telephone numbers, the system displays a menu containing the telephone numbers for the contact.

**Contact details**
Pressing the function key with the symbol \(\alpha\) the contact details are displayed.
Pressing the function key with the indicated phone numbers causes the choice to start.

### Call-lists

![Fig. 24 Call lists](image)

The call log displays information about telephone calls.

\(\triangleright\) Press in the main menu, the \textbf{Phone} function key \(\triangleright\) \(\text{Fig. 21 on page 32}\).

**Explanation of graphic**

- \(A\) Sorting the call list
  - \(\text{All} - \text{List of all calls}\)
  - \(\text{Missed calls} - \text{list of missed calls}\)
  - \(\text{Dialled nos.} - \text{List of dialled numbers}\)
  - \(\text{Received calls} - \text{list of received calls}\)
- \(B\) Dial a number with a defined prefix \(\text{page 33, Settings}\)

- \(C\) Processing the telephone number before dialling
- \(D\) Display the contact details

Press the function key for a desired contact or telephone number to start dialling.

**Telephone conversation**

**Outgoing call**
While connecting, the screen displays the phone number or contact name. And the following function can be chosen:

- \(\triangleright\) Exit choice

**Incoming call**
During the ring tone of the incoming call, the screen displays the phone number or contact name. And the following functions can be selected:

- \(\triangleright\) Answer the incoming call
- \(\triangleright\) Mute the ringer
- \(\triangleright\) Restore ringer
- \(\triangleright\) Reject the incoming call
- \(\triangleright\) Display caller details

**Current call**
During a current call, the screen displays the phone number or contact name and the call duration. Depending on the context, the following functions can be selected:

- \(\triangleright\) Hold a call
- \(\triangleright\) Continue call
- \(\triangleright\) Deactivate the microphone
- \(\triangleright\) Activate the microphone
- \(\triangleright\) End call
- \(\triangleright\) Display caller details

**Conference**
The conference is a shared call with between three and six participants.

\(\triangleright\)

\(\text{The button is only functional when the contact is stored in the phone book.}\)
Start a conference/invite additional participants

› During a call or conference, make the next call.

or

› With a new incoming call press \textit{R/M} the button.

During a conference

During an ongoing conference call, the call duration is displayed on the screen. Depending on the context, the following functions can be selected:

- \textit{O} Hold a conference - leave the conference temporarily (the conference continues in your absence)
- \textit{R} Return to the held conference
- \textit{M} Deactivate the microphone
- \textit{A} Activate the microphone
- \textit{C} Ending a conference call
- \textit{P} Meeting details

Conference details

During a conference, press the conference symbol to display a list of other conference participants. The following functions can be selected depending on the type of telephone:

- \textit{H} View participant details
- \textit{R/M} Talk to a participant separately of the conference
- \textit{C} End the call to a conference participant
This chapter contains information on the following subjects:

- Selection of travel mode (Driving Mode Selection) ................................................. 41
- Vehicle data ........................................................................................................ 42
- Auxiliary heater and ventilation ............................................................................ 43
- ESC-and ASR systems .......................................................................................... 43
- Tyre ....................................................................................................................... 43

- Restore factory settings ....................................................................................... 46
- Climatronic settings ............................................................................................. 46

First and foremost, pay attention to the safety instructions » page 4, Important notes.

Settings relating to the vehicle systems can only be made when the ignition is switched on.

Note
- The individual systems are described in the » Vehicle Owner's Manual.
- For safety reasons, if any system functions are disabled, then some functions, such as parts of the ESC system, are automatically enabled again after switching the ignition off and on.

The menu for the selection of the driving mode allows you to select one of the driving modes (Normal, Sport, Eco, Individual).

If a driving mode other than Normal is selected, then the symbol ᵃ or ᵄ » Fig. 25 lights up on the button.

The currently selected driving mode is displayed in the info field in the main menus next to the icons ᵃ » Fig. 30 on page 46 (top left).

Call up the main menu
➤ Press the button ᵃ or ᵄ » Fig. 25.

- Normal - Activates Normal mode
- Cancel - Cancel the menu to select the driving mode
- Information - Information concerning the mode settings
- Sport - Activates Sport mode
- Cancel - Cancel the menu to select the driving mode
- Information - Information concerning the mode settings
- Eco - Activates the fuel-saving mode
- Cancel - Cancel the menu to select the driving mode
- Information - Information concerning the mode settings
- Individual - Activates the individual mode
- Cancel - Cancel the menu to select the driving mode
- Setup - Individual setting

**Explanation of graphic**

- **A**: Distance travelled
- **B**: Driving time
- **C**: Average speed
- **D**: Average fuel consumption
- **E**: Approximate range
- **F**: Range (if the estimated range is less than 300 km, the vehicle starts to approach the symbol)
- **G**: Vehicle representation (the zones of the vehicle are shown in different colours, corresponding to any warning messages that occur. The warning messages are displayed once you touch vehicle)

**Call up the main menu**

Press the button → .

- **Driving data**: Display travel data

You can display one of three trip memories on the screen » Fig. 26.

- **Since start**: Driving data for the individual trip
- **Long-term**: Long-term driving data
- **Since refuelling**: Data since last refuelling

Switching between the individual driving data storage locations can be done by using the function keys ↓ .
- **Convenience consumers** - Displays up to three consumers which have the largest share of fuel consumption and displays the fuel consumption to run all convenience systems
- **Vehicle status** - Displays vehicle status » Fig. 26 or tyre pressure monitoring information
  - **Vehicle status** - Displays vehicle status information
    - ✔ - No message / ❌ - warning messages relating to vehicle status or number of messages (if there is only one message, one warning message text is displayed)
  - ♦ - Display information about the status of the START-STOP system
  - **TPMS** - Function of the tire pressure monitor » Fig. 27
  - ♦ SET - Storage of the tire pressure values

Switching between the individual menus can be done by using the function keys 🔼 ▼.

**Note**

After pressing the ❌ button, the view from the menu last displayed is shown ➡️ .

---

**Auxiliary heater and ventilation**

Call up the main menu

- Press the 🔄 button on the Climatronic control panel ➡️.
  - or
- Press the 🔄 ➡️ button.

**Set-up**

- **A** Departure time: Day and time when the vehicle is to be ready for use » Fig. 28
- **B** Heating/ventilation: Set the operating mode
- **C** List of pre-selected times, activation / deactivation of the preset time
- **D** Set the preset times 1 to 3 and the duration (10 - 60 minutes)
- **E** when heating the windows are shown in red / with continuous aeration, the windows are shown in blue

- Only one preset time can be active. The activated preset time will be deactivated again after it has started automatically. For the next start, activate one of the preset times.
- The system in operation switches off on expiration of the operating duration or can be deactivated by pressing the icon III for direct on / off switching or via radio remote control.

**Note**

- In the selection of the day in the preset time, there is an option between Sunday and Monday without the specified day. If this position is selected, the vehicle will be ready for use at the selected time, regardless of the current day.
- If a different time is set » page 17, time and date settings, the activated preset time is automatically deactivated. The preset time must be reactivated.

**ESC-and ASR systems**

- Press the button 🔄 ➡️ Press ➡️ ESC system: ☑️ .
  - **Activated** - Switch on all components of the ESC system
  - **ASR off** - Switch off the ASR system
  - **ESC sport** - activation of ESC Sport

**Tyre**

- Press the button 🔄 ➡️ Tyres.
  - **TPMS** - Tyre pressure monitoring system
  - ♦ SET - Storage of the tire pressure values
  - **Winter tyres** - Sets the speed limit for winter tyres
  - **Speed warning** - Snow tyres speed warning on/off
  - **Warning at** - Sets the speed for the warning
Assistance systems

Press the button \( \text{/filter} \rightarrow \text{ driver assistance}. \)

- **ACC (adaptive cruise control)** - Sets the adaptive cruise control system
  - **Driving programme:** - Set the vehicle acceleration when adaptive cruise control is activated\(^1\)
    - **Normal** - Normal
    - **Sport** - Sports
    - **Eco** - Economical
  - **Last distance selected** - Last selected distance on/off
  - **Distance:** - Set the distance monitoring to the vehicles ahead
    - **Very close** - Very small distance
    - **Close** - Small distance
    - **Medium** - Medium distance
    - **Far** - Large distance
    - **Very far** - Very large distance
  - **Front Assist** - Sets the assistant for monitoring the distance to the vehicles ahead
    - **Active** - Activate/deactivate the assistant
    - **Advance warning** - Activate/deactivate advance warning
  - **Display distance warning** - Activate/deactivate distance warnings
  - **Lane Assist** - Settings for Lane Assist
    - **Active** - Activate/deactivate the assistant
  - **Adaptive lane guidance** - Activate/deactivate adaptive lane guidance
  - **Driver Alert System** - Activate/deactivate the driver alert system
  - **Proactive passenger protection** - Activate/deactivate proactive passenger protection

Parking and manoeuvring

Press the button \( \text{/filter} \rightarrow \text{ parking and manoeuvring}. \)

- **ParkPilot** - Settings for the parking aid
  - **Activate automatically** - Activate/deactivate the compact parking aid display (when driving forward)
  - **Front volume** - Adjust the volume of the beeps for obstacle detection in front
  - **Front tone setting** - Setting the pitch of the beeps for obstacle detection in front
  - **Rear volume** - Set the volume level of the beeps for the rear obstacle detection

---

\(^1\) This can be set in the menu on vehicles with a travel mode option » page 41, Selection of travel mode (Driving Mode Selection).
Rear tone setting - Setting the pitch of the beeps for the rear obstacle detection
Audio lowering: - lowering the volume of the speakers (audio)
- Off - No volume reduction of the sound from speakers
- Weak - weak volume attenuation of sound from speakers
- Medium - medium volume attenuation of sound from speakers
- Strong - Strong volume attenuation of sound from speakers

Note
The compact display of the parking aid can be switched to a full screen view by touching the screen within the display.

Light
Press the button → Light.

Light assistance - Setting of outdoor lighting
Dynamic Light Assist - Switch on/off the head light assist function
Switch-on time: - Set the sensibility of the light sensor against the change in intensity of the ambient light
- Early - High sensibility
- Medium - Medium sensibility
- Late - Low sensibility
Automatic headlight control in rain - Activate/deactivate automatic headlight control in rain
Daytime running lights - Activate/deactivate daytime running lights
Lane change flash - Activate/deactivate lane change flashing
Travel mode: - Travel mode on/off
- R-hand traffic - For right-hand traffic
- L-hand traffic - For left-hand traffic
Interior lighting - Sets the interior lighting
Instrument/switch lighting - Set the brightness of the instrument/switch lighting
Footwell lighting - Sets the brightness of the footwell light
Coming/Leaving home Fct. - Setting the COMING HOME/LEAVING HOME function
Coming Home function - Sets the period that the lights remain on after you leave the vehicle (0 - 30 seconds; 0 = function deactivated)
Leaving Home function - Sets the period that the lights remain on after you unlock the vehicle (0 - 30 seconds; 0 = function deactivated)

Mirrors and wiper
Press the button → Mirrors and wipers.

Mirrors - Adjusts the mirrors
- Synchronous adjustment - Activate/deactivate synchronous mirror adjustment
- Lower while reversing - Activate/deactivate the lowering of the front passenger mirror
- Fold in when parked - Activate/deactivate folding the mirror via the remote control key or by using the sensor in the handle (KESSY)
Wipers - Adjusts the windscreen wipers
- Automatic wiping in rain - Activate/deactivate automatic windscreen wiping in rain
- Automatic rear wiper - Activate/deactivate automatic rear window wiping

Opening and closing
Press the button → Opening and closing.

Window operation - Window operation settings
Conven. opening: - Set the convenience opening feature
- All windows - All windows
- Driver window - Driver's window only
- Off - Deactivates the convenience opening
Central locking - Settings for opening and closing of doors
Door unlocking: - Set the door unlocking feature
- All doors - All doors
- Single door - Driver's door or driver's or passenger door with KESSY system
- Vehicle side - Doors on the driver's side or on the driver's or passenger's side with KESSY system
Automatic locking - Activate/deactivate automatic locking when starting off
Acoustic confirmation - Activate/deactivate acoustic signals when locking/unlocking the vehicle with an anti-theft alarm system

Seats
Press the button → Seats.
- Store seat position - Store the driver's seat position and exterior mirror position in the remote control key when locking the vehicle
- Vehicle key activated - Activate/deactivate storing the driver's seat position and exterior mirror position when locking the vehicle

**Multifunction display**

Press the button \[\text{CAR} \rightarrow \text{\textbullet} \rightarrow \text{Multifunction display}.\]

In this menu it is possible to hide/show the appearance of the menu items in the instrument cluster multifunction display and reset the driving data.
- Current consumption - Display of current fuel consumption on/off
- Average consumption - Display of average fuel consumption on/off
- Refuel quantity - Display of refuel quantity on/off
- Convenience consumers - Display of fuel consumption of convenience consumers on/off
- Eco tips - Display of tips for economical driving on/off
- Travelling time - Display of travelling time on/off
- Distance - Display of distance travelled on/off
- Average speed - Display of average speed on/off
- Digital speed display - Display of current speed on/off
- Speed warning - Winter tyres warning on/off
- Oil temperature - Oil temperature on/off
- Reset Since start driving data - Reset the single-trip memory in the device screen and in the display of the instrument cluster
- Reset Long-term driving data - Reset the long-term memory in the device screen and in the display of the instrument cluster

**Service**

Press the button \[\text{CAR} \rightarrow \text{\textbullet} \rightarrow \text{Service}.\]
- Vehicle no.: - Display of the vehicle identification number
- Inspection: --- / --- - Number of km/days remaining until the next service event
- Oil change service: --- / --- - Number of km/days until the next oil change

**Restore factory settings**

Press the button \[\text{CAR} \rightarrow \text{\textbullet} \rightarrow \text{Factory settings}.\]

In this menu you have the possibility to reset the menu items in the settings of the vehicle systems to factory settings.

- All settings - Restoration of the settings all menu items
- Driver assistance - Restoration of the driver assistance menus
- Parking and manoeuvring - Restoration of the Parking and manoeuvring menu items
- Light - Restoration of the light menus
- Mirrors and wipers - Restoration of the Mirrors and wipers menu
- Opening and closing - Restoration of the Opening/closing menu items
- Multifunction display - Restoration of the Multifunction display menus

If one of the above menu items is selected, the system will ask you whether you really want to restore the settings.
- Cancel - Return to higher-level menu
- Reset - Restore the settings

**Climatronic settings**

In the Climatronic menu the system displays the desired temperature for the driver's side and front passenger side » Fig. 30.

Depending on the desired temperature, the airflow from the air outlet vents is shown in blue (temperature under 22 °C) or red (temperature above 22.5 °C).

When using Climatronic in automatic mode, the lettering \textit{AUTO} is shown on the screen.

**Call up the main menu**

Press the \[\text{BRP}\] button on the Climatronic control panel.

- Air con. profile: ... - Set the Climatronic operating mode
- ON/OFF - Switches Climatronic on/off
- \[\text{\\text{\textbullet}}\] - Set the auxiliary heater and ventilation » page 43
- Settings for Climatronic
  - **Air con. profile**: Set the Climatronic operating mode
    - **Light**: Low power, quiet operation
    - **Medium**: Base power
    - **Strong**: High power
  - **Automatic air recirculation**: Automatic recirculated air mode on/off
  - **Automatic supplementary heater**: Quick interior heating on/off
  - **Automatic windscreen heating**: Activates/deactivates the automatic windscreen heating

**Note**
- If you do not operate the unit for longer than 10 seconds in the "Climatronic" menu and Climatronic was not switched on before the menu was opened, the unit will switch itself off.
- If you switch off the automatic mode of Climatronic by increasing or reducing the fan speed, the coloured display of the airflow from the air outlets will not be displayed.
