About the Owner's Manual

General
This Owner's Manual applies to all chassis variants of the vehicle, including all models and trim levels. All possible trim levels are described here without identifying them as special trims, model variants or market-dependent equipment. This means that not all the trim components described in this Owner's Manual are available in your vehicle.

The images in this Owner's Manual are for illustrative purposes only. The images may differ from your vehicle; these are for general information purposes only.

ŠKODA AUTO is constantly working on the further development of all vehicles. It is therefore possible for changes to be made at any time to the scope of delivery in terms of shape, equipment and technology. The information contained in this Owner's Manual corresponds to the information available at the time of going to press.

No legal claims can therefore be derived from the technical data, illustrations and information in this Owner's Manual.

Electronic version of the Owner's Manual
The printed Owner's Manual contains the most important information regarding vehicle operation and vehicle maintenance.

Complete information is included in the electronic version of the Owner's Manual. This is available on the ŠKODAweb pages as well as in the mobile application MyŠKODA, which can be downloaded.

Explanations

Terms used
“Specialist garage” - A workshop that carries out specialist service tasks for ŠKODA vehicles. A specialist can be a ŠKODA Partner, a ŠKODA Service Partner, or an independent workshop.

“ŠKODA Service Partner” - A workshop that has been contractually authorised by ŠKODA AUTO or its distribution partner to perform service work on ŠKODA vehicles and to sell ŠKODA Genuine Parts.

“ŠKODA Partner” - A company that has been contractually authorised by ŠKODA AUTO or its distribution partner to sell new ŠKODA vehicles and, when applicable, to service them using ŠKODA Genuine Parts and sell ŠKODA Genuine Parts.

Text notes
“Press” - short press (e.g. a button) within 1 second
“Hold” - long press (e.g. a button) for more than 1 second

Direction indications
All direction indications, such as “left”, “right”, “front”, “rear”, relate to the forwards direction of travel of the vehicle.

⚠️ DANGER
Texts with this symbol indicate dangerous situations which, if the safety instructions are not observed, will result in death or serious injury.

⚠️ WARNING
Texts with this symbol indicate dangerous situations which, if the safety instructions are not observed, could result in death or serious injury.

⚠️ CAUTION
Texts marked with this symbol indicate dangerous situations which, if the safety instructions are not observed, could result in minor or moderate injury.

⚠️ NOTICE
Texts with this symbol indicate situations which, if the corresponding instructions are not observed, will result in damage to the vehicle.

ⓘ Texts with this symbol contain additional information.

Indicator lights

Functionality

⚠️ WARNING
Ignoring the illuminated indicator lights and associated messages on the instrument cluster display may result in accidents, serious injury or damage to the vehicle.

The indicator lights in the instrument cluster indicate the current status of certain functions or faults. The illumination of some of the indicator lights may be accompanied by acoustic signals and messages in the instrument cluster display.

Colour display of the indicator lights
Depending on the vehicle equipment, the colour scheme of the indicator lights may vary. The coolant indicator light can, e.g. be shown in colour as follows.

- colour display
- black and white display

Additional indicator lights
Depending on the meaning, the additional indicator light will also light up in the display along with some of the indicator lights.

⚠️ - Danger
⚠️ - Warning

Indicator light overview
After switching on the ignition, some indicator lights for the functional test of the vehicle systems light up briefly. If the tested systems are in order, the respective indicator lights go out a few seconds after the ignition is switched on or after the engine has been started.

For further details » page 10, Functionality.

## Indicator light overview

After switching on the ignition, some indicator lights light up briefly as a function test of the vehicle systems. If the tested systems are in order, the respective indicator lights go out a few seconds after the ignition is switched on or after the engine has been started.

Correct and safe

Introductory notes for correct use

▶ Read this Owner's Manual carefully, as proceeding in accordance with this manual is a prerequisite for the correct use of the vehicle. This Owner's Manual should therefore always be in the vehicle.
▶ When using the vehicle, the generally binding legal provisions that are specific to the country must be observed. Such as those for transporting children, switching off airbags, using tyres, road traffic and the like.
▶ Do not exceed the maximum permissible weights and loads.
▶ Do not exceed the maximum permissible roof load.
▶ Use the specified fuel and operating fluids.
▶ Drive on roads that meet the technical vehicle parameters. Obstacles that exceed the ground clearance of the vehicle can damage the vehicle when driving over them.
▶ Care must be taken during operations related to operation, maintenance and self-help to avoid damage to the vehicle or injury. If required, seek the help of a specialised garage.
▶ All work on the vehicles and safety systems e.g. on the seatbelts or the airbag system, may only be carried out by a specialist garage.
▶ When using accessories, please note the instructions in the accessory manufacturer’s instruction manual. These include child seats, roof racks, compressors etc.
▶ Please note the service intervals.

New vehicle or new parts

New vehicle - Running in the engine
Driving style during the first 1500 km determines the quality of the engine run-in process.
▶ During the first 1000 km, rev the engine to max. 3/4 of the highest permissible engine speed and avoid using a trailer.
▶ Over the next 500 km, the engine speed can be slowly increased.

Depending on driving style and operating conditions, the engine consumes some oil, up to 0.5 l/1000 km. Consumption may be higher over the next 5000 km.

New brake pads
New brake pads do not provide the optimum braking effect during the first 200 km, they have to be worn in first. Therefore, drive very carefully.

New tyres
New tyres do not have optimum grip for the first 500 km. Therefore, drive very carefully.

Regular checks

What should be taken into account before driving?
A vehicle with technical defects can increase the risk of accidents and injuries.
Eliminate any defects before driving. If required, seek the help of a specialised garage.
Pay special attention to the following points.
▶ Is the tyre undamaged?
▶ Is the tyre tread sufficient?
▶ Is the tyre pressure sufficient?
▶ Do the headlamps, brake and turn signals work?
▶ Is the windscreen in good condition?
▶ Is the engine oil, brake fluid and coolant level OK?
▶ Is the air intake in the engine compartment free from obstruction?
▶ Are the air outlet nozzles or air intake in front of the windscreen free from obstruction?
▶ Are the windscreen wiper and washer system and windscreen wiper blades functional?
▶ Is the windscreen washer fluid level sufficient?
▶ Are the windscreen wiper blades in good condition?
▶ Are all seatbelt system components in good working order? Are the seatbelts clean and have the buckles been unclogged?
▶ Is the spoiler working properly?
▶ Are parts and components of the vehicle still visibly attached?
▶ Are there no oil stains or other operating fluids under the vehicle?

No improper vehicle adjustments

Improper modifications can cause interference and affect safety-related functions and other functions of the vehicle.
▶ Adjustments and technical modifications to the vehicle should only be carried out by a specialist garage.
▶ Do not cover the engine with additional insulation materials, e.g. a blanket.

Keeping sensors and cameras in working order

Some functions of your vehicle are supported by sensors and cameras inside and outside the vehicle.
The rear-mounted accessories, e.g. bike rack, may affect system and camera functionality.
▶ Do not cover or put a sticker over the sensors and cameras and keep them clean.
If there is damage suspected to the sensors or cameras, seek the help of a specialist garage.

**Engine compartment**

**Before opening the engine compartment flap**
Risk of scalding! Do not open the engine compartment flap if steam or coolant comes out of the engine compartment.
- Stop the engine and allow it to cool.
- Open the driver door.

**When working in the engine compartment**
- Keep children away from the engine compartment.
- Do not touch the radiator fan. The radiator fan can turn itself on, even when the ignition is off.
- Do not touch electrical cables. Avoid short circuits in the electrical system, especially on the vehicle battery.
- Do not smoke near the vicinity of the engine and refrain from handling open flames or sparks.
- If you need to work in the engine compartment with the engine running, be mindful of rotating engine parts and electrical equipment.
- Do not leave any objects in the engine compartment.

**Handling operating fluids**
Your vehicle needs various fuels to operate that can affect health or the environment when they are emitted. These include fuel, oils, battery acid, coolant and brake fluid or AdBlue®.
- Only use operating fluids outdoors or in well-ventilated areas. If required, wear protective equipment.
- Do not use or check operating fluids with the engine running.
- In the event of contact with operating fluids, wash affected areas with warm water. If required, seek medical help.
- The leaked engine oil in the engine compartment can cause a fire, so wipe it off with a cloth.
- Store soiled cloths in a well-ventilated area until disposal. Cloths with residues of engine oil can ignite and cause a fire.

**Vehicle battery**

**Handling the vehicle battery**
Battery acid is highly corrosive. Improper handling of the vehicle battery can cause an explosion, fire, chemical burns or poisoning!
- When handling the vehicle battery, eye and skin protection must be worn.
- Do not tilt the vehicle battery, as it may leak battery acid.
- If battery acid comes into contact with skin, wash the affected areas with water for a few minutes. Get medical help without delay.
- Do not charge a frozen or thawed vehicle battery. Replace a frozen vehicle battery.
- Do not use a damaged vehicle battery.
- Short circuit! Do not connect the battery terminals.

**Using electrical sockets in the vehicle**
Improper handling of sockets can lead to life-threatening electric shock or fire.
- The sockets may get hot during operation. Do not touch hot sockets.
- Protect sockets from liquids.
- If moisture gets into the socket, let the socket dry before reusing it.
- Do not insert any objects into the socket contacts.

**Before your journey**

Adults and children, cargo and objects - everything has its place in the vehicle. Observe the following instructions so that all occupants are protected in the best possible way in the event of an accident.

**Before you go**
- Ensure that you have a good view of outside the vehicle. Attach external devices (e.g. navigation system) so that they do not restrict the view externally.
- Adjust the rearview mirrors.
- Close all doors and the engine compartment and boot flap.
- Take up the correct sitting position, adjust the seats correctly and fasten the seat belt properly. Ensure that passengers do likewise. Always leave the seat belt on while driving.
- Only one person can be secured with a seat belt.
- Make sure that the seat belts are not trapped, e.g. in the door or in the seat.
- Check seat belts, their locks and attachment points for damage.

**Sitting safely**
For the safety of the occupants and to reduce the risk of injury in the event of an accident, the following instructions must be observed.
- Stand the backrests upright. If the front passenger seat backrest has been folded forward, only the seat behind the driver’s seat may be used for transporting passengers.
- Engage the rear seat backrests correctly.
Adjust the height-adjustable headrest so that the top of the headrest is as close as possible to the top of the head.

On the occupied rear seat, the headrest should not be in the lower position although the upper edge of the headrest should be at the same height as the top of the head.

Keep your feet in the footwell.

Use the entire seat.

Do not lean forward or sit to the side.

Do not hold your limbs out the window.

Adjust the driver's seat in the longitudinal direction so that the pedals can be fully pushed through with slightly bent legs.

Adjust the steering wheel so that the distance \( A \) between the steering wheel and sternum is at least 25 cm.

For vehicles with driver's knee airbag, adjust the driver's seat longitudinally so that the distance \( B \) from the legs to the dash panel in the area of the knee airbag is at least 6 cm.

Adjust the angle of the backrest so that the steering wheel can be reached at the top with your arms slightly bent.

Move the passenger seat back as far as possible. The front passenger must maintain a minimum distance of 25 cm from the dash panel.

Correct belt webbing arrangement

The webbing arrangement is extremely important for the seat belts to offer the best possible protection.

The shoulder strap must run over the middle of the shoulder, must never run over the neck, and must lie firmly against the body (it must not run over loose layers of clothing).

The lap belt part must be placed in front of the pelvis and fit tightly.

In pregnant women, the lap belt part must be as low as possible on the pelvis, so that no pressure is exercised on the abdomen.

The webbing must not be pinched or twisted and rub against sharp edges.

The webbing must not pass over solid or fragile objects in clothing, such as a key ring, etc.

The tongue may only be inserted into the buckle of the associated seat.

The webbing must be tight. Therefore, do not attach clamps or similar items to the webbing for adjusting the seat belt according to body size.

Correct steering wheel position

Hold the steering wheel with both hands on the outer edge in the "9 o'clock" and "3 o'clock" position. Otherwise, you may experience serious injury to the arms, hands and head when deploying the airbag.

Be mindful of the effect of the airbag system

Airbag systems can only properly protect if all occupants have been secured and they are in the correct seating position.

No persons, animals or objects such as cup holders or hangers for clothes may be in the deployment area of the airbags » page 45.

Do not cover or stick anything over the steering wheel or the dash panel. The front airbags were not able to deploy.

The front passenger airbag should be switched off in some situations » page 46.

Securing children properly

Do not carry a child on your lap, and secure the child and yourself with a seat belt.

Only transport children in a suitable child seat » page 42.

Children under 150 cm tall will not be properly protected without a child seat. Children that have been inadequately secured can be thrown through the vehicle in the event of an accident or a sudden manoeuvre. You can cause life-threatening injuries to yourself and other occupants.

If children lean forward or assume a wrong sitting position while driving, they are more likely to be injured in the event of an accident. This is especially true for children who are carried in the passenger seat - when the airbag system triggers, they can be seriously injured or killed!
A child that has been incorrectly secured in the wrong sitting position - endangered by the side airbag

The child should not be in the deployment area of the side airbag.

A child that has been properly secured in a child seat

There must be enough room between the child and the exit area of the side airbag for the side airbag to offer the best possible protection.

Transporting objects safely

When moving heavy objects, there is a shift in emphasis. Thus, the driving behaviour of the vehicle changes.

- Adjust driving speed and driving style to this changed driving behaviour.

Unsecured or misplaced items may be thrown around in the event of an accident or sudden manoeuvre. There is a risk of serious injury and loss of control of the vehicle!

In a rear-end collision at 50 km/h unsecured objects are thrown forward with up to 50 times their weight. A 1.5 litre water bottle is thrown up to 75 kg.

- Transport objects securely.
- Stow objects so they do not hinder the driver. Keep the driver footwell clear.
- Stow small items in the storage compartments.
- Do not leave lockable storage compartments open.
- Do not let items protrude out of the slots. This note does not apply to bottles in bottle trays.
- Do not place any objects on the dash panel or on the luggage compartment cover.
- Do not exceed the maximum permissible load of fasteners and shelves.
- Distribute the load evenly in the luggage compartment and fasten it so it cannot slip.
- Place heavy objects in the luggage compartment as far forward as possible.

Safe driving

Introductory notes

- Pay attention when you are driving! As a driver, you are fully responsible for road safety.
- Always adjust driving speed to the road conditions as well as the traffic and weather conditions.

Paying attention to warning signals

The driver information system warns you with indicator lights and messages in the event of any faults. Failure to follow the warnings may increase the risk of accidents and injuries.

- If the vehicle issues a warning signal, then park the vehicle safely and follow the information in the instrument cluster, and in this manual.

Using assistance systems in a clever way

The assistance systems are only for support and do not absolve you from your responsibility for driving the vehicle.

The assistance systems are subject to physical and technical limitations. Therefore, in certain situations, system reactions may be perceived as undesirable or delayed.

- Stay alert and be ready to intervene.
- Familiarise yourself with the assistance systems, their limitations and operating conditions.
- Activate, deactivate and adjust the assistance systems so that you have full control of the vehicle in any traffic situation.

Driving with a substitute spare wheel or emergency wheel

A substitute spare wheel or emergency wheel is only used to reach the nearest specialist garage.

- Inflate the wheel with the max. prescribed inflation pressure.
- Follow the instructions on the warning label on the rim.
- Do not cover the warning sign.
- Avoid full accelerations, strong braking and fast cornering.
- Do not drive with more than one mounted spare wheel.
- Avoid using snow chains on the temporary spare wheel.

Driving with a loaded roof rack

When transporting objects on the roof rack, the vehicle’s driving behaviour changes.

- Adapt your speed and driving style to this.

Towing a trailer

The vehicle’s handling characteristics change with a trailer. The assistance systems may behave differently.
Drive more slowly, excessive speed can lead to loss of control of the vehicle.

Keep a larger distance from the vehicle in front.

Do not exceed the max. vertical load and the permissible trailer load.

**Driving through water**

There must be no water ingress into the vehicle systems e.g. into the engine’s air intake system!

Therefore, determine the water depth before driving through water. The water level must not exceed the lower edge of the lower beam.

Drive at max. walking speed. Otherwise, a wave may form in front of the vehicle, increasing the water level.

Never stop in the water, do not drive backwards and never stop the engine.

**Vehicle operation in different weather conditions**

If you wish to operate your vehicle in countries with different weather conditions from those specified, please contact a ŠKODA Partner. They will advise you if certain precautions need to be taken to ensure the full functioning of the vehicle or to prevent damage (e.g. coolant, battery replacement, etc.).

**Is something wrong?**

Pay attention to changes in vehicle handling.

If in doubt about safety, stop driving and seek the help of a specialist garage.

Unusual vibrations or the vehicle ‘pulling' to the side may indicate a puncture.

If tyre pressure loss is very quick, try to stop the vehicle carefully without heavy steering or heavy braking.

Immediately remove foreign bodies stuck in the tyre tread.

Do not remove foreign objects that have penetrated into the tyre. Check the tyre pressure and seek the help of a specialised garage.

Immediately remove any objects jammed under the floor of the vehicle. These can damage the vehicle or ignite and cause a fire.

**Parking the vehicle safely**

A vehicle that has not been secured may roll away and cause accidents.

For parking, look for a place with suitable ground. Do not park the vehicle on flammable materials such as dried leaves, spilt fuel. Hot vehicle parts can cause a fire.

Carry out the following activities in the specified order when parking.

Stop the vehicle and keep the brake pedal depressed.

Secure the vehicle with the parking brake.

For vehicles with an automatic gearbox, put the selector lever in the P position.

Turn off the engine.

For vehicles with manual transmission, engage 1st gear or reverse gear.

Release the brake pedal.

**Exiting the vehicle**

**Do not leave children unattended in the vehicle!**

Children may injure themselves when handling the seats, releasing the parking brake etc.

In emergency situations, children are not able to leave the vehicle on their own or help themselves.

At very high or very low temperatures, there is danger to life!

When locking the vehicle, the SAFE function switches on. As a result, no doors or windows can be opened from the inside. Turn off the SAFE function if people are left behind in the locked vehicle » page 23.

**Emergency call**

⚠️ **WARNING**

Availability of a mobile network is indispensable for establishing a connection to the emergency number.

⚠️ **WARNING**

This emergency service is only available in some countries.

⚠️ **WARNING**

If the vehicle is located in an area without a functioning emergency call system infrastructure, no vehicle data shall be transmitted to the emergency call centre.

After the start of the conversation, the emergency call centre also contains information as to the accident location and the severity of the accident, the number of occupants with seatbelts on and the vehicle identification number (VIN).

Once the connection has been established, communication with the emergency call centre takes place via the loudspeaker and microphone installed in the vehicle.

**Personal data**

Personal customer data is collected, processed and used by ŠKODA AUTO in accordance with the provisions of the generally binding legal provisions in the area of personal data protection.

The current declaration on the protection of personal data can be found on the following website: https://www.skoda-auto.com/other/personal-data.
Serious accident - automatic call
In the event of an accident where the airbag or belt tensioner activates, a call is automatically started with the emergency call centre.

Minor accident - call option
The Infotainment screen displays the option to set up a connection to the emergency call centre or breakdown service.

Manual call
› Keep the key pressed down.
› Confirm the connection to the emergency call centre in the Infotainment screen.
› To cancel the connection to the emergency call centre before starting the call, press the button again or confirm the cancellation of the connection in the Infotainment screen.
Starting a manual conversation can then be used, for example, if you also report an accident in which you are not directly involved.

Indicator light
The system state is displayed after the ignition is switched on by the warning light illuminating.
› Green - lit up - the system is functional.
› Green - flashing - a call is being made to the emergency call centre.
› Red - lit up - there is a system failure, immediately seek the help of a specialist garage.
› Not lit up - the system is out of order due to a long term unavailable mobile network, if this circumstance persists, the system will require the assistance of a specialist garage.

⚠️ WARNING
If there is a system fault, no emergency call is possible.

After an accident
What to do after an accident
Where possible, please observe the following instructions.
› Switch off the ignition.
› Turn on the hazard warning lights.

Safety systems
After an accident, the safety systems of the vehicle, e.g. seatbelts and airbag system, may be out of action.
› Have the vehicle’s safety systems checked by a specialist garage, even if no load or trip has occurred.
› Have damaged, loaded or triggered components of the safety systems replaced by a specialist garage.

What to do in the event of a fire
Where possible, please observe the following instructions.
› Switch off the ignition.
› Turn on the hazard warning lights.
› Set up the warning triangle to warn other road users.
› Stay at a safe distance from the vehicle, along with any passengers.
› Report the fire to the emergency services.
› Wait for the emergency services to arrive.
Keys, locks and alarm system

Key

Key Overview

| A | Locking the vehicle |
| B | Operating the boot lid |
| A | Unlocking the vehicle |
| B | Battery status warning lamp |
| B | Locking tab for removal of the key bit |

 NOTICE

▶ Protect the key from moisture and strong vibrations.
▶ Keep the grooves in the key clean.

The effective range of the key signal is about 30 m. The effective range can be reduced, e.g. due to signal interference from other transmitters.

Removing the key bit

▶ Unlock the securing tab [A].
▶ Remove the key bit [B].

Troubleshooting

The battery in the key is almost empty
▶ After pressing a button on the key, the warning light does not flash.
Or:
▶ A message stating it is necessary to change the battery will be displayed.

Replace the battery » page 22.

The vehicle cannot be unlocked or locked with the remote control

There may be the following reasons.
▶ The battery in the key is empty.
▶ Replace the battery » page 22.
▶ The key is not synchronized.
Synchronize the key as follows.
▶ Press one of the buttons on the key.
▶ Unlock the door within 1 minute with the key via the locking cylinder » page 24.

If necessary, the key must be synchronized if one of the buttons on the key has been repeatedly pressed outside of the effective range of the remote control.

Changing the key battery

The new battery must comply with the specification of the original battery.

▶ Remove the key bit.
▶ Insert a small flat-head screwdriver into the resulting opening.
▶ Loosen the battery cover by turning the screwdriver.
▶ Slide off the battery cover.
▶ Remove the battery.
▶ Press any button on the remote key to reset the key.
▶ Insert the new battery.
▶ Fit the battery cover and press until it clicks into place.
Memory function of the key

Functionality

Applies to vehicles that do not have the personalisation function.

Each time the vehicle is locked, the position of the driver's seat and rearview mirror are stored in the memory of the remote key being used to lock the vehicle.

Operation

Retrieve stored position
› Unlock the vehicle and open the driver's door.

The driver's seat and the exterior mirrors occupy the position assigned in the memory to the key used to unlock the vehicle.

Stop position change
› Press any button on the seat to be adjusted.
Or:
› Press the button on the key.

Settings

Activate and deactivate the memory function of the key
The function is activated or deactivated in the following menu in the Infotainment system.

CAR >едактор >
Or:
MENU >едактор >

Storing driver's seat and exterior mirror position for driving forwards
Storing takes place automatically every time the vehicle is locked.

⚠ The seat position can be stored if the angle of inclination of the seat back relative to the seat surface is less than approximately 110° and the seat is not in any of the end positions.

Storing front passenger's exterior mirror position for reversing
› Unlocking the vehicle with the key.
› Turn on the ignition.
› Activate the folding function of the mirror in the Infotainment in the following menu.

CAR >едактор >
Or:
MENU >едактор >
› Turn the exterior mirror knob to the position R.
› Engage reverse gear.
› Adjust the mirror to the desired position.
› Disengage reverse gear.

The set mirror position is saved.

Central locking

Functionality

Central locking system
The system unlocks and locks all doors, the fuel filler flap and the boot lid at the same time.

Unlock indicator: double flashing of the indicator lights.

Lock indicator: single flashing of the indicator lights.

The warning light in the driver's door will flash for about 2 seconds in quick succession after the vehicle is locked, then it will start flashing regularly at longer intervals.

⚠ If none of the doors or the boot lid is opened within 45 seconds of unlocking, the vehicle automatically locks again.

SAFE function
Depending on the equipment, the SAFE function can be integrated into the central locking system.

The SAFE function prevents the doors from opening from the inside once the vehicle is locked.

The SAFE function switches on when the vehicle is locked.

In the display of the instrument cluster after the ignition is switched off, a message regarding the SAFE function is displayed.

⚠ DANGER
Risk of death!
› When the vehicle is locked and the SAFE function is switched on, nobody is allowed to remain in the vehicle.

Turn off the SAFE function
› By double locking within 2 seconds.
Or:
› Together with the deactivation of the interior monitoring » page 26, Settings.

The warning light in the driver's door will flash for about 2 seconds in quick succession after the vehicle is locked, then goes out and starts flashing regularly at longer intervals after about 30 secs.

When the SAFE function is switched off, the door can be opened from the inside by pulling once on the opening lever.

The SAFE function is switched on again after unlocking and locking the vehicle.
Operation

Ways in which central locking operates
Depending on the equipment:
▶ Key » page 22.
▶ Keyless locking (KESSY) » page 25
▶ Central locking button.

Lock/unlock using the central locking button
› Press the button in the centre console.
   The symbol in the button comes on when locked.
   The button locks all of the doors and the boot lid.
   The vehicle is also unlocked when a door is opened from the inside.
   △ WARNING
   A locked vehicle with a central locking button makes it difficult for responders to enter the vehicle in an emergency.

Setting the unlocking and locking function
The lock and unlock functions are set in the following menu in the Infotainment system.

   CAR > 📲 > 🥕
   Or:
   MENU > 📲 > 🥕

   All doors
   Unlocking of all doors, the boot lid and the fuel filler flap.

   Single door
   Using the button on the key, the driver’s door and the fuel filler flap are unlocked.
   In vehicles equipped with a keyless locking system, the door near to which the key is located and the fuel filler flap are unlocked by touching the door handle.
   When unlocked again, the other doors and the boot lid are unlocked.

   Doors on one side of the vehicle
   Using the button on the key, the doors on the driver’s side and the fuel filler flap are unlocked.
   In vehicles equipped with a keyless locking system, the doors on the passenger’s side near to which the key is located and the fuel filler flap are unlocked by touching the door handle.
   When unlocked again, the other doors and the boot lid are unlocked.

   Automatic locking after starting
   After starting, all doors and the boot lid are locked when a speed of 15 km/h is reached.

   The vehicle is unlocked when a door is opened from the inside.
   △ WARNING
   An automatically locked vehicle makes it difficult for responders to enter the vehicle in an emergency.

Troubleshooting

Central locking fault
▶ The warning light in the driver’s door first flashes for 2 secs in quick succession.
▶ Then it lights up continuously.
▶ After 30 secs, it flashes slowly.
▶ Seek the help of a specialist garage.

Mechanically unlocking and locking the door

Unlocking and locking the door with the lock cylinder
Remove the cover
› Pull on the door handle of the vehicle and hold it.
› Insert the key bit into the recess on the underside of the cover.
› Lift the cover in the direction of the arrow.
› Release the door handle.

Locking and unlocking
› Insert the removed key bit with the handle facing downwards into the lock cylinder and unlock or lock it.
Install cover
› Pull on the door handle and hold it.
› Replace the cover.

Open the door.
For vehicles with a panel over the opening, remove the panel.
Insert the key or a flat-head screwdriver into the slot.
Turn the key or flat-head screwdriver towards the outside of the vehicle (spring-loaded position). After closing, the door is locked.

Keyless locking (KESSY)

Usage
The keyless locking system, KESSY, enables unlocking and locking of the vehicle without actively using the remote control key.

Operation
Keep the key with you when unlocking and locking.
The sensors on the handle are intended to be operated with bare hands, e.g. wearing gloves may affect the function of the sensors.

Unlocking
- Grab the door handle.
- Open the door.

Locking
- Touch the sensor.
  After locking, it is not possible to unlock within 2 seconds by touching the door handle. This can be used to check whether the vehicle is locked.

Unlocking the boot lid
- Press the handle of the boot lid.

Protection against inadvertently locking the key in the vehicle
If the key is locked inside the vehicle, the vehicle will unlock itself automatically. If no door is opened within 45 seconds, the vehicle automatically locks again.
If the key is locked in the boot, the boot lid will automatically unlock itself.

Deactivate keyless locking
- Lock the vehicle with the button 8 on the key.
- Within 5 s, touch the sensor on the door handle with your finger.
  Deactivation is confirmed by a single flash of the direction indicators.
- To check the deactivation, wait at least 10 seconds and then pull the door handle.
  The door must remain locked.
Keyless locking is automatically activated once again after the vehicle is unlocked.

Troubleshooting

The vehicle cannot be unlocked or locked using the sensors on the handle
- Lock or unlock the vehicle with the button on the key.
- Then try to unlock or lock the vehicle using the sensors on the handle.
- If keyless locking does not work, seek the help of a specialist garage.

Alarm system

Functionality
The alarm system triggers audible and visual signals during a break-in or towing attempt.
The alarm system is activated automatically approximately 30 seconds after the vehicle is locked.
The alarm system is automatically deactivated after the vehicle is unlocked.

Alarm triggering
The activated alarm system triggers an alarm when one of the following events occurs.
- Opening the bonnet.
- Opening the boot lid.
- Opening the door.
- Manipulation of the ignition lock.
- Towing the vehicle.
- Movement in the vehicle.
- Sudden and significant voltage drop of the electrical system.
- Uncoupling the trailer.
- Opening the door unlocked via the lock cylinder.

Switching off the triggered alarm
- Unlock the vehicle.
  Or:
- Turn on the ignition.
Operating conditions

For the correct functioning of the alarm system, all windows must be closed.

A trailer is integrated into the alarm system under the following conditions.

✓ The vehicle is factory-fitted with a towing device.
✓ The trailer is electrically connected to the vehicle via the trailer socket.
✓ The trailer is not equipped with LED taillights.

If the electrical connection to the trailer is interrupted on a vehicle with an activated alarm system, warning signals are triggered.

Disable the alarm before connecting or disconnecting a trailer.

Settings

The following functions of the alarm system can be deactivated at the same time.

▪ Interior monitoring.
▪ Towing protection.

Deactivation will also switch off the SAFE function » page 23, Functionality.

Deactivation

▪ By double locking within 2 seconds.
Or:

▪ In Infotainment, in the menu: CAR > ‡ > menu item for interior monitoring.
Or:

▪ In Infotainment, in the menu: MENU > 🗃 > ‡ > menu item for interior monitoring.

The deactivated functions are reactivated after the vehicle is unlocked and locked again.

Deactivation is to be carried out if the vehicle is, for example, towed or transported.

Doors, windows and boot lid

Doors

Opening/closing the door

Opening from the outside

Unlock the vehicle and pull on the door handle.

Opening from the inside

Pull the door opening lever and push the door away from you.

Closing from the inside

Grasp the pull handle and close the door.

Child safety lock on the rear doors

Operation

The child lock prevents the rear doors from being opened from the inside.

Switching on and off

Turn the fuse with the vehicle key or a flat-head screwdriver.

A Child lock switched off
B Child lock switched on
Electrically operated fuse

› Press the **left** button to switch on/off the fuse in the **left** rear door.

› Press the **right** button to switch on/off the fuse in the **right** rear door.

The fact that the fuse is switched on can be seen by the illuminated symbol displayed in the button.

The fact that the fuse is switched on can be seen by the illuminated symbol displayed in the button.

**Window - with electrical operation**

**What you should be mindful of**

**Force limiter**

To reduce the risk of pinch injuries when closing the windows, the vehicle has a force limiter.

If there is an obstacle, the window closing process is stopped and the pane retracts by several centimetres.

If the obstacle prevents the window from being closed for the next 10 seconds, the closing process is interrupted once again and the window goes down by several centimetres.

If you attempt to close the window again within 10 seconds of the window being moved down for the second time, even though the obstacle was not yet been removed, the closing process is only stopped. During this time, it is not possible to automatically close the windows by pulling the button all the way. The force limiter is, however, switched on.

The force limiter is only not operational if you attempt to close the window again within the next 10 seconds – the window will now close with full force! If you wait longer than 10 seconds, the force limiter is switched on again.

⚠️ **CAUTION**

Risk of injury!

› Close the windows carefully, even though they have a force limiter.

**Overview of the operating buttons on the driver's door**

Depending on the equipment:

A Window on the front left

B Window on the front right

C Rear left window

D Rear right window

E Deactivation/activation of the buttons in the rear doors

F Deactivation/activation of the key in the left rear door (part of the child safety lock with electric operation)

G Deactivation/activation of the key in the right back door (part of the child safety lock with electric operation)

**Operation**

**Opening**

› Press the corresponding button slightly downwards and hold it until the window has reached the desired position.

Or:

› Press the corresponding button until it stops; the window opens automatically. Pressing the button again will stop the opening process.

**Closing**

› To close, pull gently upwards on the top edge of the corresponding button and hold until the window has reached the desired position.

Or:

› Pull the corresponding button until it stops; the window closes automatically. By pressing the button again, the closing process is stopped.

⚠️ After switching off the ignition, the windows can still open and close for about 10 minutes so long as none of the doors are opened.

**Open all of the windows at the same time**

› Press and hold the symbol button on the key.

Or:
Turn off the ignition, open the driver's door, and hold down the driver's window button until it stops.

Depending on the setting, only the driver's window can be opened in this way.

**Close all of the windows at the same time**

Press and hold the button on the key.

Or:

Turn off the ignition, open the driver's door, and pull upwards on the driver's window button until it stops.

Or:

For vehicles with a keyless locking system, hold one finger on the sensor on the outside of the handle on the front door.

Depending on the setting, only the driver's window can be closed in this way.

**Settings**

The window operation is set in the following menu in the Infotainment system.

**CAR > \(\text{a}\) > Menu item for window operation**

Or:

**MENU > \(\text{a}\) > Menu item for window operation**

**Troubleshooting**

The window regulator has stopped working after repeated opening and closing

The window regulator mechanism could have overheated.

Allow the window regulator mechanism to cool down.

The automatic window operation does not work after disconnecting the vehicle battery

Enable automatic window operation » page 28.

**Activation after disconnecting the vehicle battery**

Activate automatic window operation

Turn on the ignition.

Pull the corresponding button upwards and the window closes.

Release the button.

Pull up the respective button and hold for 1 second.

---

**Sliding/tilting roof**

**What you should be mindful of**

**Force limiter**

To reduce the risk of pinch injuries when closing the tilt/slide sunroof, the vehicle has a force limiter.

If there is an obstacle, the glass panel closing process is stopped and the pane retracts by several centimetres.

If the obstacle is not removed, the force limiter will be disabled during the third closing attempt. The sliding/tilting roof will then close with full force.

⚠️ **CAUTION**

Risk of injury!

› Close the sliding/tilting roof carefully, even though there is a force limiter.

⚠️ **NOTICE**

› During winter time, if necessary, remove any ice and snow around the area of the sliding/tilting roof before opening.

› Always close the sliding/tilting roof before disconnecting the battery.

**Operating conditions**

✓ The ignition is switched on.

✓ The outside temperature is higher than -20 °C (applicable for the opening of the sliding/tilting roof).

**Operation**

- Gradual opening
- Complete opening
- Gradually reset
- Fully reset

---

**CAUTION**

Risk of injury!

› Close the sliding/tilting roof carefully, even though there is a force limiter.

⚠️ **NOTICE**

› During winter time, if necessary, remove any ice and snow around the area of the sliding/tilting roof before opening.

› Always close the sliding/tilting roof before disconnecting the battery.
After moving the switch to the position B the sliding/tilting roof is in the low-noise position (at a speed of about 80 km/h). After another movement to position B the sliding/tilting roof opens completely. After switching off the ignition, the sliding/tilting roof can still open and close for about 10 minutes so long as none of the doors are opened.

**Comfort operation of the tilting/sliding sunroof**
The comfort operation makes it possible to lock the sliding/tilting roof with the key if necessary.

- Press and hold the button to turn it off.
- Press and hold the button to close it.

On vehicles with a keyless locking system, it is possible to close the sliding/tilting roof via the sensor in the door handle of the front door.

- Hold one finger on the sensor on the outside of the handle on the front door.

**Troubleshooting**

**Operation of the sliding/tilting sunroof does not work after disconnecting the vehicle battery**

- Activating operation of the sliding/tilting sunroof » page 29.

**Activation after disconnecting the vehicle battery**

**Activating operation of the sliding/tilting sunroof**

- Turn on the ignition.
- Pull the switch all the way down and hold it down. After about 10 secs, the sliding/tilting roof opens and closes again.
- Release the switch.

**Sunblind - with manual operation**

**Operation**

- Pull the handle in the appropriate direction.

**Sunblind - with electrical operation**

**Operation**

- Opening
- Closing
- Press or hold the button to move the roller blind.
- Press or release the button to stop the roller blind from moving.

**Activation after disconnecting the vehicle battery**

- Turn on the ignition.
- Keep the button pressed down. The sunblind opens and closes again.
- Release the button.

**Sunblind for the rear window**

**Operation**

**Brightness protection**

- Pull out the sun protection blind by the handle and hang it into the holders A.
Rolling up
› Remove the sun protection blind from the holders at the handle and let it roll in slowly.

**Sun protection roller blinds for the rear door panes**

**Operation**

**Brightness protection**
› Pull out the sun protection blind by the handle and hang it into the holder [A].

**Rolling up**
› Remove the sun protection blind from the holder at the handle and let it roll in slowly.

**Sun visors**

**Folding up and folding down**

1. Swivel the front visor towards the windscreen
2. Swivel the visor towards the door

**Heated windshield**

**Usage**

Windscreen heating is used for defrosting or ventilating the windscreen.

**Conditions**

✓ The engine is running.

**Heated rear window**

› Press the key to turn on the heated rear window.

**Heated windshield**

› Press the key to turn on the heated windshield.

Windscreen heating switches off automatically after 10 minutes.

**Settings**

**Automatic heated windshield**

The heated windshield switches on automatically if the windshield mists up.

This function is set in the following menu in the Infotainment system.

› Press the key on the Climatronic control panel, tap in the Infotainment screen.

Or:
› Tap on in the Infotainment screen.

**Troubleshooting**

The indicator light in the button or below the button flashes

The heating does not work as the battery charging level is low.

**Boot lid - with manual operation**

**Operation**

**Opening**

› Press the handle and lift the lid.

The option to open by pressing the handle is deactivated once a speed of 5 km/h is reached. This is activated again after the vehicle has stopped and a door is opened.
Closing

Grasp the fixture A and pull the lid down.

⚠️ CAUTION
Danger of opening the lid while driving!
- Ensure that the lock is properly engaged after closing the lid.

Set a delayed lid lock
If the lid is unlocked with the ⇨ button on the key, the lid is automatically locked again after closing.
The period after which the lid is locked automatically can be extended by a specialist garage.

Boot lid - with electrical control

Operation

⚠️ CAUTION
Risk of injury!
- Only operate the flap when there is nobody or no objects in the swivel area.

⚠️ CAUTION
Danger of opening the lid while driving!
- Ensure that the lock is properly engaged after closing the lid.

주의
- Do not manually close the tailgate when moving.
- Before operating the tailgate, check that there are no objects in the swivel area that could damage the tailgate. Also check that there are no objects within the immediate vicinity of the vehicle that could damage the vehicle interior and the transported objects.

If the tailgate hits an obstacle when closing, it stops and an audible signal sound.
- When automatically closing the tailgate, e.g. under the weight of snow, a broken beep sound.

Handle in the tailgate

Press the handle to open, close or stop the movement of the tailgate.
The option to open by pressing the handle is deactivated once a speed of 5 km/h is reached. This is activated again after the vehicle has stopped and a door is opened.

Button in the tailgate

Press the button to open, close or stop the movement of the tailgate.

Button in the centre console

To open the tailgate, hold the button until the tailgate starts to open.
- Press the button to stop the tailgate from moving.

Button on the key

Press the ⇨ button to open, close or stop the movement of the tailgate.
The option to lock exists only on vehicles with a keyless locking system. The key must not be in the vehicle and must be at a distance of max. 2 m from the tailgate.

The tailgate can also be closed by pulling it briefly downwards.
Settings

Set the uppermost position of the tailgate and store it
It makes sense to set the top position of the tailgate, e.g. setting for the opening of the tailgate in a limited space due to the garage height.

› Stop the lid in the desired position.
› Press the button and hold down on the lower edge of the tailgate until an audible signal sounds.

Re-adjusting the top starting position of the lid
› Carefully raise the flap manually to the limit.
› Press the button and hold down on the lower edge of the tailgate until an audible signal sounds.

Troubleshooting

The tailgate does not react to the opening signal
› There is a possible obstacle, e.g. snow; remove it.
Or:
› Press the handle in the tailgate and lift the lid.
Or:
› Mechanically unlock the flap » page 33.

The tailgate does not react to the closing signal
› Close the tailgate manually.

⚠️ NOTICE
▶ Close the tailgate slowly, push down the tailgate and push in the lock on the centre of the rear edge of the tailgate.

Electrically operated contactless boot lid

Operating conditions
✓ Ignition switched off.
✓ You have the vehicle key with you.
✓ No trailer or other accessory is connected to the trailer socket.

Operation

Opening/closing the lid

› Quickly swing a foot under the rear bumper in the sensor area.
If the lid doesn’t move, wait a few seconds and repeat the swing motion.

Closing display
When you close the lid, audible signals are sounded.

Stopping/ restoring lid movement
The lid movement can be stopped by a rapid swinging motion with your foot. Lid movement is restored by a subsequent swinging motion with your foot.

Restriction

The system function may be restricted in the following cases.
▶ Downpour.
▶ Dirty rear bumper.

Settings

Activating and deactivating
The function is activated and deactivated in the following menu in the Infotainment.
CAR > 🛠️ > ✽
Or:
MENU > 🛠️ > 🛠️ > ✽

We recommend that the function is deactivated in the following cases:
▶ Installation of a roof rack.
▶ Coupling a trailer or another accessory to the hitch.
▶ Car wash.
▶ Maintenance and repair work in the back of the vehicle.
Unlocking the boot lid

Unlocking

› Insert a screwdriver into the opening in the panel.
› Release the flap by moving it in the direction of the arrow.

Seats, steering wheel and mirror

Front seat - with manual operation

Controls on the seat

A Adjusting the seat in the longitudinal direction - after releasing the operating lever, the lock must audibly click into place

B Adjusting the height

C Adjusting the angle of the backrest - do not lean against the backrest during adjustment

D Adjusting the extent of the curvature of the lumbar support

After a certain time, play can develop within the adjustment mechanism of the backrest angle.

Folding passenger seat backrest

Folding down

› Pull on the operating lever.
› Fold the backrest forwards until it clicks into place.

Folding back up

› Pull on the operating lever.
› Press the backrest backwards until it audibly clicks into place.
Front seat - with electrical operation

Controls on the seat

Adjusting the seat
A Adjust in a longitudinal direction
B Adjust the inclination
C Adjusting the height

Adjusting the seat back
A Adjust the inclination

Adjusting the lumbar support
A Set the position of the curvature
B Set the extent of the curvature

Adjusting the passenger seat from the rear seats
A Adjusting the angle of the seat backrest
B Adjusting a seat in a forward/back direction

Set the length of the seat manually
› Press the release handle.
› Push the front part of the seat forwards or backwards.

Memory function of the seat

Functionality
Valid for vehicles with electrically adjustable driver's seat.
Each of the memory buttons on the driver's seat can be used to store and recall the set driver's seat and exterior mirror position.
Depending on the equipment, the front passenger seat may also have a memory function.

Operation

Retrieve stored position
› With the ignition off and the driver's door open, press the desired memory button.
› In other instances, hold the key for example with the ignition switched on or the driver's door closed.
The passenger seat position can be retrieved in the same way.

Stop position change
› With the ignition off and the driver's door open, press any button on the seat to be adjusted.
Or:
› Press the button on the key.
› In other cases, release the held memory button.
Settings

Storing driver’s seat and exterior mirror position for driving forwards

› Turn on the ignition.
› Adjust the seat and the exterior mirrors.
› Press the button A and within 10 seconds one of the memory buttons B.
Storing is confirmed by an acoustic signal.

The seat position can be stored if the angle of inclination of the seat back relative to the seat surface is less than approximately 110° and the seat is not in any of the end positions.

Save front passenger seat position
Storing the passenger seat position is analogous to storing the driver’s seat position.

Storing front passenger’s exterior mirror position for reversing
› Turn on the ignition.
› Activate the folding function of the mirror in the Infotainment in the following menu.

CAUTION
› Only switch the function on and off when the vehicle is stationary.

Rear seats

Folding down the seat backs

Before folding down
› Insert the rear headrests as far as they will go or remove them.
› Adjust the position of the front seats in such a way that they are not damaged by the folded-down seat backrests.
› For vehicles with a mesh partition, roll it into the housing, then unlock the left seat backrest followed by the right seat backrest.
› Pull the outer seat belt to the side trim.

Folding forwards from the passenger compartment

› Press the release handle and fold the seat forwards.

Folding forwards from the luggage compartment

› Pull on the lever.
The seat back is unlocked and partly folded forwards.

Folding back up

› Pull the outer seat belt to the side trim.
› Fold the seat backrest back up.
The release handle must audibly click into place.
› Check that the seat backrest has locked in place. The pin A must not be visible.

Seat massage function

Turn on/turn off

› Press the button. Function switches off automatically after 10 minutes.
Park position of rear seat belts

Headrests

Adjusting the height of the headrests

Front headrests

› Hold the safety button and move the headrest in the desired direction.

Rear headrests

› Move the headrest in the desired direction. When pushing down, press and hold the safety button.

Folding side bolsters on the rear headrest

The folded down side bolsters reduce uncontrolled sideways head movement, e.g. when sleeping.
› Adjust the headrest to the initial pulled out position.
› Fold down the side bolsters on the head rest.

Removing and inserting the rear headrests

Removing

› Partially fold the respective seat back forwards.
› Move the headrest up to the stop.
› Hold safety button A and, at the same time, push safety button B into the opening with a flat-head screwdriver and remove the headrest.

Inserting

› Insert the headrest into the seat backrest. The safety button must click into place.

Front armrest

Settings

Adjusting the height
› Raise the backrest to one of the locked positions.

Folding down
› Raise the backrest beyond the highest locked position and fold it down again.

Rear armrest

Settings

› Fold down the armrest. The folded-down armrest can be used as a storage table.
Load-through device

Open and close

Open from the passenger compartment

Fold down the armrest.
Press the lid in the upper area and pull on the handle.
Open the lid.

Open from the luggage compartment

Press the store button.
Open the lid.

To close

Fold back the lid from the passenger compartment until it clicks into place.
After closing, the red mark on the back of the cover above the safety button must not be visible.

⚠️ WARNING
▶ The through-loading channel is only intended for transporting skis in a secured through-loading bag.

Seat heating and ventilation

What you should be mindful of

⚠️ WARNING
Risk of burns!
▶ Do not switch on the seat heater for persons with limited perception of pain or temperature.

⚠️ NOTICE
Risk of seat damage!
▶ Do not kneel on the seats or otherwise puncture them.
▶ Do not turn on the heater in the following situations.
   ▶ The seat is not occupied.
   ▶ There are objects on the seat, such as a child seat.
   ▶ There are additional seat covers or protective covers on the seat.

Conditions

✓ The engine is running.

Operation

Depending on the equipment, the front seats can be heated or heated and ventilated. The outer rear seats can only be heated.

Models without seat ventilation

Press the or key to switch on the seat heating.
The seat heating is switched on with maximum heating output. By repeatedly pressing the button, the heating output is reduced until it is switched off.
The heat output is determined by the number of illuminated indicator lights that are shown in the key or in the Climatronic display.

Models with seat ventilation

Press the or button.
The Infotainment screen displays a menu for operating the front seat heater and ventilation.
Adjust the heating output/ventilation level.
⚠️ If the seat heating and ventilation functions are both switched on at the same time, the heating output/ventilation level can only be adjusted in the Infotainment screen.

Display heating output/ventilation level from the button

••• Seat heating switched on
••• Seat ventilation switched on
••• Seat heating and ventilation switched on

Settings

Lock increases in heat output for the rear seat heater

To turn the function on or off, press the MENU button on the Climatronic or in the Infotainment screen.
Or:
Tap on MENU > in the Infotainment screen.
When the function is switched on, the heating output can only be turned down.

Steering wheel

Adjust the steering wheel

⚠️ WARNING
Risk of an accident!
▶ Do not adjust the steering wheel while driving.
Swing the safety lever downwards.

Adjust the steering wheel to the desired position.

Press the safety lever as far as it will go.

Troubleshooting

**Power assisted steering faulty**

- Message: Total failure of the power assisted steering, failure of steering assistance
- Turn off the ignition, start the engine and drive a few meters.
- If the indicator light does not go out, seek the help of a specialist garage.

**Power assisted steering faulty**

- Message: Partial failure of the power assisted steering, possible reduction in power steering
- Turn off the ignition, start the engine and drive a few meters.
- If the indicator light does not go out, continue driving, exercising appropriate caution. Seek the help of a specialist garage.

**Steering column lock faulty**

- Message: Message regarding a fault in the steering column lock
- Stop the vehicle.
- Seek the help of a specialist garage.

After switching off the ignition, it is then no longer possible to switch on the ignition, to lock the steering and to switch on the electrical components.

**Steering column lock not unlocked**

- Message: Message concerning the required steering wheel movement
- Move the steering wheel slightly back and forth.
- If the steering does not unlock, stop the vehicle and seek the help of a specialist garage.

Heated steering wheel

**Conditions**

- The engine is running.

**Operation**

**Turn steering wheel heating on/off**

*Applies to Climatronic.*

- Press the **MENU** key on the Climatronic, tap the **/** on the Infotainment screen to turn on steering wheel heating.

Or:

- Tap **MENU > ☄ > ☄/ ☄** in the Infotainment screen, to turn on steering wheel heating.

**Adjust the heating output of the heated steering wheel**

- Tap **/** on the Infotainment screen to adjust the heating level.

The output level of the heating is indicated by the number of illuminated warning lights in the switch.

**Settings**

**Steering wheel heating together with driver's seat heating**

*Applies to Climatronic.*

When the function is switched on, pressing the button for the driver’s seat heating also turns steering wheel heating on or off.

Turn on the function as follows.

- Press the **MENU** button on the Climatronic in the **/** Infotainment screen and select the menu item for coupling the seat and steering wheel heating.

Or:

- Tap on **MENU > ☄ > ☄** in the Infotainment screen and select the menu item for the coupling of the seat and steering wheel heating.

When the function is switched on, the function surface ☄ is displayed in the Infotainment screen. This can be used to switch steering wheel heating on or off.
Interior rear-view mirror

Operation

Interior mirror with manual darkening

![Image of manual darkening](image1.png)

[A] Mirror is not darkened
[B] Mirror darkens

Interior mirror with automatic darkening

Darkening of the mirror is automatically controlled through the sensors in the mirror once the engine is started.

⚠️ CAUTION
Risk of an accident!
A glowing display e.g. a mobile phone or navigation device may affect the function of the automatic mirror darkening.
▶ Do not attach these devices close to the mirror.

Exterior mirror

Operation

Positions of the rotary knob

The mirrors can be folded manually or electrically, depending on the equipment.

L Adjust the left mirror
O Switch off operation
R Adjust the right mirror
้า Fold mirror in electrically (to fold back out, select a different position)
้า Heat the mirror when the engine is running

Adjusting the mirror surface

▶ Select position L or R.
▶ Turn the rotary knob in the direction of the arrows.

Folding electrically folding mirrors automatically

The mirrors fold in when the vehicle is locked and fold back out when the vehicle is unlocked, if this feature is activated.

⚠️ Locking of the vehicle is not indicated by the fact that the mirrors fold in. Locking of the vehicle is indicated by the turn signal lights flashing.

Manually foldable mirrors

▶ Fold the mirror towards the side window by applying pressure with your hand.

Setting the mirror surfaces synchronously

When adjusting the mirror surface of the driver's mirror, the mirror surface of the front passenger's mirror is adjusted at the same time if this function is activated.

Mirror with memory function

Valid for vehicles with electrically adjustable driver's seat.

The current setting for the exterior mirror surfaces can be stored in the memory of the driver's seat » page 35 or the remote key » page 23.

Lower the passenger mirror surface when reversing

Valid for vehicles with electrically adjustable driver's seat.

The mirror surface of the passenger mirror takes in the memory of the driver's seat » page 35 or the remote key » page 23 stored position to improve visibility when reversing.

Conditions
✓ The function can be activated in Infotainment.
✓ The mirror position is saved.
✓ The reverse gear is engaged.
✓ The adjustment knob is in the R position.

The mirror automatically resumes the home position when driving forward at speeds above 15 km/h or after the ignition is switched off.

⚠️ WARNING
Risk of an accident!
The exterior mirrors make objects appear farther away.
▶ Use the rear-view mirror to determine the distance from vehicles behind.

⚠️ NOTICE
Danger of mirror damage!
▶ If the electrically foldable mirror is swung out by external influences (e.g. due to an impact during manoeuvring), fold the mirror in using the rotary knob and wait for an audible folding sound.

Settings

Activation or deactivation of the automatic folding of the exterior mirrors, the synchronous adjustment of the mirror surfaces as well as the lowering of the passenger-side mirror surface when reversing are carried out in the Infotainment in the following menu.

CAR > 🎓 > 🎓
Or:

MENU > 🎓 > 🎓 > 🎓
**Troubleshooting**

**Electric mirror operation impaired**
› Adjust the mirror surface by pressing it lightly with your finger.

⚠️ **CAUTION**
Risk of burns!
› Do not touch heated exterior mirror surfaces.

---

**Restraint systems and airbags**

**Seat belts**

**Functionality**

Seat belts that are fastened correctly offer very good protection in the event of an accident. They reduce the risk of an injury and increase the chance of survival in the event of a major accident.

⚠️ **WARNING**
› The seat belts must not be removed or altered in any other way.
› Do not attempt to repair the seat belts yourself. Have a damaged seat belt replaced immediately by a specialist garage.

**Automatic belt retractor**
The automatic retractor locks the belt in the event of a jerky pull on the belt. The belts lock when full braking, for example when the car accelerates, when driving downhill and when cornering.

⚠️ **WARNING**
› If the seat belt does not lock when pulled jerkily, have the retractor checked by a specialist garage.

**Belt tensioners**
The safety of the driver, front passenger and passengers on the outer rear seats **who are wearing their seat belts** is enhanced by the belt tensioners fitted to the inertia reels on the front and rear external seat belts.

If there is a collision with a certain severity, the seat belt is tightened by the belt tensioner so that unwanted body movement is prevented.

The belt tensioner can also be deployed when the seat belt is not fastened.

Belt tensioners are **not activated** in the event of a roll-over, minor collisions or in accidents in which no major forces are produced.

⚠️ Smoke is released when the belt tensioner is deployed. This does not indicate a vehicle.

**Reversible belt tensioner**
Vehicles with a proactive occupant protection system include reversible belt tensioners » page 179.

The reversible belt pretensioners increase safety for the belted driver and front passenger by automatically tightening the seat belt tightly over the body in critical driving situations and then releasing it again.

**Status display in the instrument cluster display**

- ⚠️ illuminated – a front seat belt is not fastened
- ⚠️ illuminated – a rear seat belt is not fastened
- ⚠️ illuminated – a rear seat belt is fastened.
Operation

Fastening the seat belt

› Grasp the buckle latch and slowly pull the belt over the chest and pelvis towards the buckle.
› Insert the buckle latch into the buckle until there is an audible click.
› Pull on the belt to ensure that the buckle is securely fastened.

Unfastening the seat belt

› Grasp the buckle latch and release it by pressing the red button.
› Hold the belt so it does not twist when rolling up.

Setting

› Move the seat belt height adjuster upwards to increase the height.
› Press the safety button and move the seat belt height adjuster down to reduce the height.
› After adjustment, firmly pull on the belt to ensure that the seat belt height adjuster has correctly locked in place and that the belt is locked securely.

Troubleshooting

Blocked belt retractor

› Grasp the strap in the middle and pull quickly in the direction of the arrow.
› Hold the strap and let it roll up slowly.
› Pull on the strap to see if the retractor is working properly.
› If the strap is still blocked, repeat the unlocking procedure once or twice.
› If the strap is still blocked, seek the help of a specialist garage.

Child seat

What you should be mindful of

For how to install and use the child seat, please follow the instructions in this Owner's Manual as well as the child seat manufacturer's instructions.

For safety reasons, we always recommend that children are transported on the back seats. Carry children on the front passenger seat only in exceptional cases.

Use child seats in accordance with the ECE-R 44 European Economic Commission standard.

Child seats according to in accordance with the ECE-R 44 standard are marked with the test symbol: a large E in a circle, with the test number below.

We recommend using child seats from the ŠKODA Genuine Accessories range. These child seats have been developed and tested for use in ŠKODA vehicles. They meet the standard ECE-R 44.

⚠️ WARNING

› When installing the child seat on the rear seat, adjust the front seat so that there is no contact between the front seat and the child seat or the child carried in the child seat.
› Before installing a forward-facing child seat, adjust the headrest so that it is as low as possible.
› If the headrest prevents the child seat from being fitted, adjust the headrest to the highest position.
› If using a separate child seat cushion, adjust the headrest so that the child’s head is flush with, but not protruding above the height of the top of the headrest.
Using a child seat on the front passenger seat

Never use a child seat in which the child is carried with his or her back to the direction of travel on a seat protected by an active airbag placed in front of the seat. This could cause serious injury to the child, even death.

This is also indicated by the following stickers.

- **Sticker on the passenger sun visor.**
- **Sticker on the central body pillar on the passenger side.**

The following instructions must be followed when using a child seat on the front passenger seat.

- When using a rear-facing child seat, the front passenger airbag must be deactivated.
- If possible, adjust the front passenger seat backrest so that it is vertical, to ensure that there is secure contact between the backrest and the child seat.
- If possible, move the front passenger seat backwards so that there is no contact between the front passenger seat and the child seat behind it.
- Adjust the height-adjustable front passenger seat as much as possible.
- Set the front passenger seat belt as high up as possible.

**⚠️ WARNING**

Risk of the seat belt causing a neck injury to the transported child!

- For child seats in groups 2 and 3, ensure that the guide fitting attached to the child seat headrest is positioned in front of or at the same height as the seat belt height adjuster on the central body pillar.
- Adjust the height of the front passenger seat belt so that the belt passes through the guide fitting without kinking and is not bent over the edge of the guide fitting.

**⚠️ WARNING**

As soon as the rear-facing child seat is no longer being used on the front passenger seat, activate the front passenger airbag again.

UF The seat is suitable for forward-facing child seats in the “Universal” category and is permitted for use in this weight group.
X The seat is not suitable for children in this weight group.

Overview

ISOFIX

⚠️ WARNING
▶ Do not attach any other child seats, straps or objects to the holding eyelets provided for the installation of a child seat using the ISOFIX system.

The ISOFIX system allows for the fast and secure installation of the child seat. The eyelets for installing the child seat using the ISOFIX system are located on the outer rear seats and possibly on the front passenger seat.

A child seat that uses the ISOFIX system can only be installed in the vehicle if it is approved for this vehicle type. Further information can be obtained from a ŠKODA partner or from a list of vehicles enclosed with the child seat.

▶ Remove the covers before installing the child seat.

TOP TETHER

⚠️ WARNING
▶ Child seats that use the TOP TETHER system should only be used on those seats that are fitted with holding eyelets bearing the TOP TETHER symbol.
▶ Only attach one fastening strap on the child seat to the holding eyelet in the TOP TETHER system.
▶ When attaching the child seat with the TOP TETHER system, no other object must be attached to the TOP TETHER system holding eyelet.

Holding eyelets on the rear seats

The belt fastened into the TOP TETHER system restricts the movement of the upper part of the child seat. The holding eyelets for attaching the belt are located on the outer rear seats [A], as well as on the middle rear seat [B] when necessary.

Airbags

Usage

The airbag system offers additional occupant protection in the event of severe frontal and side collisions, as a supplement to the seat belts.
The best possible protective effect of the airbag is achieved only when the seat belt is also worn. The airbag system is no substitute for the seat belts.

**Functionality**

When sinking into the inflated airbag, the forward movement of the body is damped and the risk of injury is reduced.

⚠️ As the airbags inflate, smoke is released. This does not indicate a vehicle fire.

**Airbag deployment in the event of an accident**

Airbag deployment is influenced by many factors. The deceleration rate at the time of impact is crucial.

⚠️ WARNING

Danger of serious or fatal injuries!
- Maintain the correct seating position.
- Do not keep your limbs in the deployment area of the airbags.

In the following situations, **no** airbags are deployed.
- Minor frontal and side collisions.
- Rear-end collision.
- Vehicle rollover.

If the measured deceleration rate is below the reference values programmed into the control unit, the airbags will not be deployed despite possible serious vehicle damage.

**Airbag overview**

![Airbag overview diagram]

A Front airbags
B Side airbags - front
C Head airbags
D Side airbags - rear
E Driver’s knee airbag

The installation location of the airbags is marked with the lettering **AIRBAG**.

⚠️ WARNING

Danger of a functional restriction of the side airbags!
- Do not exert excessive forces, e.g. impacts, on the seat backs.

▶ Do not use seat covers that have not been made by ŠKODA.
▶ Have damaged seat covers at the installation location of the side airbags repaired by a specialist garage.

**Deactivating the airbags**

We recommend having airbags other than the front passenger airbag deactivated » page 46, *Operation* by a ŠKODA service partner.

Deactivation of the airbags is provided for the following cases, for example.

- If the driver’s seat adjustment is correct, the distance of at least 25 cm between the centre of the steering wheel and the sternum cannot be maintained.
- Additional operating controls for a physically disadvantaged driver are installed in the vehicle.
- The vehicle has special seats, e.g. orthopaedic seats without side airbags.

✅ Illuminates for 4 seconds after the ignition is switched on and then flashes for 12 seconds - Airbag or belt tensioner deactivated with the diagnostic device

**Message regarding the deactivated airbag or belt tensioner**

⚠️ WARNING

If an airbag is deactivated during the sale of the vehicle, inform the buyer!

**Conditions**

✅ The ignition is switched on.

**Troubleshooting**

**Airbag system faulty**

✅ Illuminates

Message regarding an airbag fault

› Seek the help of a specialist garage.

**Key switch for the front passenger airbag**

**Usage**

Deactivation of the front passenger airbag is provided for the following cases, for example.

- A rear-facing child seat is mounted on the front passenger seat.
- The vehicle has special seats, e.g. orthopaedic seats without side airbags.
What you should be mindful of

⚠️ WARNING
Danger of fault in the passenger airbag deactivation system!
▶ Only deactivate the airbag when the ignition is switched off!

⚠️ WARNING
Danger of unexpected deployment of the passenger airbags in an accident!
▶ If the front passenger airbag has been deactivated with the key, do not leave the key in the key switch while driving. Vibrations can cause the key to turn in the slot and activate the airbag!

Operation

Before switching off/switching on the front passenger airbag
› Remove the key bit.

Switch front passenger front airbag on/off

› Switch off the ignition.
› Open the storage compartment on the passenger's side.
› Insert the key bit into the slot in the key switch as far as it will go.
› To Switch off, carefully rotate the key switch into the position OFF.
› To Switch on, carefully rotate the key switch into the position ON.
› Remove the key bit from the slot.
› Close the storage compartment on the passenger's side.
› Turn on the ignition and check that the front passenger airbag indicator lights are lit up.

Status display in the instrument cluster display

Lights up 4 secs after the ignition is switched on – passenger front airbag switched off

Indicator lights

► After switching on the ignition, the two indicator lights light up briefly.
► If the system is OK, both of the indicator lights go out.
► One of the indicator lights then lights up again depending on the position of the key switch.

ON ▶️ Lights up 65 secs after the ignition is switched on – passenger front airbag switched on

Troubleshooting

Key switch for airbag deactivation is faulty
ON ▶️ Flashes together with OFF.
The front passenger airbag will not be deployed in the event of an accident!
› Have the airbag system checked by a specialist garage immediately.
Lighting, windscreen wipers and washers

Exterior lighting

Functionality

Unless otherwise stated, the light works when the ignition is switched on.

Daylight running lights

The daytime running lights illuminate the area in front of the vehicle.

- For vehicles for certain markets, they also illuminate the rear vehicle area.

Operating conditions

✓ The lights switch is in position 0, AUTO or 8<.

Switching the low beam on/off automatically

The low beam is automatically switched on or off depending on the lighting conditions.

Operating conditions

✓ The light switch is in the AUTO position.

The automatic headlight circuit is indicated by the illumination of the 8< symbol in the light switch.

Switching low beam on/off automatically in rain

Operating conditions

✓ The light switch is in the AUTO position.
✓ The function is activated.
✓ The windscreen wipers are switched on for longer than 30 seconds.

The automatic headlight circuit is indicated by the illumination of the 8< symbol in the light switch.

Full LED headlights

When the light switch is in position AUTO, the headlights provide the best possible beam of light in front of the vehicle.

The Dynamic cornering light function ensures the best possible illumination of the curve area.

CORNER function

The CORNER function is intended for turning or manoeuvring (e.g. when parking).

The function illuminates the vicinity of the vehicle front in the direction of travel.

Operating conditions

✓ The turn signal is switched on or the front wheels are steered sharply.
✓ The low beam is switched on.
✓ The fog lights are not switched on.
✓ The driving speed is lower than 40 km/h.

When no light is switched on

The symbol 8< in the light switch may also light up in the instrument cluster, indicating that it is necessary to switch on the light.

- Switch on the light.

Operation

Switching off the lights except the daytime running lights

Switching the low beam on/off automatically

Switching on the parking lights

Switching on the low beam

As the basic position of the light switch, use position AUTO.

Main beam

The high beam works when the low beam is on.

Switch on the high beam - the warning light in the instrument cluster illuminates

Switch off the high beam - in the instrument cluster, the indicator light goes out.

CAUTION

Risk of an accident!

- Do not dazzle other road users with the high beam.

Turn signal

Switching on the indicator light on the right - the warning light flashes in the instrument cluster

Switching on the indicator light on the left - the warning light flashes in the instrument cluster

Turn signal - convenience signalling

Convenience signalling enables three flashes of the turn signal lights without having to move the lever up or down.
Tap the control lever up or down.
The corresponding turn signal lights flash three times.
Tap the lever in the opposite direction ahead of time to stop signalling.

**Fog light**

Positions for pulling out the light switch

1. Fog lights - the warning light in the instrument cluster illuminates
2. Rear fog light - the warning light in the instrument cluster illuminates

› Turn the light switch to position **AUTO** or **OFF**.
› Pull the light switch to the appropriate position.

The rear fog light does not illuminate when an accessory is connected to the trailer socket.
The rear fog lamp automatically shuts off when the boot lid is opened.
The indicator light stays on.

**Hazard warning light system**

› To switch on or off, press the button ▲ in the central part of the dash panel.

When the hazard warning system is on and the turn signal is switched on, the hazard warning lights will be switched off temporarily and only the turn signal will flash on the relevant side of the vehicle.
The hazard warning lights can be switched on automatically during hard braking. The hazard warning lights are then switched off again automatically when starting off or accelerating.

**One-sided parking light**

The one-sided parking light allows one side of the parked vehicle to be illuminated through activation of the corresponding sidelights.

Switch on the side-lights on the right
A. Switch on the side-lights on the left
B. Switch off the ignition.
C. Move the lever to the appropriate position.
D. Lock the vehicle.

When the parking light is switched on, an acoustic warning signal sounds and the driver's door is opened. After a few seconds or after the driver's door is closed, the warning signal will stop.

**Double-sided parking light**

The two-sided parking light allows the parked vehicle to be illuminated through activation of the side-lights.

› Turn on the ignition.
› Turn the light switch to position **AUTO**.
› Switch off the ignition.
› Lock the vehicle.

The light may switch off automatically if the battery is low. If the two-sided parking light is switched on when the ignition is switched off, the light will not switch off automatically.

When the parking light is switched on, an acoustic warning signal sounds after the ignition is switched off and the driver's door is opened. After a few seconds or after the driver's door is closed, the warning signal will stop.

Dynamic Light Assist headlight assist system

Functionality

The headlight assist system automatically switches the high beam on and off.

When the high beam is switched on, it adjusts the light cone so that the drivers of oncoming and preceding vehicles are not dazzled.

⚠️ WARNING
Risk of an accident!
› If necessary, manually switch the high beam on or off.

Operating conditions

✓ The system is activated.
✓ The light switch is in the AUTO position.
✓ The driving speed is higher than 30 km/h (for some countries, higher than 60 km/h).
✓ The low beam is switched on.

Operation

Switching on

› Push the lever in the direction of the arrow. in the instrument cluster lights up.

Switching off

› Manually switch the high beam on or off.

Function restriction

The system may dazzle other road users if their headlights/lights are not detected for the following reasons, for example.

› The headlights/lights of oncoming vehicles are covered by crash barriers, for example.
› The headlamps/lights of the oncoming or preceding vehicle are dirty or not functioning. The system can also recognize a vehicle as a single-lane means of transport.

Settings

Activation/deactivation
The Dynamic Light Assist system is activated or deactivated in the following menu in the Infotainment system.

Replace light bulbs

What you should be mindful of

DIY replacement of the following bulbs is possible. Have the remaining light sources replaced by a specialist garage.

The new bulb must conform to the specification of the original light bulb. The name of the bulb is marked on the bulb socket.

⚠️ NOTICE
Danger of headlight damage due to the ingress of water and dirt!
› Always fit the protective cap on the headlight correctly after changing a bulb.
Conditions for changing a bulb
✓ Ignition switched off.
✓ Light switched off.

Front turn signal

› Remove the protective cap from the headlight.

› Remove the base with the bulb.

› Change the bulb in the socket.

› Insert the socket with the light bulb into the light so that the fixing lugs [A] fit into the recesses on the headlight.

› Fit the protective cap on the headlight again.

Rear turn signal and reversing lights

Loosen and remove the light

› Remove the cover with the bracket from the tool kit.

› Unscrew the screws [A] and remove the light.

› Press the lock mechanisms on the connector and remove the connector.

Replacing the light bulb

› Turn the corresponding socket with the bulb and remove it.

› Insert a new light bulb into the socket and secure the light bulb by turning it in the direction of ⬇.

› Insert the socket with the new bulb into the light so that the guide
52 Lighting, windscreen wipers and washers › Interior lighting

Lugs on the socket are aligned with the corresponding openings in the light.

Turn the socket clockwise to secure.

Insert and fix the light

Insert the connector into the light until it clicks into place.

Insert the lamp with the holes A onto the pins B in the body.

NOTICE
Risk of damage to the electrical system due to water ingress!

Make sure that the seal is inserted correctly when installing the light C.

NOTICE
Risk of damage to the electrical system!

Make sure that the cables between the light and the body are not pinched when the light is inserted.

Screw the light into place.

Fit the cover of the light, ensuring it clicks into place.

Windscreen wipers and washers

Operating conditions

✓ Engine compartment flap closed.
✓ Boot door closed.
✓ Ignition is switched on.
Operation

⚠️ WARNING
Risk of an accident!
At low temperatures, windscreen washer fluid can freeze on the windscreen and restrict visibility.
▶ Only use the windscreen washer when the windscreen is warm.

Wipe and wash the windscreen

HIGH Fast wiping
LOW Slow wiping
INT Depending on the equipment:
▶ Intermittent wiping
▶ Automatic wiping controlled by the rain sensor
OFF Switching off
1x Tip-wiping (spring-loaded position)
A Setting the wiping speed for the position INT
�� Washing and wiping (spring-loaded position)

Depending on the vehicle equipment, the windscreen washer nozzles of the windscreen can be heated automatically after starting the engine.

Clean headlights
When the headlights are switched on, they are cleaned the first time and after every tenth wash of the windscreen. The cleaning interval can be set by a specialist company.

Wipe and wash the rear window

�� Washing and wiping the window (spring-loaded position)
�� Washing the reversing camera (spring-loaded position)
�� Wiping
OFF Switching off

Automatic rear window wiping
If the windscreen wiping is performed without interruption, then the automatic regular intermittent wiping of the rear window takes place.

When the windscreen wipers are switched on, the rear window is automatically wiped when the reverse gear is engaged.

Settings

Activating/deactivating automatic wiping
The functions for automatic rear window wiping and automatic wiping in the rain can be activated and deactivated in the following menu in the Infotainment system.

CAR > ➕ ➕

MENU > ➕ ➕ ➕ ➕

Refilling windscreen washer fluid

⚠️ WARNING
Risk of an accident!
▶ Use windscreen washer fluid that is suitable for the weather conditions.

① NOTICE
Risk of damage to the windscreen washer system!
▶ When refilling the washer fluid, do not remove the strainer from the neck of the container.

① NOTICE
Risk of damage to the headlights!
▶ Only use washer fluid that does not attack polycarbonates.

① NOTICE
Risk of damage to engine compartment components!
▶ Close the container after refilling the windscreen washer fluid.

The windscreen washer tank is located in the engine compartment » page 10.

The container can hold a volume of 3.1 litres and 4.7 litres for vehicles with a headlight cleaning system. When the container is in the left-hand area of the engine compartment, the volume of the container is 3.65 litres.

▶ Open the engine compartment lid » page 186.
▶ Gently open the top of the lid.
▶ Top up the windscreen washer fluid.
Troubleshooting

Windscreen washer fluid level too low

► illuminates together with △

or

◄ illuminates together with △

› Top up the windscreen washer fluid.

Frozen windscreen wipers

› Carefully remove frozen windscreen wipers from the windscreen before switching on the ignition and free them from snow and ice.

Folding down windscreen wiper arms and replacing windscreen wiper blades

Fold the windscreen wiper arms away from the windscreen

① NOTICE
Risk of damage to the windscreen wipers and the engine compartment flap!

▶ Close the engine compartment flap before the windscreen wiper arms are folded away from the windscreen.

▶ Do not turn on the ignition when the windscreen wiper arms are folded away.

› Switch the ignition on and off again.

① NOTICE
Risk of damage to the windscreen wipers and the engine compartment flap!

▶ Close the engine compartment flap before the windscreen wiper arms are folded away from the windscreen.

▶ Do not turn on the ignition when the windscreen wiper arms are folded away.

Replace the windscreen wiper blade

③ CAUTION
Risk of an accident!

▶ Change the windscreen wiper blades once or twice a year.

▶ Fold the windscreen wiper arm away from the windscreen.

③

Press the catch and remove the wiper blade.

Insert the new wiper blade until it clicks into place.

Fold the windscreen wiper arm back onto the windscreen.

Turn on the ignition and push the control lever down.
Heating and air conditioning system

Manual air conditioning

What you should be mindful of

▶ We recommend a difference of max. 5°C between the outside temperature and the interior temperature.
▶ We recommend switching the cooling system off about 10 minutes before the end of the journey to prevent odour formation.
▶ Annual disinfection of the air conditioning is recommended.

⚠️ WARNING
Danger of misting!
▶ Always keep the fan on.

Operating conditions for the cooling system

✓ The outside temperature is below 2 °C.
✓ The engine is running.
✓ The blower is switched on.

Overview of the controls for the manual air conditioning

A Set the temperature
B Set the blower speed
C Set the direction of the air outlet
☞ Switch recirculated air mode on/off
A/C Switch the cooling system on/off

▌ After pressing the A/C button, the indicator light in the button illuminates, even if the conditions for switching on the cooling system are not met. The cooling system switches on when the conditions for switching on the cooling system are met.
▌ During operation of the air conditioning system, there may be an automatic increase in the engine idle speed.

Automatic activation of the cooling system

Automatic activation of the cooling system prevents the windows from misting up. The system switches on in the following cases.

- When the fan is on and the air distribution controller is in the position.
  In this case, the recirculation mode is switched off.
- When the air distribution controller is not in the position, and recirculated air mode is switched on.

Recirculated air mode

The recirculation mode prevents contaminated outside air getting into the interior of the vehicle.
Briefly switching on recirculation mode can increase the cooling effect.
▌ Under certain circumstances, the recirculation mode may be switched on or off automatically.

⚠️ WARNING
Risk of an accident!
In recirculation mode, there is no fresh air supply from the outside. This can result in loss of driver attention and fogging up of windows.
▶ Keep the recirculation mode switched on for a short time only.

Troubleshooting

Water under the vehicle

When the cooling system is switched on, water can drip off the air conditioning system. This is not a leak.

Fogging

☞ Increase the blower speed and switch on the cooling system.

Automatic switch-off of the cooling system

If the coolant temperature is too high, the cooling system may switch off automatically. This ensures sufficient engine cooling.

Climatronic automatic air conditioning system

What you should be mindful of

▶ We recommend a difference of max. 5°C between the outside temperature and the interior temperature.
▶ We recommend switching the cooling system off about 10 minutes before the end of the journey to prevent odour formation.
▶ Annual disinfection of the air conditioning is recommended.

⚠️ WARNING
Danger of misting!
▶ Always keep the fan on.
**Operating conditions for the cooling system**

- The outside temperature is below 2 °C.
- The engine is running.
- The blower is switched on.

**Operation**

- **A**: Set the temperature for the left side
- **B**: Set the temperature for the right side
- **C**: Set the direction of the air outlet
- **D**: Set the blower speed
- **E**: Set the temperature for the left side
- **F**: Set the temperature for the right side
- **G**: Depending on the equipment:
  - Switch auxiliary heating and ventilation on/off
  - **REST**: Use of residual engine heat for maintaining heat in the vehicle interior
  - It is possible to switch on within 30 minutes of switching off the ignition.
  - Switching off the function takes about 30 minutes.
- **H**: Interior temperature sensor
  - Switch recirculated air mode on/off
  - **MAX**: Switch the windscreen ventilation/defrosting mode on/off
- **MENU**: Operate Climatronic in the Infotainment system
- **SYNC**: Switch maintenance of the interior temperature on/off according to the temperature setting for the driver's side
- **AUTO**: Press – Switch on automatic mode
  - This function keeps the temperature constant and prevents the windows from misting.
  - Hold – Maintain the interior temperature in accordance with the temperature setting for the driver side (SYNC function)
- **A/C**: Switch the cooling system on/off

With a temperature setting outside of the number range, one of the following icons will be displayed in the Climatronic display.

**Recirculated air mode**

The recirculation mode prevents contaminated outside air getting into the interior of the vehicle.

Briefly switching on recirculation mode can increase the cooling effect.

⚠️ **WARNING**

Risk of an accident!

In recirculation mode, there is no fresh air supply from the outside. This can result in loss of driver attention and fogging up of windows.

- Keep the recirculation mode switched on for a short time only.

**Settings**

**Displaying the settings menu**

- Tap the **MENU** button on the Climatronic.
- Or:
- Tap on **MENU** • in the Infotainment screen.

**A**: Set the temperature for the left side
- **B**: Set the temperature for the right side
- **C**: Set operating power in automatic mode
- **D**: Select Climatronic mode
- **E**: Cooling system, switching circulating air operation on/off, setting blower speed and air distribution
- **F**: Set the temperature at the back
- **OFF**: Switch Climatronic on/off
- **SYNC**: Switch maintenance of the interior temperature on/off according to the temperature setting for the driver's side
- **Air Care**: The function reduces the penetration of pollutants into the vehicle interior. At the same time, the air is both circulated and cleaned.
  - The air purification process is displayed in the Infotainment.

- **LO**: Maximum cooling power
- **HI**: Maximum heating power

- During operation of the air conditioning system, there may be an automatic increase in the engine idle speed.
For proper operation, the doors and windows must be closed.
› To turn on/off, tap active.

Further Climatronic settings
› To make further settings, press the MENU button on the Climatronic, tap on ⚙ in the Infotainment screen.
› Applies to Infotainment Swing.
   Climate profile - Setting the operating power in automatic mode.
› Automatic air recirculation - Automatic re-circulated air mode on/off.
› Automatic supplementary heater - Switch fast interior heating on/off.
› Automatic windscreen heating - Switch automatic windscreen heating on/off.

Troubleshooting

Water under the vehicle
When the cooling system is switched on, water can drip off the air conditioning system. This is not a leak.

Fogging
› Increase the blower speed and switch on the cooling system.

Automatic switch-off of the cooling system
If the coolant temperature is too high, the cooling system may switch off automatically. This ensures sufficient engine cooling.

Auxiliary heating and ventilation

Usage
The auxiliary heater heats the vehicle interior and the engine.
The auxiliary ventilation makes it possible to supply fresh air to the vehicle interior when the engine is switched off. As a result, the interior temperature is lowered, e.g. when the vehicle is parked in the sun.

What you should be mindful of
⚠️ DANGER
Risk of poisoning!
› The auxiliary heater must not be operated in enclosed spaces.
⚠️ DANGER
Risk of fire!
› Switch off the auxiliary heater before refuelling.
› The exhaust pipe for the auxiliary heater is located on the underside of the vehicle. Therefore, do not stop the vehicle in places where the exhaust gases could come into contact with easily flammable materials, e.g. dry grass, spilled fuel etc.

Functionality
The system heats or ventilates the vehicle interior depending on the settings of the air conditioning system and the air outlet nozzles before the ignition is switched off.
The system consumes fuel from the fuel tank when operating the heating.

Operating conditions
✓ The battery charge is sufficient.
✓ The fuel supply is sufficient, the instrument cluster does not light up.

Operation

Switching on/off via the control panel of the air conditioning system
› Press the button.

Switch on/off with the radio remote control
› Hold down the corresponding key.

Display of the radio remote control indicator light
⚠️ Hold the radio remote control with the antenna facing upwards.
Keep a distance of at least 2 m from the vehicle.
⚠️ NOTICE
› Protect the remote control from moisture, strong vibrations and direct sunlight.

Range of the radio remote control
The range of the wireless remote control is a few hundred meters when the battery is full. For example, obstacles or weather conditions can reduce the range.
Set automatic switch on

Show the menu for vehicles with manual air conditioning
The automatic switching on is set in the following menu in the Infotainment system.

**CAR ➯ 🔍**

Or:

**MENU ➯ 🌋 ➯ 🔍**

Show menu for vehicles with Climatronic
› Press the key **MENU** on the Climatronic control panel ➯ tap 🔍 in the Infotainment screen.

Settings and information in the Infotainment screen

- **A** Day and time when the vehicle is to be ready for use
- **B** Setting the heating/ventilation
- **C** List of pre-selected times, activation / deactivation of the preset time
- **D** Set the selected choice of time and the duration (10-60 minutes)
- **E** When the heating is running, the windows are displayed in red
  - When ventilation is running, the windows are displayed in blue
- **F** Currently displayed preset time
- **G** Activation of the currently displayed preset time
- **H** Setting the departure time

When automatic switching on is activated, the warning light in the 🔴 symbol button lights up after the ignition is turned off.

Only one preset time can be active. The activated preset time will be deactivated again after it has started automatically. To start the next pre-set time, this pre-set time must be activated.

⚠️ When selecting the day in the preset time, there is an option between Sunday and Monday without the specified day. When this position is selected, the system is switched on every day without the need to select a day.

Troubleshooting

Steam in the engine compartment
In the engine compartment, steam may form during the operation of the heater. This is not a defect.

Running the auxiliary heater after stopping the engine
After switching off the system, the coolant pump and the auxiliary heating will continue running a little while longer in order to burn the remaining fuel in the heating.

Indicator light in the radio remote control
› Flashes green in a slow sequence - the switch-on signal was not received.
› Flashes red in a slow sequence - the switch-off signal was not received.
› Flashing green in rapid succession - the parking heater is locked, e.g. because the fuel tank is almost empty or there is an error.
› Check the level of fuel.
› If the fuel quantity is OK, seek the help of a specialist company.
› If the indicator is orange or flashing - the battery is almost discharged.

Change the battery in the remote control

› Use a thin screwdriver to remove the cover in the marked area.
› Open the cover and push it out.

› Use a screwdriver to loosen the battery in the marked area.
› Replace the battery.
› Insert the guard and push it until it audibly locks into place.

Driving data
Overview
The driving data display works with the ignition switched on.

In the instrument cluster display
Depending on the equipment, the display of the instrument cluster shows information such as speed, fuel consumption, range, etc.

In infotainment

A Distance travelled
B Driving time
C Average speed
D Average fuel consumption
E Evaluation of driving economy - Drive-Green Function (depending on Infotainment type) » page 165
F Graphical fuel gauge - If the expected range is less than 300 km, the vehicle slowly approaches the symbol ⌁
G Range

Memory
The system saves the driving data in the following memories.
Since start
Driving data from the time of switching on the ignition until the ignition is switched off again is stored in the memory. If the journey is interrupted for more than 2 hours, the memory will be reset.
Long-term
The driving data of all trips up to a total of 99 hours and 59 minutes driving time or 9999 km driving distance is stored in the memory. If one of the listed values is exceeded, the memory is reset.
Since refuel
Driving data from the time the fuel tank was last filled is stored in the memory. The memory is reset the next time the tank is filled.

Operation
Display driving data in the display of the instrument cluster via the multifunction steering wheel
The menu item for the driving data in the main menu in the display of the instrument cluster.
Displaying driving data in the infotainment system
The driving data is displayed in the menu in the infotainment system.

**CAR >  =$2 > Menu item for driving data**

› To reset the memory, hold the dial $A$.

Selecting the memory in the infotainment system
To select the memory, use the functional areas $<$ $>$ in the following menu in the infotainment system.

**CAR >  =$2 > Menu item for driving data**

Or:

**MENU > $H >  =$2 > Menu item for the driving data**

Resetting the memory in the infotainment system
The memory is reset in the following menu in the infotainment system.

**CAR > $F > $P**

Or:

**MENU > $H > $F > $P**

Settings
Select driving data to be displayed
The driving data to be displayed is selected in the following Infotainment menu.

**CAR > $F > $P**

Or:

**MENU > $H > $F > $P**

**Speed limit warning**

Usage
The system offers the possibility to set a speed limit beyond which an acoustic warning signal will sound and the following warning message appears in the display of the instrument cluster.

**Settings**

Setting the speed limit
› Select and confirm the Warning menu item at or $<$ (depending on display type).

› **When the vehicle is stationary**, set the desired speed limit and confirm.

› **While driving**, drive at the desired speed and confirm it as the speed limit.

Resetting the speed limit
› Select and confirm the Warning menu item at or $<$ (depending on display type).

› To reset the speed limit, confirm the stored value.

If the journey is interrupted for more than 2 hours, the set limit is deactivated, but the set value remains stored.

**Vehicle condition**

Display
The vehicle status is displayed in the following menu in the infotainment system.

**CAR >  =$2 > Menu item for the vehicle status**

Or:

**MENU > $H >  =$2 > Menu item for the vehicle status**
Vehicle areas displayed in colour indicate associated warnings

✓ No notification

⚠️ Warning messages regarding the vehicle condition and their quantity

 ula Display of information about the condition of the START-STOP system
 ▶ ula Activation/deactivation of information regarding the messages of the START-STOP system in another screen display

Functionality

In the event of a system fault, messages regarding the fault in question are displayed on the instrument cluster display when the ignition is switched on. Messages in relation to faults can also be displayed in the Infotainment.

The warning messages will continue to be displayed until the malfunctions have been remedied. After the message is displayed for the first time, only the indicator lights ⚠️ (Hazard) or ⚠️ (Warning) remain displayed.

Stopwatch in the Infotainment

Overview

The stopwatch display is shown in the menu in the Infotainment.

CAR > 🏇 > Sport

Or:

MENU > 🏇 > 🏇 > Sport

Information Sport

Settings

The Sport information display is shown in the menu in the Infotainment.

CAR > 🏇 > Sport

Or:

MENU > 🏇 > 🏇 > Sport

A swipe of the finger vertically across the screen allows three of the following displays to be shown.

▶ Charge pressure.
▶ Acceleration.
▶ Output.
▶ Coolant temperature.
▶ Oil temperature.

Personalisation

Usage

The personalization feature allows each vehicle key to be assigned a user account.

In the user account, settings can be assigned regarding e.g. light function, driver's seat and exterior mirror position, assistance systems, radio, navigation, etc.
Functionality

After opening the driver's door, all the personalised functions are adjusted according to the user account that is assigned to the key which was used to unlock the vehicle.

There are three user accounts and a guest account. A change to the set personalised functions is automatically stored in the active user account.

Change user account

⚠ WARNING
Risk of an accident!
▶ Carry out the account change while the vehicle is stationary.

In the instrument cluster display

Switching to a different user account is in the instrument cluster display within 10 seconds after turning on the ignition.

In infotainment

The system settings are made in the Infotainment in the following menu.

CAR > Vehicle status
Or:
MENU > Vehicle status

The account changes e.g. when changing drivers while traveling. This avoids unwanted re-setting of the personalized functions in the active user account.

Settings

This function is set in the following menu in the Infotainment system.

CAR
Or:
MENU

▶ Key assignment - Options for assigning the recognised key to the active user account
▶ Manual - the key must be manually assigned to the active account
▶ Automatic - detected key automatically assigned to a different account of the active account
▶ Assign the key to the current user account - Manual assignment of the key to the active account

To maintain the assignment of the selected user account to the selected key, we recommend that you select the manual key assignment.

Infotainment Swing

SETUP Infotainment settings menu
APP/SmartLink menu
▶ Press: Display menu
▶ Hold: switch voice control for the SmartLink application on/off
SOUND Sound settings
CAR Information about vehicle settings

System

Restriction

For safety reasons, operation of some Infotainment functions while driving is not possible or is restricted. The Infotainment system indicates this by means of a message in the screen.

Basic settings

Setting basic functions

The following Infotainment functions are set in the menu SETUP.
▶ Time and date.
▶ Language.
Units.

Restore factory settings.

Sound settings
The Infotainment sound is set in the menu SETUP > Sound.

The following menu items can be set.
▶ Setting the maximum volume when Infotainment is turned on.
▶ Volume adjustment of individual Infotainment functions.
▶ Setting the equalizer.
▶ Adjusting the volume ratio.

Depending on the equipment, the following advanced sound settings can be set.
▶ Setting the sound system.
▶ Setting the sound space optimisation for the driver.
▶ Turn on/off and adjust the subwoofer volume.

Configuration wizard
The configuration wizard helps to set certain Infotainment functions.

The configuration wizard is automatically displayed if, after switching on the Infotainment system, there are at least two menu items that have not been set or if a new user account has been selected.
▶ To switch off the automatic display, tap on Don't show again when the configuration wizard is displayed.
▶ For manual display, tap on SETUP > Configuration wizard.

Safely disconnect the connected USB device

1 NOTICE
Risk of damage to the data on the connected device! To safely disconnect/remove the device, proceed as follows.
▶ Tap SETUP > Remove safely.
▶ Select the desired device.
▶ Disconnect/remove the device.

Troubleshooting

Infotainment not responding
The Infotainment system must be restarted.
▶ Press 0 for more than 10 s.
▶ Wait for the restart to complete.

System update

We recommend having the system update carried out by a specialist company.

The system update ensures optimal function of the Infotainment system, e.g. compatibility with new phones.

Determine system version
▶ Tap SETUP > System information.

Manual update
For information on available updates, please refer to the ŠKODA internet pages.

> http://go.skoda.eu/updateportal
▶ Visit available updates.
▶ Save the update to a USB source.
▶ Insert the USB source into the front USB input.
▶ Tap SETUP > System information > Update software.
▶ Select the connected USB device as the update source.
▶ Go to the update file and confirm the update.
▶ Confirm any messages and wait for the update process to be completed.

Screen

Overview

A Status bar
B Bar with the functional surfaces of the displayed menu
C Other pages of the menu

Operation

1 NOTICE
Danger of screen damage!
▶ The Infotainment screen is operated by touching it lightly with your finger.

In principle, operation by touch is identical to the operation of a mobile phone.

The following operating modes are specific to the Infotainment system.
Settings

The following basic screen functions are set in the SETUP > Screen menu.

▶ Brightness level of the screen.
▶ Switch off the screen.
▶ Display the time.
▶ Confirmation sounds and animations.

Infotainment keyboard

Keypad overview

The arrangement of the keypad characters depends on the Infotainment language that has been set.

In Infotainment, the following types are used, depending on the context.

▶ Alphanumeric.
▶ Numeric.
▶ Keypad for input.
▶ Keypad for search.

Keypad example

A

Input line

▶ Delete characters before the cursor
  ▶ Tap: delete the last character
  ▶ Hold: delete all characters in sequence
▶ Show list of searched entries

B

Keypad functional surfaces

▶ Change to lowercase
▶ Switch to the first capital letter, followed by lowercase letters
▶ ABC/ASB: Switch to the language keypad
▶ 123: Switch to the numeric and character keypad
▶ Show additional keypad languages
▶ Insert a space
▶ Hold: Show additional character variants
▶ Move cursor to the left
▶ Move cursor to the right
▶ Confirm the characters that have been entered

Operation

The Infotainment keypad is used to enter characters, letters and numbers.

The keypad will be automatically displayed when Infotainment prompts for characters.

Find

During the character input, a search for corresponding entries takes place.

The entry to be searched can be entered, including diacritics.

The keypad will only provide characters that match the stored entries.

▶ To display the searched entries, tap ⏋.

Show additional keypad languages

To use the additional keypad languages, the desired languages must be set first.

▶ Tap ⏋ or repeatedly tap the flag symbol until the desired language keypad is displayed.

Further character variants

▶ Press and hold the sign with the symbol ⌃.
▶ Select the desired symbol.

Setting additional keypad languages

▶ Tap SETUP > Additional keypad languages.
Radio

Overview

Display main menu
› Tap on RADIO.

Analogue and digital radio reception

A Select frequency range
B Depending on the frequency range
   FM: Radio text
   DAB: Name of the station group
C Preset buttons for preferred stations
   ☀ List of available stations
   ⏀ Manual station search
   Ⓜ Display information about the station (applies to DAB)
   ⓕ Settings

Infotainment supports digital radio reception in DAB and DAB+ formats.

List of available stations
› To display, tap ☀.

○ Played station
☆ Station stored on the presets
TP A traffic radio station is set
 hamstring: DAB signal is not available
 hamstring: The DAB station reception is not stable
 Filtering the stations in the list according to the programme type.
   To filter the FM stations, the RDS and AF function must be switched on.
   To filter the DAB stations, the alphabetical sorting function of the stations must be activated.
○ Manual update of the station list

In the FM station list, information about the programme type and the type of the regional station can be displayed.

Operation

Select station

› Tap ◀ or ▶ at the top of the screen.

SCAN function
The function plays receivable stations of the selected frequency range in succession for a few seconds each.
› To start automatic play press ◀ or Scan or the right rotary control ◇.
› To end automatic play press ◆ or the right rotary control ◇.

Find stations manually
› In the Radio main menu, tap ☀.
› To search in sequence, tap ◀ or ▶ next to the displayed frequency range scale.
Or:
› Hold down the scroll mark on the frequency range scale and move it to the desired value.
Or:
› Turn the right rotary control ◇.

Restriction

▶ Infotainment supports digital radio reception in DAB and DAB+ formats.
▶ Car parks, tunnels, tall buildings or mountains can restrict radio reception.
▶ In the rear side windows, there are antennas for receiving the radio signal.
Covering the panes with foils or metal-coated labels may affect the reception of the radio signal.
▶ The ŠKODA AUTO company assumes no responsibility for the availability, correct functioning and broadcast information of the RDS service.

Settings

Save the station currently being listened to as a favourite from the Radio main menu
› Hold the desired station key for preferred stations until the station is stored.
Save station to favourites from the list of available stations
Applies to AM, FM and DAB frequency ranges.
› Hold the line with the name of the desired station.
› Tap the desired preset button.

Delete favourites
› In the Radio main menu, tap menu item Delete presets.
› To delete one preset button for preferred stations, tap the desired station button and confirm the deletion.
› To delete all preset buttons for preferred stations, tap on All and confirm the deletion.

Buttons
Applies to AM, FM and DAB frequency ranges.
The variant for changing stations using buttons in the Radio main menu is set as follows.
› In the Radio main menu, tap on Arrow buttons.
› Choose the change variant.

Traffic reception (TP) for FM stations on/off
Applies to the FM frequency range.
› In the Radio main menu, tap on Traffic program (TP).

Switch traffic reception for DAB stations on/off
Applies to the DAB frequency range.
› In the Radio main menu, turn on menu item Traffic Radio (TP).
› In the Radio main menu, tap on Advanced settings > DAB traffic programme announcements (TP) on/off.

Assign station logo from an external source
Applies to AM, FM and DAB frequency ranges.
Infotainment offers the option to assign logos from the pictures on an external source to the station buttons.
For station logos, images in jpg, png format with a maximum resolution of 400x240 pixels can be used.
› In the Radio main menu, tap on Station logos.
› Tap the desired preset button.
› Select the external source with the logo.
› Find the desired logo and confirm.

Delete station logos
Applies to AM, FM and DAB frequency ranges.
› In the Radio main menu, tap on Station logos.
› To delete a logo, tap the desired preset button and confirm the deletion.
› To delete all logos, tap on All and confirm the deletion.

Turn on/off radio text reception
Applies to the FM and DAB frequency ranges.
When the function is switched on and station presets are displayed, detailed information about the broadcast content of the FM station being listened to, or the name of the station group for the DAB station, is displayed.
› In the Radio main menu, tap menu item Radio text.

Switch automatic frequency control (AF) on/off
Applies to the FM frequency range.
When the function is switched on and the signal of the FM station currently being listened to is weak, Infotainment automatically sets the same station to a different frequency with a better signal.
› In the Radio main menu, tap on Advanced settings > Automatic frequency control (AF).

Sort stations in the list of available stations
Applies to the FM frequency range.
› In the Radio main menu, tap on Advanced settings > Sort station list.
› Select the sorting of stations in alphabetical order or by group.

Automatic change of frequency to a regionally linked FM station
Applies to the FM frequency range.
Infotainment provides the option of automatically switching to a regionally linked FM station in case of signal loss of the FM station being listened to.
› In the Radio main menu, tap on Advanced settings > RDS Regional.
› Select one of the following menu items.
› Fixed - If there is a loss of signal, another station must be set manually.
› Automatic - automatic selection of the station with the best signal reception.
If reception is lost in the given region, Infotainment will automatically set another available region.

Switch RDS on/off
Applies to the FM frequency range.
The menu item is only available for some countries.
› In the Radio main menu, tap on Advanced settings > Radio Data System (RDS).
If the RDS function is disabled, the following menu items in FM station settings are not available.
› Traffic programme (TP).
› Radio text.
› RDS Regional.
› Automatic frequency change (AF).

Switch additional DAB announcements on/off
Applies to the DAB frequency range.
When the function is switched on, other announcements are received as traffic announcements. For example, weather news, sports reports, financial news, etc.
In the Radio main menu, tap on Advanced settings > Other DAB announcements.

**Enable/disable automatic programme tracking of a DAB station**
 Applies to the DAB frequency range.

When the function is switched on and the DAB station is lost, Infotainment automatically changes to the same station with a better signal in a different DAB station group.

In the Radio main menu, tap on Advanced settings > DAB - DAB station tracking.

**Turn on/off automatic switching from a DAB station to the same FM station**
 Applies to the DAB frequency range.

When the function is switched on and the DAB station being listened to is lost, Infotainment automatically changes to the same FM station. The symbol (FM) is displayed after the station name.

When the corresponding DAB station can be received again, the station automatically changes from FM to DAB.

In the Radio main menu, tap on Advanced settings > Automatic DAB - FM switching.

### Media

**What you should be mindful of**

» Do not save any important data or that which has not been backed up on the connected audio sources. ŠKODA assumes no responsibility for lost or damaged files or connected audio sources.

» When changing or connecting an audio source, this may cause sudden changes in volume. Reduce the volume before changing or connecting an audio source.

» When connecting an audio source, the source information messages can be displayed. These messages must be observed and, if necessary, confirmed.

» The national copyright laws that apply in your country must be observed.

### Overview

**Display main menu**

» Tap on MEDIA.

**Operation**

**Operation - Basics**

» Tap: display available albums

» Tap: start playback

» Tap: pause

» **Within 3 seconds of starting playback, tap** play the previous song

» **After 3 seconds from the start of playback, tap** to play the current title from the beginning

» **Hold:** fast rewind within the title

» **Tap:** play the next song

» **Hold:** fast forward within the title

Movement within the title is also possible by dragging the finger over the timeline.

**Extended operation**

» Turn repeat playback of the current track on/off

» Turn repeat playback of the current album/folder on/off

» Turn random playback of the current album/folder on/off
Restriction

1 NOTICE
The availability of some media operation functions is dependent on the connected source and the software being used, e.g. Bluetooth®.

Settings

Turn title playback including subfolders on/off

» In the Media main menu, tap on \( \text{f} \) > Mix/Repeat including subfolders.

Traffic

» To turn on/off the traffic monitoring during the playback of media files, go to the Media main menu and tap on \( \text{f} \) > Traffic programme (TP).

Safely disconnect the connected device

1 NOTICE
Risk of damage to the data on the connected device! To safely disconnect/remove the device, proceed as follows.

» In the Media main menu, tap \( \text{f} \) > Safely remove:
» Select the desired device.
» Disconnect/remove the device.

Bluetooth® player

Infotainment allows audio files of a connected Bluetooth® player to play using the A2DP and AVRCP audio profile.

With Infotainment, multiple devices can be paired using Bluetooth®, but only one of them can be used as a Bluetooth® player.

» For connecting the Bluetooth® player, pair and connect the device via Bluetooth®.
» In the Media main menu, tap \( \text{f} \) > Bluetooth > paired devices.
» In the list, choose the device with the symbol \( \mathcal{A} \).

If a device is connected to Infotainment using Apple CarPlay or Android Auto, then it cannot be connected using Bluetooth®.

SD card

1 NOTICE
Risk of damaging the SD card reader!
» Do not use SD cards with a broken slide for write protection.

To insert the SD card, with the bevelled corner to the right, push into the slot in the external module until it snaps into place.

To remove, first disconnect the SD card safely. To do this in the Media main menu, tap \( \text{f} \) > Remove safely and select the SD card.
» Press on the inserted SD memory card.

The SD card moves to the eject position.

1 NOTICE
When using an SD card with an adapter, vehicle vibrations might cause the card to fall out of the adapter.

USB device

» To connect, insert the USB device into the appropriate port.

To play audio files, use USB ports that support data transfer.

» To disconnect disconnect the USB device first. To do this in the Media main menu, tap \( \text{f} \) > Remove safely and select the USB device.
» Disconnect the USB device.

A USB device can be connected directly to the USB port or via a connection cable. We recommend that you use extension cables from ŠKODA Original Accessories.

USB extension cables or reducers may affect the playback function of the connected device.

Load USB audio source

After connecting the USB device, charging will start automatically when the following conditions are met.
✓ The ignition is switched on.
✓ The USB device allows charging.

The charging efficiency can be different compared to the charging from the usual mains power supply.

Depending on the type of the connected USB device and the frequency of use, the charging current may not be sufficient to charge the battery of the connected device.

Some connected audio sources may not be recognised and cannot be charged.

Mobile device management

Overview

Mobile device management
› In the Telephone main menu, tap on the functional surface Bluetooth > paired devices.

In the list of paired mobile devices, the following symbols may appear for the individual devices.

- White icon - the device can be connected as a telephone.
- Green icon - the device is connected as a telephone.
- White icon - the device can be connected as a Bluetooth® player.
- Green icon - the device is connected as a Bluetooth® player.

Possible functions of the connected mobile device
The functions of a device connected via the HFP Bluetooth profile depends on the following connection types.

<table>
<thead>
<tr>
<th>First device Main phone</th>
<th>Second device Additional phone</th>
</tr>
</thead>
<tbody>
<tr>
<td>incoming / outgoing calls</td>
<td>Bluetooth® player</td>
</tr>
<tr>
<td>Telephone contacts</td>
<td></td>
</tr>
<tr>
<td>Bluetooth® player</td>
<td></td>
</tr>
</tbody>
</table>

With Infotainment only a mobile device can be connected as a Bluetooth® player.

Limitations of mobile devices and applications

Availability of features
The availability of certain features depends on the type of mobile device, as well as that of the applications installed.

Connection restrictions
› With Infotainment, a max. of 20 mobile devices are paired.
› The range of the connection of the mobile device to Infotainment is limited to the passenger compartment.
› After reaching the maximum number, the pairing of the next mobile device will replace that of the device that has not been used for the longest period of time.

Compatibility of mobile devices
It is possible to check the ŠKODA web pages to see if Infotainment is compatible with the selected mobile device being tested. This check is carried out by using the following reference or by reading the QR code.

http://go.skoda.eu/compatibility

All information given is incidental and is for information purposes.

The company, ŠKODA AUTO, cannot guarantee full functionality and compatibility, e.g. due to software update of infotainment and mobile devices.

Bluetooth® compatibility of mobile devices
Due to the large number of mobile devices, it is not possible to guarantee total Bluetooth® compatibility with Infotainment. Bluetooth® compatibility depends
on the Bluetooth® version as well as the implementation of Bluetooth® protocols by the manufacturer of the mobile device.

**Applications in mobile devices**

Mobile devices can be used to install applications that allow you to view additional information on the Infotainment screen, or to operate the Infotainment system.

Due to the variety of applications, as well as their ongoing development, the available applications may not function on all mobile devices. ŠKODA AUTO assumes no liability for their proper functioning.

The scope of available applications and their functionality is dependent on the type of Infotainment, as well as the vehicle and country.

**Information about ŠKODA applications**

Detailed information about ŠKODA applications can be found on the website after reading the following QR code or link.

▶ [http://go.skoda.eu/mobile-apps](http://go.skoda.eu/mobile-apps)

**Connection set-up**

**Connect a mobile device to Infotainment**

› Turn on the ignition.
› Turn on the Bluetooth® on the mobile device.
› Turn on the Bluetooth® on Infotainment → Bluetooth → Bluetooth.
› Turn on the Bluetooth® visibility of the Infotainment → Bluetooth → Visibility: Turn on → Visible.
› Find available Bluetooth® devices in the mobile device.
› Select the Infotainment Bluetooth® unit.

   The name of the unit can be found by tapping → Bluetooth → Name.
› Confirm the PIN; enter it if necessary and then confirm.

The mobile device is connected to the Infotainment or just paired, depending on the number of devices that are already connected.

**Connect Infotainment to a non-paired mobile device**

› Turn on the ignition.
› Turn on the Bluetooth® on the mobile device.
› Turn on the Bluetooth® on Infotainment → Bluetooth → Bluetooth.
› Tap → Bluetooth → Search for devices.
› Ensure the visibility of the device to be connected.
› Select the desired device from the list of Bluetooth® devices.
› Confirm the PIN; enter it if necessary and then confirm.
› If two devices are connected to the Infotainment, select the device to be replaced.

**Connect Infotainment to a mobile device that is already paired**

The connection with an already paired mobile device is made automatically after switching on the ignition; if necessary the device can be connected manually as follows.

› Turn on the ignition.
› Turn on the Bluetooth® on the mobile device.
› Turn on the Bluetooth® on Infotainment → Bluetooth → Bluetooth.
› Tap → Bluetooth → Paired devices.
› In the device list, select the desired device and the Bluetooth® profile.
› Confirm the PIN; enter it if necessary and then confirm.
› If two devices are connected to the Infotainment, select the device to be replaced.

**Disconnect from a mobile device**

› Tap → Bluetooth → Paired devices.
› Tap → Bluetooth → Profile of the desired mobile device.
› Enter the PIN; confirm if necessary.

**Delete a paired mobile device**

› Tap → Bluetooth → Profile of the desired mobile device.
› Tap on Delete and confirm the deletion.

**Telephone**

**Telephone main menu**

**Display main menu**

› Tap on PHONE.
Choice of storage group for the preferred contacts

Name of telephone service providers

If the symbol › is displayed in front of the name, roaming is active.

Enter telephone number

Contact list

Call lists

Switch on voice control for the connected telephone

Settings

 Conditions for connecting a telephone with Infotainment

✓ The ignition is switched on.
✓ The Bluetooth® function of the Infotainment and the telephone needs to be switched on.

The Bluetooth® function of the Infotainment is switched on in the menu item SETUP > Bluetooth > Bluetooth.
✓ Visibility of the Infotainment is switched on.

The visibility of the Infotainment is switched on in the menu item SETUP > Bluetooth > Visibility > Visible.
✓ The telephone is within signal range of the Infotainment's Bluetooth® unit.
✓ The telephone is compatible with Infotainment.
✓ Through Infotainment, no mobile device can be connected using Apple CarPlay.

Telephone operation

Enter telephone number

› In the Telephone main menu, tap .
› Enter the telephone number using the numeric keypad that is displayed.

The displayed numeric keypad can also be used for searching for contacts.
If, for example, the digits 32 are entered, contacts with the letter sequence DA, FA, EB etc. are displayed next to the numeric keypad.

List of telephone contacts

The list of telephone contacts is imported from the connected main telephone.

› To display the contact list in the telephone main menu, tap .
› To find details within the list, tap Find.
› Enter the details you wish to find.
› To establish a connection with a contact, tap the functional area showing the desired contact.

If a contact has multiple telephone numbers, select the telephone number from the displayed list.

To display the details for a contact, tap ›.

Telephone conversation

Depending on the context of the telephone conversation, the following functions can be selected.

End connection / reject incoming call / end call
✓ Answer an incoming call / return to the held call
✓ Switch the ringer off / on
✓ Hold a call
✓ Switch the microphone off / on
✓ Show details of the caller

To switch the call tone from the speakers to the telephone, go to the telephone main menu and tap on > hands-free.

To switch the call tone from the telephone to the speakers, tap .

Settings for Infotainment telephone functions

Manage preset buttons for preferred contacts

To save the desired preset button, press and hold.
Select a contact from the displayed list.
If the contact contains multiple telephone numbers, choose the desired telephone number.
To delete tap on Telephone > User profile > Manage favourites in the main menu.
To delete one preset, tap on the list entry and confirm the deletion.

Or:
To delete all presets, tap on Delete all and confirm the deletion.

Import telephone contacts

After first connecting the main telephone with Infotainment, telephone contacts will start to be imported into the Infotainment memory.

Infotainment can import up to 2000 telephone contacts. Each contact can include max. 5 telephone numbers.
Depending on the type of telephone, import confirmation may be required.

Update telephone contacts

When re-connecting the telephone with Infotainment, an automatic update of the list is carried out.
For a manual update of the list in the telephone main menu, tap on > User profile > Import contacts.

Sort contacts in the phone book

In the Telephone main menu, tap on > User profile > Sort by .
Select the type by which to sort.
Ringer
Some phones do not allow the use of the telephone ringtone; instead, the Infotainment ringtone is used.

› To set the Infotainment ringer in the Telephone main menu, tap on User profile > Select ringtone.
› Select the ringtone.

Simultaneous calls
This applies to some countries.
Depending on the connected telephone, it is possible to answer the next incoming call and hold the previous call.

› To switch on/off simultaneous calls, tap on telephone Simultaneous calls.

SmartLink
Functionality
SmartLink offers the ability to display and operate certified applications from a connected mobile device in the Infotainment screen.

Certification may be conditional upon the use of the latest update to the particular SmartLink application.
Applications include, for example, apps for route guidance, telephoning, listening to music, etc.
Mobile devices can be connected via a USB cable.

Supported connection types
SmartLink supports the following connection types.

➤ Android Auto.
➤ Apple CarPlay.
➤ MirrorLink.

Overview of the SmartLink connection

Connection conditions

General connection conditions
✓ The mobile device supports the following SmartLink connection types: Android Auto, Apple CarPlay and MirrorLink.
✓ Mobile devices, as well as the type of SmartLink connection, are supported in the respective market.
✓ Some connected mobile devices require the mobile device to be “unlocked”.

Conditions for Android Auto
✓ The device to be connected must have Android AutoSupport.
   A list of devices, supported regions and applications that the Android Auto connection supports can be found on the websites of Google Inc..
✓ The Android Auto application needs to be installed on the mobile device.
✓ Some applications require the data connection in the mobile device to be turned on.

Conditions for Apple CarPlay
✓ The device to be connected must have Apple CarPlaySupport.
   A list of devices, supported regions and applications that the Apple CarPlay connection supports can be found on the websites of Apple Inc..
✓ Siri voice control is on.
✓ The data connection is switched on in the mobile device.

Conditions for MirrorLink
✓ The device to be connected must have MirrorLinkSupport.
   A list of devices and applications that the MirrorLink connection supports can be found on the websites of Car Connectivity Consorciunm®.
✓ The MirrorLink application needs to be installed on the mobile device.
✓ Some applications require the data connection in the connected mobile device to be turned on.

Operation

Operation of the running MirrorLink application

> Move the functional areas to the right edge of the screen
▲ Move the functional areas to the top of the screen
▼ Move the functional areas to the bottom of the screen
❖ Return to the MirrorLink main menu

Restriction

Restriction of SmartLink applications while driving
For safety reasons, operation of some SmartLink applications while driving is not possible or is restricted.

Functionality restriction of Infotainment with an Android Auto connection
▶ For the duration of the connection, the external device cannot be used as an audio source in the Media menu.
▶ By connecting the device, all currently connected Bluetooth® devices will be disconnected and the device will automatically be connected as the main telephone.
▶ For the duration of the connection, no other Bluetooth® devices can be connected to the Infotainment system.

Functionality restriction of Infotainment with an Apple CarPlay connection
▶ For the duration of the connection, the external device cannot be used as an audio source in the Media menu.
▶ Connecting the device disconnects all currently connected Bluetooth® devices.
▶ For the duration of the connection, no Bluetooth® devices can be connected to the Infotainment system.

Functionality restriction of Infotainment with a MirrorLink connection
▶ For the duration of the connection, the external device cannot be used as an audio source in the Media menu.
▶ By connecting the device, all currently connected Bluetooth® devices will be disconnected and the device will automatically be connected as the main telephone.

Depending on the device to be connected, a connection confirmation may be required.

Settings

Apple CarPlay – Connection via USB
Turn on the Infotainment.
Turn on the mobile device.
Connect the mobile device to the front USB input using a cable.
Choose to connect via Apple CarPlay.

Apple CarPlay – Disconnection
In the Apple CarPlay main menu, tap on the “ŠKODA” functional area.
Tap on ◦.

Android Auto – Connection via USB
Turn on the Infotainment.
Turn on the mobile device.

Connect the mobile device to the front USB input using a cable.

Choose to connect via Android Auto.

**Android Auto - Disconnection**

> In the main menu of Android Auto tap on "Return to ŠKODA".

> Tap on .

**MirrorLink - Connection via USB**

> Turn on the Infotainment.

> Turn on the mobile device.

> Connect the mobile device to the front USB input using a cable.

> Choose to connect through MirrorLink.

**MirrorLink - Disconnection**

> In the MirrorLink main menu, tap .

> Tap on .

**Change to another device / connection type**

Infotainment allows you to switch between currently connected devices and the connection type.

> Tap on .

> Select the desired device or connection type.

**ŠKODA Connect online services**

**Functionality**

ŠKODA Connect online service offer the option of connecting the vehicle to the online world. They thus represent an extension of the vehicle and Infotainment functions.

For the functionality of the ŠKODA Connect Online Services, the vehicle must be within range of a mobile network through which the services are provided. The availability, the connection speed and the technology used in the mobile network can be different in the respective countries and are dependent on the mobile network operator.

The ŠKODA Connect online services are not included in the equipment of the vehicle. They can be ordered separately on the ŠKODA Connect Portal website or in the ŠKODA Connect application.

The offer of ŠKODA Connect online services depends on the type of vehicle and its trim level, Infotainment and country. Availability in each country can be checked on the ŠKODA Connect website.

The rights and obligations of the Parties with respect to the provision of these services are governed by a separate agreement. Current legal documents regarding the online services can be found on the ŠKODA Connect Portal as well as the ŠKODA Connect application.
Settings

Registration and activation of online services
User registration, as well as the activation of the ŠKODA Connect online services, is completed on the ŠKODA Connect Portal website or in the ŠKODA Connect application.

In order to complete user registration, you will need to access your e-mails.

In order to activate ŠKODA Connect, proceed as follows.

› Switch on the ignition and the Infotainment.
› Tap SETUP > ŠKODA Connect (online services) > Registration.
› Enter and confirm the registration PIN you have received during user and vehicle registration on the ŠKODA Connect Portal website or in the ŠKODA Connect application.
› Wait for the registration completion message to appear.
› Confirm any messages on the screen.

Delete user
› Switch on the ignition and the Infotainment.
› Tap SETUP > ŠKODA Connect (online services) > Registration.
› Tap Delete user > Delete.
› Confirm the deletion.

By deleting the registered vehicle in the user account on the website ŠKODA Connect Portal the user is also deleted in Infotainment.

Changing the user
› Switch on the ignition and the Infotainment.
› Tap SETUP > ŠKODA Connect (online services) > Registration.
› Tap New owner > Change ownership.
› Enter and confirm the registration PIN code received during registration of the new user and during vehicle registration on the ŠKODA Connect Portal website.
› If necessary, confirm the change by tapping the function surface Change main users.

Management of online services
In the service management, it is possible to display information about the online services, the validity of their licence, or to switch the services on/off.

› Tap SETUP > ŠKODA Connect (online services) > Privacy settings and manage services.
› To display the designations and the status of the services, select the desired service.

For detailed information about the service tap ➤.
› To switch the services on/off, tap the Checkbox.

Connection status of the online services
The connection status of the online services of ŠKODA Connect online services is indicated by an icon in the status bar on the Infotainment screen.

A The ŠKODA Connect online services are available.
At the same time the symbol of the data connection type can be displayed.

B The ŠKODA Connect online services are not available.

C Localisation services are restricted or disabled.
Detailed information about the online services can be viewed in the Online Services Administration.

D Localisation services are enabled.
Detailed information about the online services can be viewed in the Online Services Administration.

Localisation services
For the complete functionality of some online services, activated localisation services are required.

Localisation services include, for example, information on the last parking position, area notification or speed notification.

When localisation services are active, the symbol 🗺 will be displayed in the status line in the Infotainment screen.

Switch Private mode function on/off
By switching the Private mode function on, the services relating to sending vehicle information and personal data, which are essential for the provision of online services, are deactivated.

› Tap SETUP > ŠKODA Connect (online services) > Services Management > Private mode.

NOTICE
The emergency call remains fully functional after turning on the private mode feature.
The functions of the information and breakdown call are limited.
Switch Care Connect function on/off
By switching the Care Connect services off, the services relating to sending vehicle information and personal data, which are essential for the provision of Care Connect online services, are deactivated.

> Tap SETUP > ŠKODA Connect (online services) > Services Management > Care Connect.

⚠ NOTICE
The emergency call remains fully functional after turning off the Care Connect feature. The functions of the information and breakdown call are limited.

Switch online services on/off
It is possible to have the online services switched off/on exclusively by a ŠKODA service partner.

After turning off the online services, none of the ŠKODA Connect online services, including the emergency calls are functioning.

To inform the vehicle user that the ŠKODA Connect online services are out of order, the service partner applies the sticker at a visible point in the vehicle (e.g. on the roof cladding). This sticker must not be removed as long as the online services are off.

⚠ NOTICE
It should be noted that the emergency, information and breakdown calls are not available after switching off the online services.
For this reason, no automatic emergency call is made in the event of a serious car accident.

Infotainment Bolero
Infotainment overview

MENU menu
The MENU menu contains all available Infotainment menus.

> To Display the menu tap MENU.
The graphic display type for the MENU menu can be set.
For safety reasons, operation of some Infotainment functions while driving is not possible or is restricted. The Infotainment system indicates this by means of a message in the screen.

### Basic settings

#### Setting basic functions

The following Infotainment functions are set in the **MENU > ☰** menu:

- Time and date.
- Language.
- Units.
- Restore factory settings.

#### Sound settings

The Infotainment sound is set in the menu **MENU > ☰**. The following menu items can be set:

- Setting the equalizer.
- Adjusting the volume ratio.
- Volume adjustment of individual Infotainment functions.
- Volume adjustment of voice commands.
- Setting the maximum volume when Infotainment is turned on.
- Speed-dependent volume setting.
- Setting the Infotainment to mute with the parking aid switched on.

Depending on the equipment, the following advanced sound settings can be set:

- Setting space optimisation.
- Setting the audio profiles according to genre.
- Adjusting the subwoofer volume.

#### Configuration wizard

The configuration wizard helps to set certain Infotainment functions.

The configuration wizard is automatically displayed if, after switching on the Infotainment system, there are at least two menu items that have not been set or if a new user account has been selected.

- To switch off the automatic display, tap on Don’t show again when the configuration wizard is displayed.
- For manual display, tap on **MENU > ☰ > Configuration wizard**.

#### Setting the MENU

The graphic display type for the MENU menu can be set as follows.

- **MENU > ☰ > Screen > Menu:**
- Select one of the following menu items.
- **Grid display** - Grid display.
- **Horizont. Display** - horizontal display.

### Safely disconnect the connected USB device

**NOTICE**
Risk of damage to the data on the connected device! To safely disconnect/remove the device, proceed as follows.

- Tap **MENU > ☰ > Remove safely**.
- Select the desired device.
- Disconnect/remove the device.

#### Electronic voice amplification for driver and passenger

The voice enhancer allows transmission of the driver’s and passenger’s voice on the speakers in the rear.

- For **volume adjustment of voice amplification**
  - **MENU > ☰ > volume**, tap **Electronic voice enhancement**.

### Troubleshooting

#### Infotainment not responding

The Infotainment system must be restarted.

- Press ⏰ for more than 10 s.
- Wait for the restart to complete.

#### System update

We recommend having the system update carried out by a specialist company.
The system update ensures optimal function of the Infotainment system, e.g. compatibility with new phones.

**Determine system version**
› Tap MENU › INFO › System information.

**Manual update**
For information on available updates, please refer to the ŠKODA internet pages.

▶ [http://go.skoda.eu/updateportal](http://go.skoda.eu/updateportal)
› Visit available updates.
› Save the update to a USB source.
› Insert the USB source into the front USB input.
› Tap MENU › INFO › System information › Update software.
› Select the connected USB device as the update source.
› Go to the update file and confirm the update.
› Confirm any messages and wait for the update process to be completed.

---

**Screen**

**Overview**

![Station](image)

A Status bar
B Bar with the functional surfaces of the displayed menu
C Other pages of the menu

**Operation**

1️⃣ **NOTICE**
Danger of screen damage!

The Infotainment screen is operated by touching it lightly with your finger.

In principle, operation by touch is identical to the operation of a mobile phone.

The following operating modes are specific to the Infotainment system.

---

**Dragging up or down with two fingers**

▶ Quickly review the list of phone contacts.

**Pulling apart with two fingers**

▶ Enlarge image.

**Pulling together with two fingers**

▶ Minimize image.

---

**Settings**

The following basic screen functions are set in the MENU › INFO › Screen menu.

▶ Brightness level of the screen.
▶ Switch off the screen.
▶ Display the time.
▶ Confirmation sounds and animations.

---

**Infotainment keyboard**

**Keypad overview**

The arrangement of the keypad characters depends on the Infotainment language that has been set.

In Infotainment, the following types are used, depending on the context.

▶ Alphanumeric.
▶ Numeric.
▶ Keypad for input.
Keypad for search.

Keypad example

A Input line
- ● Delete characters before the cursor
- Tap: delete the last character
- Hold: delete all characters in sequence
- ⇧ Show list of searched entries

B Keypad functional surfaces
- ✈ Change to lowercase
- → Switch to the first capital letter, followed by lowercase letters
- 123 Switch to the language keypad
- 123 Switch to the numeric and character keypad
- ☔ Show additional keypad languages
- ← Insert a space
- ☆ Hold: Show additional character variants
- ⇨ Move cursor to the left
- → Move cursor to the right
- ◼ Confirm the characters that have been entered

Operation

The Infotainment keypad is used to enter characters, letters and numbers.

Find

During the character input, a search for corresponding entries takes place.

The entry to be searched can be entered, including diacritics.

The keypad will only provide characters that match the stored entries.

To display the searched entries, tap ⇧.

Show additional keypad languages

To use the additional keypad languages, the desired languages must be set first.

- Tap 1 or repeatedly tap the flag symbol until the desired language keypad is displayed.

Further character variants

- Press and hold the sign with the symbol ☔.
- Select the desired symbol.

Setting additional keypad languages

- Tap MENU > 11 > Additional keypad languages.

Voice control

Functionality

Voice control principle

Voice control works according to the principle of dialogue between the user and the Infotainment system.

The user says a voice command. The Infotainment system responds or executes the voice command.

Conditions

- Ignition is switched on.
- Infotainment is switched on.
- No telephone conversation can be held via Infotainment.
Operation

Voice control process
› To turn on voice control, press the button on the multifunction steering wheel.

Or:
› Tap on "VOICE".
After switching on, the icon is displayed.
› Say a voice command.
During recognition of the voice command, the icon is displayed.
The Infotainment system then executes the voice command or plays the message. During the message, the icon is displayed.

After the execution of the voice command, voice control is switched off.

Correcting a voice command
› During voice command input, press the button on the multifunction steering wheel and say a new voice command.

Stopping voice control
Stopping leaves more time for voice command input, e.g. for searching for a phone contact.
› Move your finger up or down over the Infotainment screen.

Or:
› Say the "pause" voice command.

Resuming stopped voice control
› Press the button on the multifunction steering wheel.

Or:
› Tap on in the Infotainment screen.

Stopping the played back message
› Press the button on the multifunction steering wheel.

Ending voice control
› Press the button on the multifunction steering wheel twice.

Or:
› Say the voice command “cancel” during voice command input.

Restriction
For some Infotainment languages, no voice control is available. The Infotainment system will indicate this.
The messages are generated by the Infotainment system. Flawless clarity (e.g. road or city name) cannot always be guaranteed.

You cannot use voice control while a phone call is in progress.

Settings
The following voice control functions are set in the menu Voice control.
› Confirmation tones.
› Display of sample commands.

Self-help
Starting acoustic help
› If the Infotainment system is expecting a voice command, say “Help”.
The “Help” voice command can be issued repeatedly for further tips on voice control.
Activate/deactivate the display of example voice commands in the Infotainment screen.
The system offers the option of displaying example voice commands after switching on the voice control in the Infotainment screen.
› To turn on/off Voice control tap on Example commands (Infotainment system).

Activate/deactivate display of example voice commands in the instrument cluster display
The system offers the option of displaying example voice commands after switching on the voice control in the Instrument cluster screen.
› To turn on/off Voice control tap on Example commands (Instrument cluster).

Radio
Overview
Display main menu
› Tap on RADIO.

Or:
› Tap on MENU .

Analogue and digital radio reception

You cannot use voice control while a phone call is in progress.
Depending on the frequency range

- **FM**: Radio text
- **DAB**: Name of the station group

- **Preset buttons for preferred stations**
  - List of available stations
  - Manual station search
  - Display information about the station (applies to DAB)

- **Settings**

Infotainment supports digital radio reception in DAB and DAB+ formats.

**List of available stations**

- **To display**, tap \(\Rightarrow\).
  - Played station
  - Station stored on the presets
  - **TP** A traffic radio station is set
  - \(\Rightarrow\) DAB signal is not available
  - \(\Rightarrow\) The DAB station reception is not stable
  - To filter the FM stations into alphabetical order, tap according to group or genre.
    The prerequisite for the filtering option is ensuring RDS and AF functions are activated.
  - **Manual update of the station list**

In the FM station list, information about the programme type and the type of the regional station can be displayed.

**Operation**

**Select station**

- Tap \(<\) or \(>\) at the top of the screen.

**SCAN function**

The function plays receivable stations of the selected frequency range in succession for a few seconds each.

- **To start automatic play** press \(\Rightarrow\) Scan or the right rotary control \(\circlearrowright\).
- **To end automatic play** press \(\Leftrightarrow\) or the right rotary control \(\circlearrowright\).

**Find stations manually**

- In the Radio main menu, tap \(\Rightarrow\).
- To **search in sequence**, tap \(<\) or \(>\) next to the displayed frequency range scale.

Or:

- Hold down the scroll mark on the frequency range scale and move it to the desired value.

Or:

- Turn the right rotary control \(\circlearrowright\).

**Restriction**

- Infotainment supports digital radio reception in DAB and DAB+ formats.
- Car parks, tunnels, tall buildings or mountains can restrict radio reception.
- In the rear side windows, there are antennas for receiving the radio signal.
  Covering the panes with foils or metal-coated labels may affect the reception of the radio signal.
- The ŠKODA AUTO company assumes no responsibility for the availability, correct functioning and broadcast information of the RDS service.

**Settings**

- **Save the station currently being listened to as a favourite from the Radio main menu**
  - Hold the desired station key for preferred stations until the station is stored.

- **Save station to favourites from the list of available stations**
  **Applies to AM, FM and DAB frequency ranges.**
  - Hold the line with the name of the desired station.
  - Tap the desired preset button.

- **Delete favourites**
  - In the **Radio** main menu , tap \(\Rightarrow\) > Delete presets.
  - To delete one preset button for preferred stations, tap the desired station button and confirm the deletion.
  - To delete all preset buttons for preferred stations, tap \(\Rightarrow\) All and confirm the deletion.

**Buttons** \(\Leftrightarrow\) \(\Rightarrow\)

**Applies to AM, FM and DAB frequency ranges.**

The variant for changing stations using buttons \(\Leftrightarrow\) \(\Rightarrow\) in the **Radio** main menu is set as follows.

- In the **Radio** main menu, tap \(\Rightarrow\) > Arrow buttons.
  Choose the change variant.

**Traffic reception (TP) for FM stations on/off**

**Applies to the FM frequency range.**

- In the **Radio** main menu, tap \(\Rightarrow\) > Traffic program (TP).
Switch traffic reception for DAB stations on/off
Applies to the DAB frequency range.
› In the Radio main menu, turn on menu item 📀 > Traffic Radio (TP).
› In the Radio main menu, tap 📀 > Advanced settings > DAB traffic programme announcements (TP) on/off.

Assign station logo from an external source
Applies to the DAB frequency range.
Infotainment offers the option to assign logos from the pictures on an external source to the station buttons.
For station logos, images in jpg, gif, png, bmp format with a maximum resolution of 500x500 pixels can be used.
› In the Radio main menu, tap 📀 > Station logos.
› Tap the desired preset button.
› Select the external source with the logo.
› Find the desired logo and confirm.
The information for updating station logos is taken from the ŠKODA web pages.

▶ http://go.skoda.eu/updateportal

Delete station logos
Applies to AM, FM and DAB frequency ranges.
› In the Radio main menu, tap 📀 > Station logos.
› To delete a logo, tap the desired preset button and confirm the deletion.
› To delete all logos, tap on All and confirm the deletion.

Activating / deactivating automatic station logo assignment
Applies to the FM and DAB frequency ranges.
When the function is switched on, a station logo from the Infotainment memory is assigned when the station is stored on a preset.
› In the Radio main menu, tap 📀 > Advanced settings > Autostore station logos.

Regional FM station logo
Applies to the FM frequency range.
Infotainment provides the option of using country-specific FM station logos.
› In the Radio main menu, tap 📀 > Advanced settings > Region for station logo.
› Choose the country.

Turn on/off radio text reception
Applies to the FM and DAB frequency ranges.
When the function is switched on and station presets are displayed, detailed information about the broadcast content of the FM station being listened to, or the name of the station group for the DAB station, is displayed.
› In the Radio main menu, tap 📀 > Radio text.

Switch automatic frequency control (AF) on/off
Applies to the FM frequency range.
When the function is switched on and the signal of the FM station currently being listened to is weak, Infotainment automatically sets the same station to a different frequency with a better signal.
› In the Radio main menu, tap on 📀 > Advanced settings > Automatic frequency control (AF).

Automatic change of frequency to a regionally linked FM station
Applies to the FM frequency range.
Infotainment provides the option of automatically switching to a regionally linked FM station in case of signal loss of the FM station being listened to.
› In the Radio main menu, tap on 📀 > Advanced settings > RDS Regional.
› Select one of the following menu items.
- Fixed - If there is a loss of signal, another station must be set manually.
- Automatic - automatic selection of the station with the best signal reception.
If reception is lost in the given region, Infotainment will automatically set another available region.

Switch RDS on/off
Applies to the FM frequency range.
The menu item is only available for some countries.
› In the Radio main menu, tap 📀 > Advanced settings > Radio Data System (RDS).
If the RDS function is disabled, the following menu items in FM station settings are not available.
- Traffic programme (TP).
- Radio text.
- RDS Regional.
- Automatic frequency change (AF).
- Regional station logo.

Switch additional DAB announcements on/off
Applies to the DAB frequency range.
When the function is switched on, other announcements are received as traffic announcements. For example, weather news, sports reports, financial news, etc.
› In the Radio main menu, tap on 📀 > Advanced settings > Other DAB announcements.
Enable/disable automatic programme tracking of a DAB station

Applies to the DAB frequency range.

When the function is switched on and the DAB station is lost, Infotainment automatically changes to the same station with a better signal in a different DAB station group.

› In the Radio main menu, tap on 📊 > Advanced settings > DAB - DAB station tracking.

Turn on/off automatic switching from a DAB station to the same FM station

Applies to the DAB frequency range.

When the function is switched on and the DAB station being listened to is lost, Infotainment automatically changes to the same FM station. The symbol (FM) is displayed after the station name.

When the corresponding DAB station can be received again, the station automatically changes from FM to DAB.

› In the Radio main menu, tap on 📊 > Advanced settings > Automatic DAB - FM switching.

Activating/deactivating reception of DAB transmitter in the L band

In some countries, the DAB radio reception is only available as a so-called LBand.

› In the Radio main menu, tap 📊 > Advanced settings > L-Band:

⚠️ If there is no DAB radio reception available in the L-band in your country, we recommend turning the L-band reception off. The DAB channel scan is therefore faster.

Media

What you should be mindful of

▶ Do not save any important data or that which has not been backed up on the connected audio sources. ŠKODA assumes no responsibility for lost or damaged files or connected audio sources.

▶ When changing or connecting an audio source, this may cause sudden changes in volume. Reduce the volume before changing or connecting an audio source.

▶ When connecting an audio source, the source information messages can be displayed. These messages must be observed and, if necessary, confirmed.

▶ The national copyright laws that apply in your country must be observed.

Operation

Overview

Display main menu

› Tap on MEDIA.

Or:

› Tap on MENU > 📊.

Select source

Manage files / multimedia database

Settings

Operation - Basics

Album image / symbol of the connected source

Tap: display available albums

Tap: start playback

Tap: pause

_within 3 seconds of starting playback, tap:_ play the previous song

_after 3 seconds from the start of playback, tap:_ to play the current title from the beginning

Hold: fast rewind within the title

Tap: play the next song

Hold: fast forward within the title

Movement within the title is also possible by dragging the finger over the timeline.

Extended operation

Turn repeat playback of the current track on/off

Turn repeat playback of the current album/folder on/off

Turn random playback of the current album/folder on/off
Restriction

**NOTICE**
The availability of some media operation functions is dependent on the connected source and the software being used, e.g. Bluetooth®.

Settings

**Turn title playback including subfolders on/off**
- In the Media main menu, tap on > Mix/Repeat including subfolders.

**Traffic**
- To turn on/off the traffic monitoring during the playback of media files, go to the Media main menu and tap on > Traffic programme (TP).

**Safely disconnect the connected device**

**NOTICE**
Risk of damage to the data on the connected device! To safely disconnect/remove the device, proceed as follows.
- In the Media main menu, tap > Safely remove:
- Select the desired device.
- Disconnect/remove the device.

**Bluetooth® player**
Infotainment allows audio files of a connected Bluetooth® player to play using the A2DP and AVRCP audio profile.

With Infotainment, multiple devices can be paired using Bluetooth®, but only one of them can be used as a Bluetooth® player.
- For **connecting the Bluetooth® player**, pair and connect the device via Bluetooth®.
- In the Media main menu, tap > Bluetooth > paired devices.
- In the list, choose the device with the symbol 📱.

If a device is connected to Infotainment using Apple CarPlay or Android Auto, then it cannot be connected using Bluetooth®.

**SD card**

**NOTICE**
Risk of damaging the SD card reader!
- Do not use SD cards with a broken slide for write protection.

To insert the SD card, with the bevelled corner to the right, push into the slot in the external module until it snaps into place.

To remove, first disconnect the SD card safely. To do this in the Media main menu, tap > Remove safely and select the SD card.

Press on the inserted SD memory card.
The SD card moves to the eject position.

**USB device**
- To connect, insert the USB device into the appropriate port.
- To play audio files, use USB ports that support data transfer.
- To disconnect disconnect the USB device first. To do this in the Media main menu, tap > Remove safely and select the USB device.

A USB device can be connected directly to the USB port or via a connection cable. We recommend that you use extension cables from ŠKODA Original Accessories. USB extension cables or reducers may affect the playback function of the connected device.

**Load USB audio source**
After connecting the USB device, charging will start automatically when the following conditions are met.
- The ignition is switched on.
- The USB device allows charging.

The charging efficiency can be different compared to the charging from the usual mains power supply. Depending on the type of the connected USB device and the frequency of use, the charging current may not be sufficient to charge the battery of the connected device.

Some connected audio sources may not be recognised and cannot be charged.

The GPT standards (GUID partition table) method structured audio sources are not supported by Infotainment. Viewing images on the Infotainment screen is not supported by connected Apple devices.

Compatibility of mobile devices
It is possible to check the ŠKODA web pages to see if Infotainment is compatible with the selected mobile device being tested. This check is carried out by using the following reference or by reading the QR code.

► http://go.skoda.eu/compatibility

All information given is incidental and is for information purposes.

The company, ŠKODA AUTO, cannot guarantee full functionality and compatibility, e.g. due to software update of infotainment and mobile devices.

Mobile device management

Overview

Mobile device management
› In the Telephone main menu, tap on the functional surface Bluetooth > paired devices.

In the list of paired mobile devices, the following symbols may appear for the individual devices.

- Grey icon - the device can be connected as a telephone.
- Green icon - the device is connected as a telephone.
- Grey icon - the device can be connected as a Bluetooth® player.
- White icon - the device is connected as a Bluetooth® player.

Possible functions of the connected mobile device
The functions of a device connected via over the HFP Bluetooth profile depends on the following connection types.

<table>
<thead>
<tr>
<th>First device</th>
<th>Second device</th>
</tr>
</thead>
<tbody>
<tr>
<td>Main phone</td>
<td>Additional phone</td>

<td></td>
</tr>
<tr>
<td>Bluetooth® player</td>
<td></td>
</tr>
</tbody>
</table>

With Infotainment only a mobile device can be connected as a Bluetooth® player.

Limitations of mobile devices and applications

Availability of features
The availability of certain features depends on the type of mobile device, as well as that of the applications installed.

Connection restrictions
▶ With Infotainment, a max. of 20 mobile devices are paired.
▶ The range of the connection of the mobile device to Infotainment is limited to the passenger compartment.
▶ After reaching the maximum number, the pairing of the next mobile device will replace that of the device that has not been used for the longest period of time.

Compatibility of mobile devices
It is possible to check the ŠKODA web pages to see if Infotainment is compatible with the selected mobile device being tested. This check is carried out by using the following reference or by reading the QR code.
▶ http://go.skoda.eu/compatibility

All information given is incidental and is for information purposes.

The company, ŠKODA AUTO, cannot guarantee full functionality and compatibility, e.g. due to software update of infotainment and mobile devices.

Bluetooth® compatibility of mobile devices
Due to the large number of mobile devices, it is not possible to guarantee total Bluetooth® compatibility with Infotainment. Bluetooth® compatibility depends on the Bluetooth® version as well as the implementation of Bluetooth® protocols by the manufacturer of the mobile device.

Applications in mobile devices
Mobile devices can be used to install applications that allow you to view additional information on the Infotainment screen, or to operate the Infotainment system.

Due to the variety of applications, as well as their ongoing development, the available applications may not function on all mobile devices. ŠKODA AUTO assumes no liability for their proper functioning.
The scope of available applications and their functionality is dependent on the type of Infotainment, as well as the vehicle and country.

Information about ŠKODA applications
Detailed information about ŠKODA applications can be found on the website after reading the following QR code or link.
▶ http://go.skoda.eu/mobile-apps

Connection set-up

Connect a mobile device to Infotainment
› Turn on the ignition.
› Turn on the Bluetooth® on the mobile device.
› Turn on the Bluetooth® on Infotainment MENU > Bluetooth > Bluetooth.
› Turn on the Bluetooth® visibility of the Infotainment MENU > Bluetooth > Visibility > Visible.
› Find available Bluetooth® devices in the mobile device.
› Select the Infotainment Bluetooth® unit.
   The name of the unit can be found by tapping MENU > Bluetooth > Name.
› Confirm the PIN; enter it if necessary and then confirm.

The mobile device is connected to the Infotainment or just paired, depending on the number of devices that are already connected.

Connect Infotainment to a non-paired mobile device
› Turn on the ignition.
› Turn on the Bluetooth® on the mobile device.
› Turn on the Bluetooth® on Infotainment MENU > Bluetooth > Bluetooth.
› Tap on MENU > Bluetooth > Search for devices.
› Ensure the visibility of the device to be connected.
› Select the desired device from the list of Bluetooth® devices.
› Confirm the PIN; enter it if necessary and then confirm.
› If two devices are connected to the Infotainment, select the device to be replaced.

Connect Infotainment to a mobile device that is already paired
The connection with an already paired mobile device is made automatically after switching on the ignition; if necessary the device can be connected manually as follows.
› Turn on the Bluetooth® on the mobile device.
› Turn on the Bluetooth® on Infotainment MENU > Bluetooth > Bluetooth.
› Tap MENU > Bluetooth > Paired devices.
› In the device list, select the desired device and the Bluetooth® profile.
› Confirm the PIN; enter it if necessary and then confirm.
› If two devices are connected to the Infotainment, select the device to be replaced.

Disconnect from a mobile device
› Tap MENU > Bluetooth > Paired devices.
› Tap on the Bluetooth® profile icon of the desired mobile device.

Delete a paired mobile device
› Tap MENU > Bluetooth > Paired devices.
› To delete a mobile device, tap it and confirm the deletion.
› To delete all mobile devices, tap on Delete all and confirm the deletion.

Telephone

Telephone main menu

Display main menu
› Tap on PHONE.
Or:
› Tap on MENU > 📞.

A Name of the connected telephone
› Tap: Show list of previously connected phones
B Preset buttons for preferred contacts
C Choice of storage group for the preferred contacts
D Name of telephone service providers
   › If the symbol 📢 is displayed in front of the name, roaming is active.
E Symbol for the connection type
F Status symbol of the phone
I Change the main phone to the extension telephone
   ✓ Enter the telephone number
Contact list
Text messages
Call lists
Settings

Conditions for connecting a telephone with Infotainment
✓ The ignition is switched on.
✓ The Bluetooth® function of the Infotainment and the telephone needs to be switched on.
   The Bluetooth® function of the Infotainment is switched on in the menu item MENU > Bluetooth > Bluetooth.
✓ Visibility of the Infotainment is switched on.
   The visibility of the Infotainment is switched on in the menu item MENU > Bluetooth > Visibility > Visible.
✓ The telephone is within signal range of the Infotainment's Bluetooth® unit.
✓ The telephone is compatible with Infotainment.
✓ Through Infotainment, no mobile device can be connected using Apple CarPlay.

Telephone operation

Enter telephone number
› In the Telephone main menu, tap 📞.
› Enter the telephone number using the numeric keypad that is displayed.
   The displayed numeric keypad can also be used for searching for contacts.
   If, for example, the digits 32 are entered, contacts with the letter sequence DA, FA, EB etc. are displayed next to the numeric keypad.

List of telephone contacts
The list of telephone contacts is imported from the connected main telephone.
› To display the contact list in the telephone main menu, tap 📞.
› To find details within the list, tap Find.
› Enter the details you wish to find.
› To establish a connection with a contact, tap the functional area showing the desired contact.
   If a contact has multiple telephone numbers, select the telephone number from the displayed list.
› To display the details for a contact, tap ⬤.

Establish a connection to the voice mailbox number
› In the Telephone main menu, tap ☎️ > 🔖.

Telephone conversation
Depending on the context of the telephone conversation, the following functions can be selected.
← End connection / reject incoming call / end call
✓ Answer an incoming call / return to the held call
✓ Switch the ringer off / on
✓ Hold a call
✓ Switch the microphone off / on
✓ Show details of the caller
✓ Set up a conference call

To switch the call tone from the speakers to the telephone, go to the telephone main menu and tap on ☎️ > hands-free.
To switch the call tone from the telephone to the speakers, tap 🗦.

Conference call
A conference call is a joint telephone conversation with a minimum of three and a maximum of six participants.
› Make the next call during an ongoing conversation / conference.

Or:
› Accept a new incoming call by tapping the functional area 🔄.
› To start a conference call, tap on the functional area 🔄.
   During an ongoing conference call, the following functions can be selected depending on the context.
   Hold the conference call and leave temporarily (the conference will continue in the background)
   Return to the conference being held
   Switch the microphone off / on
   End the conference
   Show details of the conference call

In the details of the conference call, depending on the connected telephone, the following functions can be selected.
✓ Show details of the conference call participants
✓ End conversation with the conference call participant
✓ Conversation with a participant outside of the conference call

Send a text message
› In the Telephone main menu, tap ☎️ > 📭 New text message.
› Write a text message and confirm; a view of the message is displayed.
   The message can be edited when the text area within the view is tapped.
› Consult or select the recipient of the message, if necessary tap ☎️ to enter the phone number.
› Add more recipients or confirm selected recipients.
Display received text messages
› In the Telephone main menu, tap E-mails.
› To display the Message, select the desired message.

The message content and the following menu with functions is displayed.
- Read the text message using the generated Infotainment voice.
- Display the menu with the following functions of an accepted message.
  - Option to answer the message by means of a template.
  - Delete message.
  - Recognise phone numbers in the message.
  - Forward message, with the option to edit the message before sending.
  - Reply to the sender by sending a message.

Settings for Infotainment telephone functions

Manage preset buttons for preferred contacts
› To save the desired preset button, press and hold.
› Select a contact from the displayed list.
› If the contact contains multiple telephone numbers, choose the desired telephone number.
› To delete tap on Telephone User profile Manage favourites in the main menu.
› To delete one preset, tap on the list entry and confirm the deletion.
Or:
› To delete all presets, tap on Delete all and confirm the deletion.

Import telephone contacts
After first connecting the main telephone with Infotainment, telephone contacts will start to be imported into the Infotainment memory.

Infotainment can import up to 2000 telephone contacts together with contact pictures. Each contact can include max. 5 telephone numbers.

Depending on the type of telephone, import confirmation may be required.

Update telephone contacts
When re-connecting the telephone with Infotainment, an automatic update of the list is carried out.
› For a manual update of the list in the telephone main menu, tap User profile Import contacts.

Show pictures on phone contacts
› In the Telephone main menu, tap User profile Show pictures for contacts.

Sort contacts in the phone book
› In the Telephone main menu, tap User profile Sort by.
› Select the type by which to sort.

Ringer
Some phones do not allow the use of the telephone ringtone; instead, the Infotainment ringtone is used.
› To set the Infotainment ringer in the Telephone main menu, tap User profile Select ringtone.
› Select the ringtone.

Number for the voice mailbox
› To enter the number of the voice mailbox.

Conference calls
› To enable/disable the option for conference call setup in the phone main menu, tap conference.

SmartLink

Functionality
SmartLink offers the ability to display and operate certified applications from a connected mobile device in the Infotainment screen.

Certification may be conditional upon the use of the latest update to the particular SmartLink application.

Applications include, for example, apps for route guidance, telephoning, listening to music, etc.

Mobile devices can be connected via a USB cable.

Supported connection types
SmartLink supports the following connection types.
› Android Auto.
› Apple CarPlay.
› MirrorLink.

Overview of the SmartLink connection

Main menu SmartLink
› Tap on APP.
Or:
› Tap on MENU.

Connection conditions

General connection conditions
- The mobile device supports the following SmartLink connection types: Android Auto, Apple CarPlay, and MirrorLink.
- Mobile devices, as well as the type of SmartLink connection, are supported in the respective market.
- Some connected mobile devices require the mobile device to be “unlocked”.

Conditions for Android Auto
- The device to be connected must have Android Auto Support.
- A list of devices, supported regions, and applications that the Android Auto connection supports can be found on the websites of Google Inc..
- The Android Auto application needs to be installed on the mobile device.
- Some applications require the data connection in the mobile device to be turned on.

Conditions for Apple CarPlay
- The device to be connected must have Apple CarPlay Support.
- A list of devices, supported regions, and applications that the Apple CarPlay connection supports can be found on the websites of Apple Inc..
- Siri voice control is on.
- The data connection is switched on in the mobile device.

Conditions for MirrorLink
- The device to be connected must have MirrorLink Support.
A list of devices and applications that the MirrorLink connection supports can be found on the websites of Car Connectivity Consorciu®.

✓ The MirrorLink application needs to be installed on the mobile device.
✓ Some applications require the data connection in the connected mobile device to be turned on.

Operation

Operation of the running MirrorLink application
▷ To display the following operation surfaces, press the right rotary control ◤.
- Display of control surfaces at the bottom
- Display of control surfaces at the top
- Return to the MirrorLink main menu

Restriction

Restriction of SmartLink applications while driving
For safety reasons, operation of some SmartLink applications while driving is not possible or is restricted.

Functionality restriction of Infotainment with an Android Auto connection
▷ For the duration of the connection, the external device cannot be used as an audio source in the Media menu.
▷ By connecting the device, all currently connected Bluetooth® devices will be disconnected and the device will automatically be connected as the main telephone.
▷ For the duration of the connection, no other Bluetooth® devices can be connected to the Infotainment system.

Functionality restriction of Infotainment with an Apple CarPlay connection
▷ For the duration of the connection, the external device cannot be used as an audio source in the Media menu.
▷ Connecting the device disconnects all currently connected Bluetooth® devices.
▷ For the duration of the connection, no Bluetooth® devices can be connected to the Infotainment system.

Functionality restriction of Infotainment with a MirrorLink connection
▷ For the duration of the connection, the external device cannot be used as an audio source in the Media menu.
▷ If you wish to use the device to be connected in the Telephone menu, the device must be paired with and connected to the Infotainment system by Bluetooth® before establishing the MirrorLink connection.

Settings

Apple CarPlay - Connection via USB
▷ Turn on the Infotainment.
▷ Turn on the mobile device.
▷ Connect the mobile device to the front USB input using a cable.
▷ Choose to connect via Apple CarPlay.

Apple CarPlay – Disconnection
▷ In the Apple CarPlay main menu, tap on the “ŠKODA” functional area.
▷ Tap on ◤.

Android Auto - Connection via USB
▷ Turn on the Infotainment.
▷ Turn on the mobile device.
▷ Connect the mobile device to the front USB input using a cable.
▷ Choose to connect via Android Auto.

Android Auto - Disconnection
▷ In the main menu of Android Auto ◤ tap on “Return to ŠKODA”.
▷ Tap on ◤.

MirrorLink - Connection via USB
▷ Turn on the Infotainment.
▷ Turn on the mobile device.
▷ Connect the mobile device to the front USB input using a cable.
▷ Choose to connect through MirrorLink.

MirrorLink - Disconnection
▷ In the MirrorLink main menu, tap ◤.
▷ Tap on ◤.

Change to another device / connection type
Infotainment allows you to switch between currently connected devices and the connection type.
▷ Tap on MENU ◤.”
▷ Select the desired device or connection type.

ŠKODA Connect online services

Functionality
ŠKODA Connect online service offer the option of connecting the vehicle to the online world. They thus represent an extension of the vehicle and Infotainment functions.

For the functionality of the ŠKODA Connect Online Services, the vehicle must be within range of a mobile network through which the services are provi-
ded. The availability, the connection speed and the technology used in the mobile network can be different in the respective countries and are dependent on the mobile network operator.

The ŠKODA Connect online services are not included in the equipment of the vehicle. They can be ordered separately on the ŠKODA Connect Portal website or in the ŠKODA Connect application.

The offer of ŠKODA Connect online services depends on the type of vehicle and its trim level, Infotainment and country. Availability in each country can be checked on the ŠKODA Connect website.

The rights and obligations of the Parties with respect to the provision of these services are governed by a separate agreement. Current legal documents regarding the online services can be found on the ŠKODA Connect Portal as well as the ŠKODA Connect application.

ŠKODA Connect website
▶ http://go.skoda.eu/skoda-connect

For example, the ŠKODA Connect website contains the latest information about the online services, a link to the ŠKODA Connect Portal as well as the option of downloading the ŠKODA Connect application.

ŠKODA Connect Portal website
▶ http://go.skoda.eu/connect-portal

The ŠKODA Connect Portal website is used, for example, for registration, activation and ordering of online services. It also provides the option of remote access to the vehicle.

Information call
The information call may be used in the case of problems with the online services or for information regarding the products and services of the ŠKODA brand.

✓ The functional condition represents the active online ŠKODA Connect services.

Breakdown call
The breakdown call can be used in the event of a breakdown.

 ✓ The functional condition represents the active online ŠKODA Connect services.

Press the button.

ŠKODA Connect Application
The ŠKODA Connect application enables remote access to the vehicle using a mobile device. It can also be used for user registration and to activate and configure the online services.

The application can be downloaded to the mobile device after scanning the following QR code or link.

▶ http://go.skoda.eu/skodacorrectapp

Settings

Registration and activation of online services
User registration, as well as the activation of the ŠKODA Connect online services, is completed on the ŠKODA Connect Portal website or in the ŠKODA Connect application.

In order to complete user registration, you will need to access your e-mails.

In order to activate ŠKODA Connect, proceed as follows.

› Switch on the ignition and the Infotainment.

› Tap MENU → ŠKODA Connect (online services) → Registration.

› Enter and confirm the registration PIN you have received during user and vehicle registration on the ŠKODA Connect Portal website or in the ŠKODA Connect application.

› Wait for the registration completion message to appear.

› Confirm any messages on the screen.

Delete user

› Switch on the ignition and the Infotainment.

› Tap MENU → ŠKODA Connect (online services) → Registration.

› Tap Delete user → Delete.

› Confirm the deletion.

By deleting the registered vehicle in the user account on the website ŠKODA Connect Portal the user is also deleted in Infotainment.
Changing the user
› Switch on the ignition and the Infotainment.
› Tap MENU > ŠKODA Connect (online services) > Registration.
› Tap New owner > Change ownership.
› Enter and confirm the registration PIN code received during registration of the new user and during vehicle registration on the ŠKODA Connect Portal website.
› If necessary, confirm the change by tapping the function surface Change main users.

Management of online services
In the service management, it is possible to display information about the online services, the validity of their licence, or to switch the services on/off.
› Tap MENU > ŠKODA Connect (online services) > Privacy settings and manage services.
› To display the designations and the status of the services, select the desired service.
› For detailed information about the service tap >.
› To switch the services on/off, tap the Checkbox.

Connection status of the online services
The connection status of the online services of ŠKODA Connect online services is indicated by an icon in the status bar on the Infotainment screen.

Localisation services include, for example, information on the last parking position, area notification or speed notification.

When localisation services are active, the symbol will be displayed in the status line in the Infotainment screen.

Switching Private mode function on/off
By switching the Private mode function on, the services relating to sending vehicle information and personal data, which are essential for the provision of online services, are deactivated.
› Tap MENU > ŠKODA Connect (online services) > Services Management > Private mode.

The emergency call remains fully functional after turning on the private mode feature.
The functions of the information and breakdown call are limited.

Switch Care Connect function on/off
By switching the Care Connect services off, the services relating to sending vehicle information and personal data, which are essential for the provision of Care Connect online services, are deactivated.
› Tap MENU > ŠKODA Connect (online services) > Services Management > Care Connect.

NOTICE
The emergency call remains fully functional after turning off the Care Connect feature.
The functions of the information and breakdown call are limited.

Switch online services on/off
It is possible to have the online services switched off/on exclusively by a ŠKODA service partner.

After turning off the online services, none of the ŠKODA Connect online services, including the emergency calls are functioning.

To inform the vehicle user that the ŠKODA Connect online services are out of order, the service partner applies the sticker at a visible point in the vehicle (e.g. on the roof cladding).

This sticker must not be removed as long as the online services are off.

NOTICE
It should be noted that the emergency, information and breakdown calls are not available after switching off the online services.
For this reason, no automatic emergency call is made in the event of a serious car accident.

MENU Overview of Infotainment menus

System

Infotainment Menus

MENU menu
The MENU menu contains all available Infotainment menus.
› To Display the menu tap MENU.

The graphic display type for the MENU menu can be set.

Grid display

List

Restriction

For safety reasons, operation of some Infotainment functions while driving is not possible or is restricted. The Infotainment system indicates this by means of a message in the screen.

Basic settings

Setting basic functions
The following Infotainment functions are set in the MENU menu.
▶ Time and date.
▶ Language.
▶ Units.
▶ Restore factory settings.

Sound settings
The Infotainment sound is set in the menu.

▶ Setting the equalizer.
▶ Adjusting the volume ratio.
▶ Volume adjustment of individual Infotainment functions.

Some are adjustable, for example the following menu items.
▶ Volume adjustment of voice commands.
▶ Setting the maximum volume when Infotainment is turned on.
▶ Speed-dependent volume setting.
▶ Setting the Infotainment to mute with the parking aid switched on.
Depending on the equipment, the following advanced sound settings can be set.

- Setting space optimisation.
- Setting the audio profiles according to genre.
- Adjusting the subwoofer volume.

**Configuration wizard**

The configuration wizard helps to set certain Infotainment functions.

The configuration wizard is automatically displayed if, after switching on the Infotainment system, there are at least two menu items that have not been set or if a new user account has been selected.

- To switch off the automatic display, tap on Don’t show again when the configuration wizard is displayed.
- For manual display, tap on **MENU > »** Configuration wizard.

**Setting the MENU**

The graphic display type for the MENU menu can be set as follows.

- **MENU > »** Screen > Menu:
  - Select one of the following menu items.
  - Grid display - Grid display.
  - Horiz. Display - horizontal display.

**Safely disconnect the connected USB device**

- **NOTICE**
  - Risk of damage to the data on the connected device!
  - To safely disconnect/remove the device, proceed as follows.
  - Tap **MENU > »** Remove safely:
  - Select the desired device.
  - Disconnect/remove the device.

**Electronic voice amplification for driver and passenger**

The voice enhancer allows transmission of the driver’s and passenger’s voice on the speakers in the rear.

- For **volume adjustment of voice amplification**
  - **MENU > »** volume, tap > Electronic voice enhancement.

**Troubleshooting**

**Infotainment not responding**

The Infotainment system must be restarted.

- Press ⊗ for more than 10 s.
- Wait for the restart to complete.

**System update**

We recommend having the system update carried out by a specialist company.

The system update ensures optimal function of the Infotainment system, e.g. compatibility with new phones.

**Determine system version**

- Tap **MENU > »** System information.

**Manual update**

For information on available updates, please refer to the ŠKODA internet pages.

- **http://go.skoda.eu/updateportal**
  - Visit available updates.
  - Save the update to a USB source.
  - Insert the USB source into the front USB input.
  - Tap **MENU > »** System information > Update software.
  - Select the connected USB device as the update source.
  - Go to the update file and confirm the update.
  - Confirm any messages and wait for the update process to be completed.

**Screen**

**Overview**

- **A** Status bar
- **B** Bar with the functional surfaces of the displayed menu
- **C** Other pages of the menu

**Operation**

- **NOTICE**
  - Danger of screen damage!
  - The Infotainment screen is operated by touching it lightly with your finger.

In principle, operation by touch is identical to the operation of a mobile phone.

The following operating modes are specific to the Infotainment system.
Dragging up or down with two fingers
▶ Quickly review the list of phone contacts.

Pulling apart with two fingers
▶ Enlarge image.
▶ Zoom in to the map.

Pulling together with two fingers
▶ Minimize image.
▶ Zoom out of the map.

Turn two fingers
▶ Rotate image.

Finger movement
▶ Move the map.

Infotainment keyboard

Keypad overview
The arrangement of the keypad characters depends on the Infotainment language that has been set.
In Infotainment, the following types are used, depending on the context.
▶ Alphanumeric.
▶ Numeric.
▶ Keypad for input.
▶ Keypad for search.

Keypad example
A
Input line
▶ Delete characters before the cursor
▶ Tap: delete the last character
▶ Hold: delete all characters in sequence
▶ Show list of searched entries
B
Keypad functional surfaces
▶ Change to lowercase
▶ Switch to the first capital letter, followed by lowercase letters
▶ ABC/AB Switch to the language keypad
▶ 123 Switch to the numeric and character keypad
▶ Show additional keypad languages
▶ Insert a space
▶ Hold: Show additional character variants
▶ Move cursor to the left
▶ Move cursor to the right
▶ Confirm the characters that have been entered

Settings
The following basic screen functions are set in the
MENU > > Screen menu.
▶ Brightness level of the screen.
▶ Switch off the screen.
▶ Display the time.
▶ Confirmation sounds and animations.
Numeric keypad

Keypad example

A  Input line
   ▶ Delete characters before the cursor
   ▶ Tap: delete the last character
   ▶ Hold: delete all characters

B  Keypad functional surfaces
   ▶ OK Confirm the characters that have been entered
   ▶ If context-sensitive, alphanumeric characters can be entered by holding a functional surface with a digit.

Voice control

Functionality

Voice control principle
Voice control works according to the principle of dialogue between the user and the Infotainment system.

The user says a voice command. The Infotainment system responds or executes the voice command.

Operating conditions

✓ Ignition is switched on.
✓ Infotainment is switched on.
✓ No telephone conversation can be held via Infotainment.

Operation

Voice control process

To turn on voice control, press the button \( \bullet \) on the multifunction steering wheel.

Or:

▶ Tap on VOICE.

After switching on, the \( \bullet \) icon is displayed.

▶ Say a voice command.

During recognition of the voice command, the \( \bullet \) icon is displayed.

The Infotainment system then executes the voice command or plays the message. During the message, the \( \bullet \) icon is displayed.

After the execution of the voice command, voice control is switched off.

Correcting a voice command

▶ During voice command input, press the \( \bullet \) button on the multifunction steering wheel and say a new voice command.

Stopping voice control

Stopping leaves more time for voice command input, e.g. for searching for a phone contact.

▶ Move your finger up or down over the Infotainment screen.

Or:

▶ Say the “pause” voice command.

Resuming stopped voice control

▶ Press the \( \bullet \) button on the multifunction steering wheel.

Or:

▶ Tap on \( \bullet \) in the Infotainment screen.
Stopping the played back message
› Press the \( \text{C} \) button on the multifunction steering wheel.

Ending voice control
› Press the \( \text{C} \) button on the multifunction steering wheel twice.
Or:
› Say the voice command “cancel” during voice command input.

Restriction
For some Infotainment languages, no voice control is available. The Infotainment system will indicate this.
The messages are generated by the Infotainment system. Flawless clarity (e.g. road or city name) cannot always be guaranteed.
You cannot use voice control while a phone call is in progress.

Settings
The following voice control functions are set in the menu MENU → \( \text{C} \) → Voice control.
▶ Confirmation tones.
▶ Display of sample commands.

Self-help
Starting acoustic help
› If the Infotainment system is expecting a voice command, say “Help”.
The “Help” voice command can be issued repeatedly for further tips on voice control.

Activate/deactivate the display of example voice commands in the Infotainment screen.
The system offers the option of displaying example voice commands after switching on the voice control in the Infotainment screen.
› To turn on/off MENU → \( \text{C} \) → voice control → tap on Example commands (Infotainment system).

Activate/deactivate display of example voice commands in the instrument cluster display
The system offers the option of displaying example voice commands after switching on the voice control in the Instrument cluster screen.
› To turn on/off MENU → \( \text{C} \) → voice control → tap on Example commands (Instrument cluster).

Radio
Overview
Display main menu
› Tap on RADIO.
Or:
› Tap on MENU → \( \text{C} \).

Analogue and digital radio reception

![Radio Overview](image)

A Select frequency range
B Depending on the frequency range
   FM: Radio text
   DAB: Name of the station group
C Preset buttons for preferred stations
   ➕ List of available stations
   ➖ Manual station search
   ➞ Display information about the station (applies to DAB)

Settings

Infotainment supports digital radio reception in DAB and DAB+ formats.

List of available stations
› To display, tap ➕.

⊙ Played station
★ Station stored on the presets
TP A traffic radio station is set
✓ DAB signal is not available
☞ The DAB station reception is not stable
♦ To filter the FM stations into alphabetical order, tap according to group or genre.
   The prerequisite for the filtering option is ensuring RDS and AF functions are activated.
⊙ Manual update of the station list

In the FM station list, information about the programme type and the type of the regional station can be displayed.
Operation

Select station

Tap ‹ or › at the top of the screen.

SCAN function
The function plays receivable stations of the selected frequency range in succession for a few seconds each.

› To start automatic play press ‹ › Scan or the right rotary control (.)
› To end automatic play press ‹ › or the right rotary control (.)

Find stations manually
› In the Radio main menu, tap .
› To search in sequence, tap ‹ or › next to the displayed frequency range scale.
Or:
› Hold down the scroll mark on the frequency range scale and move it to the desired value.
Or:
› Turn the right rotary control (.)

Restriction

› Infotainment supports digital radio reception in DAB and DAB+ formats.
› Car parks, tunnels, tall buildings or mountains can restrict radio reception.
› In the rear side windows, there are antennas for receiving the radio signal.

Covering the panes with foils or metal-coated labels may affect the reception of the radio signal.
› The ŠKODA AUTO company assumes no responsibility for the availability, correct functioning and broadcast information of the RDS service.

Settings

Save the station currently being listened to as a favourite from the Radio main menu
› Hold the desired station key for preferred stations until the station is stored.

Save station to favourites from the list of available stations
Applies to AM, FM and DAB frequency ranges.
› Hold the line with the name of the desired station.
› Tap the desired preset button.

Delete favourites
› In the Radio main menu , tap ‹ › Delete presets.
› To delete one preset button for preferred stations, tap the desired station button and confirm the deletion.
› To delete all preset buttons for preferred stations, tap All and confirm the deletion.

Buttons ‹ ›
Applies to AM, FM and DAB frequency ranges.

The variant for changing stations using buttons ‹ › in the Radio main menu is set as follows.
› In the Radio main menu, tap ‹ › Arrow buttons. Choose the change variant.

Traffic reception (TP) for FM stations on/off
Applies to the FM frequency range.
› In the Radio main menu, tap ‹ › Traffic program (TP).

Switch traffic reception for DAB stations on/off
Applies to the DAB frequency range.
› In the Radio main menu, turn on menu item ‹ › Traffic Radio (TP).
› In the Radio main menu, tap ‹ › Advanced settings › DAB traffic programme announcements (TP) on/off.

Assign station logo from an external source
Applies to AM, FM and DAB frequency ranges.

Infotainment offers the option to assign logos from the pictures on an external source to the station buttons.

For station logos, images in jpg, gif, png, bmp format with a maximum resolution of 500x500 pixels can be used.
› In the Radio main menu, tap ‹ › Station logos.
› Tap the desired preset button.
› Select the external source with the logo.
› Find the desired logo and confirm.

The information for updating station logos is taken from the ŠKODA web pages.

http://go.skoda.eu/updateportal

Delete station logos
Applies to AM, FM and DAB frequency ranges.
› In the Radio main menu, tap ‹ › Station logos.
To delete a logo, tap the desired preset button and confirm the deletion.

To delete all logos, tap on All and confirm the deletion.

Activating / deactivating automatic station logo assignment
Applies to the FM and DAB frequency ranges.

When the function is switched on, a station logo from the Infotainment memory is assigned when the station is stored on a preset.

In the Radio main menu, tap on Advanced settings > Autostore station logos.

Regional FM station logo
Applies to the FM frequency range.

Infotainment provides the option of using country-specific FM station logos.

In the Radio main menu, tap on Advanced settings > Region for station logo.

Choose the country.

Turn on/off radio text reception
Applies to the FM and DAB frequency ranges.

When the function is switched on and station presets are displayed, detailed information about the broadcast content of the FM station being listened to, or the name of the station group for the DAB station, is displayed.

In the Radio main menu, tap on Advanced settings > Radio text.

Switch automatic frequency control (AF) on/off
Applies to the FM frequency range.

When the function is switched on and the signal of the FM station currently being listened to is weak, Infotainment automatically sets the same station to a different frequency with a better signal.

In the Radio main menu, tap on Advanced settings > Automatic frequency control (AF).

Automatic change of frequency to a regionally linked FM station
Applies to the FM frequency range.

Infotainment provides the option of automatically switching to a regionally linked FM station in case of signal loss of the FM station being listened to.

In the Radio main menu, tap on Advanced settings > RDS Regional.

Select one of the following menu items.

Fixed - If there is a loss of signal, another station must be set manually.

Automatic - automatic selection of the station with the best signal reception.

If reception is lost in the given region, Infotainment will automatically set another available region.

Switch RDS on/off
Applies to the FM frequency range.

The menu item is only available for some countries.

In the Radio main menu, tap Advanced settings > Radio Data System (RDS).

If the RDS function is disabled, the following menu items in FM station settings are not available.

Traffic programme (TP).

Radio text.

RDS Regional.

Automatic frequency change (AF).

Regional station logo.

Switch additional DAB announcements on/off
Applies to the DAB frequency range.

When the function is switched on, other announcements are received as traffic announcements. For example, weather news, sports reports, financial news, etc.

In the Radio main menu, tap on Advanced settings > Other DAB announcements.

Enable/disable automatic programme tracking of a DAB station
Applies to the DAB frequency range.

When the function is switched on and the DAB station is lost, Infotainment automatically changes to the same station with a better signal in a different DAB station group.

In the Radio main menu, tap on Advanced settings > DAB - DAB station tracking.

Turn on/off automatic switching from a DAB station to the same FM station
Applies to the DAB frequency range.

When the function is switched on and the DAB station being listened to is lost, Infotainment automatically changes to the same FM station. The symbol (FM) is displayed after the station name.

When the corresponding DAB station can be received again, the station automatically changes from FM to DAB.

In the Radio main menu, tap on Advanced settings > Automatic DAB - FM switching.

Activating/deactivating reception of DAB transmitter in the L band
In some countries, the DAB radio reception is only available as a so-called LBand.

In the Radio main menu, tap Advanced settings > L-Band.

If there is no DAB radio reception available in the L-band in your country, we recommend turning the L-band reception off. The DAB channel scan is therefore faster.
Media

What you should be mindful of

▶ Do not save any important data or that which has not been backed up on the connected audio sources. ŠKODA assumes no responsibility for lost or damaged files or connected audio sources.
▶ When changing or connecting an audio source, this may cause sudden changes in volume. Reduce the volume before changing or connecting an audio source.
▶ When connecting an audio source, the source information messages can be displayed. These messages must be observed and, if necessary, confirmed.
▶ The national copyright laws that apply in your country must be observed.

Overview

Display main menu

› Tap on MEDIA.
Or:
› Tap on MENU > 🎧.

Select source
Manage files / multimedia database
Settings

Operation

Operation - Basics

Tap: start playback
ournals: pause
_within 3 seconds of starting playback, tap: play the previous song
After 3 seconds from the start of playback, tap to play the current title from the beginning
Hold: fast rewind within the title
Tap: play the next song
Hold: fast forward within the title
Movement within the title is also possible by dragging the finger over the timeline.

Extended operation

- Turn repeat playback of the current track on/off
- Turn repeat playback of the current album/folder on/off
- Turn random playback of the current album/folder on/off

Restriction

NOTICE
The availability of some media operation functions is dependent on the connected source and the software being used, e.g. Bluetooth®.

Settings

Turn title playback including subfolders on/off

› In the Media main menu, tap on 🎧 > Mix/Repeat including subfolders.

Traffic

› To turn on/off the traffic monitoring during the playback of media files, go to the Media main menu and tap on 🎧 > Traffic programme (TP).

Safely disconnect the connected device

NOTICE
Risk of damage to the data on the connected device!
To safely disconnect/remove the device, proceed as follows.
› In the Media main menu, tap 🎧 > Safely remove.
› Select the desired device.
› Disconnect/remove the device.

Bluetooth® player

Infotainment allows audio files of a connected Bluetooth® player to play using the A2DP and AVRCP audio profile.

With Infotainment, multiple devices can be paired using Bluetooth®, but only one of them can be used as a Bluetooth® player.

› For connecting the Bluetooth® player, pair and connect the device via Bluetooth®.
In the **Media** main menu, tap on Bluetooth paired devices.

In the list, choose the device with the symbol 📱.

If a device is connected to Infotainment using Apple CarPlay or Android Auto, then it cannot be connected using Bluetooth.

**SD card**

1. **NOTICE**
   Risk of damaging the SD card reader!
   - Do not use SD cards with a broken slide for write protection.

2. To **insert** the SD card, with the bevelled corner to the right, push into the slot in the external module until it snaps into place.

3. To **remove**, first disconnect the SD card safely. To do this, in the **Media** main menu, tap Remove safely: and select the SD card.

4. Press on the inserted SD memory card.
   - The SD card moves to the eject position.

1. **NOTICE**
   When using an SD card with an adapter, vehicle vibrations might cause the card to fall out of the adapter.

**USB device**

To **connect**, insert the USB device into the appropriate port.

To play audio files, use USB ports that support data transfer.

To **disconnect** disconnect the USB device first. To do this in the **Media** main menu, tap Remove safely: and select the USB device.

**Load USB audio source**

After connecting the USB device, charging will start automatically when the following conditions are met.

- The ignition is switched on.
- The USB device allows charging.

The charging efficiency can be different compared to the charging from the usual mains power supply.

Depending on the type of the connected USB device and the frequency of use, the charging current may not be sufficient to charge the battery of the connected device.

Some connected audio sources may not be recognised and cannot be charged.

Media Command

### Functionality

The Media Command function allows playback of audio files or videos in up to two tablets that are connected to Infotainment via Wi-Fi, to control Infotainment.

### Overview

Display main menu

› Tap on MENU > 📀.

### Operating conditions

✓ Data transfer of Infotainment is switched on.

Switching the transmission on/off takes place in the menu item.

✓ Infotainment operation via the application is enabled.

The adjustment of the operation takes place in the menu item.

One of the following menu items can be selected.

▶ Deactivate - the operation is deactivated.

▶ Confirm - Operation requires confirmation at the start of the application.

▶ Allow - the operation requires no confirmation.

✓ In the tablet(s), the ŠKODA Media Command application is installed.

✓ The tablet(s) are connected to the Infotainment hotspot.

### Operation

Start playback

› For selection of the playback source in the main menu, tap 📀 and select the source tablet.

› For playback select the category and then the title.
If two tablets are connected, the title playback starts in the two tablets at the same time.

**Playback control**

- Tap: Start playback
-Tap: Pause
-Within 3 seconds of starting playback, tap:
  - play the previous song
-After 3 seconds, tap from the start of playback:
  - to play the current title from the beginning
- Tap: play the next song
- Increase the audio volume of the tablet
- Decrease the audio volume of the tablet
- View control options for two tablets
- View control options for a tablet
- Mute the tablet
- Unmute the tablet

Movement within the title is also possible by dragging a finger over the timeline.

**Function restriction**

Some tablet types allow playback of audio files or videos by an inserted SD card in the tablet. Playback of these tracks may be limited.

If several devices are connected to the Infotainment system by means of Wi-Fi, there is the danger of Wi-Fi overloading and thus also the inability of Media Command to function properly.

High-definition video playback may cause playback problems or problems connecting the tablets to the Infotainment system.

**Supported files**

**Settings**

**ŠKODA Media Command application**

The application can be downloaded to the mobile device after reading the following QR code or by referring to the ŠKODA mobile application website.

▶ [http://go.skoda.eu/service-app](http://go.skoda.eu/service-app)

**Connect tablet with Infotainment hotspot**

- Turn on the ignition.
- Turn on the Infotainment’s Wi-Fi hotspot in the menu item **MENU > Wi-Fi > Mobile Hotspot > Mobile Hotspot.**
- Turn on Wi-Fi on the tablet.
- In the list of available Wi-Fi devices, look for Infotainment Wi-Fi.

The name of the Infotainment hotspot refers to the menu item **MENU > Wi-Fi > Mobile Hotspot > Hotspot Settings (Wi-Fi) > SSID.**

- Select the Infotainment hotspot and enter the required password.

The password for connecting to the Infotainment hotspot is taken from the menu item **MENU > Wi-Fi > Mobile Hotspot > Hotspot Settings (Wi-Fi) > Network key.**

- Confirm the connection.
- In the tablet, start the application ŠKODA Media Command.
Mobile device management

Overview

Mobile device management

› In the Telephone main menu, tap on the functional surface Bluetooth paired devices.

In the list of paired mobile devices, the following symbols may appear for the individual devices.

› Grey icon - the device can be connected as a telephone.
› Green icon - the device is connected as a telephone.
› Grey icon - the device can be connected as a Bluetooth® player.
› White icon - the device is connected as a Bluetooth® player.

Possible functions of the connected mobile device

The functions of a device connected via the HFP Bluetooth profile depend on the following connection types.

<table>
<thead>
<tr>
<th>First device</th>
<th>Second device</th>
</tr>
</thead>
<tbody>
<tr>
<td>Main phone</td>
<td>Additional phone</td>
</tr>
<tr>
<td>incoming / outgoing calls</td>
<td>incoming calls</td>
</tr>
<tr>
<td>SMS</td>
<td>Bluetooth® player</td>
</tr>
<tr>
<td>Telephone contacts</td>
<td></td>
</tr>
<tr>
<td>Bluetooth® player</td>
<td></td>
</tr>
</tbody>
</table>

With Infotainment only a mobile device can be connected as a Bluetooth® player.

Limitations of mobile devices and applications

Availability of features
The availability of certain features depends on the type of mobile device, as well as that of the applications installed.

Connection restrictions
▶ With Infotainment, a max. of 20 mobile devices are paired.
▶ The range of the connection of the mobile device to Infotainment is limited to the passenger compartment.
▶ After reaching the maximum number, the pairing of the next mobile device will replace that of the device that has not been used for the longest period of time.

Compatibility of mobile devices
It is possible to check the ŠKODA web pages to see if Infotainment is compatible with the selected mobile device being tested. This check is carried out by using the following reference or by reading the QR code.

▶ http://go.skoda.eu/compatibility

All information given is incidental and is for information purposes.

The company, ŠKODA AUTO, cannot guarantee full functionality and compatibility, e.g. due to software update of infotainment and mobile devices.

Bluetooth® compatibility of mobile devices
Due to the large number of mobile devices, it is not possible to guarantee total Bluetooth® compatibility with Infotainment. Bluetooth® compatibility depends on the Bluetooth® version as well as the implementation of Bluetooth® protocols by the manufacturer of the mobile device.

Applications in mobile devices
Mobile devices can be used to install applications that allow you to view additional information on the Infotainment screen, or to operate the Infotainment system.

Due to the variety of applications, as well as their ongoing development, the available applications may not function on all mobile devices. ŠKODA AUTO assumes no liability for their proper functioning.
The scope of available applications and their functionality is dependent on the type of Infotainment, as well as the vehicle and country.

**Information about ŠKODA applications**

Detailed information about ŠKODA applications can be found on the website after reading the following QR code or link.

▶ [http://go.skoda.eu/mobile-apps](http://go.skoda.eu/mobile-apps)

**Connection set-up**

### Connect a mobile device to Infotainment

- Turn on the ignition.
- Turn on the Bluetooth® on the mobile device.
- Turn on the Bluetooth® on Infotainment
  - Turn on the Bluetooth® visibility of the Infotainment
  - Find available Bluetooth® devices in the mobile device.
  - Select the Infotainment Bluetooth® unit.
  - Confirm the PIN; enter it if necessary and then confirm.

The mobile device is connected to the Infotainment or just paired, depending on the number of devices that are already connected.

### Connect Infotainment to a non-paired mobile device

- Turn on the ignition.
- Turn on the Bluetooth® on the mobile device.
- Turn on the Bluetooth® on Infotainment
  - Tap on Bluetooth > Search for devices.
  - Ensure the visibility of the device to be connected.
  - Select the desired device from the list of Bluetooth® devices.
  - Confirm the PIN; enter it if necessary and then confirm.
  - If two devices are connected to the Infotainment, select the device to be replaced.

### Connect Infotainment to a mobile device that is already paired

The connection with an already paired mobile device is made automatically after switching on the ignition; if necessary the device can be connected manually as follows.

- Turn on the ignition.
- Turn on the Bluetooth® on the mobile device.
- Turn on the Bluetooth® on Infotainment
  - Tap MENU > Bluetooth > Bluetooth.
- Tap MENU > Bluetooth > Paired devices.
- In the device list, select the desired device and the Bluetooth® profile.
- Confirm the PIN; enter it if necessary and then confirm.
- If two devices are connected to the Infotainment, select the device to be replaced.

### Disconnect from a mobile device

- Tap MENU > Bluetooth > Paired devices.
- Tap on the Bluetooth® profile icon of the desired mobile device.

### Delete a paired mobile device

- Tap MENU > Bluetooth > Paired devices.
- To delete a mobile device, tap ✕ and confirm the deletion.
- To delete all mobile devices, tap on Delete all and confirm the deletion.

### Telephone

**Telephone main menu**

**Display main menu**

- Tap on PHONE.
- Or:
  - Tap on MENU > ．

![Telephone main menu diagram](image)

- **E** Symbol for the connection type
- **F** Status symbol of the phone
- **I** Change the main phone to the extension telephone
- **N** Enter the telephone number
Conditions for connecting a telephone with Infotainment

✓ The ignition is switched on.
✓ The Bluetooth® function of the Infotainment and the telephone needs to be switched on.
   The Bluetooth® function of the Infotainment is switched on in the menu item MENU > ☏ > Bluetooth → Bluetooth.
✓ Visibility of the Infotainment is switched on.
   The visibility of the Infotainment is switched on in the menu item MENU > ☏ > Bluetooth → Visibility: → Visible.
✓ The telephone is within signal range of the Infotainment's Bluetooth® unit.
✓ The telephone is compatible with Infotainment.
✓ Through Infotainment, no mobile device can be connected using Apple CarPlay.

Telephone operation

Enter telephone number

› In the Telephone main menu, tap ☏.
› Enter the telephone number using the numeric keypad that is displayed.
   The displayed numeric keypad can also be used for searching for contacts.
   If, for example, the digits 32 are entered, contacts with the letter sequence DA, FA, EB etc. are displayed next to the numeric keypad.

List of telephone contacts

The list of telephone contacts is imported from the connected main telephone.

› To display the contact list in the telephone main menu, tap ☏.
› To find details within the list, tap Find.
› Enter the details you wish to find.

Establish a connection with a contact, tap the functional area showing the desired contact.

If a contact has multiple telephone numbers, select the telephone number from the displayed list.

› To display the details for a contact, tap ☏.

Establish a connection to the voice mailbox number

› In the Telephone main menu, tap ☏ > ☏.

Telephone conversation

Depending on the context of the telephone conversation, the following functions can be selected.

ıld. End connection / reject incoming call / end call
.cid. Answer an incoming call / return to the held call
. Switch the ringer off / on
. Hold a call
. Switch the microphone off / on
. Show details of the caller
. Set up a conference call

› To switch the call tone from the speakers to the telephone, go to the telephone main menu and tap ☏ > hands-free.

› To switch the call tone from the telephone to the speakers, tap ✉.

Conference call

A conference call is a joint telephone conversation with a minimum of three and a maximum of six participants.

› Make the next call during an ongoing conversation / conference.

Or:

› Accept a new incoming call by tapping the function area ✉.

› To start a conference call, tap on the functional area ✉.

During an ongoing conference call, the following functions can be selected depending on the context.

. Hold the conference call and leave temporarily (the conference will continue in the background)
. Return to the conference being held
. Switch the microphone off / on
. End the conference
. Show details of the conference call

In the details of the conference call, depending on the connected telephone, the following functions can be selected.

. Show details of the conference call participants
. End conversation with the conference call participant
. Conversation with a participant outside of the conference call

Send a text message

› In the Telephone main menu, tap ☏ > ☏ New text message.

› Write a text message and confirm; a view of the message is displayed.

The message can be edited when the text area within the view is tapped.

› Consult or select the recipient of the message, if necessary tap ☏ to enter the phone number.
› Add more recipients or confirm selected recipients.
Display received text messages
- In the Telephone main menu, tap ➤ E-mails.
- To display the Message, select the desired message.

The message content and the following menu with functions is displayed.
- ➤ Read the text message using the generated Infotainment voice.
- ➤ Display the menu with the following functions of an accepted message.
  - Option to answer the message by means of a template.
  - Delete message.
  - Recognise phone numbers in the message.
  - ➤ Forward message, with the option to edit the message before sending.
  - ➤ Reply to the sender by sending a message.

Sort contacts in the phone book
- In the Telephone main menu, tap ➤ User profile ➤ Sort by.
- Select the type by which to sort.

Ringer
Some phones do not allow the use of the telephone ringtone; instead, the Infotainment ringtone is used.
- ➤ To set the Infotainment ringer in the Telephone main menu, tap ➤ User profile ➤ Select ringtone.
- Select the ringtone.

Number for the voice mailbox
- ➤ To set the voice mailbox number in the Telephone main menu, tap ➤ User profile ➤ Mailbox number.
- Enter the number of the voice mailbox.

Conference calls
- ➤ To enable/disable the option for conference call setup in the phone main menu, tap ➤ conference.

Settings for Infotainment telephone functions

Manage preset buttons for preferred contacts
- ➤ To save the desired preset button, press and hold.
- Select a contact from the displayed list.
- If the contact contains multiple telephone numbers, choose the desired telephone number.
- ➤ To delete tap on Telephone ➤ User profile ➤ Manage favourites in the main menu.
- ➤ To delete one preset, tap on the list entry and confirm the deletion.

Or:
- ➤ To delete all presets, tap on Delete all and confirm the deletion.

Import telephone contacts
After first connecting the main telephone with Infotainment, telephone contacts will start to be imported into the Infotainment memory.

Infotainment can import up to 2000 telephone contacts together with contact pictures. Each contact can include max. 5 telephone numbers.

Depending on the type of telephone, import confirmation may be required.

Update telephone contacts
When re-connecting the telephone with Infotainment, an automatic update of the list is carried out.
- ➤ For a manual update of the list in the telephone main menu, tap ➤ User profile ➤ Import contacts.

Show pictures on phone contacts
- In the Telephone main menu, tap ➤ User profile ➤ Show pictures for contacts.

Wi-Fi

Functionality
Wi-Fi can be used to connect to the Internet or for operating the Infotainment system using an application in the connected device (e.g. ŠKODA Media Command).

The Infotainment hotspot can connect up to 8 mobile devices. At the same time, the Infotainment can be connected to another hotspot.

Overview of available hotspots

Display available hotspots
- ➤ Tap ➤ Wi-Fi ➤ Wi-Fi.
The Wi-Fi signal from the hotspot is not available.

**Function restriction**

The Infotainment system can only be connected to a hotspot with WPA2 access protection.

**Settings**

**Connect a mobile device to the Infotainment hotspot**
- Turn on the ignition.
- Turn on the Infotainment’s Wi-Fi hotspot in the menu item MENU > Wi-Fi > Mobile Hotspot > Mobile Hotspot.
- Turn on the Wi-Fi on the mobile device.
- In the list of available Wi-Fi devices, look for Infotainment Wi-Fi.
- The name of the Infotainment hotspot refers to the menu item MENU > Mobile Hotspot > Hotspot Settings (Wi-Fi) > SSID.
- Select the Infotainment hotspot and enter the required password.
- The password for connecting to the Infotainment hotspot is taken from the menu item MENU > Mobile Hotspot > Hotspot Settings (Wi-Fi) > Network key.
- Confirm the connection.

**Connect Infotainment to the mobile device hotspot**
- Turn on the ignition.
- Turn on the Infotainment’s Wi-Fi unit in the menu item MENU > Wi-Fi: Wi-Fi.
- Select the desired hotspot in the list of available hotspots.
- Enter the password for connecting to mobile devices.
- Infotainment stores passwords for previously connected hotspots.

**Security level of the Infotainment hotspot**
The security level is factory-set at WPA2 and cannot be changed.

**Change the name of the Infotainment hotspot**
- Tap MENU > Wi-Fi > Mobile Hotspot > Hotspot Settings (Wi-Fi) > SSID.
- Enter the name and confirm.
- Tap Save.

**Change password for connection to Infotainment hotspot**
The password must be a minimum of 8 and a maximum of 63 characters.
- Tap MENU > Wi-Fi > Mobile Hotspot > Hotspot Settings (Wi-Fi) > Network key.
- Enter the password and confirm.

**Quick connection of a mobile device to the Infotainment hotspot**
- Turn on the ignition.
- Turn on the Infotainment’s Wi-Fi hotspot in the menu item MENU > Wi-Fi > Mobile Hotspot > Mobile Hotspot.
- Tap WPS quick connection (WPS button).
- In the mobile device, switch on the option for connection via WPS.
- Wait for the connection to be established and, if necessary, confirm the respective messages.

**Quick connection of Infotainment to the mobile device hotspot**
- Turn on the ignition.
- On the mobile device, turn on the hotspot, its visibility, and the option for WPS connection.
- Turn on the Infotainment’s Wi-Fi unit in the menu item MENU > Wi-Fi: Wi-Fi.
- Tap WPS quick connection (WPS button).
- Wait for the connection to be established and, if necessary, confirm the respective messages.

**Manual connection of Infotainment to the mobile device hotspot**
- Set the hotspot backup of the mobile device to WPA2.
- Turn on the ignition.
- Turn on the Infotainment’s Wi-Fi unit in the menu item MENU > Wi-Fi: Wi-Fi.
- Tap Manual settings.
- Enter the name of the hotspot to connect to and the access password.
- Tap Connect.
- Wait for the connection to be established and, if necessary, confirm the respective messages.

**Tips for a perfect connection**
- Keep only the hotspot to be connected switched on and switch off the other hotspots.
- Delete unused hotspots. This shortens the time required to establish a connection.
- For some hotspots, the connection takes longer, so wait for the connection to finish.
- If the connection is interrupted, recheck the available hotspots and repeat the connection.

**Data connection**

**Settings**

Mobile data
Mobile data for the data connection may be subject to charges according to the mobile network operator’s tariff conditions.
**Types of data connection setup**

▶ By connecting the Infotainment with the **external hotspot** via Wi-Fi.
▶ Using the CarStick **USB device**.

**Connecting using the CarStick USB device**
The CarStick USB device can be purchased from Škoda original accessories.

▶ Insert a SIM card with activated data services into the CarStick device.

The required dimensions of the SIM card, as well as the correct procedure during insertion can be found in the instructions enclosed with the CarStick device.

▶ Turn on the ignition and switch on Infotainment.
▶ Insert the CarStick into the USB input at the front.
▶ Wait approximately one minute until a light other than the red indicator light on CarStick is permanently lit.

When the red indicator light comes on, the CarStick can be removed and inserted again.

▶ If the SIM card is protected by a PIN code, then the PIN code of the SIM card must be entered.
▶ Confirm the entered PIN code by tapping **OK**.

Or:

▶ Tap to save and confirm the PIN code.
▶ If necessary, set the required network of the data service provider.

**NOTICE**
If a SIM card is incorrectly sized or if a SIM card is inserted in the wrong direction, there is a risk of damage to the CarStick USB device.

**Set network parameters**

▶ Tap on **Network**.
▶ Set the desired parameters.

For accurate parameters for setting the network, contact the data service provider.

---

**SmartLink**

**Functionality**

SmartLink offers the ability to display and operate certified applications from a connected mobile device in the Infotainment screen.

Certification may be conditional upon the use of the latest update to the particular SmartLink application.

Applications include, for example, apps for route guidance, telephoning, listening to music, etc.

Mobile devices can be connected via a USB cable.

**Supported connection types**

SmartLink supports the following connection types.

▶ Android Auto.
▶ Apple CarPlay.
▶ MirrorLink.

---

**Overview of the SmartLink connection**

**Main menu SmartLink**

▶ Tap on **APP**.

Or:

▶ Tap on **MENU > Setup**.

Connection conditions

General connection conditions
- ✓ The mobile device supports the following SmartLink connection types: Android Auto, Apple CarPlay, and MirrorLink.
- ✓ Mobile devices, as well as the type of SmartLink connection, are supported in the respective market.
- ✓ Some connected mobile devices require the mobile device to be "unlocked".

Conditions for Android Auto
- ✓ The device to be connected must have Android AutoSupport.

  A list of devices, supported regions and applications that the Android Auto connection supports can be found on the websites of Google Inc..
- ✓ The Android Auto application needs to be installed on the mobile device.

  Some applications require the data connection in the mobile device to be turned on.

Conditions for Apple CarPlay
- ✓ The device to be connected must have Apple CarPlaySupport.

  A list of devices, supported regions and applications that the Apple CarPlay connection supports can be found on the websites of Apple Inc..
- ✓ Siri voice control is on.
- ✓ The data connection is switched on in the mobile device.

Conditions for MirrorLink
- ✓ The device to be connected must have MirrorLinkSupport.

  A list of devices and applications that the MirrorLink connection supports can be found on the websites of Car Connectivity Consorciunm®.
- ✓ The MirrorLink application needs to be installed on the mobile device.
- ✓ Some applications require the data connection in the connected mobile device to be turned on.

Operation

Operation of the running MirrorLink application
- To display the following operation surfaces, press the right rotary control.
  - Display of control surfaces at the bottom
  - Display of control surfaces at the top
  - Return to the MirrorLink main menu

Restriction

Restriction of SmartLink applications while driving
For safety reasons, operation of some SmartLink applications while driving is not possible or is restricted.

Functionality restriction of Infotainment with an Android Auto connection
- For the duration of the connection, the external device cannot be used as an audio source in the Media menu.
- By connecting the device, all currently connected Bluetooth® devices will be disconnected and the device will automatically be connected as the main telephone.
- For the duration of the connection, no other Bluetooth® devices can be connected to the Infotainment system.
- If route guidance is taking place at this moment in Infotainment, then there is the option to start the route guidance in the Android Auto application. And vice versa, if route guidance is currently taking place in the Android Auto application, then there is
the possibility that this will be terminated by the start of route guidance by the Infotainment system.

**Functionality restriction of Infotainment with an Apple CarPlay connection**
- For the duration of the connection, the external device cannot be used as an audio source in the Media menu.
- Connecting the device disconnects all currently connected Bluetooth® devices.
- For the duration of the connection, no Bluetooth® devices can be connected to the Infotainment system.
- If route guidance is taking place at this moment in Infotainment, then there is the option to start the route guidance in the Apple CarPlay application. And vice versa, if route guidance is currently taking place in the Apple CarPlay application, then there is the possibility that this will be terminated by the start of route guidance by the Infotainment system.

**Functionality restriction of Infotainment with a MirrorLink connection**
- For the duration of the connection, the external device cannot be used as an audio source in the Media menu.
- If you wish to use the device to be connected in the Telephone menu, the device must be paired with and connected to the Infotainment system by Bluetooth® before establishing the MirrorLink connection.

**Settings**

**Apple CarPlay – Connection via USB**
- Turn on the Infotainment.
- Turn on the mobile device.
- Connect the mobile device to the front USB input using a cable.
- Choose to connect via Apple CarPlay.

**Apple CarPlay – Disconnection**
- In the Apple CarPlay main menu, tap on the “ŠKODA” functional area.
- Tap on ◊.

**Android Auto – Connection via USB**
- Turn on the Infotainment.
- Turn on the mobile device.
- Connect the mobile device to the front USB input using a cable.
- Choose to connect via Android Auto.

**Android Auto – Disconnection**
- In the main menu of Android Auto ◊ > tap on "Return to ŠKODA".

- Tap on ◊.

**MirrorLink – Connection via USB**
- Turn on the Infotainment.
- Turn on the mobile device.
- Connect the mobile device to the front USB input using a cable.
- Choose to connect through MirrorLink.

**MirrorLink – Disconnection**
- In the MirrorLink main menu, tap ◊.
- Tap on ◊.

**Change to another device / connection type**
Infotainment allows you to switch between currently connected devices and the connection type.
- Tap on MENU ◊.
- Select the desired device or connection type.

**ŠKODA Connect online services**

**Functionality**
ŠKODA Connect online service offer the option of connecting the vehicle to the online world. They thus represent an extension of the vehicle and Infotainment functions.

For the functionality of the ŠKODA Connect Online Services, the vehicle must be within range of a mobile network through which the services are provided. The availability, the connection speed and the technology used in the mobile network can be different in the respective countries and are dependent on the mobile network operator.

The ŠKODA Connect online services are not included in the equipment of the vehicle. They can be ordered separately on the ŠKODA Connect Portal website or in the ŠKODA Connect application.

The offer of ŠKODA Connect online services depends on the type of vehicle and its trim level, Infotainment and country. Availability in each country can be checked on the ŠKODA Connect website.

The rights and obligations of the Parties with respect to the provision of these services are governed by a separate agreement. Current legal documents regarding the online services can be found on the ŠKODA Connect Portal as well as the ŠKODA Connect application.

**ŠKODA Connect website**
- http://go.skoda.eu/skoda-connect

For example, the ŠKODA Connect website contains the latest information about the online services, a link to the ŠKODA Connect Portal as well as the option of downloading the ŠKODA Connect application.
The ŠKODA Connect Portal website is used, for example, for registration, activation and ordering of online services. It also provides the option of remote access to the vehicle.

**Information call**
The information call may be used in the case of problems with the online services or for information regarding the products and services of the ŠKODA brand.

✓ The functional condition represents the active online ŠKODA Connect services.

**Breakdown call**
The breakdown call can be used in the event of a breakdown.

✓ The functional condition represents the active online ŠKODA Connect services.

**ŠKODA Connect Application**
The ŠKODA Connect application enables remote access to the vehicle using a mobile device. It can also be used for user registration and to activate and configure the online services.

The application can be downloaded to the mobile device after scanning the following QR code or link.

> [http://go.skoda.eu/skodaconnectapp](http://go.skoda.eu/skodaconnectapp)

---

**Settings**

**Registration and activation of online services**
User registration, as well as the activation of the ŠKODA Connect online services, is completed on the ŠKODA Connect Portal website or in the ŠKODA Connect application.

In order to complete user registration, you will need to access your e-mails.

In order to activate ŠKODA Connect, proceed as follows.

- Switch on the ignition and the Infotainment.
- Tap **MENU** > **ŠKODA Connect (online services)** > Registration.
- Enter and confirm the registration PIN you have received during user and vehicle registration on the ŠKODA Connect Portal website or in the ŠKODA Connect application.
- Wait for the registration completion message to appear.
- Confirm any messages on the screen.

**Delete user**

- Switch on the ignition and the Infotainment.
- Tap **MENU** > **ŠKODA Connect (online services)** > Registration.
- Tap **Delete user** > Delete.
- Confirm the deletion.

By deleting the registered vehicle in the user account on the website ŠKODA Connect Portal the user is also deleted in Infotainment.

**Changing the user**

- Switch on the ignition and the Infotainment.
- Tap **MENU** > **ŠKODA Connect (online services)** > Registration.
- Tap **New owner** > Change ownership.
- Enter and confirm the registration PIN code received during registration of the new user and during vehicle registration on the ŠKODA Connect Portal website.
- If necessary, confirm the change by tapping the function surface **Change main users**.

**Management of online services**
In the service management, it is possible to display information about the online services, the validity of their licence, or to switch the services on/off.

- Tap **MENU** > **ŠKODA Connect (online services)** > Privacy settings and manage services.
- To display the designations and the status of the services, select the desired service.
- For detailed information about the service tap >.
- To switch the services on/off, tap the Checkbox.

**Connection status of the online services**
The connection status of the online services of ŠKODA Connect online services is indicated by an icon in the status bar on the Infotainment screen.
A The ŠKODA Connect online services are available. At the same time the symbol of the data connection type can be displayed.

B The ŠKODA Connect online services are not available.

C Localisation services are restricted or disabled. Detailed information about the online services can be viewed in the Online Services Administration.

D Localisation services are enabled. Detailed information about the online services can be viewed in the Online Services Administration.

Localisation services
For the complete functionality of some online services, activated localisation services are required. Localisation services include, for example, information on the last parking position, area notification or speed notification.

When localisation services are active, the symbol will be displayed in the status line in the Infotainment screen.

Switching Private mode function on/off
By switching the Private mode function on, the services relating to sending vehicle information and personal data, which are essential for the provision of online services, are deactivated.

Tap MENU > ŠKODA Connect (online services) > Services Management > Private mode.

The emergency call remains fully functional after turning on the private mode feature. The functions of the information and breakdown call are limited.

Switch Care Connect function on/off
By switching the Care Connect services off, the services relating to sending vehicle information and personal data, which are essential for the provision of Care Connect online services, are deactivated.

Tap MENU > ŠKODA Connect (online services) > Services Management > Care Connect.

NOTICE
The emergency call remains fully functional after turning off the Care Connect feature. The functions of the information and breakdown call are limited.

Switch on/off Infotainment Online function
By switching off the Infotainment Online Services, the services in relation to the provision of online services Infotainment Online are switched off.

Tap ŠKODA Connect (online services) > Services Management > Infotainment Online.

Switch online services on/off
It is possible to have the online services switched off/on exclusively by a ŠKODA service partner. After turning off the online services, none of the ŠKODA Connect online services, including the emergency calls are functioning.

To inform the vehicle user that the ŠKODA Connect online services are out of order, the service partner applies the sticker at a visible point in the vehicle (e.g. on the roof cladding).

This sticker must not be removed as long as the online services are off.

NOTICE
It should be noted that the emergency, information and breakdown calls are not available after switching off the online services. For this reason, no automatic emergency call is made in the event of a serious car accident.

Navigation
Navigation announcements
Infotainment route guidance takes place using graphic driving recommendations and navigation announcements.

The navigation announcements are generated by the Infotainment system. Navigation announcement clarity (e.g. road or city name) cannot always be guaranteed.

Repeat the last navigation announcement
Tap on.

Turn off navigation announcements
Tap on.

Setting navigation announcements
In the navigation main menu, tap Navigation announcements.
Navigation overviews

Display main menu
› Tap on NAV.
Or:
› Tap on MENU ➜ .

▶ Favourites
▶ Telephone contact destinations
▶ Saved destinations in the ŠKODA Connect Portal website or in the ŠKODA Connect application

Selecting the stored destination
▶ Select the category of stored destinations.
▶ Select the desired destination.
  Destination details are displayed with the option of
  starting route guidance.

Selecting destination by tapping the map point
▶ Tap the desired item or the POI icon in the map.
▶ Tap to start the route guidance.

Route calculation
A route is created by starting route guidance to a destination.
Additional intermediate destinations can be added to the route.
Route calculation is done on the basis of the set
route options.
▶ Route options.
▶ Select the desired list entries.
With selection of alternative routes turned on, the
following menu is displayed after the calculation of a new route.
▶ To switch on / off the alternative routes in the
  main menu, tap Navigation Route options Suggest 3
  alternative routes.

Calculate the most economical route with short-
est travelling time and distance travelled – the
route is highlighted green.
Calculate the fastest route to the destination, even if a detour is necessary - the route is highlighted in red.

Infotainment tries to allow for continued guidance even if the navigation data is incomplete or there is no data at all for the given area.
The route is recalculated if you ignore driving recommendations or change the route.
The navigation announcements provided may vary from the actual situations, e.g. due to out-of-date navigation data.

Route overview
During route guidance the display of a route overview is possible.
▶ Route details.

Change route destinations to each other
If intermediate routes are included in the route, it is possible to change them in the route overview and thus change their order, add further destinations or delete destinations.
▶ In order to change the order of the destination, hold the functional area until the destination becomes free.
▶ Move the destination to the desired position and release the functional surface.
The route is re-calculated.

List of traffic reports
The Infotainment enables the reception of traffic reports, which include information regarding traffic congestion, using TMC (Traffic Message Channel) or online services Infotainment Online.
The list of traffic reports will be updated by Infotainment on a continuous basis.
▶ To display traffic reports, tap MENU Traffic reports.

A List of traffic reports
B Filtering of traffic reports
C Symbol for the source of the traffic message

If no route guidance takes place, the traffic obstruction in the map is represented by a red line.
If route guidance takes place, the traffic obstruction is shown as follows.
| Grey line | The traffic obstruction is not on the route |
| Red line | The traffic obstruction is on the route, the route will not be recalculated and the route passes through the traffic obstruction |
| Orange line | The traffic obstruction is on the route, the route is recalculated and an alternative route is available |

For **switching the traffic flow display off / on** in the main menu, tap Navigation  > Map  > Settings traffic flow.

**NOTICE**
SKODA AUTO does not accept responsibility for the availability, content, up-to-dateness or evaluation of TMC traffic reports or other data provided by third parties. SKODA AUTO is not entitled to examine or adapt this data in any way. The data can only be edited by Infotainment in areas where it is available.

**Touch operation**

**Move map**

**Enter destination by tapping the map item**

**Zoom into the map**

**Zoom out of the map**

**Restriction**

Infotainment may give incorrect driving recommendations if the road conditions or the traffic do not match the navigation data.

This can lead to the route guidance being carried out using a different route or proposing a change of direction in a one-way street.

**Settings**

**Avoiding traffic obstructions**

If the function is switched on and the Infotainment receives information about a traffic obstruction on the route from online traffic information or the TP traffic announcements, the route is recalculated.

For **switching on/off the function** in the main menu, tap Navigation  > Route options  > Dynamic route.

**Showing arrival time information in the destination / driving time**

The status line displays information on the time depending on the following setting.

In the navigation main menu, tap  > Advanced settings  > Time display.

**Showing information on the destination / waypoint**

The status line displays information on the distance and travel time to the destination, depending on the following time setting.

In the navigation main menu, tap  > Advanced settings  > status display.

**Switching display of country-specific speed limits on / off**

When the function is switched on, the country-specific speed limits are displayed when crossing national borders.

In the navigation main menu, tap  > Advanced settings  > Note: Country border crossed.

Or:

In the navigation main menu, tap  > Advanced settings  > Note: Country border crossed.
For display of speed limits in the main menu, tap Navigation > Top speed.

Switching the display of road signs on motorways and expressways on/off
When the function is switched on, Infotainment displays traffic and information signs on motorways and expressways.

Switching the fuel warning on/off
When the function is switched on and the fuel supply reaches the reserve area, a warning message appears with the option of going to the nearest petrol station.

Towing a trailer
To calculate the correct route for trailer operation, switch on trailer inclusion.

Setting navigation announcements
In the navigation main menu, tap Navigation > Route options > Include trailer.

Setting home address
The defined destination of the home address is displayed in the overview of recommended destinations.

Setting POI categories
Favourite POI categories are displayed on the map and provided in the destination search.

Switching demo mode on/off
In demo mode, the route guidance from the starting point of the demo mode to the selected destination is simulated.

Updating the navigation database
Information on updating the navigation database must be requested from a ŠKODA partner, or refer to the following ŠKODA websites.

Navigation data source Amundsen
The navigation data is stored on an Original SD Card. In order to ensure the function of the navigation, the Original SD card, with the navigation data, must be inserted in the respective slot in the external module.

If the original SD card is damaged or lost, a new original SD card can be purchased from the ŠKODA Original Accessories.

With a non-original SD Card, navigation does not work.

Determining the navigation database version
Tap MENU > Advanced settings > System information.

System

Infotainment Menus

MENU menu
The MENU menu contains all available Infotainment menus.

› To display the menu tap MENU.

The graphic display type for the MENU menu can be set.

Grid display

HOME menu
The HOME menu includes three windows for quick access to selected Infotainment menus.

› To display the menu tap HOME.

In the left window, the navigation menu is always displayed.

The menus in the right-hand windows can be individually adjusted.

Restriction

For safety reasons, operation of some Infotainment functions while driving is not possible or is restricted.

The Infotainment system indicates this by means of a message in the screen.

Basic settings

Setting basic functions
The following Infotainment functions are set in the MENU > 🗝️ menu.

▶ Time and date.
▶ Language.
▶ Units.
▶ Restore factory settings.

Sound settings
The Infotainment sound is set in the menu MENU > 🗝️.
The following menu items can be set.
- Setting the equalizer.
- Adjusting the volume ratio.
- Volume adjustment of individual Infotainment functions.
  Some are adjustable, for example the following menu items.
  - Volume adjustment of voice commands.
  - Setting the maximum volume when Infotainment is turned on.
  - Speed-dependent volume setting.
  - Setting the Infotainment to mute with the parking aid switched on.

Depending on the equipment, the following advanced sound settings can be set.
- Setting space optimisation.
- Setting the audio profiles according to genre.
- Adjusting the subwoofer volume.

Configuration wizard
The configuration wizard helps to set certain Infotainment functions.

The configuration wizard is automatically displayed if, after switching on the Infotainment system, there are at least two menu items that have not been set or if a new user account has been selected.
- To switch off the automatic display, tap on Don’t show again when the configuration wizard is displayed.
- For manual display, tap on MENU > Settings > Configuration wizard.

Setting the HOME menu
The menus in the right-hand windows of the menu HOME can be changed.
- Hold down the symbol of the desired menu in the right window.
  A list of available menus is displayed.
  > Select the desired menu.

Setting the MENU
The graphic display type for the MENU menu can be set as follows.
- MENU > Settings > Screen > Menu.
  > Select one of the following menu items.
  - Grid display - Grid display.
  - Horizontal Display - horizontal display.

Safely disconnect the connected USB device
⚠️ NOTICE
Risk of damage to the data on the connected device!
To safely disconnect/remove the device, proceed as follows.
- Tap MENU > Settings > Remove safely.
  > Select the desired device.
- Disconnect/remove the device.

Electronic voice amplification for driver and passenger
The voice enhancer allows transmission of the driver’s and passenger’s voice on the speakers in the rear.

The volume setting for voice enhancement is carried out in the MENU > Settings > Volume > Electronic voice enhancement menu.

Troubleshooting
Infotainment not responding
The Infotainment system must be restarted.
- Press ⌁ for more than 10 s.
  > Wait for the restart to complete.

System update
We recommend having the system update carried out by a specialist company.

The system update ensures optimal function of the Infotainment system, e.g. compatibility with new phones.

Determine system version
- Tap MENU > System information.

Manual update
For information on available updates, please refer to the ŠKODA internet pages.

http://go.skoda.eu/updateportal
- Visit available updates.
- Save the update to a USB source.
- Insert the USB source into the front USB input.
- Tap MENU > System information > Update software.
- Select the connected USB device as the update source.
- Go to the update file and confirm the update.
- Confirm any messages and wait for the update process to be completed.
Screen Overview

A Status bar
B Bar with the functional surfaces of the displayed menu
C Other pages of the menu

Operation

NOTICE
Danger of screen damage!
▶ The Infotainment screen is operated by touching it lightly with your finger.

In principle, operation by touch is identical to the operation of a mobile phone. The following operating modes are specific to the Infotainment system.

Dragging up or down with two fingers
▶ Quickly review the list of phone contacts.

Pulling apart with two fingers
▶ Enlarge image.
▶ Zoom in to the map.

Pulling together with two fingers
▶ Minimize image.
▶ Zoom out of the map.

Turn two fingers
▶ Rotate image.

Finger movement
▶ Move the map.

Contactless gesture control
The Infotainment menus marked with the symbol can be controlled by hand gestures.
▶ Gesture control is achieved by slowly moving the hand back and forth approximately 8 cm above the lower edge of the screen. Depending on the setting, a recognized gesture can be confirmed acoustically and animated.

Settings
The following basic screen functions are set in the Screen menu.
▶ Brightness level of the screen.
▶ Switch off the screen.
▶ Display the time.
▶ Confirmation sounds and animations.

Keypad

Keypad overview
The arrangement of the keypad characters depends on the Infotainment language that has been set. In Infotainment, the following types are used, depending on the context.
▶ Alphanumeric.
▶ Numeric.
▶ Keypad for input.
▶ Keypad for search.
Keypad example

A Input line
  ▶ Delete characters before the cursor
  ▶ Tap: delete the last character
  ▶ Hold: delete all characters in sequence
  ▶ Show list of searched entries

B Keypad functional surfaces
  ▶ Change to lowercase
  ▶ Switch to the first capital letter, followed by lowercase letters
  ▶ ABC/ABZ Switch to the language keypad
  ▶ 123 Switch to the numeric and character keypad
  ▶ Show additional keypad languages
  ▶ Insert a space
  ▶ Hold: Show additional character variants
  ▶ Move cursor to the left
  ▶ Move cursor to the right
  ▶ Confirm the characters that have been entered

Numeric keypad

Keypad example

A Input line
  ▶ Delete characters before the cursor
  ▶ Tap: delete the last character
  ▶ Hold: delete all characters

B Keypad functional surfaces
  ▶ Confirm the characters that have been entered

Operation

The Infotainment keypad is used to enter characters, letters and numbers.

The keypad will be automatically displayed when Infotainment prompts for characters.

Find

During the character input, a search for corresponding entries takes place.

The entry to be searched can be entered, including diacritics.

The keypad will only provide characters that match the stored entries.

To display the searched entries, tap \( \text{J} \).

Show additional keypad languages

To use the additional keypad languages, the desired languages must be set first.

Tap \( \text{J} \) or repeatedly tap the flag symbol until the desired language keypad is displayed.

Further character variants

Press and hold the sign with the symbol \( \text{J} \).

Select the desired symbol.

Setting additional keypad languages

Tap MENU > \( \text{J} \) > Additional keypad languages.

Voice control

Functionality

Voice control principle

Voice control works according to the principle of dialogue between the user and the Infotainment system.

The user says a voice command. The Infotainment system responds or executes the voice command.

Operating conditions

✓ Ignition is switched on.
✓ Infotainment is switched on.
✓ No telephone conversation can be held via Infotainment.
Operation

Voice control process
› To turn on voice control, press the button \( \mathcal{A} \) on the multifunction steering wheel.

Or:
› Tap on VOICE.

After switching on, the \( \mathcal{O} \) icon is displayed.
› Say a voice command.

During recognition of the voice command, the \( \mathcal{O} \) icon is displayed.

The Infotainment system then executes the voice command or plays the message. During the message, the \( \mathcal{O} \) icon is displayed.

After the execution of the voice command, voice control is switched off.

Correcting a voice command
› During voice command input, press the \( \mathcal{A} \) button on the multifunction steering wheel and say a new voice command.

Stopping voice control
Stopping leaves more time for voice command input, e.g. for searching for a phone contact.
› Move your finger up or down over the Infotainment screen.

Or:
› Say the “pause” voice command.

Resuming stopped voice control
› Press the \( \mathcal{A} \) button on the multifunction steering wheel.

Or:
› Tap on \( \mathcal{O} \) in the Infotainment screen.

Stopping the played back message
› Press the \( \mathcal{A} \) button on the multifunction steering wheel.

Ending voice control
› Press the \( \mathcal{A} \) button on the multifunction steering wheel twice.

Or:
› Say the voice command “cancel” during voice command input.

Restriction
For some Infotainment languages, no voice control is available. The Infotainment system will indicate this.

The messages are generated by the Infotainment system. Flawless clarity (e.g. road or city name) cannot always be guaranteed.

You cannot use voice control while a phone call is in progress.

Settings
The following voice control functions are set in the menu \( \text{MENU} \rightarrow \mathcal{O} \rightarrow \text{Voice control} \).
› Confirmation tones.
› Display of sample commands.

Self-help
Starting acoustic help
› If the Infotainment system is expecting a voice command, say “Help”.

The “Help” voice command can be issued repeatedly for further tips on voice control.

Activate/deactivate the display of example voice commands in the Infotainment screen.
The system offers the option of displaying example voice commands after switching on the voice control in the Infotainment screen.
› To turn on/off \( \text{MENU} \rightarrow \mathcal{O} \rightarrow \text{voice control} \) tap on Example commands (Infotainment system).

Activate/deactivate display of example voice commands in the instrument cluster display
The system offers the option of displaying example voice commands after switching on the voice control in the Instrument cluster screen.
› To turn on/off \( \text{MENU} \rightarrow \mathcal{O} \rightarrow \text{voice control} \) tap on Example commands (Instrument cluster).

Radio
Overview
Display main menu
› Tap on \( \text{MENU} \rightarrow \mathcal{H} \).

Analogue and digital radio reception

A Select frequency range
B Depending on the frequency range
FM: Radio text
Infotainment supports digital radio reception in DAB and DAB+ formats.

**Restriction**
- Infotainment supports digital radio reception in DAB and DAB+ formats.
- Car parks, tunnels, tall buildings or mountains can restrict radio reception.
- In the rear side windows, there are antennas for receiving the radio signal.
- Covering the panes with foils or metal-coated labels may affect the reception of the radio signal.
- The ŠKODA AUTO company assumes no responsibility for the availability, correct functioning and broadcast information of the RDS service.

**List of available stations**
- To display, tap ⇑.
- Played station
- Station stored on the presets
- TP A traffic radio station is set
- DAB signal is not available
- Filter the FM stations into alphabetical order, according to group or genre
  The prerequisite for the filtering option is ensuring RDS and AF functions are activated.
- Manual update of the station list
  In the FM station list, information about the programme type and the type of the regional station can be displayed.

**Operation**

**Select station**

**SCAN function**
The function plays receivable stations of the selected frequency range in succession for a few seconds each.
- To start automatic play ⬅️, tap Scan.
- To stop automatic play, tap ⬅️.

**Find stations manually**
- In the Radio main menu, tap ⬅️.
- To search in sequence, tap ⬅️ or ⬅️ next to the displayed frequency range scale.

**Buttons**
- Applies to AM, FM and DAB frequency ranges.
  The variant for changing stations using buttons ⬅️ in the Radio main menu is set as follows.
  - In the Radio main menu, tap ⬅️ Arrow buttons.
  - Choose the change variant.

**Traffic reception (TP) for FM stations on/off**
- Applies to the FM frequency range.
  - In the Radio main menu, tap ⬅️ Traffic program (TP).

**Switch traffic reception for DAB stations on/off**
- Applies to the DAB frequency range.
  - In the Radio main menu, turn on menu item ⬅️ Traffic Radio (TP).
  - In the Radio main menu, tap ⬅️ Advanced settings ⬅️ DAB traffic programme announcements (TP) on/off.

**Assign station logo from an external source**
- Applies to AM, FM and DAB frequency ranges.

**Settings**

**Save the station currently being listened to as a favourite from the Radio main menu**
- Hold the desired station key for preferred stations until the station is stored.

**Save station to favourites from the list of available stations**
- Applies to AM, FM and DAB frequency ranges.
  - Hold the line with the name of the desired station.
  - Tap the desired preset button.

**Delete favourites**
- In the Radio main menu , tap ⬅️ Delete presets.
  - To delete one preset button for preferred stations, tap the desired station button and confirm the deletion.
  - To delete all preset buttons for preferred stations, tap All and confirm the deletion.

**Restriction**
- Infotainment supports digital radio reception in DAB and DAB+ formats.
- Car parks, tunnels, tall buildings or mountains can restrict radio reception.
- In the rear side windows, there are antennas for receiving the radio signal.
- Covering the panes with foils or metal-coated labels may affect the reception of the radio signal.
- The ŠKODA AUTO company assumes no responsibility for the availability, correct functioning and broadcast information of the RDS service.
Infotainment offers the option to assign logos from the pictures on an external source to the station buttons.

For station logos, images in jpg, gif, png, bmp format with a maximum resolution of 500x500 pixels can be used.

› In the Radio main menu, tap › Station logos.
› Tap the desired preset button.
› Select the external source with the logo.
› Find the desired logo and confirm.

The information for updating station logos is taken from the ŠKODA web pages.

▶ http://go.skoda.eu/updateportal

Delete station logos
Applies to AM, FM and DAB frequency ranges.

› In the Radio main menu, tap › Station logos.
› To delete a logo, tap the desired preset button and confirm the deletion.
› To delete all logos, tap on All and confirm the deletion.

Activating / deactivating automatic station logo assignment
Applies to the FM and DAB frequency ranges.

When the function is switched on, a station logo from the Infotainment memory is assigned when the station is stored on a preset.

› In the Radio main menu, tap on ↪ Advanced settings ↪ Autostore station logos.

Regional FM station logo
Applies to the FM frequency range.

Infotainment provides the option of using country-specific FM station logos.

› In the Radio main menu, tap on ↪ Advanced settings ↪ Region for station logo.
› Choose the country.

Turn on/off radio text reception
Applies to the FM and DAB frequency ranges.

When the function is switched on and station presets are displayed, detailed information about the broadcast content of the FM station being listened to, or the name of the station group for the DAB station, is displayed.

› In the Radio main menu, tap on ↪ Radio text.

Switch automatic frequency control (AF) on/off
Applies to the FM frequency range.

When the function is switched on and the signal of the FM station currently being listened to is weak, Infotainment automatically sets the same station to a different frequency with a better signal.

› In the Radio main menu, tap on ↪ Advanced settings ↪ Automatic frequency control (AF).

Automatic change of frequency to a regionally linked FM station
Applies to the FM frequency range.

Infotainment provides the option of automatically switching to a regionally linked FM station in case of signal loss of the FM station being listened to.

› In the Radio main menu, tap on ↪ Advanced settings ↪ RDS Regional.
› Select one of the following menu items.
› Fixed – If there is a loss of signal, another station must be set manually.
› Automatic – automatic selection of the station with the best signal reception.

If reception is lost in the given region, Infotainment will automatically set another available region.

Switch RDS on/off
Applies to the FM frequency range.

The menu item is only available for some countries.

› In the Radio main menu, tap on ↪ Advanced settings ↪ RDS Data System (RDS).

If the RDS function is disabled, the following menu items in FM station settings are not available.

› Traffic programme (TP).
› Radio text.
› RDS Regional.
› Automatic frequency change (AF).
› Regional station logo.

Switch additional DAB announcements on/off
Applies to the DAB frequency range.

When the function is switched on, other announcements are received as traffic announcements. For example, weather news, sports reports, financial news, etc.

› In the Radio main menu, tap on ↪ Advanced settings ↪ Other DAB announcements.

Enable/disable automatic programme tracking of a DAB station
Applies to the DAB frequency range.

When the function is switched on and the DAB station is lost, Infotainment automatically changes to the same station with a better signal in a different DAB station group.

› In the Radio main menu, tap on ↪ Advanced settings ↪ DAB - DAB station tracking.
Turn on/off automatic switching from a DAB station to the same FM station
Applies to the DAB frequency range.

When the function is switched on and the DAB station being listened to is lost, Infotainment automatically changes to the same FM station. The symbol (FM) is displayed after the station name.

When the corresponding DAB station can be received again, the station automatically changes from FM to DAB.

› In the Radio main menu, tap ▶ Advanced settings ▶ Automatic DAB - FM switching.

Turn on/off automatic switching to a similar DAB station
Applies to the DAB frequency range.

When the function is switched on and DAB station being listened to is lost, Infotainment automatically changes to another DAB station with similar content.

› In the Radio main menu, tap ▶ Advanced settings ▶ Switch to a similar station.

Activating/deactivating reception of DAB transmitter in the L band
In some countries, the DAB radio reception is only available as a so-called LBand.

› In the Radio main menu, tap ▶ Advanced settings ▶ L-Band:

⚠️ If there is no DAB radio reception available in the L-band in your country, we recommend turning the L-band reception off. The DAB channel scan is therefore faster.

Media

What you should be mindful of

▶ Do not save any important data or that which has not been backed up on the connected audio sources. ŠKODA assumes no responsibility for lost or damaged files or connected audio sources.

▶ When changing or connecting an audio source, this may cause sudden changes in volume. Reduce the volume before changing or connecting an audio source.

▶ When connecting an audio source, the source information messages can be displayed. These messages must be observed and, if necessary, confirmed.

▶ The national copyright laws that apply in your country must be observed.

CD/DVD laser product

⚠️ CAUTION

▶ The CD/DVD-player is a laser product.

Operation

Operation - Basics

Album image / symbol of the connected source
Tap: display available albums
▷ Tap: Start playback
☀ Tap: Pause
♫ Within 3 seconds of starting playback, tap: play the previous song
♫ After 3 seconds, tap from the start of playback: to play the current title from the beginning
♫ Hold: fast rewind within the title
♫ Tap: play the next song
♫ Hold: fast forward within the title

Movement within the title is also possible by dragging a finger over the timeline.

Extended operation
♫: Turn repeat playback of the current track on/off
♫: Turn repeat playback of the current album/folder on/off
♫: Turn random playback of the current album/folder on/off

Restriction

① NOTICE
The availability of some media operation functions is dependent on the connected source and the software being used, e.g. Bluetooth®.

Settings

Turn title playback including subfolders on/off
▷ In the Media main menu, tap on ⚙️ > Mix/Repeat including subfolders.

Traffic
▷ To turn on/off the traffic monitoring during the playback of media files, go to the Media main menu and tap on ⚙️ > Traffic programme (TP).

Safely disconnect the connected device
① NOTICE
Risk of damage to the data on the connected device!
To safely disconnect/remove the device, proceed as follows.
▷ In the Media main menu, tap ⚙️ > Safely remove.
▷ Select the desired device.
▷ Disconnect/remove the device.

Manage jukebox

In the Jukebox (in the Infotainment internal memory), supported audio files can be imported from connected devices.

▷ To display jukebox management and the level of internal Infotainment memory in the Media main menu, tap ⚙️ > Manage jukebox.

▷ To import the files in the jukebox management, tap Import.
▷ Select the desired files or folders.
▷ Press the ■ button.
▷ To delete files from the jukebox in the jukebox management, tap Clear.
▷ Select the desired folder or files in the selected category.
▷ Tap ■ > Delete.

Bluetooth® player

Infotainment allows audio files of a connected Bluetooth® player to play using the A2DP and AVRCP audio profile.
With Infotainment, multiple devices can be paired using Bluetooth®, but only one of them can be used as a Bluetooth® player.

▷ For connecting the Bluetooth® player, pair and connect the device via Bluetooth®.
▷ In the Media main menu, tap on ⚙️ > Bluetooth > paired devices.
▷ In the list, choose the device with the symbol ⊁.
уществует несколько функций управления медиакомпонентами, которые зависят от подключенного источника и используемого программного обеспечения, например, Bluetooth®.

Настройки

Включение/выключение воспроизведения трека включая подкаталоги
▷ В главном меню Медиа, нажмите на ⚙️ > Микс/Повтор включая подкаталоги.

Трафик
▷ Чтобы включить/выключить мониторинг трафика во время воспроизведения медиафайлов, перейдите в главное меню Медиа и нажмите на ⚙️ > Программа (TP) мониторинга трафика.

Безопасное отключение подключенного устройства
① ОБЩЕЕ ОБЗОР
Опасность причинения вреда данным на подключенном устройстве!
Для безопасного отключения/удаления устройства, следуйте таким пунктам.
▷ В главном меню Медиа, нажмите на ⚙️ > Безопасное удаление.
▷ Выберите нужное устройство.
▷ Отключите/удалите устройство.

Управление библиотекой

В библиотеке (в внутренней памяти Infotainment), поддерживаемые аудиофайлы можно импортировать из подключенных устройств.

▷ Для отображения управления библиотекой и уровня внутренней памяти Infotainment в главном меню Медиа, нажмите на ⚙️ > Управление библиотекой.

▷ Для импорта файлов в библиотеке управления, нажмите Import.
▷ Выберите необходимые файлы или каталоги.
▷ Нажмите на ■ > Удалить.

Бluetooth®-проигрыватель

Infotainment позволяет воспроизводить аудиофайлы Bluetooth®-проигрывателя на основе профилей A2DP и AVRCP аудио.
С Infotainment, можно парировать и соединять несколько устройств по Bluetooth®, но только одно из них может быть использовано как Bluetooth®-проигрыватель.

▷ Для подключения Bluetooth®-проигрывателя, парируйте и соедините устройство через Bluetooth®.
▷ В главном меню Медиа, нажмите на ⚙️ > Bluetooth > Парные устройства.
▷ В списке, выберите устройство с символом ⊁.

Внимание:
Опасность повреждения SD-карты!
▷ Не используйте SD-карты с поврежденным слайдом защиты записи.

▷ Чтобы вставить SD-карту, вставьте ее конус в слот внешнего модуля до щелчка.

▷ Чтобы удалить карту, сначала безопасно отключите SD-карту. Для этого в главном меню Медиа, нажмите на Remove safely: и выберите SD-карту.

▷ Нажмите на вставленную SD-карту.
The SD card moves to the eject position.

**NOTICE**
When using an SD card with an adapter, vehicle vibrations might cause the card to fall out of the adapter.

**USB device**
› To **connect**, insert the USB device into the appropriate port.

To play audio files, use USB ports that support data transfer.

› To **disconnect** disconnect the USB device first. To do this in the Media main menu, tap \( \bigtriangledown \) Remove safely and select the USB device.

› Disconnect the USB device.

A USB device can be connected directly to the USB port or via a connection cable. We recommend that you use extension cables from ŠKODA Original Accessories. USB extension cables or reducers may affect the playback function of the connected device.

**Load USB audio source**
After connecting the USB device, charging will start automatically when the following conditions are met.

✓ The ignition is switched on.
✓ The USB device allows charging.

The charging efficiency can be different compared to the charging from the usual mains power supply. Depending on the type of the connected USB device and the frequency of use, the charging current may not be sufficient to charge the battery of the connected device.

Some connected audio sources may not be recognised and cannot be charged.

**CD/DVD**
The CD/DVD slot is located in an external module in the storage compartment on the front passenger side.

› To **insert** a CD/DVD, with the labelled side facing up, press into the CD slot until it is automatically drawn in.

› To **remove**, press the \( \Delta \) button.

The CD/DVD is moved to the starting position.

If the ejected CD/DVD is not removed within 10 secs, it is retracted again for safety reasons.

**Wi-Fi player**
Infotainment allows audio files to be played from a device connected to the Infotainment via Wi-Fi.

The connected device must meet the following conditions.

✓ Support DLNA technology.
✓ The installed UPnP application allows playback.

› For **connecting the wireless player**, connect the device via Wi-Fi.

› Start the UPnP application in the connected device.

› In the main menu, select Media \( \bigtriangledown \) as audio source.

Video DVD

What you should be mindful of

⚠️ CAUTION
- The CD/DVD-player is a laser product.
- On the manufacturing date, this unit was classified as a Class 1 laser product in accordance with the national/international standards DIN EN 60825-1: 2008-05 and DHHS Rules 21 CFR, Subchapter J. The laser used in this Class 1 laser product is so weak that there is no risk of danger when operated correctly.
- This product is designed such that the laser is restricted to the inside of Infotainment. However, the installed laser could be classified in a higher class were the housing to be removed. For this reason, never remove the Infotainment housing.

Overview

Display main menu
- To display the main menu, insert a CD / DVD in the corresponding slot in the external module.
- In the Media main menu, select the video source, display the folder/track list and start the video file.

Operation

Playback control
- Tap: start playback
- Tap: pause
- Within 3 seconds of starting playback, tap: play the previous song
- After 3 seconds from the start of playback, tap: to play the current title from the beginning
- Hold: fast rewind within the title
- Tap: play the next song
- Hold: fast forward within the title

Movement within the title is also possible by dragging the finger over the timeline.

DVD menu

A Operating surface
- Move the operating surface left / right
- Move the operating surface left / right
- Hide full screen display of the operating surface
Settings

In the Video DVD main menu, tap 🗿.

Depending on the DVD, some of the following menu items are displayed.
- Format for setting up the screen width/height ratio.
- Select the audio channel.
- Subtitle selection.
- Enable/disable the parental control settings.
- Parental control settings.

Media Command

Functionality

The Media Command function allows playback of audio files or videos in up to two tablets that are connected to Infotainment via Wi-Fi, to control Infotainment.

Overview

Display main menu
› Tap on MENU  □.

Main menu for a tablet

Main menu for two tablets

Choice of connected tablet
Settings

Operating conditions
✓ Data transfer of Infotainment is switched on.
   Switching the transmission on/off takes place in the MENU  □ Data transmission mobile devices  □ Enable data transfer for ŠKODA apps menu item.
✓ Infotainment operation via the application is enabled.
   The adjustment of the operation takes place in the MENU  □ Data transmission mobile devices  □ Operation through apps menu item.
   One of the following menu items can be selected.
   ▶ Deactivate - the operation is deactivated.
   ▶ Confirm - Operation requires confirmation at the start of the application.

Operation

Start playback
› For selection of the playback source in the main menu, tap  □ and select the source tablet.
› For playback select the category and then the title.

If two tablets are connected, the title playback starts in the two tablets at the same time.

Playback control
› Tap: Start playback
   □ Tap: Pause
   Within 3 seconds of starting playback, tap: play the previous song
   After 3 seconds, tap from the start of playback: to play the current title from the beginning
   Tap: play the next song
   ▶ Increase the audio volume of the tablet
   ▼ Decrease the audio volume of the tablet
   □ View control options for two tablets
   □ View control options for a tablet
   □ Mute the tablet
   □ Unmute the tablet
   Movement within the title is also possible by dragging a finger over the timeline.

Function restriction

Some tablet types allow playback of audio files or videos by an inserted SD card in the tablet. Playback of these tracks may be limited.

If several devices are connected to the Infotainment system by means of Wi-Fi, there is the danger of Wi-Fi overloading and thus also the inability of Media Command to function properly.

High-definition video playback may cause playback problems or problems connecting the tablets to the Infotainment system.

Settings

ŠKODA Media Command application
The application can be downloaded to the mobile device after reading the following QR code or by referring to the ŠKODA mobile application website.

http://go.skoda.eu/service-app
Connect tablet with Infotainment hotspot

› Turn on the ignition.
› Turn on the Infotainment’s Wi-Fi hotspot in the menu item MENU > 📷 > Wi-Fi > Mobile Hotspot > Mobile Hotspot.
› Turn on Wi-Fi on the tablet.
› In the list of available Wi-Fi devices, look for Infotainment Wi-Fi.

The name of the Infotainment hotspot refers to the menu item MENU > 📷 > Wi-Fi > Mobile Hotspot > Hotspot Settings (Wi-Fi) > SSID.
› Select the Infotainment hotspot and enter the required password.
The password for connecting to the Infotainment hotspot is taken from the menu item MENU > 📷 > Wi-Fi > Mobile Hotspot > Hotspot Settings (Wi-Fi) > Network key.
› Confirm the connection.
› In the tablet, start the application ŠKODA Media Command.

Mobile device management

Overview

Mobile device management
› In the Telephone main menu, tap on the functional surface 📷 > Bluetooth > paired devices.
In the list of paired mobile devices, the following symbols may appear for the individual devices.

 adorn Grey icon - the device can be connected as a telephone.
 adorn Green icon - the device is connected as a telephone.
 adorn White icon - the device can be connected as a Bluetooth® player.
 adorn Blue icon - The device can be connected to use telephone contacts and for text message functionality.

Possible functions of the connected mobile device
The functions of the device depend on the following connection types.
<table>
<thead>
<tr>
<th>Connection variant</th>
<th>First device Main phone</th>
<th>Second device Additional phone</th>
<th>Third device</th>
<th>Fourth device</th>
</tr>
</thead>

<td>-</td>
</tr>
</tbody>
</table>

With Infotainment only a mobile device can be connected as a Bluetooth® player.

**Limitations of mobile devices and applications**

**Availability of features**
The availability of certain features depends on the type of mobile device, as well as that of the applications installed.

**Connection restrictions**
- With Infotainment, a max. of 20 mobile devices are paired.
- The range of the connection of the mobile device to Infotainment is limited to the passenger compartment.
- After reaching the maximum number, the pairing of the next mobile device will replace that of the device that has not been used for the longest period of time.

**Compatibility of mobile devices**
It is possible to check the ŠKODA web pages to see if Infotainment is compatible with the selected mobile device being tested. This check is carried out by using the following reference or by reading the QR code.

▶ [http://go.skoda.eu/compatibility](http://go.skoda.eu/compatibility)

All information given is incidental and is for information purposes.
The company, ŠKODA AUTO, cannot guarantee full functionality and compatibility, e.g. due to software update of infotainment and mobile devices.

**Bluetooth® compatibility of mobile devices**
Due to the large number of mobile devices, it is not possible to guarantee total Bluetooth® compatibility with Infotainment. Bluetooth® compatibility depends on the Bluetooth® version as well as the implementation of Bluetooth® protocols by the manufacturer of the mobile device.

**Applications in mobile devices**
Mobile devices can be used to install applications that allow you to view additional information on the Infotainment screen, or to operate the Infotainment system.

Due to the variety of applications, as well as their ongoing development, the available applications may not function on all mobile devices. ŠKODA AUTO assumes no liability for their proper functioning.

The scope of available applications and their functionality is dependent on the type of Infotainment, as well as the vehicle and country.

**Information about ŠKODA applications**
Detailed information about ŠKODA applications can be found on the website after reading the following QR code or link.

▶ [http://go.skoda.eu/mobile-apps](http://go.skoda.eu/mobile-apps)

**Connection set-up**

**Connect a mobile device to Infotainment**
- Turn on the ignition.
- Turn on the Bluetooth® on the mobile device.
- Turn on the Bluetooth® on Infotainment **MENU > Bluetooth**.
- Turn on the Bluetooth® visibility of the Infotainment **MENU > Bluetooth > Visibility > Visible**.
- Find available Bluetooth® devices in the mobile device.
- Select the Infotainment Bluetooth® unit.
  - The name of the unit can be found by tapping **MENU > Bluetooth > Name**.
  - Confirm the PIN; enter it if necessary and then confirm.

The mobile device is connected to the Infotainment or just paired, depending on the number of devices that are already connected.

**Connect Infotainment to a non-paired mobile device**
- Turn on the ignition.
- Turn on the Bluetooth® on the mobile device.
- Turn on the Bluetooth® on Infotainment **MENU > Bluetooth**.
- Tap on **MENU > Bluetooth > Search for devices**.
- Ensure the visibility of the device to be connected.
- Select the desired device from the list of Bluetooth® devices.
- Confirm the PIN; enter it if necessary and then confirm.
- If two devices are connected to the Infotainment, select the device to be replaced.

**Connect Infotainment to a mobile device that is already paired**
The connection with an already paired mobile device is made automatically after switching on the ignition; if necessary the device can be connected manually as follows.
- Turn on the ignition.
- Turn on the Bluetooth® on the mobile device.
- Turn on the Bluetooth® on Infotainment **MENU > Bluetooth**.
- Tap **MENU > Bluetooth > Paired devices**.
- In the device list, select the desired device and the Bluetooth® profile.
- Confirm the PIN; enter it if necessary and then confirm.
- If two devices are connected to the Infotainment, select the device to be replaced.

**Disconnect from a mobile device**
- Tap **MENU > Bluetooth > Paired devices**.
- Tap on the Bluetooth® profile icon of the desired mobile device.

**Delete a paired mobile device**
- Tap **MENU > Bluetooth > Paired devices**.
- To delete a mobile device, tap it and confirm the deletion.
- To delete all mobile devices, tap on Delete all and confirm the deletion.

**Connection via a SIM card in the external module**
The SIM card can be used for phone and data services.

Use a mini-sized SIM card, standard size 25x15 mm.
- Turn on the ignition and switch on Infotainment.
- Turn on the menu item in **PHONE > Telephone interface > Business**.
- Insert a SIM card into the corresponding slot in the external module in the storage compartment on the passenger's side.
- Insert the SIM card with the bevelled corner on the left and the contacts facing downwards until it locks.
NOTICE
When inserting an incorrectly sized SIM card or in the wrong direction, there is a risk of damage to the external module.

When using the SIM card for the first time, select one of the following menu items to use the SIM card.

- Calls too - enabling data and telephone services.
- Only data connections - enabling of data services only.
- If the SIM card is protected by a PIN code, then the PIN code of the SIM card must be entered.
- Confirm the entered PIN code by tapping OK.

Or:
- Tap to save and confirm the PIN code.
- Set the data service provider's required network and confirm the Internet connection.

If your data provider is not available in the list, ask your provider whether one of the displayed providers can be used.

By using the SIM card for phone services, the connection to the connected phones is terminated.

Remove the SIM card from the external module
- Press on the inserted SIM card until it snaps into the delivery position. Then remove it.

Set network parameters
- Tap MENU > Network.
- Set the desired parameters.

For accurate parameters for setting the network, contact the data service provider.

Set the parameters for the data connection
- Tap MENU > Network > Data Connection.
- Set the desired parameters.

Connection to the phone via rSAP Bluetooth® profile
- Turn on the ignition and switch on Infotainment.
- Turn on the menu item in PHONE > Telephone interface "Business".
- Turn on the Bluetooth® on Infotainment MENU > Bluetooth > Bluetooth.
- Turn on the Bluetooth® visibility of the Infotainment MENU > Bluetooth > Visibility: Turn on > Visible.
- Switch on Bluetooth® and its visibility in the phone.
- Pair and connect the phone to the Infotainment via the rSAP Bluetooth® profile.

The prerequisite for establishing an Internet connection is using a telephone with a SIM card with active data services.

Conditions for connecting a telephone with Infotainment

✓ The ignition is switched on.
✓ The Bluetooth® function of the Infotainment and the telephone needs to be switched on.

The Bluetooth® function of the Infotainment is switched on in the menu item MENU > Bluetooth > Bluetooth.

✓ Visibility of the Infotainment is switched on.

The visibility of the Infotainment is switched on in the menu item MENU > Bluetooth > Visibility.

✓ The telephone is within signal range of the Infotainment's Bluetooth® unit.
✓ The telephone is compatible with Infotainment.
✓ Through Infotainment, no mobile device can be connected using Apple CarPlay.

**Telephone operation**

**Enter telephone number**
› In the Telephone main menu, tap 📞.
› Enter the telephone number using the numeric keypad that is displayed.

提示 The displayed numeric keypad can also be used for searching for contacts.

If, for example, the digits 32 are entered, contacts with the letter sequence DA, FA, EB etc. are displayed next to the numeric keypad.

**List of telephone contacts**
The list of telephone contacts is imported from the connected main telephone.
› To display the contact list in the telephone main menu, tap 📞.
› To find details within the list, tap Find.
› Enter the details you wish to find.
› To establish a connection with a contact, tap the functional area showing the desired contact.

If a contact has multiple telephone numbers, select the telephone number from the displayed list.
› To display the details of a contact, tap 📞.

**Establish a connection to the voice mailbox number**
› In the Telephone main menu, tap 📞 📠.

**Telephone conversation**
Depending on the context of the telephone conversation, the following functions can be selected.

- End connection / reject incoming call / end call
- Answer an incoming call / return to the held call
- Switch the ringer off / on
- Hold a call
- Switch the microphone off / on
- Show details of the caller
- Set up a conference call
› To switch the call tone from the speakers to the telephone, go to the telephone main menu and tap 📞 on hands-free.
› To switch the call tone from the telephone to the speakers, tap 📞.

**Conference call**
A conference call is a joint telephone conversation with a minimum of three and a maximum of six participants.
› Make the next call during an ongoing conversation/conference.
Or:
› Accept a new incoming call by tapping the function area 📞.
› To start a conference call, tap on the functional area 📞.

During an ongoing conference call, the following functions can be selected depending on the context.
- Hold the conference call and leave temporarily (the conference will continue in the background)
- Return to the conference being held
- Switch the microphone off / on
- End the conference
- Show details of the conference call

In the details of the conference call, depending on the connected telephone, the following functions can be selected.
- Show details of the conference call participants
- End conversation with the conference call participant
- Conversation with a participant outside of the conference call

**Send a text message**
› In the Telephone main menu, tap 📞 📟 New text message.
› Write a text message and confirm; a view of the message is displayed.

The message can be edited when the text area within the view is tapped.
› Consult or select the recipient of the message, if necessary tap 📟 to enter the phone number.
› Add more recipients or confirm selected recipients.
› Tap on 📟.

**Display received text messages**
› In the Telephone main menu, tap 📟 E-mails.
› To display the Message, select the desired message.

The message content and the following menu with functions is displayed.
- Read the text message using the generated Infotainment voice.
- Display the menu with the following functions of an accepted message.
  Option to answer the message by means of a template.
  Delete message.
  Recognise phone numbers in the message.
  Forward message, with the option to edit the message before sending.
  Reply to the sender by sending a message.
Settings for Infotainment telephone functions

Manage preset buttons for preferred contacts
› To save the desired preset button, press and hold.
› Select a contact from the displayed list.
› If the contact contains multiple telephone numbers, choose the desired telephone number.
› To delete tap on Telephone ⏹️ Profile Manage favourites in the main menu.
› To delete one preset, tap on the list entry and confirm the deletion.

Import telephone contacts
After first connecting the main telephone with Infotainment, telephone contacts will start to be imported into the Infotainment memory.

Infotainment can import up to 4000 telephone contacts together with contact pictures. Each contact can include max. 5 telephone numbers.

Depending on the type of telephone, import confirmation may be required.

Update telephone contacts
When re-connecting the telephone with Infotainment, an automatic update of the list is carried out.
› For a manual update of the list in the telephone main menu, tap on ⏹️ Profile Import contacts.

Show pictures on phone contacts
› In the Telephone main menu, tap ⏹️ Profile Show pictures for contacts.

Sort contacts in the phone book
› In the Telephone main menu, tap on ⏹️ Profile Sort by:
› Select the type by which to sort.

Ringer
Some phones do not allow the use of the telephone ringtone; instead, the Infotainment ringtone is used.
› To set the Infotainment ringer in the Telephone main menu, tap on ⏹️ Profile Select ringtone.
› Select the ringtone.

Number for the voice mailbox
› To set the voice mailbox number in the Telephone main menu, tap on ⏹️ Profile Mailbox number:
› Enter the number of the voice mailbox.

Conference calls
› To enable/disable the option for conference call setup in the phone main menu, tap ⏹️ Conference.

Prefer services of SIM card in external module
› In the Telephone main menu, tap on ⏹️ Profile Prioritise.

Select the type by which to sort.

For a conference call, instead of the Infotainment ringtone is used.

Some phones do not allow the use of the telephone ringer; instead, the Infotainment ringer is used.

Switching SIM card telephone data services on / off in the external module
› In the Telephone main menu, tap ⏹️ Profile Data transfer - A data connection is preferred.

Set PIN code of SIM card in external module
› In the Telephone main menu, tap ⏹️ Profile Set PIN code of SIM card in external module

Select the desired menu item.

Delete call log
Deleting the selected call type by means of a SIM card inserted in the external module or by means of a telephone connected to the Infotainment via the rsAP Bluetooth® profile.
› In the Telephone main menu, tap ⏹️ Profile Delete calls.
› Select the desired menu item.
› Confirm the deletion.

Set the functions of the text messages
Settings for text messages of a SIM card inserted in the external module or in the telephone connected via the Bluetooth® profile rsAP.
› In the Telephone main menu, tap ⏹️ Profile Text message settings.
› Select and set the desired menu item.

Redirect incoming SIM card calls in the external module
› In the Telephone main menu, tap ⏹️ Profile Redirect incoming SIM card calls in the external module

Select the desired menu item.
Wi-Fi

Functionality

Wi-Fi can be used to connect to the Internet, to playback audio files in the Media menu or for operating the Infotainment system using an application in the connected device (e.g. ŠKODA Media Command).

The Infotainment hotspot can connect up to 8 mobile devices. At the same time, the Infotainment can be connected to another hotspot.

Overview of available hotspots

Display available hotspots

- Tap MENU > Wi-Fi > Wi-Fi.

- The Wi-Fi signal from the hotspot is not available

Function restriction

The Infotainment system can only be connected to a hotspot with WPA2 access protection.

Settings

Connect a mobile device to the Infotainment hotspot

- Turn on the ignition.
- Turn on the Infotainment’s Wi-Fi hotspot in the menu item MENU > Wi-Fi > Mobile Hotspot > Mobile Hotspot.
- Turn on the Wi-Fi on the mobile device.
- In the list of available Wi-Fi devices, look for Infotainment Wi-Fi.
- The name of the Infotainment hotspot refers to the menu item MENU > Wi-Fi > Mobile Hotspot > Hotspot Settings (Wi-Fi) > SSID.

- Select the Infotainment hotspot and enter the required password.
- The password for connecting to the Infotainment hotspot is taken from the menu item MENU > Wi-Fi > Mobile Hotspot > Hotspot Settings (Wi-Fi) > Network key.
- Confirm the connection.

Connect Infotainment to the mobile device hotspot

- Turn on the ignition.
- Turn on the Infotainment’s Wi-Fi unit in the menu item MENU > Wi-Fi > Wi-Fi.
- Select the desired hotspot in the list of available hotspots.
- Enter the password for connecting to mobile devices.
- Infotainment stores passwords for previously connected hotspots.

Security level of the Infotainment hotspot

The security level is factory-set at WPA2 and cannot be changed.

Change the name of the Infotainment hotspot

- Tap MENU > Wi-Fi > Mobile Hotspot > Hotspot Settings (Wi-Fi) > SSID.
- Enter the name and confirm.
- Tap Save.

Change password for connection to Infotainment hotspot

The password must be a minimum of 8 and a maximum of 63 characters.

- Tap MENU > Wi-Fi > Mobile Hotspot > Hotspot Settings (Wi-Fi) > Network key.
- Enter the password and confirm.
- Tap Save.

Manual connection of Infotainment to the mobile device hotspot

- Set the hotspot backup of the mobile device to WPA2.
- Turn on the ignition.
- Turn on the Infotainment’s Wi-Fi unit in the menu item MENU > Wi-Fi > Wi-Fi.
- Tap Manual settings.
- Enter the name of the hotspot to connect to and the access password.
- Tap Connect.
- Wait for the connection to be established and, if necessary, confirm the respective messages.

Tips for a perfect connection

- Keep only the hotspot to be connected switched on and switch off the other hotspots.
- Delete unused hotspots. This shortens the time required to establish a connection.
For some hotspots, the connection takes longer, so wait for the connection to finish.

If the connection is interrupted, recheck the available hotspots and repeat the connection.

**Data connection**

**Settings**

**Mobile data**

Mobile data for the data connection may be subject to charges according to the mobile network operator’s tariff conditions.

**Types of data connection setup**

- By connecting the Infotainment with the external hotspot via Wi-Fi.
- By using a SIM card with data services inserted in the external module of the Infotainment.
- By connecting the Infotainment with a mobile phone via the Bluetooth® profile rSAP.

**Connection via a data SIM card in the external module**

A SIM card size mini (standard size 25x15 mm) with enabled data services must be used.

- Switch on the ignition and the Infotainment.
- Turn on the menu item in **Telephone interface “Business”**.
- Insert a SIM card into the corresponding slot in the external module in the storage compartment on the passenger's side.
  - Insert the SIM card **with the bevelled corner on the left and the contacts facing downwards** until it locks.

**NOTICE**

When inserting an incorrectly sized SIM card or in the wrong direction, there is a risk of damage to the external module.

- Select one of the following menu items to use the SIM card.
  - **Calls too** - enabling data and telephone services.
  - **Only data connections** - enabling of data services only.
  - If the SIM card is protected by a PIN code, then the PIN code of the SIM card must be entered.
  - Confirm the entered PIN code by tapping **OK**.

Or:

- Tap to save and confirm the PIN code.
- Set the data service provider’s required network and confirm the Internet connection.

If your data provider is not available in the list, ask your provider whether one of the displayed providers can be used.

**Set network parameters**

- Tap **MENU > Network**.
- Set the desired parameters.

For accurate parameters for setting the network, contact the data service provider.

**Set the parameters for the data connection**

- Tap **MENU > Network > Data Connection**.
- Set the desired parameters.

**Connection to the phone via rSAP Bluetooth® profile**

- Switch on the ignition and the Infotainment.
- Turn on the menu item in **PHONE > Telephone interface “Business”**.
- Turn on the Bluetooth® in Infotainment **MENU > Bluetooth > Bluetooth**.
- Turn on the Bluetooth® visibility of the Infotainment **MENU > Bluetooth > Visibility: Turn on > Visible**.
- Switch on Bluetooth® and its visibility in the phone.
- Pair and connect the phone to the Infotainment via the rSAP Bluetooth® profile.

- The prerequisite for establishing an Internet connection is using a telephone with a SIM card with active data services.

**SmartLink**

**Functionality**

SmartLink offers the ability to display and operate certified applications from a connected mobile device in the Infotainment screen.

Certification may be conditional upon the use of the latest update to the particular SmartLink application. Applications include, for example, apps for route guidance, telephoning, listening to music, etc.

Mobile devices can be connected via a USB cable.

**Supported connection types**

SmartLink supports the following connection types.

- Android Auto.
- Apple CarPlay.
- MirrorLink.

**Overview of the SmartLink connection**

**Main menu SmartLink**

- Tap **MENU > SmartLink**.
Previously connected device
Currently connected device
Display information about SmartLink
Separation of the active connection
Settings for the SmartLink menu

**Android Auto**

- Navigation applications
- Telephone applications
- Overview of running applications, phone calls, incoming text messages, and more.
- Music applications
- Display of other available applications as well as the option to return to the SmartLink main menu
- Turn on voice control (Google Voice)

**Apple CarPlay**

- List of available applications
- Depending on the duration of operation:
  - Tap: Return to the Apple CarPlay main menu
  - Hold: Turn on voice control (Siri)

**MirrorLink**

- It is not possible to operate the application while driving
- Return to the SmartLink main menu
- List of running applications
- Display of the last running application in connected mobile devices
- Settings

**Connection conditions**

**General connection conditions**
- The mobile device supports the following SmartLink connection types: Android Auto, Apple CarPlay, and MirrorLink.
- Mobile devices, as well as the type of SmartLink connection, are supported in the respective market.
- Some connected mobile devices require the mobile device to be “unlocked”.

**Conditions for Android Auto**
- The device to be connected must have Android AutoSupport.
- A list of devices, supported regions and applications that the Android Auto connection supports can be found on the websites of Google Inc..
- The Android Auto application needs to be installed on the mobile device.
- Some applications require the data connection in the mobile device to be turned on.

**Conditions for Apple CarPlay**
- The device to be connected must have Apple CarPlaySupport.
- A list of devices, supported regions and applications that the Apple CarPlay connection supports can be found on the websites of Apple Inc..
- Siri voice control is on.
- The data connection is switched on in the mobile device.

**Conditions for MirrorLink**
- The device to be connected must have MirrorLinkSupport.
A list of devices and applications that the MirrorLink connection supports can be found on the websites of Car Connectivity Consorcium®.

✓ The MirrorLink application needs to be installed on the mobile device.
✓ Some applications require the data connection in the connected mobile device to be turned on.

Operation

Operation of the running MirrorLink application
- Display of control surfaces at the bottom
- Display of control surfaces at the top
- Return to the MirrorLink main menu

Restriction

Restriction of SmartLink applications while driving
For safety reasons, operation of some SmartLink applications while driving is not possible or is restricted.

Functionality restriction of Infotainment with an Android Auto connection
- For the duration of the connection, the external device cannot be used as an audio source in the Media menu.
- If route guidance is taking place in the Android Auto application, then there is the possibility that this will be terminated by the start of route guidance by the Infotainment system.

Functionality restriction of Infotainment with a MirrorLink connection
- For the duration of the connection, the external device cannot be used as an audio source in the Media menu.
- If route guidance is taking place in the Apple CarPlay application, then there is the possibility that this will be terminated by the start of route guidance by the Infotainment system.

Functionality restriction of Infotainment with an Apple CarPlay connection
- For the duration of the connection, the external device cannot be used as an audio source in the Media menu.
- If route guidance is taking place in the Apple CarPlay application, then there is the possibility that this will be terminated by the start of route guidance by the Infotainment system.

Settings

Apple CarPlay - Connection via USB
- Turn on the Infotainment.
- Turn on the mobile device.
- Connect the mobile device to the front USB input using a cable.
- Choose to connect via Apple CarPlay.

Apple CarPlay – Disconnection
- In the Apple CarPlay main menu, tap on the “ŠKODA” functional area.
- Tap on .

Android Auto - Connection via USB
- Turn on the Infotainment.
- Turn on the mobile device.
- Connect the mobile device to the front USB input using a cable.
- Choose to connect via Android Auto.

Android Auto - Disconnection
- In the main menu of Android Auto tap on “Return to ŠKODA”.
- Tap on .

MirrorLink - Connection via USB
- Turn on the Infotainment.
- Turn on the mobile device.
- Connect the mobile device to the front USB input using a cable.
- Choose to connect through MirrorLink.

MirrorLink - Disconnection
- In the MirrorLink main menu, tap .
- Tap on .

Change to another device / connection type
Infotainment allows you to switch between currently connected devices and the connection type.
- Tap on MENU • .
Select the desired device or connection type.

ŠKODA Connect online services

Functionality

ŠKODA Connect online services offer the option of connecting the vehicle to the online world. They thus represent an extension of the vehicle and Infotainment functions.

For the functionality of the ŠKODA Connect Online Services, the vehicle must be within range of a mobile network through which the services are provided. The availability, the connection speed and the technology used in the mobile network can be different in the respective countries and are dependent on the mobile network operator.

The ŠKODA Connect online services are not included in the equipment of the vehicle. They can be ordered separately on the ŠKODA Connect Portal website or in the ŠKODA Connect application.

The offer of ŠKODA Connect online services depends on the type of vehicle and its trim level, Infotainment and country. Availability in each country can be checked on the ŠKODA Connect website.

The rights and obligations of the Parties with respect to the provision of these services are governed by a separate agreement. Current legal documents regarding the online services can be found on the ŠKODA Connect Portal as well as the ŠKODA Connect application.

ŠKODA Connect website
▶ http://go.skoda.eu/skoda-connect

For example, the ŠKODA Connect website contains the latest information about the online services, a link to the ŠKODA Connect Portal as well as the option of downloading the ŠKODA Connect application.

ŠKODA Connect Portal website
▶ http://go.skoda.eu/connect-portal

The ŠKODA Connect Portal website is used, for example, for registration, activation and ordering of online services. It also provides the option of remote access to the vehicle.

Information call

The information call may be used in the case of problems with the online services or for information regarding the products and services of the ŠKODA brand.

✓ The functional condition represents the active online ŠKODA Connect services.

Breakdown call

The breakdown call can be used in the event of a breakdown.
✓ The functional condition represents the active online ŠKODA Connect services.

ŠKODA Connect Application

The ŠKODA Connect application enables remote access to the vehicle using a mobile device. It can also be used for user registration and to activate and configure the online services.

The application can be downloaded to the mobile device after scanning the following QR code or link.
▶ http://go.skoda.eu/skodaconnectapp

Settings

Registration and activation of online services

User registration, as well as the activation of the ŠKODA Connect online services, is completed on the ŠKODA Connect Portal website or in the ŠKODA Connect application.

In order to complete user registration, you will need to access your e-mails.

In order to activate ŠKODA Connect, proceed as follows.

› Switch on the ignition and the Infotainment.
› Tap MENU > ŠKODA Connect (online services) > Registration.
› Enter and confirm the registration PIN you have received during user and vehicle registration on the
SKODA Connect Portal website or in the SKODA Connect application.
› Wait for the registration completion message to appear.
› Confirm any messages on the screen.

Delete user
› Switch on the ignition and the Infotainment.
› Tap MENU > SKODA Connect (online services) > Registration.
› Tap Delete user > Delete.
› Confirm the deletion.

By deleting the registered vehicle in the user account on the website SKODA Connect Portal the user is also deleted in Infotainment.

Changing the user
› Switch on the ignition and the Infotainment.
› Tap MENU > SKODA Connect (online services) > Registration.
› Tap New owner > Change ownership.
› Enter and confirm the registration PIN code received during registration of the new user and during vehicle registration on the SKODA Connect Portal website.
› If necessary, confirm the change by tapping the function surface Change main users.

Management of online services
In the service management, it is possible to display information about the online services, the validity of their licence, or to switch the services on/off.
› Tap MENU > SKODA Connect (online services) > Privacy settings and manage services.
› To display the designations and the status of the services, select the desired service.
› For detailed information about the service tap >.
› To switch the services on/off, tap the Checkbox.

Connection status of the online services
The connection status of the online services of SKODA Connect online services is indicated by an icon in the status bar on the Infotainment screen.

A The SKODA Connect online services are available.
At the same time the symbol of the data connection type can be displayed.

B The SKODA Connect online services are not available.

C Localisation services are restricted or disabled.
Detailed information about the online services can be viewed in the Online Services Administration.

D Localisation services are enabled.
Detailed information about the online services can be viewed in the Online Services Administration.

Localisation services
For the complete functionality of some online services, activated localisation services are required.

Localisation services include, for example, information on the last parking position, area notification or speed notification.

When localisation services are active, the symbol will be displayed in the status line in the Infotainment screen.

Switching Private mode function on/off
By switching the Private mode function on, the services relating to sending vehicle information and personal data, which are essential for the provision of online services, are deactivated.
› Tap MENU > SKODA Connect (online services) > Services Management > Private mode.

The emergency call remains fully functional after turning on the private mode feature.
The functions of the information and breakdown call are limited.

Switch Care Connect function on/off
By switching the Care Connect services off, the services relating to sending vehicle information and personal data, which are essential for the provision of Care Connect online services, are deactivated.
› Tap MENU > SKODA Connect (online services) > Services Management > Care Connect.

NOTICE
The emergency call remains fully functional after turning off the Care Connect feature.
The functions of the information and breakdown call are limited.

Switch on/off Infotainment Online function
By switching off the Infotainment OnlineServices, the services in relation to the provision of online services Infotainment Online are switched off.
› Tap MENU > SKODA Connect (online services) > Services Management > Infotainment Online.

Switch online services on/off
It is possible to have the online services switched off/on exclusively by a SKODA service partner.
After turning off the online services, none of the ŠKODA Connect online services, including the emergency calls are functioning.

To inform the vehicle user that the ŠKODA Connect online services are out of order, the service partner applies the sticker at a visible point in the vehicle (e.g. on the roof cladding).

This sticker must not be removed as long as the online services are off.

Notice

It should be noted that the emergency, information and breakdown calls are not available after switching off the online services.

For this reason, no automatic emergency call is made in the event of a serious car accident.

Navigation

Navigation announcements

Infotainment route guidance takes place using graphic driving recommendations and navigation announcements.

The navigation announcements are generated by the Infotainment system. Navigation announcement clarity (e.g. road or city name) cannot always be guaranteed.

Repeat the last navigation announcement

› Tap on 🔄 ➜ 🔄.

Turn off navigation announcements

› Tap on 🔄 ➜ 🔄.

Setting navigation announcements

› In the navigation main menu, tap 🗺 ➜ Navigation announcements.

Navigation overviews

Display main menu

› Tap on MENU ➜ 🔄.

Map overview

A Vehicle position
B Route
C Functional surface for the operation of the map display
D Functional surface of the POI
E Functional surface of the POI list
F Road sign for the affected route section
G Information on the maximum permitted speed

Show the following menu depending on context

There is no route guidance - search/enter a new destination

Route guidance is taking place

▶ Show route plan.
▶ Set traffic obstruction manually.
▶ Search for destination/enter.
▶ End route guidance.

Show the following menu

▶ Save current vehicle position as a flag target.
▶ Show list of saved routes.
▶ Display list of stored destinations.
▶ Display list of last destinations.
▶ Route guidance to home address.

POI Search

✎ Map display options
✎ Change the map display between the digital instrument cluster and the Infotainment screen
✎ Display for navigation announcement
✎ Settings

Symbols displayed in the map

✎ Destination position
✎ Intermediate destination position
✎ Location of home address
⭐ Favourite position
Map options

A Automatic map display in day or night mode (depending on the currently active vehicle lighting)
B Daytime map display
C Night-time map display
D Switch the split screen display on/off
E Switching on/off of the selected POI categories display

Map display in the digital instrument cluster
The map can be displayed in the digital instrument cluster and in infotainment at the same time.
The type of map displayed in the digital instrument cluster can be selected.

In the navigation main menu, tap \( \text{Map} \) \( \rightarrow \) \( \text{Map view in the station wagon} \).

Map scale

It is possible to change the map scale manually or to turn on the automatic change of scale.

To display the operating surfaces for changing the map scale, tap \( A \).

Types of manual scale change

- Touch the screen with two fingers and pull them apart or close them together.
- For slider or functional areas, use \( \text{ } \) and \( \text{ }\).

Switch on/off the automatic change of scale
When the automatic scale is active, the map scale changes automatically, depending on the type of road used and the manoeuvre you are about to undertake.
The automatic scale is only active as long as the map is centred on the vehicle position.

To turn on navigation in the main menu, tap \( \rightarrow \) \( \text{ } \).
The functional surface \( \text{ } \) is highlighted in green.

To turn off navigation in the main menu, tap \( \text{ } \rightarrow \) \( \text{ } \).
The functional surface \( \text{ } \) is highlighted in white.
The turning off occurs likewise when the map is moved or the map scale is changed manually.

Map view in reduced scale
The map scale is reduced for a few seconds and then restored.

To display, tap \( \text{ } \).

Map orientation

To change the map orientation, tap \( A \).
The map can be aligned as follows.

The map is oriented to the north
The symbol \( \text{ } \) rotates the vehicle position, the map and the Polarstern Symbol \( \text{ } \) do not rotate.

Map oriented to the direction of travel
The map as well as the Polarstern symbol \( \text{ } \) rotate, the symbol \( \text{ } \) showing the vehicle position does not rotate.

With a map scale greater than 10 km, the map is automatically oriented towards north.

Map centring
The moved map can be centred/aligned to the vehicle, destination or route position.

Tap map centring \( \text{ } \).

Search for a new destination

Tap on \( \text{ } \).

A Input line
Depending on the search mode, the following symbols are displayed:

- Display the map as well as the list of the destinations listed in the navigation database
- Display the map as well as the list of online destinations

Select the destination search/destination entry

- Select the destination search/destination entry
- Context-dependent display of the destination list
  - List of last destinations
  - List of visited destinations

Select the destination you are looking for

- Enter the details for the destination search.
- Select the desired destination.
  
  Destination details are displayed with the option of starting route guidance.

Enter a new destination via the address

- Tap on the address field.
  
  A menu will appear with the destination input options.
- Select the destination via the address.
- Enter the required information.
  
  Destination details are displayed with the option of starting route guidance.

Enter a new destination via the map point

- Tap on the map point.
  
  A menu will appear with the destination input options.
- Select the destination via the map point.
- Touch the screen to move the desired destination into the cross-hair.

Or:

- Set the GPS coordinates.
- Confirm the destination input.
  
  Destination details are displayed with the option of starting route guidance.

List of stored destinations

- Tap on the stored destinations.
  
  A menu will appear with the destination input options.
- Select the destination via the map point.
- Touch the screen to move the desired destination into the cross-hair.

Select the category of stored destinations.

- Select the desired destination.
  
  Destination details are displayed with the option of starting route guidance.

Selecting the stored destination

- Select the category of stored destinations.
- Select the desired destination.
  
  Destination details are displayed with the option of starting route guidance.

Selecting destination by tapping the map point

- Tap the desired item or the POI icon in the map.
- Tap the address field to start the route guidance.

Route calculation

A route is created by starting route guidance to a destination.

Additional intermediate destinations can be added to the route.

Route calculation is done on the basis of the set route options.

- Route options.
- Select the desired list entries.

With selection of alternative routes turned on, the following menu is displayed after the calculation of a new route.

To switch on / off the alternative routes in the main menu, tap Navigation > Route options > Suggest 3 alternative routes.

- Calculate the most economical route with shortest travel time and distance travelled – the route is highlighted green.
- Calculate the fastest route to the destination, even if a detour is necessary – the route is highlighted in red.
- Calculate the shortest route to the destination, even if a longer travel time is required – the route is highlighted in orange.

Infotainment tries to allow for continued route guidance even if the navigation data is incomplete or there is no data at all for the given area.

The route is recalculated if you ignore driving recommendations or change the route.
The navigation announcements provided may vary from the actual situations, e.g. due to out-of-date navigation data.

**Route overview**
During route guidance the display of a route overview is possible.

- Route details.

**Change route destinations to each other**
If intermediate routes are included in the route, it is possible to change them in the route overview and thus change their order, add further destinations or delete destinations.

- In order to **change the order of the destination**, hold the functional area until the destination becomes free.
- Move the destination to the desired position and release the functional surface.

The route is re-calculated.

**Waypoint mode**
This mode is suitable for off-road navigation or for areas where maps are not available.

Infotainment allows the recording of waypoint tours driven using automatic or manually entered waypoints. Then there is the possibility to start route guidance to the stored waypoint tour or to save the waypoint tour on the SD card.

- To display, in the **navigation** main menu, tap **Enable waypoint mode**.

**List of traffic reports**
The Infotainment enables the reception of traffic reports, which include information regarding traffic congestion, using TMC (Traffic Message Channel) or online services Infotainment Online.

The list of traffic reports will be updated by Infotainment on a continuous basis.

- To display **traffic reports**, tap **MENU > Traffic reports**.

If **route guidance takes place**, the traffic obstruction is shown as follows.

- **Grey line** - The traffic obstruction is not on the route
- **Red line** - The traffic obstruction is on the route, the route will not be recalculated and the route passes through the traffic obstruction
- **Orange line** - The traffic obstruction is on the route, the route is recalculated and an alternative route is available

- **For switching the traffic flow display off / on** in the main menu, tap **Navigation > Map > Settings traffic flow**.

**NOTICE**
ŠKODA AUTO does not accept responsibility for the availability, content, up-to-dateness or evaluation of TMC traffic reports or other data provided by third parties. ŠKODA AUTO is not entitled to examine or adapt this data in any way. The data can only be edited by Infotainment in areas where it is available.

**Touch operation**

**Move map**

**Enter destination by tapping the map item**
Restriction

Infotainment may give incorrect driving recommendations if the road conditions or the traffic do not match the navigation data. This can lead to the route guidance being carried out using a different route or proposing a change of direction in a one-way street.

Settings

Avoiding traffic obstructions
If the function is switched on and the Infotainment receives information about a traffic obstruction on the route from online traffic information or the TP traffic announcements, the route is recalculated.

› For switching on/off the function in the main menu, tap Navigation ➤ Route options ➤ Dynamic route.

Showing arrival time information in the destination / driving time
The status line displays information on the time depending on the following setting.

› In the navigation main menu, tap ➤ Advanced settings ➤ Time display.

Showing information on the destination / waypoint
The status line displays information on the distance and travel time to the destination, depending on the following time setting.

› In the navigation main menu, tap ➤ Advanced settings ➤ status display.

Switching display of country-specific speed limits on / off
When the function is switched on, the country-specific speed limits are displayed when crossing national borders.

› In the navigation main menu, tap ➤ Advanced settings ➤ Note: Country border crossed.

Or:

› In the navigation main menu, tap ➤ Advanced settings ➤ Note: Country border crossed.

› For display of speed limits in the main menu, tap Navigation ➤ Top speed.

Switching the display of road signs on motorways and expressways on / off
When the function is switched on, Infotainment displays traffic and information signs on motorways and expressways.

› In the navigation main menu, tap ➤ Map ➤ Show traffic sign.

Switching the fuel warning on / off
When the function is switched on and the fuel supply reaches the reserve area, a warning message appears with the option of going to the nearest petrol station.

› In the navigation main menu, tap ➤ Tank options ➤ Tank warning.

Towing a trailer
To calculate the correct route for trailer operation, switch on trailer inclusion.

› In the navigation main menu, tap ➤ Route options ➤ Include trailer.

Setting navigation announcements

› In the navigation main menu, tap ➤ Navigation announcements.

› Select and set the desired menu item.

Favourite POI categories
Favourite POI categories are displayed on the map and provided in the destination search.

› In the navigation main menu, tap ➤ Map ➤ Show special destinations ➤ Select categories for points of interest.

› Set favourite categories.

Setting home address
The defined destination of the home address is displayed in the overview of recommended destinations.

› ➤ Home address.

› Define the home address using the current vehicle position or enter the address.
Switching demo mode on / off
In demo mode, the route guidance from the starting point of the demo mode to the selected destination is simulated.

When the function is switched on, Infotainment issues a query before the start of route guidance as to whether the route guidance should be carried out in the normal way or in demo mode.

› For switching on/off in the navigation main menu, tap ➔ Advanced settings ➔ Demo mode.

Defining the starting point of the demo mode
› In the navigation main menu, tap ➔ Advanced settings ➔ Demo mode ➔ Start point Define demo mode.

Or:
› Hold down the desired point in the map and choose menu item Start point Define demo mode.

Updating the navigation database
Information on updating the navigation database must be requested from a ŠKODA partner, or refer to the following ŠKODA websites.

▶ http://go.skoda.eu/updateportal

Manual online update
› In the navigation main menu, tap ➔ version information ➔ Update (Online) ➔ Recall.

A menu for importing/updating the navigation data and POI categories is displayed.
› Tap ➔ and select the desired menu item.
› Confirm the download.

Automatic online update
Infotainment automatically offers an update option if the following conditions are met.
✓ The "Infotainment Online" online services are activated.
✓ A data connection to the Internet is available, with the quality allowing an online update.
✓ An update of the navigation database for the current vehicle position or route destination is available.

Determining the navigation database version
› Tap ➔ ➔ System information.

Starting and driving
Start at the push of a button

Notes on starting

⚠️ DANGER
Danger of poisoning by exhaust gases!
▶ Do not run the engine in an enclosed space.

Operating conditions
✓ The vehicle key is located in the vehicle interior.

⚠️ NOTICE
Risk of key loss, possibly of key damage!
The system can detect the key even if it has been forgotten on the vehicle roof.
▶ Always keep the key with you.

Switching the ignition on and off
› Press the starter button.

Starting the vehicle with manual transmission
› Secure the vehicle with the parking brake.
› Move the shift lever to the neutral position.
› Keep the clutch pedal depressed.
› Press the starter button.

Starting the vehicle with automatic transmission
› Secure the vehicle with the parking brake.
› Keep the brake pedal depressed.
› Move the selector lever to position P or N.
› Press the starter button.

After switching on the ignition on vehicles with diesel engines, the indicator light Preheating system illuminates. The engine starts after goes out.

⚠️ CAUTION
Danger of unexpected vehicle movement!
▶ At temperatures below -10°C, start the vehicle with the selector lever in the P position.

Stopping the engine
› Secure the vehicle with the parking brake.
› Press the starter button.

⚠️ WARNING
Steering lock hazard!
▶ During a journey with the engine stopped, the ignition must always be switched on.

⚠️ NOTICE
Risk of engine overheating!
▶ Do not switch the engine off immediately at the end of your journey after the engine has been running at high loads. Leave it to run at an idling speed for about 1 minute.
Starting issues

Troubleshooting

1) NOTICE
Danger of engine damage!
▶ Do not start the vehicle by towing.

The engine does not start
▶ Switch off the ignition.
▶ Wait 30 seconds and repeat the starting procedure.
▶ If the engine does not start, use the jump start cables with the battery of another vehicle » page 194 or seek the help of a specialist garage.

The engine does not start, the display shows a message regarding the immobilizer
▶ Use the other vehicle key.
▶ If the engine does not start, seek the help of a specialist garage.

Starting is not possible with the starter button, the system did not detect the key
▶ Press the starter button with the key.
▶ If the engine does not start, seek the help of a specialist garage.

1) The key might not be detected if the battery in the key is nearly discharged or the signal is faulty.

The engine cannot be turned off with the starter button
▶ Hold the starter button or press twice.

The radiator fan keeps running even after the engine has stopped
The radiator fan can continue to run for approximately 10 minutes after the engine is stopped. This is not a defect.

The engine makes noises after the cold start
The increased running noise is due to the briefly increased engine speed. This is not a defect.

START STOP

Usage
The START STOP system reduces environmentally damaging emissions, including CO₂, and saves fuel.

If the system determine that the engine is not needed when the vehicle stops, it turns off the engine and starts it again when moving off.

Functionality

Vehicle with manual transmission
A system-related engine switch-off occurs when stopping, when switching the gear lever into the neutral position, and when releasing the clutch pedal.
A system-related engine start occurs when the clutch pedal is pressed down.

Vehicle with automatic transmission
A system-related engine switch-off occurs when the brake pedal is actuated and the engine is stopped.
A system-related engine start occurs when the accelerator pedal is pressed down. When the Auto Hold function is deactivated, a system-related engine start occurs after releasing the brake pedal.

Status display in the instrument cluster display
Engine is switched off via the START-STOP system
Engine is not switched off via the START-STOP system due to operating conditions that are not met

Display of detailed information in the infotainment screen
CAR ➔Vehicle status
Or:
MENU ➔Vehicle status

Operating conditions

Some conditions are systemic and can neither be influenced nor recognised. Therefore, the system may react differently in situations which seem identical from the driver's perspective.
The driver must fulfil the following conditions.
✓ The driver's door is closed.
✓ The driver has fastened the seat belt.
✓ The driving speed was higher than 4 km/h after the last stop.

Settings

Automatic activation
▶ Upon start-up of the engine.
▶ By selecting driving mode Eco » page 164, Operation.

Deactivate/activate system
▶ Press the button.
When the system is deactivated, the symbol illuminates in the button.
If a system-related engine switch-off occurs and the system is deactivated, the engine will start.

Troubleshooting

The engine does not switch off when stopping, or it starts before starting up
The system has detected that the engine is running.

Manual gearbox

Operation

NOTICE
Danger of engine damage!
▶ Shift to a higher gear before reaching the red area on the tachometer scale.

NOTICE
Danger of gearbox damage!
▶ Fully depress the clutch pedal when changing gear.
▶ When not shifting gear, do not put your hand on the shift lever.

Engaging reverse gear
▶ Stop the vehicle.
▶ Fully depress the clutch.
▶ Move the shift lever to the neutral position.
▶ Push the shift lever down.
▶ Turn it completely to the left.
▶ Wait briefly.
▶ Engage reverse gear.

Automatic gearbox

Lever positions

P Parked vehicle
The drive wheels are locked.
P Only set the position when the vehicle is stationary.

R Reverse gear
R Only set the position when the vehicle is stationary.

N Neutral
There is no transmission of engine power to the wheels.

D/S Forward drive / sports program
The gear is changed automatically.

In $ mode, the gear is changed at higher speeds than in D mode.

⚠️ Choose between D and $ (spring-loaded position)

Moving the selector lever out of the P or N position
lights up - the selector lever is locked

▶ Press the brake pedal, and at the same time, press the button in the selector lever.

⚠️ WARNING
Risk of the stationary vehicle rolling away automatically!
▶ When the selector lever is in the D/S position, R position or in manual shift mode, secure the vehicle with the brake.

Operation

Starting up
▶ Keep the brake pedal depressed.
▶ Start the engine.
▶ Press the button in the selector lever and set it to the desired position.
▶ Release the brake pedal and press the accelerator pedal lightly.

Speeding up while driving (kick-down)
▶ Fully depress the accelerator.

Stopping temporarily (e.g. at a junction)
▶ Leave the selector lever in the D/S position and secure the vehicle with the brake pedal.

Stopping
▶ Keep the brake pedal depressed.
▶ Secure the vehicle with the parking brake.
▶ Press the button in the selector lever and set it to the P position.
▶ Turn off the engine.

Driving in neutral
If the system detects that no gear is engaged while driving, it automatically switches to neutral position.

Requirements for driving in neutral position
✓ D mode is chosen.
✓ Neither the accelerator nor the brake pedal is pressed.
The vehicle speed is 20-130 km/h.

There is no device connected to the trailer socket.

**Acceleration on start-up (launch control)**
This function allows maximum acceleration during start-up.

› Select $mode or manual shift mode.
› Disable the TCS » page 170.
› Keep the brake pedal depressed.
› Fully depress the accelerator.
› Release the brake pedal.

The vehicle drives with maximum acceleration.

**Manually switching gear with the selector lever**
› To **turn on**, put the selector lever in the D/S position to the right (to the left for right-hand drive vehicles).
› To **turn off**, put the selector lever back in the D/S position.

![Changing up a gear](image)
![Changing down a gear](image)

**Manually changing gear with the shift paddles on the steering wheel**

- Changing down a gear
+ Changing up a gear

To **switch on** the rocker switch, press - or +.
To **turn off** the rocker switch, hold +.

If none of the shift paddles are pressed for a certain time, manual shift mode turns off automatically.

**If the engine threatens to over-rev**
› The gearbox automatically changes to the next higher gear.
› The transmission prevents changing to the next lower gear.

**Troubleshooting**

**The selector lever cannot be moved out of position P in the normal way**
› Mechanically unlock the selector lever » page 163.

**Gearbox overheated**

- illuminates together with 🔴

or

- illuminates together with 🔴

**Message regarding the gearbox overheating**
› You may continue driving, exercising appropriate caution.

- illuminates together with 🔴

or

- illuminates together with 🔴

**Message regarding the gearbox in emergency mode**
› You may continue driving, exercising appropriate caution.
› Immediately seek the help of a specialist garage.

- illuminates together with 🔴

or

- illuminates together with 🔴

**Message regarding a gearbox fault**
› Stop driving! Seek the help of a specialist garage.

- illuminates together with 🔴

**Starting up a vehicle that is stuck**
› Adjust the selector lever between D/S and R. The vehicle will then start to rock and be easier to free.

**Mechanical release of automatic gearbox**
› Secure the vehicle with the parking brake.
› Open the stowage compartment in the front centre console.
Vehicle driving mode

Usage

The driving mode offers the possibility of adapting the driving behaviour to the desired driving style.

Overview

Information about the selected driving mode is displayed in the status bar in the Infotainment screen as well as in the digital instrument cluster.

—heco mode

Eco mode is suitable for a relaxed driving style and helps to save fuel.

—Comfort mode

Comfort mode is suitable for driving on roads with poorer surface or for long motorway journeys.

—to Normal mode

Normal mode is suitable for a normal driving style.

—to Sports mode

Sport mode is suitable for a sporty driving style.

—to Individual mode

Individual mode allows the individual configuration of certain vehicle systems.

—he Offroad mode

Off-road mode is suitable for driving on non-paved roads. But even with Offroad mode switched on, your vehicle is never a true SUV.

The following brake and stabilisation systems change in Offroad mode.

—ESC.
—TCS.
—EDL.
—ABS.

When switched on, OffroadMode is illuminated .

And in the instrument cluster.

Operation

Select driving mode

› Press the button.

In the Infotainment, a driving mode menu appears.

Troubleshooting

Adaptive DCC suspension faulty

illuminates together with or

illuminates together with

› Drive on, exercising appropriate caution. Seek the help of a specialist garage.
Economical driving style

Tips for economical driving and evaluation of driving economy

Tips for economical driving
▶ Avoid unnecessary acceleration and braking.
▶ Observe the recommended gear » page 60.
▶ Avoid full acceleration and too high speeds.
▶ Avoid engine idling during longer periods of stationary time.
▶ Do not warm up the engine while the vehicle is stationary. If possible, start your journey as soon as the engine starts.
▶ Observe the prescribed tyre pressure » page 202.
▶ Remove unnecessary ballast.
▶ Remove the roof rack when it is not needed.
▶ Switch on electric consumers only for as long as necessary.
▶ Do not leave the windows open while driving.

Display of evaluation in the infotainment screen

CAR » DriveGreen
Or:

MENU » DriveGreen

A smooth driving display
With the driving is fluid, the display is located near the green dot.

Leaf
The greener the leaf, the more economic the driving style. Tapping the screen near the leaf displays tips for reducing fuel consumption and energy consumption.

Driving efficiency chart
Each bar indicates driving efficiency in 5 second increments. The current bar is on the left. The higher the green bars, the more economical the driving style.

Point value (0-100)
The higher the indicated value, the more economical the driving style. Tapping the screen near the value displays a rating for the last 30 minutes of driving.

Average fuel consumption

Tapping the screen near the value displays the average fuel consumption during the last 30 minutes of driving.

Information about the current driving style
▶ ECO Economical driving style
▶ The speed has a negative effect on fuel consumption
▶ The ride is not smooth
▶ Recommended gear

In Infotainment it is possible to display up to three consumers that are currently making up the largest share of fuel consumption.

CAR » Convenien. consumers
Or:

MENU » Convenien. consumers

Consumption-friendly driving
In the following situations, a small reduction in fuel consumption occurs. in the instrument cluster lights up.
▶ Active cylinder management has temporarily disabled some cylinders in the engine (applies to certain engine types).
▶ A vehicle with automatic transmission rolls in neutral position.

Towing a trailer

What you should be mindful of

⚠️ WARNING
When driving with a trailer, special care is required!

⚠️ NOTICE
With frequent towing, the vehicle is excessively loaded so this must also be checked between service intervals.

Recommendations for using a trailer
▶ Adjust the tyre pressure on the vehicle for full load.
▶ Do not exceed the maximum permissible total weight of the vehicle and the combination weight specified in the technical vehicle documentation (e.g. in the vehicle registration documentation, in the COC document) and on the type plate.
▶ For trailer operation, consider the current load condition of the vehicle as well as the distribution of the load in the trailer. The coupled trailer increases the rear axle load and can therefore reduce the payload.
▶ Adjust the headlight range of the headlights according to the load status of the vehicle. The front of the vehicle may lift up when a trailer is being towed and the headlights may dazzle other road users.
▶ A speed of 100 km/h should not be exceeded.
Reduce the speed by releasing the accelerator pedal as soon as a pendulum movement of the trailer is noticeable. Never attempt to stop the trailer from swaying by accelerating.

If the traffic area behind the trailer can not be viewed, install additional exterior mirrors.

Apply the brakes in good time. If the trailer is fitted with a trailer brake, apply the brakes gently at first, then brake firmly. This will avoid brake jolts resulting from the trailer wheels locking.

Select a lower gear before descending to also use the braking force of the engine.

### Distribution of the load over the vehicle and trailer combination

- Secure heavy objects against slipping, as close to the trailer axle as possible.
- Transport small and light objects in the luggage compartment.

---

### Permitted trailer loads

The details in the technical vehicle documentation take precedence over the information in this Owner's Manual.

⚠️ **WARNING**

**Risk of an accident!**

Do not exceed the permissible trailer load.

Towing eye and towing procedure

Towing eye

Removing the front cap

› Press on the cap and remove it.

Removing the rear cap

› Press on the cap and remove it.

Installing the towing eye

› Screw in the towing eye.
› Insert the wheel wrench or similar object through the towing eye.
› Tighten the towing eye.

After the towing process
› Unscrew the towing eye.
› Insert the cover cap.

Towing the vehicle

⚠️ WARNING
Risk of an accident!
▶ The tow rope must not be twisted.
▶ When towing, drive at a speed of max. 50 km/h.

⚠️ WARNING
Risk of an accident!
▶ Use a braided synthetic fibre rope for towing. Do not use a twisted tow rope.

⚠️ NOTICE
▶ Always keep the tow rope taut during the towing procedure.
▶ Do not exceed a towing distance of 50 km.

⚠️ NOTICE
Danger of gearbox damage!
▶ If the gearbox no longer contains any oil, the vehicle must only be towed with the front axle raised clear of the ground or transported on a special breakdown vehicle.
▶ Vehicles with automatic transmission must not be towed with the rear axle raised.

Where should the tow rope or the tow bar be secured?
▶ At the front towing eye.
▶ At the rear towing eye.
▶ On the ball bar of the factory-installed towing hitch.

Information for the driver of the towing vehicle
▶ Drive slowly and smoothly.
▶ Only accelerate once the rope is taut.

Information for the driver of the towed vehicle

⚠️ WARNING
Risk of an accident!
When the ignition is switched off, the brake booster and the power steering do not work. In addition, there is a risk that the steering lock will engage.
▶ If it is not possible to start the engine, switch on the ignition!
▶ Move the shift lever to the neutral position or the selector lever to the N position.

Brakes

What you should be mindful of

⚠️ WARNING
Problems and faults with the brake system can extend the braking distance of the vehicle!
DANGER
Danger of a functional restriction of the brake booster!
▶ When braking in a vehicle with manual transmission, when the vehicle is in gear and at low revs, depress the clutch pedal.

DANGER
Danger of the brakes overheating!
▶ Do not depress the brake pedal unless braking is required.
▶ If the standard front spoiler is damaged, ensure the air supply to the front brakes is guaranteed.

Checking the brake fluid level

Test conditions
✓ The vehicle is on a horizontal surface.
✓ Engine turned off.

Checking

The fill level must be within the marked range.
▶ If the level is below the mark MIN, do not continue.
▶ Do not refill liquid.
▶ Seek the help of a specialist garage.

If the brake fluid level is too low, this will be indicated in the instrument cluster by the illumination of . Nevertheless, we recommend checking the brake fluid level regularly directly at the reservoir.

WARNING
Danger of brake failure!
If the fluid level falls significantly within a short time or drops below the mark MIN, the brake system may have become leaky.
▶ Stop driving! Seek the help of a specialist garage.

Specification
The brake fluid must comply with standard VW 501 14. This standard complies with the requirements of the FMVSS 116 DOT4 standard.

Changing
Have the brake fluid replaced by a specialist garage.

WARNING
Danger of brake failure!
If the brake fluid change date is exceeded, heavy braking may cause vapour bubbles to form in the brake system.

Troubleshooting

Brake fluid level is too low
(⚠) illuminates
▶ Stop driving! Seek the help of a specialist garage.

Brake system and anti-lock braking system faulty
(⚠) illuminates together with ☹
▶ Stop driving! Seek the help of a specialist garage.

Worn brake pads
(⚠) illuminates
▶ Drive to a specialist garage, exercising appropriate caution.

Reduced braking effect
Damp, frozen, salt-affected or corroded brakes can impair the braking effect.
▶ Clean the brakes by braking several times if traffic conditions allow it.

When the engine is stopped, the brake booster does not work
▶ Depress the brake pedal more forcefully.

Electric parking brake

Operation

WARNING
Danger of key locking!
▶ The recessed grip for the fingers in front of the button ☺ must remain empty.

Manual switch on

(⚠) in the button.
(☺) in the instrument cluster.

Automatic shut-off
The parking brake switches off automatically when starting up.

If automatic switch-off is to be prevented, e.g. when starting off on a slope, keep the button ☺ pulled.

Conditions for automatic shutting down
✓ Driver's door is closed, in some cases, the driver's seat belt is also fastened.
Manual shut-down

With the ignition switched on, press the brake pedal and at the same time push the button.

Troubleshooting

Parking brake error

Message regarding a parking brake error
› Seek the help of a specialist garage.

Parking on a steep slope

Notification regarding parking position on a steep slope
› Go to another parking spot where there is less of a slope.

Noise when using the parking brake
Noise when using the parking brake is normal. This is not a defect.

The vehicle battery is discharged, the parking brake cannot be switched off
› Connect the vehicle battery to a power source, such as the battery of another vehicle.

Emergency braking in case of faulty brake system

Switching on

› Pull the button and hold it.
  The vehicle starts to brake sharply and an acoustic signal is sounded.

Switching off
› Release the button.
Or:
› Depress the accelerator pedal.

Auto Hold automatic holding function

Usage
Auto Hold automatically secures the vehicle from rolling away when stopped.

Functionality

⚠️ WARNING
Risk of an accident!
Auto Hold is not able to stop the vehicle under all circumstances, such as on slippery ground, or on gradients.

Secure and release the vehicle
With Stop, the vehicle is automatically secured using Auto Hold. is illuminated in the instrument cluster. The brake pedal can be released.

With Start, the vehicle is automatically released using Auto Hold.

Automatic protection from the parking brake
Under certain circumstances, the vehicle can be secured using the parking brake. is illuminated in the instrument cluster.

Operating conditions
✓ The driver's door is closed.
✓ The engine is running or has been switched off by the START-STOP system.
✓ Auto Hold is activated.
✓ On vehicles with an automatic gearbox, the selector lever is not in N mode.

Settings

Activation/deactivation
› Press the button.
  Activation displayed in the button by the illumination of the symbol.

⚠️ NOTICE
Disable Auto Hold to allow the vehicle to roll if necessary when driving through a car wash.
**Driver assist systems**

**Braking and stabilising systems**

**Overview**

**Electronic Stability Control (ESC)**  
ESC helps to stabilize the vehicle in borderline situations (e.g. when the vehicle starts to skid). ESC brakes the individual wheels to maintain the direction of travel.  
- flashes - ESC is engaged

**ESC Sport**  
ESC Sport allows for a sportier driving style.  
- lit up - ESC Sport is activated

**Anti-Slip Regulation (ASR)**  
ASR helps to stabilize the vehicle when accelerating or driving on low-grip roads. ASR reduces the drive power transmitted to the wheels when the wheels spin.  
- flashes - ASR is engaged

**Anti-lock Braking System (ABS)**  
ABS helps maintain control of the vehicle during emergency braking. An ABS intervention is noticeable by pulsating movements of the brake pedal.

**Motor Slip Regulation (MSR)**  
MSR helps to maintain control of the vehicle in the event of a sudden reduction in speed, e.g. on icy roads. If the drive wheels lock, MSR increases the engine speed. As a result, the braking effect of the engine is reduced and the wheels can turn freely again.

**Electronic Differential Lock (EDL)**  
EDL helps to stabilize the vehicle when driving on road surfaces with different grip under the individual wheels. EDL brakes a spinning wheel and transmits power to a different drive wheel.

**Electronic Differential Lock (XDL+)**  
XDL+ helps to stabilize the vehicle during fast cornering by braking the inside wheel of the driven axle.

**Active steering assistance (DSR)**  
In difficult situations, the DSR provides the driver with a steering recommendation in order to stabilise the vehicle.

**Hill Hold Control**  
Hill Hold Control helps when starting off on uphill gradients by braking the vehicle for about 2 seconds after the brake pedal is released.

- The gradient is at least 5%.

**Multi-Collision Brake (MCB)**  
MCB helps to decelerate and stabilize the vehicle after a collision with an obstacle. This reduces the risk of further collisions.

**Operating conditions**
- There has been a frontal, side and rear collision of a certain severity.
- The impact speed was greater than 10 km/h.
- The brakes, ESC and other required systems remained functional after the impact.
- The accelerator pedal is not pressed.

**Trailer Stability Assist (TSA)**  
TSA helps to stabilize the trailer. As the trailer begins to lurch, TSA stabilizes the trailer by slowing down the individual vehicle wheels.

**Operating conditions**
- The hitch was supplied from the factory or purchased from ŠKODA Genuine Accessories.
- The trailer is connected to the trailer socket.
- ASR activated.
- The driving speed is higher than 60 km/h.

**Electromechanical brake booster (electronic brake force distribution)**  
electronic brake force distribution facilitates operation of the brake pedal.

After switching off the ignition, the electronic brake force distribution function is either restricted or not available.

| ![Symbol] Should the vehicle be delayed by means of an assistance system, pulsating movements of the brake pedal may occur. |

**Settings**

**Deactivating/activating ASR**
- Press the button.
  Or:
  - In Infotainment, select the following menu.
    - MENU > >  
  Or:
    - CAR > >

When deactivating goes out in the instrument cluster.

- goes out on renewed activation.

Deactivating the ASR may be helpful in the following situations.
- Driving with snow chains.
- Driving in deep snow or on very loose ground.
- Starting up a vehicle that is stuck.
Activate/deactivate ESC Sport
› Keep the key pressed down.
Or:
› In Infotainment, select the following menu.

MENU > ⚙️ > ⚙️ > ⚙️
Or:
CAR > ⚙️ > ⚙️
When activating lights up in the instrument cluster.
offs goes out when deactivated.

Troubleshooting

ESC or ASR faulty/deactivated by the system
illuminates
› Stop the engine and start again.
› If the indicator light does not go out after covering a short distance, seek the help of a specialist garage.

ABS faulty
illuminates
› You may continue driving, exercising appropriate caution. Seek the help of a specialist garage.

Brake system and anti-lock braking system faulty
illuminates together with ⚙️
› Stop driving! Seek the help of a specialist garage.

Electromechanical brake booster faulty
illuminates
› Stop driving! Seek the help of a specialist garage.

Front Assist

Functionality
Front Assist monitors the distance to the vehicle ahead and points out when the safety distance is exceeded. In borderline situations, it helps to avoid a collision by braking interventions.

Status display in the instrument cluster display
Illuminated - safety distance too small
Illuminated - warning in case of collision

Automatic braking if there is a risk of a collision
If there is a risk of a collision, the following symbol is illuminated as a warning. If you do not respond to the warning, the vehicle will slow down.

At a driving speed of up to 45 km/h, the vehicle is braked without prior warning.
Automatic braking can be stopped by pressing the accelerator pedal or by a steering intervention.
With automatic braking, the pressure in the brake system increases. The brake pedal can not be operated by using the pedal as normal.

⚠️ WARNING
Risk of an accident!
Front Assist does not respond to crossing or oncoming vehicles.

Operating conditions
✓ ASR activated.
✓ The driving speed is higher than 5 km/h.

Function restriction
The function may be restricted or unavailable in the following cases.
› About 30 seconds after starting.
› When driving around a sharp bend.
› During an ESC intervention.

Settings

Automatic activation
Front Assist is automatically activated when the ignition is switched on.

Activation/deactivation in the instrument cluster
In the display in the Assist systems menu item.

Activation / deactivation and setting in Infotainment
In the following menu.

CAR > ⚙️ > ⚙️
Or:
MENU > ⚙️ > ⚙️ > ⚙️

Show system deactivation in the display of the instrument cluster
illuminates together with ⚙️

Deactivate Front Assist when handling the vehicle on a truck, a car ferry etc.

Troubleshooting

Front Assist is not available
› Clean the front radar sensor.
› Stop the engine and start again.
If Front Assist is still unavailable, check the brake lights on the vehicle or on the attached trailer.
Replace the defective bulb.
If the brake lights are working and Front Assist is still unavailable, seek the help of a specialist garage.

There was an unfounded warning or system intervention
Clean the front radar sensor.
If the system is not working properly, disable Front Assist and seek the help of a specialist garage.

Pedestrian detection system

Functionality
Pedestrian recognition helps to prevent a collision with crossing pedestrians by enabling automatic braking interventions.

Status display in the instrument cluster display
lights up - Danger of collision

Risk of collision in a speed range of 5-30 km/h
The system triggers automatic braking.

Risk of collision in a speed range of 30-60 km/h
The system warns of a collision hazard first. If the driver does not respond, the vehicle is automatically braked.

Operating conditions
✓ Front Assist activated.
✓ Driving speed between 5-60 km/h.

Speed limiter

Functionality
The speed limiter controls the maximum driving speed according to the set speed limit.
If the limit is exceeded when driving downhill, brake the vehicle with the brake pedal.

Status display in the instrument cluster display
illuminated - the cruise control is activated.
When the control starts, \( \text{ } \) is highlighted and the set limit is displayed.
illuminated - cruise control is active flashing - the set limit is exceeded

Operating conditions
✓ The driving speed is higher than 30 km/h.

Operation

Variant with GRA

A ON Activate GRA (condition for the subsequent activation of the limiter).
To Enable speed limiter, press the key [D] and in the instrument cluster choose the menu item Speed limit.
OFF Deactivate limiter
cANCEL Interrupt control (sprung position)

B RES/+ Resume control\(^1\)/Increase limit
C SET/- Start control with current speed/Reduce limit
D Show menu of assist systems - Possibility of switching between GRA and speed limiter Switching to GRA interrupts the control.

Adjusting the speed limit with the buttons [B] and [C]
By pressing in steps of 1 km/h.
By holding in steps of 10 km/h.

\(^1\) If no speed limit is set, the current speed is set as the speed limit.
Variant with ACC

Activate ACC (condition for the subsequent activation of the limiter). To enable the speed limiter, press the key ON and in the instrument cluster choose the menu item Speed limit.

- ON: Activate ACC (condition for the subsequent activation of the limiter)
- RESUME: Resume control \(^1\)/Increase limit in steps of 1 km/h (sprung position)
- CANCEL: Interrupt control (sprung position)
- OFF: Deactivate the limiter
- SPEED+ / SPEED−: Increase limit in steps of 10 km/h / Decrease limit in steps of 10 km/h
- SET: Start control/Reduce limit in steps of 1 km/h

Limit exceeded
- Fully depress the accelerator.
Control will continue as soon as the vehicle has decelerated to below the set limit.

Troubleshooting

Speed limiter faulty
- LIM illuminates
  - Seek the help of a specialist garage.

Cruise control system

Functionality

The cruise control system maintains the set speed without the accelerator pedal having to be operated. However, this is only done to the extent permitted by engine performance or engine braking.

- WARNING
  - Risk of the cruise control system starting unintentionally!
    - Deactivate cruise control after use.

Status display in the instrument cluster display
- Illuminated - the cruise control system is activated
- Illuminated - cruise control is active
  - When cruise control starts, the set speed is displayed.

Operating conditions

- The driving speed is higher than 20 km/h.

Operation

Operating with the lever

- ON: Activate cruise control (cruise control deactivated)
- OFF: Deactivate cruise control
- CANCEL: Interrupt control (sprung position)
- RES+/RES−: Resume cruise control \(^2\)/Increase speed
- SET+/SET−: Start control with current speed/Reduce limit
- D: Show menu of assist systems - Possibility of switching between GRA and speed limiter

Accelerate temporarily
- Depress the accelerator pedal.
After you release the accelerator, the speed drops to the previously stored value.

Interrupting cruise control
- After pressing the brake pedal.
- After an ESC intervention.

---

\(^1\) If no speed limit is set, the current speed is set as the speed limit.
\(^2\) If no speed is set, the current speed is adopted.
Troubleshooting

Cruise control system faulty

⚠️  Illuminates

› Seek the help of a specialist garage.

Adaptive Cruise Control (ACC)

Functionality

Control
ACC maintains the set speed. When your vehicle approaches the vehicle in front, ACC will automatically start to maintain the set distance to this vehicle.

Maintaining the set speed and the distance will hereinafter be referred to as Control.

⚠️ WARNING
ACC does not respond to stationary objects or to crossing or oncoming objects.

ACC is intended primarily for use on motorways.

Speed range
Depending on the equipment, ACC allows a speed setting in the range of 30-160 or 30-210 km/h.

If control is started at a speed of less than 30 km/h on vehicles with an automatic transmission, the speed is automatically increased to 30 km/h or controlled according to the speed of the vehicle ahead.

Distance level
The distance to the vehicle ahead can be adjusted to five different levels.

⚠️ WARNING
▶ Maintain a minimum distance in accordance with the country-specific legal regulations.

Automatic stop and start
A vehicle with an automatic transmission can be decelerated to a stop using the ACC and start moving again. Control is disconnected in case of longer holding periods.

› To resume control, depress the accelerator pedal or move the lever into position RESUME.

Overtaking
If your vehicle changes to the fast lane and no vehicle is detected in front, ACC accelerates up to the set speed.

Status display in the instrument cluster display

 ula - ACC is activated

 ula - Control is active

When the control starts, the set speed is displayed.

照亮 - ACC controls the driving speed according to the permissible speed

-operation

Operating with the lever

ON  Activate ACC (control inactive)
RESUME Start or resume control/Increase speed in steps of 1 km/h (sprung position)
CANCEL Interrupt control (sprung position)
OFF Deactivate ACC
SPEED+ Increase speed in steps of 10 km/h
SPEED− Reduce speed in steps of 10 km/h
DISTANCE Set distance level
SET Start control/Reduce speed in steps of 1 km/h

Starting control with the current speed
▶ Tap on SET.

Or:
▶ If no speed is saved, move the lever to the sprung position RESUME.

Set distance level
▶ Move the DISTANCE switch to the sprung position – or +. 

照亮 - ACC controls the driving speed according to the permissible speed

照亮 - ACC does not decelerate sufficiently

Depress the brake pedal.
Line [A] appears in the display, indicating the change in distance.

Use the Distance switch to set the desired distance level.

For temporary acceleration

Depress the accelerator pedal.
The vehicle accelerates and control is temporarily interrupted. Upon releasing the accelerator, control is resumed.

Interrupting cruise control

- After pressing the brake pedal.
- By operating the clutch pedal for a long time.
- After an ESC intervention.
- After deactivation of the ASR.

Resuming control

- If a speed is stored, move the lever to the sprung position Resume.
The vehicle is controlled at the set speed. The set speed is shown in the instrument cluster display.

Function restriction

⚠️ WARNING
- Be particularly attentive and alert in the following situations.

Regulation according to the vehicle in the adjacent lane
If your vehicle is moving faster than the vehicle in the next lane on the driver’s side, at a speed of more than 80 km/h, this may cause your vehicle to be controlled according to that vehicle.

When cornering

When cornering, a vehicle in the next lane may enter the detected area. Your vehicle will be controlled according to this vehicle.

Narrow or staggered vehicle

ACC detects a narrow or staggered vehicle only when it is in the area covered by the radar.

Lane change by another vehicle

A vehicle that changes to the lane a short distance away may not be recognized by the ACC in time.

Stationary vehicle

If a vehicle in front turns and there is a stationary vehicle in front of this vehicle, the ACC will not respond to the stationary vehicle.

Vehicles with special load or special bodies
A load or superstructure that protrudes outside the vehicle might not be detected by the ACC.

Settings

In Infotainment, in the following menu.

- CAR > ⏯️ > ⏯️
- Or:
- MENU > ⏯️ > ⏯️ > ⏯️
Driving program:
- Setting the vehicle acceleration when the ACC is switched on (this setting is made for vehicles with driving mode selection » page 164)
- Last distance selected - Switch the last selected distance level on/off
- Distance: - Setting the distance to vehicles in front
- Take account of the road profile - switch the cruise control on/off according to the road profile (e.g. reduce speed before a bend)
- Take account of permissible speed - Switch the speed control on/off according to the permissible speed

Troubleshooting

ACC not available
-illuminates together with ▶

or
-illuminates together with ▶

Stop the engine and start again.
If ACC is still unavailable, check the brake lights on the vehicle or on the attached trailer.
Replace the defective bulb.
If the brake lights are working and ACC is still unavailable, seek the help of a specialist garage.

Lane Assist

Usage
Lane Assist helps to keep the vehicle within the lane. It is based on the boundaries of a lane. These may include lane markings, road edges or objects such as curbs or possibly traffic cones.
The system is intended primarily for use on highways.

Functionality
As the vehicle approaches a lane marking, the system executes a steering movement in the opposite direction from the lane marking. The steering intervention can be overridden manually.
No system intervention occurs when changing lane with the turn signal on.

Status display in the instrument cluster display
- lights up - System is activated and ready to intervene
- lights up - System is activated and ready to intervene

Adaptive lane guidance functionality
This function keeps the driver within the selected position within the lane. ▶ or ▶ lights up in the instrument cluster display.

Display
Display examples in monochromatic display.

Warning through steering wheel vibrations
If the steering wheel vibrates, this means the system is unable to keep the vehicle in the lane.
Correct the steering movement.

Operating conditions
✓ The driving speed is higher than 60 km/h.
✓ The lane markings are clearly visible.

Function restriction
The system function may be restricted in the following cases.
- The field of view of the sensor is limited by a dirty screen or an obstacle or a preceding vehicle.
- In the event of unfavourable weather conditions.
- When driving around a sharp bend.
- When driving on a steep road or in ruts.
- Driving lane too narrow.
WARNING
Danger of incorrect steering intervention!
Certain objects or markings on the road may be erro-
neously recognized as lane markings.
▶ Always keep your hands on the steering wheel and
be prepared to override the steering intervention.

Settings

Activation/deactivation in the instrument cluster
In the display in the Assist systems menu item
Setting in Infotainment
In the following menu.
CAR > >
Or:
MENU > >

Troubleshooting

Message regarding system unavailability
› Clean the windscreen in the sensor area.
› Stop the engine and restart again after a short
time.
› If the system is still not available, seek the help of a
specialist garage.

Traffic jam assistant

Functionality
The traffic jam assist system helps to keep the vehi-
cle within the lane. At the same time, it maintains the
distance from the vehicle in front.
The system is intended primarily for use on high-
ways.
The traffic jam assist system uses the functions of
the automatic gearbox, the Lane Assist and the ACC.

WARNING
Risk of an accident!
▶ Always keep your hands on the steering wheel and
be ready to take over the steering.
▶ The notes in the functional description of Lane As-
sist and ACC are to be taken into account.

Operating conditions
✓ Lane Assist with adaptive guidance is activated
and the boundary lines of the traffic lane are rec-
ognised.
✓ ACC is activated and speed is regulated.
✓ The driving speed is lower than 60 km/h.

Lane change assist system Side Assist

Usage
Side Assist monitors the area both beside and behind
the vehicle.
The system uses optical signals in the exterior mirror
to alert the driver to vehicles that could be danger-
ous when changing lanes.

Functionality
The system warns of an approaching vehicle through
the illumination of the indicator light ■ in the exteri-
or mirror cover on the vehicle side where the vehicle
is detected.

Driving situations in which a system warning oc-
curs

Your vehicle is overtaken by vehicle [A]. The faster
vehicle [A] approaches, the sooner the warning is giv-
en by the indicator light.
Vehicle [B] is overtaken by your vehicle at a speed
that is faster by max. 10 km/h. If the speed is higher
during the overtaking process, no warning will be
provided by the indicator light.

Indicator light
■ illuminated - There is another vehicle behind your
vehicle
■ flashing - There is another vehicle behind your ve-
hicle, and the turn signal on the same side is switch-
ed on

For vehicles with Lane Assist, the indicator light will
also flash if your vehicle crosses the lane markings in
the direction of the approaching vehicle. The system
will trigger a steering wheel vibration in this case.
For this, Lane Assist must be activated and the lane
marking between the vehicles must be detected.

Operating conditions
✓ The driving speed is higher than 15 km/h.
✓ No accessories are connected to the trailer sock-
et.
Function restriction

The system cannot detect lane width. For this reason, it may, for example, draw attention to a vehicle in a distant lane in the following cases.

▶ Driving on a road with narrow lanes or on the lane edge.
▶ Driving round bends.

The system can draw attention to objects along the road, such as high guard rails or noise barriers.

The system might not warn of a vehicle e.g. in the following cases, or a warning may only be issued incorrectly.

▶ Unfavourable weather conditions.
▶ A very fast approaching vehicle.
▶ When going round a sharp bend or a roundabout.

Settings

In the instrument cluster display
The system settings are made in the display of the instrument cluster in menu item Assist Systems.

In infotainment
The system settings are made in the infotainment system in the following menu.

CAR >  > Road sign recognition
Or:

MENU >  > Road sign recognition

Troubleshooting

Message regarding system unavailability

▶ Stop the engine and start again.
▶ If the system is still not available, seek the help of a specialist garage.

Traffic sign recognition

Usage

The road sign recognition shows road signs in the display of the instrument cluster. This also indicates exceeding the speed limit.

Functionality

Displayed road signs

▶ Speed limit.
▶ Overtaking prohibited.
▶ Driving bans – one-way traffic.
▶ Additional characters, e.g. speed limit in wet conditions.

⚠ WARNING

Road signs on the road always have priority over the road signs shown on the display.

Towing a trailer
If a trailer or other accessory is connected to the trailer socket, trailer-relevant road signs are also displayed.

Driving on roads without speed limits
If you are on a road with no speed limits, the road signs ⚠️ will appear in the display.

Example of road sign display

Example of additional characters

Example of several simultaneously recognised road signs.

Speed units
The speed indications in the road signs shown refer to the speed units that are common in the country.

For example, the ⚠️ display may refer to 30 km/h or 30 mph depending on the country.

Restriction

The system function may be restricted in the following cases.

▶ The sensor is blinded by the sun or oncoming traffic.
▶ The field of view of the sensor is limited by an obstacle or a preceding vehicle.
▶ In the event of unfavourable weather conditions.
▶ At high speeds.
▶ The road signs are hidden, damaged, or are non-standard.
▶ The road signs are attached to flashing neon signs.
▶ Non-current or unavailable map documents for the navigation.

Settings

In Infotainment, in the following menu.

CAR >  > Road sign recognition
Or:

MENU >  > Road sign recognition

Road Sign Recognition
Crew Protect Assist proactive occupant protection

Usage
The Crew Protect Assist system increases occupant protection in the front seats if a collision is imminent.

Functionality
The first level of protection
With a dynamic driving style, the system tightens the front seat belts on the body.

The second level of protection
If the system evaluates the situation as critical:
- The front seat belts are tightened on the body.
- Open windows are closed except for a small gap.
- The sliding/tilting roof is closed.

Settings
Automatic activation
The system is automatically activated when the ignition is switched on.

Deactivation of the first protection level
The first protection level can be deactivated as follows.
- By activating ESC Sport.
- By deactivating the ASR.
- By selecting the driving mode Sport.
- By selecting the driving mode Offroad.
- In Infotainment, in the following menu.

Emergency situation assist system Emergency Assist

Usage
The assistant for emergencies detects inactivity of the driver, which, for example, can be caused by a sudden loss of consciousness. The system then performs measures as safely as possible to decelerate the vehicle to a stop.
The assist systems are only available for vehicles with an automatic gearbox.

**Functionality**

**When the assist system detects inactivity on the part of the driver**
- An acoustic warning signal sounds and a message appears in the instrument cluster display.
- If, after repeated warnings, the driver does not take over the steering, the hazard warning lights are switched on and the vehicle automatically brakes.
- After the vehicle has come to a standstill, the parking brake is switched on.

**Interruption of automatic braking**
- By pressing the brake or accelerator pedal.
- By actively steering.

**Operating conditions**
- ✓ Lane Assist is activated and the boundary lines of the traffic lane are recognised.
- ✓ ACC is enabled.

**Hill descent assistant**

**Functionality**

The hill descent assist system helps to keep a constant speed when driving downhill by undertaking automatic braking interventions.

The system also works when driving in neutral or when the reverse gear is engaged.

⚠️ **WARNING**
Risk of an accident!
The assist system cannot properly fulfil its function on slushy soil due to physical reasons (e.g. ice or mud).

**Status display in the instrument cluster display**
- ➡️ lit up in grey - the system is activated
- ➡️ lit up in white - the system intervenes

**Alter the speed**
The driving speed can be changed by pressing the brake or accelerator pedal. After releasing the pedal, the assist system maintains the current speed.

**Operating conditions**
- ✓ The engine is running.
- ✓ Offroad mode is enabled.
- ✓ The gradient is at least 10%.

**Settings**

**Automatic activation**
The system will be automatically activated when you turn on Offroad mode.

**Activation/deactivation in Infotainment**
The system is activated or deactivated in the following menu.

MENU > 🗺️ > 🎯
Or:
CAR > 🎯
Park Assist systems

Park Pilot parking aid

Functionality

If an obstacle is detected, the infotainment will display a visible message and an audible signal will sound.

The interval between the signals becomes shorter as the clearance is reduced. At a distance of less than 30 cm from the obstacle, a continuous tone sounds.

If the driver does not respond to the warning, the system triggers automatic emergency braking at speeds below 8 km/h in order to reduce the impact.

Automatic braking can be activated and deactivated in the infotainment.

Display

The recorded areas vary according to the equipment.

- Route controlled at the current steering angle
- Acoustic signals on/off
- One-time deactivation/activation of automatic braking
- Change to the rear view camera display
  - System fault
- Obstacle at a distance of less than 30 cm
- Obstacle at a distance of more than 30 cm
- Obstacle outside the route

Operating conditions

- The driving speed is lower than 15 km/h.
- No accessories are connected to the trailer socket.

Operation

Switching on

- Engage reverse gear.
  - Or:

Automatic switch-on during forward travel

When approaching an obstacle at a speed of less than 10 km/h.

Automatic switch-on does not activate automatic braking.

Switching off

- Disengage reverse gear.
  - Or:
    - Press the P₄ button.

Automatic switch off

The driving speed is higher than 15 km/h.

Function restriction

The system might not warn of an obstacle e.g. in the following cases, or a warning may only be issued incorrectly.

- Unfavourable weather conditions.
- The detected obstacles are moving.
- Sensor signals are not reflected by the surface of the obstacles.
- It is a small obstacle, e.g. a stone or a pillar.

Settings

The system settings are made in the infotainment system in the following menu.

-CAR > 📰 > P₄
  - Or:

-MENU > 📰 > 📰 > P₄

Troubleshooting

After switching on, an audible signal sounds for 3 seconds and there is no obstacle near the vehicle

- Seek the help of a specialist garage.

After switching on, the symbol P₄ flashes in the button

- Seek the help of a specialist garage.

After switching on, not all scanned areas are displayed on the Infotainment screen

- Move the vehicle a few meters forwards or backwards.
- If the scanned areas are still not displayed, seek the help of a specialist garage.
Rear view camera

Functionality

When reversing, the area behind the vehicle is displayed in the Infotainment screen complete with orientation lines.

The camera is equipped with a cleaning system. Cleaning takes place automatically when the rear or front window is washed.

Orientation lines and functional surfaces

Orientation lines

A  Distance about 40 cm
B  Distance about 100 cm
C  Distance about 200 cm
D  The lines indicate the track, which is controlled at the current steering angle. The distance between the side lines corresponds approximately to the vehicle width including mirrors.

Function surfaces

A  Mode for transverse parking
B  Mode for parallel parking
C  Mode for driving up to a trailer/distance monitoring
D  Mode for monitoring the area behind the vehicle (wide view)
E  Brightness, contrast and colour settings of the screen
F  Parking Assist View
   ⍀/⌘ Switch the view on / off
   ⎄ Full Screen

Operating conditions

✓  The ignition is switched on.
✓  The driving speed is lower than 15 km/h.

Operation

Switch on the system

› Engage reverse gear.
Or:
› Press the P button.

When switching on, an alarm sounds and the symbol P lights up in the button.

Mode for transverse parking

› Stop the vehicle in front of a suitable parking space.
› Reverse so that the yellow lines lead into the parking space.
› At the latest, stop when the red line touches the rear boundary (e.g. curb).

Mode for parallel parking

› In the screen, select the mode for parallel parking.
› Turn on the indicator light for the side on which you want to park.
› Stop the vehicle so that there are no obstructions in the gap between the auxiliary boxes [A] and the rear box does not extend over the side of the parking space (e.g. kerb).
› Turn the steering wheel in the recommended direction [B] until the red colour of the trapezoidal border [C] turns green.
Hold the steering wheel in the adjusted position and reverse.
Stop the vehicle if the green line overlaps with the lateral boundary of the parking space (e.g. the curb) or if is displayed.
Countersteer until the yellow lane line crosses the red line for the required lane orientation.
Hold the steering wheel in the adjusted position and reverse.
Stop the vehicle at a safe distance from the obstacle or when is displayed.

Mode for driving up to a trailer/distance monitoring
The screen shows the area behind the vehicle in plan view.
On vehicles with a factory fitted tow-bar, this mode assists the driver when the vehicle is approaching a trailer draw bar. A line for approaching the trailer draw bar and lines for estimating distance are displayed on the screen.
For vehicles without a factory fitted tow bar, a line for monitoring the distance to obstacles is displayed on the screen at a distance of 40 cm behind the vehicle.

Mode for monitoring behind the vehicle
The area behind the vehicle is displayed on the screen.

Switch off the system
Press the P4 button.
Or:
For vehicles with an automatic gearbox, put the selector lever in the P position.

Automatic shut-off
The automatic system shut-off occurs when driving forward at a speed over 15 km/h.

Restriction
The camera image is distorted in contrast to the naked eye. The display may only be used to estimate the distance.
Some items may not be displayed properly on the screen. These include narrow columns, wire mesh fences, grids or road bumps.

Rear Traffic Alert
Functionality
When reversing, the Rear Traffic Alert warns of approaching vehicles.
If the driver does not respond to the warning, the vehicle is braked automatically at a speed below 10 km/h.

Vehicle with Park Pilot
If an approaching vehicle is detected in the area behind your vehicle, a graphical warning is displayed in the Infotainment. At the same time, a continuous tone sounds.

Vehicle without Park Pilot
If an approaching vehicle is detected in the area behind your vehicle, the warning is displayed in the instrument cluster display, indicating to the driver to monitor the traffic behind. At the same time, an acoustic signal sounds.

Operating conditions
✓ No accessories are connected to the trailer socket.

Function restriction
Manoeuvre Assist’s functionality may be limited in unfavourable weather conditions.

Settings
The system is activated or deactivated in the instrument cluster display in the Assist systems menu item.
The system is activated or deactivated in the following menu in the Infotainment system.

**CAR > P10**
Troubleshooting

Message regarding system unavailability
› Stop the engine and start again.
› If the system is still not available, seek the help of a specialist garage.

Park steering assistant

Usage

Park Assist helps drivers park in parallel and perpendicular parking places and to manoeuvre out of parallel parking spaces.

What you should be mindful of

Do not use the system in the following cases.
▶ On unpaved or slippery surfaces.
▶ If snow chains or a spare wheel are mounted on the vehicle.
▶ If the system chooses an inappropriate parking space for parking.

Functionality

The system looks for a parking space and only takes over the steering during the parking procedure or when leaving a parking place. The driver operates the pedals and the shift lever/gear selector.

The system displays information and notes on the instrument cluster display.

If the system detects a risk of collision, automatic emergency braking takes place to prevent a collision.

Operating conditions

✓ The driving speed is lower than 7 km/h.
✓ The ASR is activated and there is no intervention.
✓ There is no driver intervention in the automatic steering operation.
✓ No accessories are connected to the trailer socket.

Operation

Turn on/turn off
› Press the P₉ button.

When the system is switched on, the symbol lights up in the button P₉.

Select the lane side for the parking procedure
The system automatically searches for a suitable parking space on the passenger side.
› Press the driver's side indicator to find a parking space on this side of the road.

Operation while searching for a parking space
› Drive past a number of parked vehicles at a distance of 0.5–1.5 m.
› To search for a parking space across the road, drive slower than 20 km/h.
› To search for a parking space along the road, drive slower than 40 km/h.

If the symbol Ø (km/h) appears in the display, reduce the driving speed. If the system finds a parking space, the display will show the recommended parking mode.

Changing the parking mode
If a suitable parking space is found, the following Park modes can be shown in the display.

A Park backwards longitudinally
B Park backwards crosswise
C Park forwards across

The parking mode can be changed by pressing the button P₉.

Press the button again P₉ and the system is switched off.
› To return to the original recommended parking mode, press the button P₉ again.

Before the parking process
› If a suitable parking space is found, stop and drive backwards or forwards as indicated by the arrow in the display.
› When a steering intervention message is displayed, release the steering wheel. The steering operation is taken over by the system.
Parking operation

⚠️ CAUTION
Risk of injury!
▶ Do not reach between the steering wheel spokes during the parking manoeuvre.
▶ Only operate the pedals and the shift / selector lever.
› Observe the area around the vehicle and drive backwards or forwards in accordance with the arrow in the display.
› As soon as the symbol 🅴 appears in the display and an audible signal sounds, stop the vehicle. The steering wheel is taken over accordingly. The symbol 🅴 goes out.
› Travel backwards or forwards in accordance with the arrow in the display.

As soon as the parking process is completed, the corresponding message is displayed and an audible signal sounds.

The parking procedure can be ended at any time by pressing the button 🅴.

⚠️ When partially parked in a suitable transverse parking space forward, press button 🅴. The parking process is completed by the system.

Exiting a parking space

› Press the 🅴 button.
  When the system is switched on, the symbol lights up in the button 🅴.
› Follow the instructions on the screen.

Automatic speed reduction

If a speed of 7 km/h is exceeded during the parking process, the system will reduce the speed.
Upon the speed being exceeded by 7 km/h a second time, the parking process is terminated.

Function restriction

If the parking space is too small, it is not possible to use the system to initiate a parking manoeuvre. A message is shown on the instrument cluster display.

Troubleshooting

Message regarding system unavailability
› Stop the engine and start again.
› If the system is still not available, seek the help of a specialist garage.

Incorrect resulting position of the vehicle in the parking space
The correct parking procedure depends on the size of the wheels. If other wheels approved by ŠKODA AUTO are fitted, have the system readjusted by a specialist garage.
Engine, exhaust system and fuel

Bonnet

Opening the bonnet

Before opening
› Make sure the windscreen wiper arms are folded down onto the windscreen.
› Keep everyone away from the engine compartment.

To open
› Pull the release lever underneath the dash panel.
› Release the lock.
› Lift the bonnet so that the gas pressure springs hold it open.

Closing
› Pull the flap down.
› Close the flap with a slight push from a distance of about 20 cm.
› Check that the bonnet is closed.

1 NOTICE
› Do not press down on an unclosed bonnet.

Engine oil

Checking the fill level and topping up

Test conditions
✓ The vehicle is on a horizontal surface.
✓ The parked engine is warm.

Checking the level
› Wait a few minutes for the engine oil to flow back into the oil sump.
› Remove the dipstick and wipe with a clean cloth.
› Insert the dipstick as far as it will go and pull it out again.

The oil level must be within the marked range.

1 NOTICE
Risk of damage to the engine and the exhaust system!
› The oil level must not be outside the marked range. If it is not possible to top up the engine oil or if the oil level is above the marked range, do not continue driving. Stop the engine and seek the help of a specialist garage.
› Do not use any oil additives.

Consumption
Depending on driving style and operating conditions, the engine consumes some oil, up to 0.5 l/1000 km. Consumption may be higher over the next 5000 km.

Refilling
› Unscrew the cover of the engine oil filler opening.
› Top up the oil to the correct specification in 0.5 litre portions.
› Check the oil level.
› Screw on the cover of the engine oil filler opening.

Specification
Ask a specialist garage for the correct engine oil specification for your vehicle.
If no oil of the correct specification is available, max. 0.5 l of oil with the following specifications may be used until the next oil change.

1 Petrol engines: VW 504 00, VW 508 00, ACEA C3, ACEA C5.
1 Diesel engines: VW 507 00, VW 509 00, ACEA C3 or API CJ-4. For vehicles without a particulate filter, VW 505 01 can be optionally used.

Changing
Have the oil changed by a specialist garage.

Troubleshooting

Engine oil pressure too low
леч, lights up at the same time 🔒

C High temperature range

**Checking the fill level and topping up**

**Test conditions**
✓ The vehicle is on a horizontal surface.
✓ The engine is turned off and cooled.

**Checking the level**

The fill level must be within the marked range.
› If the fill level is below the mark **MIN**, top up the coolant.

① **NOTICE**
Danger of damage to the engine compartment!
▶ Do not top up the coolant above the marked area. The coolant could be forced out of the cooling system when heated.

② **NOTICE**
There must be a small quantity of coolant in the tank.
▶ Do not add coolant when the tank is empty.
▶ Stop driving! Seek the help of a specialist garage.

**Refilling**

▲ **CAUTION**
Risk of scalding!
The cooling system is pressurised.
▶ Do not open the cap of the coolant expansion tank while the engine is warm. Let the engine cool down.
▶ Place a rag on the lid of the tank and carefully unscrew the lid.
▶ Refill with coolant of the correct specification.
▶ Screw on the cap until it clicks into place.

**Specification**
Use the G12evo (TL 774 L) additive for refilling.

① **NOTICE**
Risk of damage to the cooling system and the engine!
Adding coolant that does not conform to the correct specification can reduce the corrosion protection of the cooling system.
Troubleshooting

Coolant level too low
illuminates together with 
illuminates together with 
Message concerning the required coolant check
› Check the coolant level.

The coolant level is OK:

**AdBlue**

**Regulations**

Only use AdBlue\textsuperscript{®} that complies with the ISO 22241-1 standard. Do not mix any additives to the AdBlue\textsuperscript{®}.

AdBlue\textsuperscript{®} is a registered trademark of VDA and is also known as OFF 32 (Aqueous Urea Solution) or DEF (Diesel Exhaust Fluid).

**Functionality**

In order to reduce pollutant emissions, a urea solution is automatically injected into the exhaust system - AdBlue\textsuperscript{®}.

AdBlue\textsuperscript{®} freezes at temperatures below -11 C. System function is ensured by an automatic heating system.

**Checking the fill level and topping up**

**Checking the level**

The AdBlue\textsuperscript{®} level is automatically monitored.

The range with the existing AdBlue\textsuperscript{®} tank fill level as well as the indication of the minimum and maximum AdBlue\textsuperscript{®} top up quantity can be displayed in the driving data in the instrument cluster display in the menu item \( \textcolor{red}{\text{F}} \).

If the range with the existing AdBlue\textsuperscript{®} tank filling level drops to 0 km, it is not possible to start the engine.

› If possible, top up AdBlue\textsuperscript{®} to the maximum level.

**Requirements for refilling**

✓ Vehicle unlocked.
✓ Ignition switched off.
✓ Park the vehicle on a horizontal surface.

**Methods of refilling**

› With the fuel nozzle at the gas station.
› With the refill bottle or from the canister.
At a specialist garage.

We recommend using refill bottles or canisters, refill bottles and canisters from ŠKODA original parts for refilling. The refill bottles are equipped with overfill protective function.

**Refilling**

› Open the tank flap.

› Turn the tank cap in the direction of the arrow and remove it.

› Place the tank cap on the tank flap.

› Top up AdBlue®.

The AdBlue® tank is full when the fuel nozzle switches off or as soon as no more AdBlue® flows out of the refill bottle. Do not continue refilling.

› Place the tank cap on the filler neck and turn it in the opposite direction to the arrow until it clicks into place.

› Close the tank flap and click into place.

› Before starting the engine, leave the ignition on for 30 seconds to allow the system to detect the refilling.

₁ NOTICE
Risk of damage to the system for the injection of AdBlue® in the exhaust system!

› Do not exceed the maximum refill quantity specified in the instrument cluster.

› The service life of AdBlue® is 4 years. If the tank contents are not consumed within this period, have them replaced by a specialist garage. For refilling, do not use any AdBlue® which has passed its expiry date.

**Troubleshooting**

AdBlue® level too low

🎁 or ✮ or 🔴 lights up

› Top up AdBlue®.

AdBlue® system impaired.

📅 or ⏰ or ⚠️ lights up

› Seek the help of a specialist garage.

**Technical data**

The AdBlue® tank capacity is approximately 13 litres.

---

**Petrol**

**What you should be mindful of**

⚠️ DANGER
Risk of death!
Fuel and fuel vapours are explosive.

₁ NOTICE
Risk of damage to the engine and the exhaust system!

› Never empty the fuel tank completely!

If you would like to operate your vehicle in a country other than that intended for vehicle operation, please contact a ŠKODA Partner. They will let you know whether a suitable fuel is offered in the associated country.

**Regulations**

**Standards**

Petrol must comply with European standard EN 228 (in Russia, GOST 32513-2013).

Only use unleaded petrol that contains max 10% bioethanol (E10).

₁ We recommend using petrol with additives, which is available at petrol stations at the petrol pumps.

**Octane number**

Use the petrol with the octane number prescribed for your vehicle.

Petrol with an octane number that is one higher than the one prescribed for your vehicle can be used without restriction.

₁注意到
Risk of damage to the engine and the exhaust system!

› If petrol is used that has an octane number that is lower than the one prescribed for your vehicle, then drive at moderate speeds with minimal engine stress.

› Fill up with the prescribed octane number as soon as possible.

› Do not use petrol with an octane number that lower than 91!

**Prescribed petrol 95 / min. 92 or 93 RON / ROZ**

We recommend using 95 RON petrol.

92 or 93 RON petrol may be used as an option (low power loss, slightly increased fuel consumption).

In an emergency, 91 RON petrol may be used (low power loss, slightly increased fuel consumption).

**Prescribed petrol min. 95 RON / ROZ**

Use min. 95 petrol.
Using higher octane petrol than 95 RON may result in improved performance and lower fuel consumption.

In an emergency 91, 92 or 93 RON may be used (low power loss, slightly increased fuel consumption).

**Prescribed petrol 98 / (95) RON / ROZ**

We recommend using 98 RON petrol.

95 RON petrol may be used as an option (low power loss, slightly increased fuel consumption).

In an emergency 91, 92 or 93 RON may be used (low power loss, slightly increased fuel consumption).

**Additive**

-important NOTICE

Risk of damage to the engine and the exhaust system!

- Do not use petrol containing metal-based additives, e.g. manganese, iron, lead, and do not use, for example, any LRP petrol – lead replacement petrol.

- Do not add any additional additives to the petrol in accordance with EN 228.

- If petrol is not used in accordance with EN 228, we recommend obtaining information from a specialist company regarding the possible use of petrol additives approved by ŠKODA AUTO.

**Requirements for refuelling**

- Vehicle unlocked.
- Ignition switched off.

**Refilling**

- Open the tank flap.
- Turn the tank cap in the direction of the arrow and remove it.
- Place the tank cap on the tank flap.
- Insert the fuel nozzle into the fuel filler neck up to the stop and refuel.
- Do not continue refuelling after the fuel nozzle switches off.
- Remove the fuel nozzle and put it back on the petrol pump.
- Place the fuel cap on the fuel filler neck and turn it in the opposite direction to the arrow until it clicks into place.
- Close the tank flap and click into place.

**Troubleshooting**

If fuel other than unleaded petrol has been refuelled according to the standards applicable to your vehicle

- Do not start the engine or switch on the ignition.
- Seek the help of a specialist garage.

**Technical data**

The fuel prescribed for your vehicle is indicated on a sticker on the inside of the fuel filler flap.

[Diagram showing fuel types: A Unleaded petrol, B Organic share as a percentage]

The fuel tank has a capacity of about 66 litres, including a reserve of approx. 6 litres.

- illuminates - the fuel level has reached the reserve area.

**Diesel**

What you should be mindful of

- **DANGER**
  Risk of death!
  Fuel and fuel vapours are explosive.

- **NOTICE**
  Risk of damage to the engine and the exhaust system!

- Never empty the fuel tank completely!

If you would like to operate your vehicle in a country other than that intended for vehicle operation, please contact a ŠKODA Partner. They will let you know whether a suitable fuel is offered in the associated country.

**Regulations**

**Standards**

The diesel fuel must comply with European standard EN 590 (in Russia, GOST 32511-2013 or GOST R 55475-2013).

Only use a diesel fuel that contains a maximum of 7% biodiesel (B7).
We recommend using diesel with additives, which is available at petrol stations at the petrol pumps.

**Operation in different weather conditions**

Only use a diesel fuel according to the current or the expected weather conditions.

**Additive**

⚠️ **NOTICE**

Risk of damage to the engine and the exhaust system!

- Do not use RME biofuel, even as a diesel fuel additive.
- Do not add any additional additives to the diesel in accordance with EN 590.
- If diesel is not used in accordance with EN 590, we recommend obtaining information from a specialist company regarding the possible use of diesel additives approved by ŠKODA AUTO.

**Requirements for refuelling**

- Vehicle unlocked.
- Ignition switched off.

**Refilling**

**Misfuelling protection**

The fuel filler neck on diesel vehicles may be equipped with a misfuelling protection device.

In some countries, the diameter of the diesel fuel nozzle may be identical to that of the petrol nozzle. Before driving in these countries, have the protection device removed by a specialist garage.

**Refilling**

- Open the tank flap.
- Turn the tank cap in the direction of the arrow and remove it.
- Place the tank cap on the tank flap.
- Insert the fuel nozzle into the fuel filler neck up to the stop and refuel.
- Do not continue refuelling after the fuel nozzle switches off.
- Remove the fuel nozzle and put it back on the petrol pump.
- Place the fuel cap on the fuel filler neck and turn it in the opposite direction to the arrow until it clicks into place.
- Close the tank flap and click into place.

**Troubleshooting**

If a fuel other than diesel fuel has been refuelled to the appropriate standard

- Do not start the engine or switch on the ignition.
- Seek the help of a specialist garage.

The diesel fuel nozzle cannot be correctly inserted into the filler neck

- If the fuel nozzle cannot be properly inserted into the fuel filler neck, move it slightly back and forth when inserting it.

**Technical data**

The fuel prescribed for your vehicle is indicated on a sticker on the inside of the fuel filler flap.

- Diesel
- Organic share as a percentage

The fuel tank has a capacity of about 66 litres, including a reserve of approx. 6 litres.

⚠️ illuminates - the fuel level has reached the reserve area.
Vehicle battery and fuses

Vehicle battery

Functionality - Discharge protection

Possible causes of battery discharge
▶ Frequent short-distance traffic.
▶ Low temperatures.
▶ Vehicle stationary for a long period of time.

System-related discharge protection measures
▶ Increasing the engine idling speed.
▶ Switching off certain consumers or limiting their power.

Measures to be taken when vehicle stationary for more than three weeks
▶ Disconnect the terminal of the vehicle battery.

Checking and charging the vehicle battery

Checking the condition
The battery condition is checked by a specialist garage during servicing.

Checking the acid level
Applies to a vehicle battery with an acid level indicator.

Requirements for the charging process
✓ Ignition switched off.
✓ Power consumers switched off.

Vehicle battery charging process
To charge the vehicle battery fully, set a charging current of max. of 0.1 times the battery capacity.

Troubleshooting

Vehicle battery does not charge while the engine is running
-or – illuminates
▶ Seek the help of a specialist garage.

Engine fault
- or – lights up
▶ Stop driving!
▶ Stop the engine and seek the help of a specialist garage.

Disconnecting, connecting and replacing

⚠️ CAUTION
Risk of fire!
▶ Do not mix up the connection cables.

Disconnecting
▶ Close the electric boot lid, the tilting/sliding sunroof, all windows and the electric sunblind.
▶ Switch off the ignition and any connected power consumers.
▶ Disconnect the ☐ terminal and then the ☐ terminal.

Connecting
▶ Connect the ☐ terminal of the charger to the ☐ terminal of the vehicle battery.
▶ Connect the ☐ terminal of the charger to the earth point [A].
▶ Plug the charger’s power cable into the socket and switch on the device.

After charging, switch off the charger and unplug the power cable from the socket.
▶ Disconnect the charger terminals from the vehicle battery.

⚠️ WARNING
Risk of explosion!
▶ During charging, hydrogen is released. An explosion can also be caused by sparks, for example, when disconnecting or loosening the cable connector.
▶ Never charge a frozen or thawed vehicle battery.
▶ Do not carry out the so-called quick charging of the vehicle battery yourself, but have it carried out by a specialist garage.

⚠️ NOTICE
A flat vehicle battery can freeze easily!

Commission these functions after disconnecting and connecting the vehicle battery
▶ Clock setting » page 59.
Window operation » page 28.
Operation of the tilting/sliding sunroof » page 29,
Sunblind » page 29.

Changing
The new vehicle battery must have the same parameters as the original battery. Have the replacement carried out by a specialist garage.

Using the jump-starting cable

What you should be mindful of

⚠️ WARNING
Risk of explosion and chemical burns!
- Do not jump start with the battery of another vehicle under the following conditions.
  - The discharged vehicle battery is frozen. A discharged vehicle battery can freeze at temperatures just below 0°C.
  - The battery acid level is too low » page 193.

Use jump leads with a sufficient cross section and insulated terminal clamps.

The rated voltage of both batteries must be 12V. The capacity (in Ah) of the charging battery must not be significantly lower than the capacity of the discharged battery.

Jump-starting with the battery of another vehicle

⚠️ WARNING
Risk of injury and danger of vehicle damage!
- Lay the jump start cables so that they cannot become caught by rotating parts in the engine compartment.

⚠️ NOTICE
Short circuit!
- The non-insulated parts of the terminal clamps must not touch each other.
- The cable connected to the positive pole of the battery must not come into contact with electrically conductive vehicle parts.
- The vehicles must not touch each other.

Connect the jump start cable
- Connect the terminal clamps of the jump start cables in the order shown in the legend.

Start the engine
- Start the engine of the current-giving vehicle and let it idle.
- Start the engine of the vehicle with the flat battery.
- If the engine of the vehicle with the flat battery does not start within 10 seconds, repeat the starting procedure after approximately 30 seconds.

Disconnecting the cable
- Disconnect the cables in the reverse order from connection.

Fuses

What you should be mindful of

⚠️ NOTICE
Fire hazard and risk of damage to the electrical system.
- Do not repair fuses or replace them with stronger fuses.
- Replace the defective fuse with a new fuse with the same amperage.
- We recommend using replacement fuses from the ŠKODA Genuine Accessories range. These guarantee reliable and safe consumer protection.
- If a newly inserted fuse blows again, seek the help of a specialist garage.
One fuse may belong to several consumers. One consumer may have several fuses.

Functionality

Blown fuse

Conditions for the replacing a fuse

✓ Ignition switched off.
✓ Driver door opened.
✓ All consumers switched off.

Replacing a fuse

› Replace the fuse with the clamp located on the inside of the fuse box cover in the engine compartment.
› Use the appropriate end of the clamp according to the fuse dimensions.

Fuses overview

Fuses in the dash panel

Overview

Access to fuses – left-hand drive
› Open the storage compartment on the driver's side.
› Grasp the side storage compartment in area A and open it.
› Change the fuse.
› Close the storage compartment.

Access to fuses – right-hand drive
› Open the storage compartment on the passenger's side.
### Fuses in the engine compartment

#### Overview

**Access to the fuses**

1. Simultaneously press the locking buttons on the fuse box cover and remove the cover.
2. Change the fuse.
3. Fit the cover and click into place.

**NOTICE**

Danger of water entering the fuse box.
- Fit the cover correctly and click into place securely.

Wheels

Tyres and rims

What you should be mindful of

1. **NOTICE**
   - Protect tyres from contact with lubricants and fuel.
   - Always store wheels or tyres in a cool, dry and, where possible, dark place. Tyres without rims should be stored in an upright position.
   - Alloy rims can be damaged by grit.

Causes of uneven tyre wear

- Improper tyre pressure.
- Driving style (e.g. fast cornering, rapid acceleration and deceleration).
- Wheel alignment error.
- Incorrect wheel balancing.

Wheel changes

For uniform wear on all tyres, we recommend that you change the wheels every 10,000 km according to the schedule.

Advice for tyre assembly

- Follow the specified running direction, otherwise the driving characteristics may be impaired. The direction of rotation of the tyres is marked by arrows on the wall of the tyre.
- Always replace the tyres by the axle.

Additional information

Only fit radial tyres of the same type, size (rolling circumference) and the same tread pattern on one axle. Approved tyre sizes are specified in the technical vehicle documentation and in the declaration of conformity (in the so-called COCDocument).

The declaration of conformity can be obtained from a ŠKODA Partner (valid for some countries and some models).

Overview of tyre labelling

Explanation of tyre markings

e.g. 216/60 R 16 95 V

- 216 Tyre width in mm
- 60 Height/width ratio in %
- R Code letter for the type of tyre - Radial
- 16 Diameter of wheel in inches
- 95 Load index
- V Speed symbol
load index
The load index indicates the maximum permissible load for each individual tyre

- 91: 615 kg
- 92: 630 kg
- 93: 650 kg
- 94: 670 kg
- 95: 690 kg
- 96: 710 kg
- 97: 730 kg
- 98: 750 kg
- 99: 775 kg

Speed symbol
The speed symbol indicates the maximum permissible speed for a vehicle fitted with tyres in the category concerned

- M: 130 km/h
- T: 190 km/h
- U: 200 km/h
- H: 210 km/h
- V: 240 km/h
- W: 270 km/h
- Y: 300 km/h

⚠️ WARNING
▶ Do not exceed the maximum permissible load bearing capacity and speed for the tyres fitted.

Tread wear indicators
Wear indicators are located in the profile of the tyres that display the permissible minimum tread depth. Markings on the walls of the tyres with the letters “TWI” or other symbols (e.g. △) indicate the position of the wear indicators.
A tyre is to be regarded as worn out when this wear indicator is flush with the tread.

⚠️ The tread depth can be measured using a tread depth gauge on the ice scraper. The ice scraper is located on the inside of the fuel filler flap.

⚠️ WARNING
Risk of an accident!
▶ Do not use worn tyres.

Tyre manufacturing date
The date of manufacture is indicated on the tyre sidewall.
For example, DOT ... 10 19 means that the tyres were produced in the 10th week of the year 2019.

⚠️ WARNING
Risk of an accident!

Troubleshooting
Help with a flat tyre
▶ Spare and emergency spare wheel » page 199.
▶ Changing the wheel and raising the vehicle.
▶ Breakdown kit » page 201.

Change of tyre pressure
⚠️ illuminates
▶ Stop the vehicle.
▶ Check the tyres and tyre pressures.

Show tyres with modified pressure
In the following menu, select the menu item for displaying the tyre condition.

MENU → 🗃 → ⚠
Or:
CAR → ⚠

All-season or winter tires

Usage
All-season or winter tyres improve handling in winter weather conditions. They are characterised by ‘M+S’ and a mountaintop and snowflake symbol 🗃.

What you should be mindful of
For the best possible handling, use tyres on all four wheels with a minimum tread depth of 4 mm.
Change winter tyres to summer tyres at the appropriate time. Summer tyres have better driving and braking characteristics on snow- and ice-free roads and at temperatures above 7 °C.

Usage conditions
If all-season or winter tyres are installed that have a lower speed category than the actual specified maximum vehicle speed, then proceed as follows.
▶ In infotainment, set the speed limit according to the category of tyres fitted.
▶ In the driver’s field of view, affix a warning label with the maximum value of the speed category intended for the tyres fitted (applies only to certain countries).
Settings
The speed limit setting for tyres is set in the infotainment in the following menu item.

\[\text{CAR} \Rightarrow \text{ } \Rightarrow \text{ } \Rightarrow \text{O}\]

Or:

\[\text{MENU} \Rightarrow \text{ } \Rightarrow \text{O}\]

Snow chains

Usage
The snow chains improve driving in wintry road conditions.

⚠️ WARNING
Risk of accident as well as tyre damage!

▷ Do not use chains on routes that are free from snow and ice.

What you should be mindful of

› Before fitting the snow chains, remove the full wheel trims.

› Only mount the snow chains on the front wheels.

Technical data

Permitted rim/tyre combinations for mounting of snow chains.

<table>
<thead>
<tr>
<th>Rim size</th>
<th>Tyre size</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.5Jx16 ET41</td>
<td>215/60 R16</td>
</tr>
<tr>
<td>6.5Jx17 ET41</td>
<td>215/55 R17</td>
</tr>
</tbody>
</table>

Only fit snow chains with links and locks that are no larger than 13 mm.

SEAL tyres

Usage

The SEAL tyres have increased resistance to air leakage when punctured.

When replacing SEAL tyres with standard tires, the vehicle must have one of the following pieces of equipment.

▷ Spare or emergency spare wheel with corresponding tool for replacing it.

▷ Breakdown kit.

Spare and emergency spare wheel

Overview

Spare wheel

▷ A full spare wheel is identical to the wheels mounted on the vehicle.

▷ A temporary spare wheel is provided with a warning label on the rim. This wheel is intended to enable you to reach the nearest specialist garage.

Inflate a space saver wheel with the maximum prescribed pressure.

Emergency wheel

A warning label is displayed on the rim of the temporary spare wheel. This wheel is intended to enable you to reach the nearest specialist garage.

An emergency wheel is significantly narrower than the wheels mounted ex-factory.

Remove the wheel on vehicles without sound system and replace

The spare wheel or emergency wheel is mounted in a recess under the floor covering or the variable loading floor in the boot.

Removing

› Loosen the retaining belt and take out the box with the tool kit.

› Unscrew the lock nut.

› Take out the wheel.

Inserting

› Insert the wheel into the wheel well with the outside facing downwards.

› Pull the fixing band through the opposite holes in the wheel rim.

› Screw in the locknut until it stops.

› Replace the box with the tool kit into the wheel and secure it with the tape.
Changing the wheel and raising the vehicle

What you should be mindful of

Before changing
› Park the vehicle securely and secure it from rolling away.
› Turn off the engine.
› Let all of the occupants get out. During the wheel change they should not stand on the road, e.g. behind the crash barriers.
› Close all doors, the luggage compartment and tailgate.
› Uncouple any trailers.

Raise vehicle
⚠️ WARNING
Always ensure the base plate of the lifting jack cannot slip!
▸ Provide a wide and firm base under the jack on loose surfaces.
▸ Create a non-slip base (e.g. a rubber floor mat) under the jack on a smooth surface.
▸ Always raise the vehicle with the doors closed.
▸ Do not insert any body parts under the raised vehicle.
▸ Do not start the engine of the lifted vehicle.

⚠️ NOTICE
Danger of damage to vehicle!
▸ Make sure that the jack is attached correctly to the bridge of the sill.

After having been changed
› Check the tyre pressure on the mounted wheel and adjust if necessary.
› In vehicles with a tyre indicator, save the tyre pressure values in the system.
› Have the tightening torque of the wheel bolts of the mounted tyres checked with a torque wrench as soon as possible.

The specified tightening torque is 140 Nm.

Drive carefully until the tightening torque is checked.
Replace the damaged tyre. It is not recommended to repair the tyre.

⚠️ WARNING
Risk of an accident!
▸ Too low a tightening torque may cause the wheel to disengage while driving.
▸ Too high a tightening torque can damage the threads and cause the rim to deform.

⚠️ WARNING
Risk of an accident!
▸ Do not grease or lubricate screws.
▸ Do not use corroded or damaged screws.

Release screws
› If the vehicle has covers over the wheel bolts or wheel trims, remove them.

⚠️ WARNING
▸ If you step on the key end when loosening the screw, hold on to the vehicle for better stability.

Some vehicles may have anti-theft wheel bolts that protect the wheels from theft.
› Insert the upper section on the anti-theft wheel bolt until it stops.

▸ Place the key on the wheel bolt or on the attachment piece.
▸ Turn the screw a maximum of half a turn so that the wheel does not come loose and fall off.

Jacking points for the jack

A 16 cm
B 34 cm

Position the jack and lift the vehicle
Use the jack from the tool kit.
Position the jack at the jacking point closest to the wheel to be replaced.
Insert the crank into the mount on the car jack.
Support the base plate of the jack with its full area resting on level ground and ensure that the jack is located in a vertical position at the jacking point.
Use the crank to raise the jack until its claw encloses the bar.
Continue to lift the vehicle until the wheel is just off the floor.

**Changing a wheel**

Unscrew the screws and place them on a clean surface.
Remove the wheel carefully.
Attach the wheel.
Slightly screw in the screws.
Lower the vehicle.

⚠️ **NOTICE**

Applies to wheel trims supplied ex-factory or from ŠKODA Original Accessories: the anti-theft wheel bolt should be installed in the position marked on the back of the wheel trim.

**Tighten screws**

Tighten the opposite wheel bolts including the anti-theft wheel bolt one after the other.
Reinstall the cover caps of the wheel bolts or the full wheel covers.

Keep the label with the code number of the anti-theft wheel bolts. A replacement upper section can be acquired from ŠKODA original parts based on this.

---

**Breakdown kit**

**Content overview**

The kit is located in a box under the floor covering in the luggage compartment.

---

**Usage conditions**

Performing a repair with the breakdown kit not at all intended to replace a permanent repair on the tyre.
The purpose of the repair is to get you to the nearest specialist garage.
Change the tyre repaired by the breakdown kit as soon as possible.

**Before using the kit**

Park the vehicle securely and secure it from rolling away.
Turn off the engine.
Let all of the occupants get out. During the wheel repair they should not stand on the road, e.g. behind the crash barriers.
Close all doors as well as the bonnet and boot lid.
Uncouple any trailers.

**After using the kit**

If a tyre pressure of 2.0 bar can not be achieved, the tyre is too damaged and cannot be sealed with the puncture set.
Stop driving. Seek the help of a specialist garage.
Once a tyre pressure of 2.0–2.5 bar is achieved, continue the journey at a maximum speed of 80 km/h (50 mph).

Avoid full accelerations, strong braking and fast cornering.

**Information for driving with repaired tyres**

- The pressure of the repaired tyre must be checked after driving for 10 minutes.
- If the tyre pressure is 1.3 bar and less, do not continue! Seek the help of a specialist garage.
- If the tyre pressure is higher than 1.3 bar, correct the pressure to the correct value of at least 2 bar and continue driving.

**NOTICE**

Danger of damage to the compressor!
- After the maximum running time of the air compressor, allow it to cool for a few minutes.

**WARNING**

Risk of burns!
- The tyre inflation hose and the air compressor may become hot when inflated.
- Allow the air compressor and hose to cool for a few minutes.

**Usage restrictions**

Do not use the kit in the following cases.

- The rim is damaged.
- The outdoor temperature is below the minimum temperature indicated in the manual of the tyre filling bottle.
- Tyre punctures are greater than 4 mm.
- There is damage to the tyre wall.
- The expiry date stated on the tyre inflation bottle has expired.

**Self-help**

**Seal the tyres**

- Unscrew the valve cap from the damaged tyre.
- Unscrew the valve core with the valve insert and place it on a clean surface.
- Shake the tyre inflation bottle back and forth with sealant.
- Screw the inflation hose onto the tyre inflator bottle. The film on the closure is pierced automatically.
- Remove the plug from the inflation hose and push it fully onto the tyre valve.
- Hold the bottle with the bottom facing upwards and fill all of the sealing agent into the tyre.
- Remove the filler plug from the valve.
- Screw in the valve insert.

**Inflate tyres**

- Fit the tyre inflation hose of the air compressor to the tyre valve.
- Secure the vehicle with the parking brake.
- Start the engine.
- Plug the connector into the 12 volt socket.
- Turn on the air compressor.
- Once a tyre pressure of 2.0-2.5 bar is reached, turn off the air compressor.

Observe the maximum running time of the air compressor according to the directions of the repair kit manufacturer.

- If an air pressure of 2.0 - 2.5 bar has not been reached, remove the tyre inflation hose from the valve.
- Drive approx. 10 metres forwards or backwards to allow the sealing agent to distribute in the tyre.
- Replace the tire inflation hose on the valve and repeat the inflation procedure.

**Tyre pressure**

**What you should be mindful of**

**NOTICE**

- Always adjust the tyre pressure to the load.
- Check the pressure in all tyres at least once a month and before each longer ride.
- Check the pressure when the tyres are cold. If necessary, do not reduce the elevated pressure when the tyres are warm.
- After each change in tyre pressure, save the new values in the tyre control display.

**WARNING**

Risk of an accident!
- If tyre pressure loss is very quick, try to stop the vehicle carefully without heavy steering or heavy braking.

**Sticker with prescribed tyre pressures**

The sticker with prescribed tyre pressures is located on the inside of the fuel filler flap.

[A] Inflation pressure for half load
[B] Inflation pressure for environmentally friendly operation (slightly lower fuel consumption and emissions)
[C] Inflation pressure for a full load
Tyre pressure monitor

Functionality

The tyre pressure monitoring indicator indicates a change in tyre pressure.

Warning when pressure changes

- The symbol illuminates.
  - Stop the vehicle.
  - Check the tyres and tyre pressures.

Show tyres with modified pressure

- In the following menu, select the menu item for displaying the tyre condition.

Or:

- Using the functional surfaces &nbsp;&nbsp;select the tyre control display menu.
  - Tap on the functional surface (ɪ)SET.
  - Then follow the instructions on the screen.

Save the tyre pressures in the following cases.

- Change of tyre pressure.
- Change of one or more wheels.
- Change of position of a wheel on the vehicle.
- Always after covering a distance of 10,000 km or once a year.

Troubleshooting

Tyre pressure display faulty

- The symbol flashes for about 1 minute and stays on.
  - Stop the vehicle, switch off the ignition and start the engine.

- If the symbol flashes again after starting the engine, there is a system fault.
  - Continue driving, exercising appropriate caution, and seek the help of a specialist garage.

Tyre pressure monitoring system

Functionality

The system measures tyre pressure while driving using sensors on the wheels.

For correct system function, you must select the tyre type as well as the load condition of the vehicle in the Infotainment.

- After switching on the ignition, the last measured tyre pressure values are displayed. This display will be updated at the start of the journey.

Warning when changing the tyre pressure

- The symbol illuminates.
  - Stop the vehicle.
  - Check the tyres and tyre pressures.

Overview

Display in the instrument cluster

- Select the Vehicle menu item.

Display in Infotainment

- In the following menu, select the menu item for displaying the vehicle condition.

Or:

- Using the functional surfaces &nbsp;&nbsp;select the tyre control display menu.
  - Tap on the functional surface (ɪ)SET.
  - Then follow the instructions on the screen.

Or:

- Using the functional surfaces &nbsp;&nbsp;select the tyre control display menu.
  - Tap on the functional surface (ɪ)SET.
  - Then follow the instructions on the screen.
Using the functional surfaces ◄ ► choose the Tyre Pressure Monitoring menu item.

**Instrument cluster / Infotainment**

- **A** Tyre pressure
- **B** Recommended tyre pressure
- **C** Tyre pressure not available
- **D** Tyre pressure too low
- **E** Adjust the vehicle’s loading condition

⚠ The tyres warm up while driving and there is an increase in pressure. This is completely normal, it is not a defect. If the system indicates an increase in pressure while driving, do not reduce the pressure.

**Settings**

**Tyre type**
Select the tyre type in the following menu.

**CAR ► ≥ ◄**

Or:

**MENU ► ≥ ◄ ◄ ≥ ◄**

**Vehicle loading condition**
- In the following menu, select the menu item for displaying the vehicle condition.

**CAR ◄ ≥**

Or:

**MENU ◄ ≥ ◄ ≥**

- Using the functional surfaces ◄ ► choose the Tyre Pressure Monitoring menu item.
- Tap the ◄ functional area and select the vehicle load condition.

**Troubleshooting**

**Functional restriction / system fault**

Flash

- Stop the engine and start again.
- If the indicator light flashes again after the engine starts, there is a problem with the system.

- Continue driving, exercising appropriate caution, and seek the help of a specialist garage.

**Wheel bolt cover caps**

**Remove cover caps and install**

**Disconnecting**
- Push the pull-off clamp onto the cover cap up to the stop.
- Remove the cover cap.

**Installing**
- Push the cover cap onto the wheel bolt to the stop.

**Full wheel frame**

**Removing and installing the trim**

Applies to factory built or original accessory trims from ŠKODA.

**Disconnecting**
- Hang the clamps for removing the wheel trims at the edge of one of the openings in the trim.
- Push the wheel wrench through the clamp, support on the tyre and pull off the wheel trim.

**Installing**
- Press the wheel trim onto the wheel rim at the designated valve opening.

When using an anti-theft wheel bolt, it must be located at the location indicated on the bezel.
- Press the trim, starting at the valve, into the rim on both sides until it engages around the entire circumference.

⚠ **NOTICE**
- Use hand pressure, do not hit the wheel cover.

**Removing and installing the Aero trim**

Applies to factory built or original accessory trims from ŠKODA.
**Storage space and interior equipment**

**Installing**
- When using an anti-theft wheel bolt, it must be located at the location indicated on the bezel.
- Position the panel on the wheel rim and push in the individual spokes of the panel one after the other until they are fully engaged.
- Press in the centre of the wheel cover until it engages completely.

**NOTICE**
- Use hand pressure, do not hit the wheel cover.

To facilitate removal, it is possible to insert the wheel wrench through the bracket loop and pull on the two key ends.

**Disconnecting**
- Insert the bracket to remove the wheel covers at the edge of the panel as close to the centre as possible.
- Pull off the centre of the wheel cover by loosening it and pulling off the trim.

**Equipment in the boot**

**Overview**

![Diagram of equipment in the boot]

- **A** Removable light
- **B** Lever for folding forward the rear seat backrests
- **C** Removable partition of the storage compartment
  - Max. load 2.5 kg
- **D** Net
  - Max. load 1.5 kg
- **E** Removable partition of the storage compartment
  - Max. load 2.5 kg
- **F** 12 volt socket

**Emergency equipment**

**Overview of the emergency equipment**

**Emergency equipment in the luggage compartment**

![Diagram of emergency equipment]

- **A** Positioning of the first aid kit (depending on equipment)
- **B** Tool kit
- **C** Positioning of the warning triangle (depending on equipment)

**Storage compartment for the reflective vest**

The storage compartment for the reflective vest is in the storage compartment of the front door.
Tool kit

Depending on the equipment, not all of the following components may be included in the tool kit.

- A Attachment for the anti-theft wheel bolts
- B Towing eye
- C Bracket for removing the full wheel covers
- D Jack with sign and crank
- E Wheel wrench
- F Removal clip for the wheel bolt cover caps
- G Breakdown kit
- H Screwdriver

The declaration of conformity is enclosed with the jack or the logbook folder.

Storage compartment for the reflective vest

Fasteners in the boot

Overview

Vehicle without variable loading floor

- A Bag hooks
  - Max. load 7.5 kg
- B Fasteners for securing the fastening nets
- C Lashing eyes for securing the load and the fastening nets
  - Max. load 350 kg

Vehicle with variable loading floor

- A Bag hooks
  - Max. load 7.5 kg
- B Fasteners for securing the fastening nets
- C Lashing eyes for securing the load and the fastening nets
  - Max. load 350 kg
- D Lashing eyes for securing the load and the fastening nets
  - Max. load 350 kg

Other fasteners

- A Cargo elements
  - Max. load 8 kg
  - Fold up the cargo element and fasten it to the floor covering in the boot.
- B A storage compartment for the cargo elements is located
in the storage compartment or under the floor covering in the boot.

**Bag hooks in the boot**

The maximum load for the hook is 7.5 kg.

**Storage compartment with Cargo components in the boot**

The maximum load for the Cargo components is 8 kg.

**Storage net**

The maximum permissible load for the net is 1.5 kg.

**Fastening nets**

**Overview**

The maximum load of the respective fastening nets is 1.5 kg.

**Multifunctional pocket**

**Operation**

**Unfolding**

› Fold down the front hooks on both sides of the boot.
› Fit the rear strip on the hooks.

**Folding**

› Remove the rear strip from the hooks.
› Place the rear strip against the front strip and press them together at both ends.

**Removing and inserting**

**Removing**

› Remove the roll-up cover.
› Take out the folded pocket in an upwards direction.
Inserting

› Insert the end of the strip marked with R into the right-hand mount and the end of the strip marked with L into the left-hand mount.

Stowing the pocket under the variable loading floor
› Fold the variable loading floor in the upper position.
› Open and remove the side compartments.
› Remove the left cover.
› Insert the pocket into the recesses of the side panel.
If the multifunction pocket and the roll-up cover are stowed at the same time, the roll-up cover at the back must cover the multifunction pocket.
› Replace the left cover and the side compartments.
› Unfold the variable loading floor in the upper position.

Net partition

Attach the net partition

Attach at the back
› Open the lid of the roll-up cover.

Fasten in the front
The procedure is analogous to the process behind.
Before installing, fold back the rear seat backrests.

Releasing
› Open the lid of the roll-up cover.
› Move the rod first to one side and then to the other side, and take it out of the supports.
› Hold the pole and allow the net partition to slowly roll in.
› Open the lid of the roll-up cover.

Remove housing and insert

Removal
› Fold the rear seat backrests forwards.
› Open the door at the right rear.
› Move and swing out the housing.

Inserting
› Insert the housing into the supports and move it.
Troubleshooting

Blocked net partition

To unlock, press the lock button.

Double-sided floor covering

Overview

Depending on the equipment, the vehicle may be equipped with a double-sided floor covering in the luggage compartment. One side is made of fabric, the other side is washable.

Floor covering in the boot

Folding up and folding down

Version 1/Version 2

NOTICE
Risk of damage to the hook!
For version 1, the following information applies.
▶ Only hang the floor covering on the hook.
▶ Before closing the boot lid, remove the floor covering from the hook.

The floor covering can be fixed with Version 2 only if the variable loading floor is folded in the upper position.

Removable light

Overview

A Button for switching on and off
B Light (lights up when the light is in the bracket and the boot lid is open)
C Light (lights up when the light is outside the bracket)

The batteries in the light are charged while the engine is running. A full charge of the batteries takes about 3 hours.

Removing and inserting

NOTICE
▶ Protect the light from moisture.

Removing

Grasp the light in area A and swivel it out.

Thanks to the integrated magnets, the light can be attached, for example, to the vehicle body.

Inserting

Insertion takes place in reverse order.
Replace batteries

› Pry off the cover with a narrow, pointed object in the area of the arrow.
› Replace the batteries.
› Fit the cover and click into place.

① NOTICE
New batteries must comply with the specifications of the original battery.

Rigid boot cover

Remove and insert

The maximum load of the other fastening nets is 1 kg.

Removing

› Unhook the straps.

Inserting

› Insert the holder with part A and then snap part B of the receptacle into the recess C on both sides of the luggage compartment.
› Hook in the retaining straps.

Store the cover behind the rear seats

› Insert the cover behind the rear seats.

Roll-up luggage compartment cover

Operation

Extending

› Pull out the cover on the handle until it clicks into place.

Retracting

› Press the cover in the handle area.
The cover rolls up to the intermediate position [A].
Press again to fully open the cover.
It is possible that the cover rolls more slowly during winter weather conditions.

Settings

Automatic rewinding of the cover to the intermediate position
The cover automatically rolls into the intermediate position when the boot lid is opened.
The function is activated or deactivated in the following menu in the Infotainment system.

CAR > 📀 > 📀
Or:
MENU > 📀 > 📀 > 📀
Removing and inserting

**Take out and insert the roll-up cover**

> Press the end of the crossbar and take out or insert the cover.

---

**Stowing the cover under the variable loading floor**

> Fold the variable loading floor in the upper position.
> Open and remove the side compartments.

---

**Insert the cover into the recesses of the side panel.**

> Replace the left cover.

---

**Variable loading floor in the boot**

**Setting the position**

The maximum load of the variable loading floor is 75 kg.

---

**Set the variable loading floor to the upper position**

> Lift the variable loading floor.
> Pull the variable loading floor towards you and raise it to the height of the roll-up cover until you hear an audible click.
> Press the variable loading floor forward and hang up.

---

**Install in the lower position**

> Lift the variable loading floor.
> Pull the variable loading floor towards you until it sinks down into the lower position.
> Press the variable loading floor forward and hang up.

---

**Fold the variable loading floor together**

> Lift the variable load floor and move it forwards.
> The variable loading floor is folded down in the central area.
> Fold the variable loading floor forwards.

---

**Dividing the boot**

> Lift the variable loading floor and push the rear edge into the grooves A.

---

Depending on the equipment, the vehicle can be equipped with a washable storage compartment under the variable loading floor.
Storage compartment under the variable loading floor

The maximum load for the fastening element is 10 kg.

To remove, pull the securing tab on both sides upwards and outwards and remove the partition.

To insert, position the fastening element in an oblique direction on the partition and press downwards.

Removing takes place in reverse order.

Partition in the boot

Removing and inserting

Removing and inserting the partition
The partition prevents the cargo from slipping.
The maximum load for the partition is 10 kg.

To remove, pull the securing tab on both sides upwards and outwards and remove the partition.

To insert, engage the partition in the fixing points A, B or C.

Remove fastening element and insert
The fastening element prevents the cargo from slipping.
The fastening element is attached to the partition on the variable loading floor.

Partition with fastening element in the luggage compartment

The maximum load for the partition is 10 kg.
The maximum load for the fastening element is 10 kg.

Through-loading bag

Insert and lock
In the bag, a max. of 4 pairs of skis with poles can be transported.

Fold the rear armrest and the cover in the seat backrest downwards.

Place the empty bag in the opening in such a way that the end of the bag with the zip is in the boot.

Place the skis with the tips facing to the front and the poles with the tips facing to the rear into the bag and close the bag.
› Tighten the strap A around the skis in front of the bindings.
› Fold the seat backrest a little forward.

› Guide the securing strap B through the opening around the upper part of the seat backrest.
› Fold the seat backrests back until the locking button clicks into place.
› Insert the securing strap into the lock until it clicks into place.

⚠️ WARNING
The maximum weight of the transported skis is 17 kg.

⚠️ NOTICE
Risk of damage to the armrest!
› Handle the bag and the skis with care.

Overview of passenger compartment

Overview of practical equipment in the front

Storage compartment for cards in the storage area on the driver's side
Storage compartment for an umbrella

Overview

Phonebox

What you should be mindful of

⚠ CAUTION
Risk of burns during charging.
▶ The phone may get warm, remove it carefully from the storage compartment.
▶ Do not leave any metal objects in the compartment under the phone. If there is a metallic object in the storage compartment, which has become hot, remove the phone and let it cool down in the storage compartment!

Functionality

Functions of the Phonebox
▶ Wireless charging of phones.
▶ Amplification of the telephone signal (only valid for some countries).

The Phonebox is located in the storage compartment in the centre console at the front.

Insert a telephone with a maximum size of 146x80 mm into the storage compartment.

Charging Indicator
When the phone is charging, the 🔄 in the status bar in the infotainment screen will light up.

Recommendations for optimal function
✓ The phone is positioned with the screen facing up.
✓ The protective cover of the phone is removed.
✓ The phone is centred on the phone icon on the pad.

Operating conditions

Conditions for wireless charging
✓ Ignition is switched on.
✓ The phone supports the Qi standard.

Troubleshooting

A message has been displayed on the Infotainment screen indicating that the mobile phone cannot be charged.
▶ Check that there is no object between the pad and the phone to be charged. If this is the case, remove the phone and the item. Place the phone centrally on the phone symbol on the pad again.
▶ Check that the position of the phone to be charged has not changed. If this is the case, remove the phone and put it back in the centre of the phone symbol on the pad.

Cup holder

Overview

Cup holder at the front
▶ Press on the bar to open.

In the centre console holder area, a bottle can be opened with one hand.
▶ Press the bottle into the holder and unscrew the cap.

Rear cup holder
▶ To open it, open the lid.

⚠ CAUTION
Risk of scalding!
▶ Never put hot beverage containers in the drinks holder.

† NOTICE
Risk of damage to the electrical system and to the panels due to spilled drinks.
Waste container

Replace bags

Ashtray and cigarette lighter

What you should be mindful of

⚠️ CAUTION
Risk of burning or fire!
▶ Do not use the ashtray for storing hot or burning objects.
▶ Handle the lighter carefully.

Operation

Removable ashtray

The ashtray is inserted in the cup holder.

⚠️ NOTICE
▶ When removing, do not hold the ashtray by the lid.

Ashtray with removable insert

Cigarette lighter

Push in the lighter.
▶ Wait until the glowing lighter pops back out.
▶ Remove the lighter and use.
▶ Push the lighter back in.

The socket of the cigarette lighter serves as a 12 V socket.

Ceiling

Remove and insert

The blanket is in a bag that can be attached to one of the following locations.
▶ On the guide rods of the front headrests.
▶ In the storage pockets on the backs of the front seats.

Display in rear centre console

Overview

Set the temperature

Display
**Tablet holder**

**Settings**

**Tilt and turn**

Pull out the locking tab and move the upper part of the holder to the desired position.

Set the minimum size of the empty holder to avoid noise while driving.

**Adjust size**

**Remove and insert**

**Fasten behind the headrests**

Place the open adapter on the front guide rods of the headrest and clip in carefully.

Clip in the holder in the adapter.

---

**Removal**

Press the safety button and unfold the holder.

Press on the adapter and remove it.

Clip the holder into the opening.

Press the safety button and unfold the holder.

---

**Insert into the rear armrest**

Clip the holder into the opening.

---

**Technical data**

The holder is for fixing a tablet with a height of min. 12.2 cm and max. 19.5 cm.

The maximum load for the holder is 0.75 kg.
Storage compartment for the tablet

Operation

› Pull A to open at the loop.

12-Volt power socket

Operating conditions

① NOTICE
Risk of damage to the electrical system of the vehicle!
▶ Use the sockets only for the connection of approved electrical accessories with a total power consumption of up to 120 watts.

① NOTICE
Danger of damage to the connected consumers!
▶ Switch off the consumers before switching the ignition on or off and before starting the engine.

230-Volt power socket

Functionality

① NOTICE
Danger of damage to the connected consumers!
▶ Do not connect a light with fluorescent lamp to the socket.
▶ Switch off the consumers before switching the ignition on or off and before starting the engine.

Status display
▶ Lit up in green - the socket is switched on.
▶ Blinking green - the socket is still switched on for about 10 minutes after the engine has been switched off, if a consumer was connected before the engine was switched off.

The socket has a child safety lock. When inserting the plug, the fuse is unlocked and the socket is switched on.

Operating conditions

✓ The engine is running.

Troubleshooting

The indicator light flashes red
The socket is switched off for the following reasons.
▶ Excessive current.
▶ Low state of charge of the battery.
▶ Overheating of the socket.
▶ If the reasons given above no longer apply and the socket is still not switched on automatically, disconnect the connected consumer from the socket and reconnect after a short time.
Roof rack and hitch

Roof rack

Overview

The maximum weight of the load incl. roof rack is 100 kg.

Depending on the equipment, the roof bars can be attached at the attachment points A and B or to the roof rail.

Swivelling hitch

What you should be mindful of

⚠️ WARNING
Risk of an accident!
▶ Do not manipulate the handle for swinging the tow bar in and out while a trailer or another accessory is coupled to the tow bar. The tow bar could be unlocked.

⚠️ CAUTION
Risk of injury!
▶ Handle the trailer coupling carefully.
▶ When swinging out the tow bar, do not stand in the middle area of the rear bumper.

⚠️ NOTICE
Risk of damage to the trailer coupling!
▶ When not using the towing device, swing the tow bar under the bumper.

Tow bar: swivel out/in

Swing out the tow bar

▶ Pull on the handle. The tow bar swings out. The indicator light next to the handle flashes red.
▶ Slowly retract the handle.

Swivel tow bar

⚠️ NOTICE
▶ No trailer or any other accessory can be connected to the tow bar.
▶ A socket or adapter may not be plugged into the socket.

▶ Pull on the handle. The tow bar is unlocked. The indicator light next to the handle flashes red.
▶ Slowly retract the handle.

Swing in the tow bar under the bumper until it audibly clicks into place.

Check latching: the indicator light next to the handle lights up green.

Coupling or uncoupling a trailer or accessory

The following information describes the procedure for coupling and uncoupling a trailer. The information also refers to another accessory, e.g. a bike carrier.

⚠️ WARNING
Risk of an accident!
▶ Do not use the safety eye for towing.
▶ Distribute and fix the load correctly.

⚠️ The trailer has a 13-pin electrical socket. If the trailer have a 7-pin connector, use a corresponding adapter from the ŠKODA Original Accessories.

Coupling

▶ Swing out the tow bar.
▶ Put the trailer drawbar onto the ball head.
Plug the electrical trailer plug into the socket [A].

Hook the tear-off rope of the trailer onto the safety eye [B]. The tear-off rope must sag against the vehicle in all trailer positions.

Uncoupling
Uncoupling takes place in reverse order.

Power supply of the trailer power network
In the electrical connection between the vehicle and trailer, the trailer is powered by the vehicle.

 NOTICE
Risk of damage to the vehicle electronics!
The total power consumption of all consumers connected to the trailer power supply must not exceed max. 350 watts.

Troubleshooting

Trailer coupling error
The indicator light next to the handle does not light up green, or the tow bar does not lock into place.

 › Do not use the trailer coupling.
 › Seek the help of a specialist garage.

Tow bar not locked
illuminates

 › Engage the tow bar.

Technical data

Maximum vertical load for trailer operation
The maximum vertical load for trailer operation depends on the engine type and the vehicle equipment. The valid specification for your vehicle can be found in the technical vehicle documentation, (e.g. vehicle approval documentation, COC document) or at a ŠKODA partner.

Other information (e.g. on the nameplate of the trailer device) merely provides information on the test values of the device.

Support load with mounted accessories
When using the accessories (e.g. bicycle carrier), the maximum length and the permissible total weight including load must be considered.

The maximum length of the mounted accessories (from the ball of the towing device) may not exceed 70 cm.
Maintaining and cleaning

Service events

Service intervals
Compliance with service intervals is crucial for the life and value of the vehicle.

The service events symbol and the corresponding message on the instrument cluster display indicate that a service appointment is due.

The specialist garage will inform you of the type of service interval, the option of changing this and the scope of service.

All services and the replacement or refilling of operating fluids are chargeable to the customer, even during the warranty period, unless the ŠKODA AUTO warranty conditions or other binding agreements determine otherwise.

Proof of service
A specialist garage stores the proof of service in the information system called Digital Service Plan.

The proof of service can be printed out.

Resetting information
We recommend that you do not reset the information regarding service events on your own. It can lead to incorrect setting of the service intervals and thus also to possible faults in the vehicle.

For vehicles with a variable service interval, new service interval values calculated according to the previous operating conditions will be displayed after the oil change service indicator is reset. These values will then continue to be adjusted according to the current operating conditions.

Service work, adjustments and technical changes

The instructions and guidelines from ŠKODA AUTO must be observed when carrying out any modifications, repairs or technical alterations to the vehicle.

Adhering to these instructions and guidelines helps ensure road safety and helps keep the vehicle in a good technical condition.

We advise only using ŠKODA Original Accessories and ŠKODA Original Parts which have been expressly approved for use on your vehicle. Reliability, safety and suitability for your vehicle are guaranteed with these.

ŠKODA Service Partner

All ŠKODA Service Partners operate according to the most recent guidelines and instructions from ŠKODA AUTO. Service and repair work is therefore carried out on time and at the appropriate quality.

Adhering to these instructions and guidelines helps ensure road safety and helps keep the vehicle in a good technical condition.

We therefore advise having all modifications, repairs and technical alterations to the vehicle carried out by a ŠKODA Service Partner.

ŠKODA original parts

We recommend the use of ŠKODA Original Parts for your vehicle, as these parts are approved by ŠKODA AUTO. These parts correspond exactly to the ŠKODA AUTO regulations and are identical to the parts used in series production.

ŠKODA AUTO is able to warrant the safety, suitability, and long life of these products.

ŠKODA Service Partners are liable for any defects of ŠKODA Genuine Parts for a period of 2 years after sale in accordance with the materials defect liability, unless agreed otherwise in the purchase agreement.

ŠKODA original accessories

We recommend that you use ŠKODA Genuine Accessories in your vehicle. With these accessories, ŠKODA AUTO stands for safety, reliability and the suitability for your vehicle type.

ŠKODA Service Partners are liable for any defects of ŠKODA Genuine Accessories for a period of 2 years after installation or delivery in accordance with the materials defect liability, unless agreed otherwise in the purchase agreement or any other agreements.

Spoiler

⚠️ WARNING
Risk of an accident!

- Only use the original spoiler on the front bumper in combination with the original spoiler on the boot lid.
- The original spoiler on the front bumper cannot be left on its own without the spoiler on the luggage compartment lid or in combination with an unsuitable spoiler on the luggage compartment lid.
- We recommend that you consult the ŠKODA Service Partner for any repairs to or replacement, addition or removal of spoilers.

Component protection

Some electronic vehicle components (such as the instrument cluster) are factory-equipped with component protection. This component protection ensures the functional limitation of these components in a non-legitimate installation in another vehicle (e.g. after a theft) or operation outside the vehicle.
Interior

What you should be mindful of

**NOTICE**
- Use cleaning agents intended for cleaning and care of the individual materials.
- Do not use aggressive cleaning agents or chemical solvents.

Natural leather / Faux leather / Alcantara® suede / material

**NOTICE**
- Remove impurities as soon as possible.
- Do not use solvents, floor wax, shoe cream, stain remover or similar agents on Alcantara® suede seat upholstery.
- Make sure that natural leather is not moistened when cleaning and that no water seeps into the seams.
- Do not clean the roof cladding with a brush.

**NOTICE**
- Risk of fading to the cover fabric.
- If necessary, do not leave the covers for long periods in the blazing sun.

**NOTICE**
- During use, the leather and Alcantara® and suede materials may show minor changes (e.g. folds or discolouration).
- Some clothing fabrics, e.g. dark denim, sometimes do not have sufficient colour fastness. As a result, discolouration that is clearly visible on the seat upholstery can occur. This is not a defect in the fabric.
- Sharp-edged zippers, rivets, clamps and similar garments can damage the upholstery in the vehicle. Such damages cannot be subsequently recognised as a justified complaint.

Plastic parts

**NOTICE**
- Risk of damaging the dash panel.
- Do not attach fragrances and air fresheners to the dash panel.

Windows

**NOTICE**
- Risk of damage to the filaments or the glass antenna.
- Do not stick stickers on the heating filaments.

Covers on electrically heated seats

**NOTICE**
- Risk of damaging the heating system.
- Do not clean the seats with water or other liquids.
- Do not dry the seats by switching on the heating.

Seat belts

**NOTICE**
- Risk of damage to the seat belts.
- Do not dry clean the seat belts.
- Allow cleaned belts to dry before rolling up.

Instructions for cleaning

Natural leather / Faux leather / Alcantara® suede / material

- Remove dust and dirt on the surface with a vacuum cleaner.
- Remove fresh impurities with water, slightly moistened cotton cloth or woolen cloth; if necessary, use a mild soap solution and wipe with a dry cloth.
- Remove stubborn stains with a suitable cleaning agent.
- For regular care of natural leather, use the equipment provided for this purpose. After each clean, use a care cream with light protection and impregnation effect.
- When looking after Alcantara®, remove stubborn hair from suede and fabric surfaces with a cleaning brush. Remove pills from materials with a brush.

Plastic parts

- Remove impurities with water, slightly moistened cloth or sponge with a suitable cleaning agent if necessary.

Windows

- Remove impurities with clean water and dry with a cloth provided for this purpose.

Covers of electrically heated seats

- Remove impurities with a suitable cleaning agent.

Seat belts

- Remove impurities with a soft cloth and mild soap solution.

Exterior

What you should be mindful of

**WARNING**
- Risk of an accident!
- After washing the vehicle, the functionality of the brake system may be affected by moisture and, in winter, by ice.
- Dry and clean the brakes by braking several times.
NOTICE
▶ Bird droppings, insect residues, litter and sea salt residues, overflowed fuel, AdBlue® etc. are to be removed as soon as possible.
▶ Do not use rough sponges, scourers or similar to remove dirt.
▶ Use cleaning agents intended for cleaning and care of the individual materials.
▶ Do not use aggressive cleaning agents or chemical solvents.
▶ Do not polish the vehicle in a dusty environment.

NOTICE
AdBlue® picks up some materials, e.g. paint and plastics.
▶ Clean the affected area with a damp cloth and cold water.
▶ Remove any dried solution with warm water and a sponge.

NOTICE
▶ Paint damage should be repaired as soon as possible.
▶ Do not treat painted parts with or hard waxes.
▶ Do not polish panels.
▶ Door seals and window guides must not be treated with anything. Exempted from this are products that are ŠKODA Original accessories. These ensure that the protective lacquer layer of the seals and window guides is not attacked.
▶ Do not use abrasive cleaners to clean the reversing camera.

Before driving through a car wash
▶ Observe the usual specifications of the car wash, e.g. close all windows, fold the mirrors, etc.
▶ Move the windscreen wiper lever to position OFF to adjust.
▶ If there are special attachments on your vehicle, observe the instructions of the car wash operator.

NOTICE
In vehicles with an electric boot lid, this can open automatically due to the pressure of the washing brushes.
▶ Lock the vehicle, e.g. with the central lock button.

After washing with a wax preservation
▶ Wipe off the windscreen wiper blades with a dry cloth.

Wash with a pressure washer
NOTICE
▶ Follow the operating instructions for the high-pressure cleaner. This particularly applies to information with respect to the pressure and spray distance from the vehicle surface.
▶ Do not direct the water jet directly at the following vehicle parts.
▶ Foils.
▶ Locks.
▶ Columns on the vehicle.
▶ Trailer connection.
▶ Swivelling ball bar.
▶ Sensors.
▶ Camera lenses.
▶ Plastic, chromed and anodised parts.

Remove snow and ice
NOTICE
▶ Remove snow and ice with a plastic scraper or a suitable deicing agent.
▶ Clean the cameras with a hand brush.
▶ Only move the scraper in one direction.
▶ Do not use scratchers or other sharp objects for foils.
▶ Do not remove snow and ice with hot or warm water.
▶ Do not remove snow and ice from surfaces with coarse dirt.

Instructions for cleaning

Handwash
▶ Wash the vehicle from top to bottom with a soft sponge or wash glove and plenty of water, if necessary with additional suitable cleaning agents.
▶ For foils and headlights, use a mild soap solution that contains two tablespoons of white neutral soap to one litre of lukewarm water.
▶ Use a glass cleaner for the windscreen wiper blades.
▶ Wash the cameras with clean water and dry with a suitable clean wipe.
NOTICE
▶ Wash out the sponge or wash mitt regularly.
▶ Use a different sponge for wheels, sills and the lower part of the vehicle than that used for the other vehicle parts.
▶ Do not wash the vehicle in the blazing sun.
▶ Do not dry the headlights or use sharp objects.
▶ Do not put pressure on the bodywork when washing.
▶ The temperature of the washing water may be a max. 60 °C.

After hand washing
▶ Rinse the vehicle and wipe it with a suitable clean cloth.

Vehicle paint
▶ Preserve the varnish at least twice a year with hard wax.
▶ Use a polish for matt lacquers.
Films
Films will age and become brittle – this is entirely normal: this is not an error.

The following factors have a negative effect on the life or colour fastness of the films.
- Sun rays.
- Moisture.
- Air pollution.
- Stones, e.g. the rebound of the cargo during transport on the roof rack.

Protection of hollow spaces
Corrosion-prone cavities of the vehicle are permanently protected by preservative wax at the factory.
- Remove spilled wax with a plastic scraper, clean stains with mineral spirits.

Underseal
The underside is permanently protected by the factory against chemical and mechanical influences.
- Have the protective coating checked by a specialist garage before starting and at the end of the cold season.

Wheels
- After washing, preserve the wheels with suitable means.

⚠️ NOTICE
Severe dirt on the wheels can result in the wheels unbalancing.

Car jack
- If necessary, treat moving parts with suitable grease.

Tow hitch
- Coat the ball head of the towing device with a suitable grease whenever necessary.

Ice scraper on the fuel filler flap

Technical data and specifications

Requirements for the technical data
The emission standard, information on fuel consumption and other information pertaining to your vehicle can be found listed in the technical vehicle documentation and in the declaration of conformity, in the so-called COCDocument. The information can also be requested from a ŠKODA partner.

The declaration of conformity can be obtained from a ŠKODA partner.

The details in the technical vehicle documentation take precedence over the information in this Owner's Manual.

The listed performance values were determined without performance-reducing equipment, e.g. air conditioning system.

The values listed are for the basic model without any optional equipment. The values have been determined in accordance with the rules and conditions specified in statutory or technical regulations for determining operational and technical data for motor vehicles.

Vehicle identification data

Vehicle Identification Number (VIN)
The vehicle identification number is found at the following locations.
- Directly in the engine compartment on the suspension turret.
- On a plate under the windscreen in the lower left corner.
- On the type plate at the bottom of the middle body pillar of the vehicle.

![Vehicle identification number](image)

Type plate.

A Vehicle manufacturers
B Vehicle Identification Number (VIN)

VIN display
The display of the VIN takes place in the infotainment in the following menu item.

CAR > 🎇 > Menu item for the service
Or:

**MENU ➤ 🡛 ➤ 🡚 ➤ Menu item for the service**

**Engine number**
The engine number is embossed on the engine block.

**Maximum permissible weights**
The maximum permissible weights are listed on the nameplate.
The type plate is located at the bottom of the middle body pillar of the vehicle.

Therefore, for every additional 1,000 m in height (or part), the maximum permissible towed weight must be reduced by 10%.
The towed weight is made up of the actual weights of the loaded towing vehicle and the loaded trailer.

**Payloads**
It is possible to calculate the approximate maximum payload from the difference between the permissible total weight and the operating weight.
The payload consists of the following components.

- The weight of the rider.
- The weight of all luggage and other loads.
- The weight of the roof, including the roof rack system.
- The weight of the equipment that are excluded from the operating weight.
- Trailer bearing load for trailer towing » page 222.

⚠️ **WARNING**
Risk of accident and danger of vehicle damage!
- Do not exceed the specified values for the maximum permissible weights.

**Operating weight**

**Information about the operating weight**
The specification corresponds to the lowest possible operating weight without additional weight-increasing equipment. This includes 75 kg driver’s weight, the weight of the operating fluids and the on-board tool kit and a fuel tank filled to min. 90%.

### Event Data Recorder

The vehicle is equipped with a device that serves as an accident data recorder (referred to solely as “EDR” from this point). The main purpose of the EDR is data recording during a traffic accident or other exceptional traffic conditions (referred to solely as “accident” from this point), where the restraint systems are activated.

The EDR records the accident in a short time (approximately 10 s), by showing the following information, for example:

- The function of certain systems in the vehicle.
- The seat belt status of the driver and front passenger.
- The actuation of the brake and accelerator pedals.
- The speed of the vehicle at the time of the accident.

The recorded data helps with the analysis of how the vehicle systems were behaving shortly before, during and shortly after the accident, thereby ensuring better information regarding the circumstances under which the accident occurred, which lead to material damage and possibly to personal injury.

The data relating to assist systems in the vehicle is then also recorded. In addition to the information on whether the affected systems were switched on or off at the relevant time, whether these were only partially available or were inactive, there is also the possibility of tracking whether these vehicle functions controlled, accelerated or braked the vehicle during the accident. Depending on the equipment, these functions are, e.g.:

- Adaptive Cruise Control (ACC).
- Lane Assist.
- Park Assist.
- Emergency brake function (Front Assist).

EDR data is only recorded if an accident causes the restraint systems to be activated. Under normal driving conditions there is no data recording and there is no audio or video recording of the vehicle interior or the vehicle environment. Personal data such as name, gender, age or place where the accident occurred is also not stored in the EDR. However, third parties such as law enforcement authorities may use certain resources to connect EDR content to other data sources, and therefore deduce the identification of some of the people involved in the accident when investigating the causes of the accident.

Reading out the EDR requires special equipment with specific access authorization and a legally prescribed diagnostic connection in the vehicle “on-board diagnostics”), and the ignition will need to be switched on.

---

*a) Automatic dual-clutch transmission.*
ŠKODA AUTO will not read or otherwise process any accident data from the EDR without the approval of the vehicle owner or other person authorised for use of the vehicle. Exceptions are specified in the contractual arrangements, or these are subject to generally binding regulations.

Due to legal requirements, ŠKODA AUTO is required to monitor the quality and safety of its products, meaning that it is only entitled to use data from the EDR to monitor the product on the market, for further research and development, and to improve the quality of the vehicle’s safety systems. For the purpose of research and development, ŠKODA AUTO will also make data available to third parties. This is done exclusively in anonymous form, i.e. without any connection to the specific vehicle, the vehicle owner or any other authorised user.

**Rights arising from defective performance, ŠKODA warranties**

**Rights arising from defective performance**

Your ŠKODA Partner, as a seller, is liable to you for material defects in your new ŠKODA vehicle, ŠKODA Genuine Parts and ŠKODA Genuine Accessories, in accordance with the legal requirements and the purchase contract.

The buyer is entitled to assert the rights arising from defective performance with the responsible ŠKODA partner from the time of vehicle handover. The date of the vehicle handover and the vehicle identification number (VIN) are properly documented in the “Vehicle delivery documentation” chapter in this Owner's Manual.

**ŠKODA warranty for new cars**

As well as the legal rights arising from defective performance, ŠKODA AUTO a.s. grants you the ŠKODA warranty for new cars (hereinafter referred to as the “ŠKODA Warranty”), according to the conditions described below.

Under the ŠKODA Warranty, the company ŠKODA AUTO shall provide the following services:

- Free repair of damage due to a defect that occurs in your vehicle within two years of the start of the ŠKODA Warranty.
- Free repair of damage due to paintwork flaws that occur on your vehicle within three years of the start of the ŠKODA Warranty.
- Free repair of rust corrosion on the body, which occurs on your vehicle within twelve years of the start of the warranty. In terms of rust corrosion on the body, the ŠKODA Warranty shall cover only rust corrosion through body panels from the inside to the outside.
- Free repair of the high-voltage battery if it is installed in the vehicle and if the damage occurs within 8 years or before reaching a mileage of 160,000 km/100,000 miles (whichever occurs first) from the beginning of the ŠKODA warranty. A reduction in the capacity of the high-voltage battery over time is a natural feature of technology and does not constitute a defect within the meaning of the ŠKODA warranty, provided that this value does not fall below 70% of the total usable capacity before the expiry of 8 years or before the achievement of 160,000 km/100,000 miles (whichever comes first) from the beginning of the ŠKODA warranty.

The start of the ŠKODA Warranty is the day on which the new car is handed over for use by a ŠKODA partner or importer.

To display information about Directive 2014/53 / EU on the approximation of the laws of the Member States relating to the marketing of radio equipment, Technical regulation on radio equipment, approved by the decision of the Cabinet of Ministers of Ukraine of May 25, 2017 No. 355 as well as regarding declaration of conformity, proceed as follows.

1. Import the QR code or enter the following address in the web browser.
   http://go.skoda.eu/owners-manuals
2. Click on “Choose your manual”.
3. Select the desired model - a menu with the instructions will be displayed.
4. Select the construction period and the language.

Based on the requirements of generally binding legal regulations or country-specific market requirements, the ŠKODA partner or importer can provide a warranty beyond the scope of the stated ŠKODA Warranty. This local warranty extends the scope of performance in accordance with the specific warranty conditions of ŠKODA partners or importers.
The service work was not carried out on time and
Damage refers to parts that are subject to natural
 Unauthorized use, improper handling (e.g. use in
Non-observance of instructions in the Owner's Manual or in other factory instructions, including, but not limited to, non-observance of instructions
regarding the procedure for charging the high-voltage battery if it is installed in the vehicle.

Use of the vehicle as a stationary source of electrical energy.
External impact or influences (e.g. accident, hail, flood, etc.).
Damage has not been reported immediately to a specialist company or has not been properly remedied.
The customer shall prove the lack of causation.
The present ŠKODA Warranty shall not affect the purchaser's statutory rights arising from unsatisfactory performance in respect of the seller of the vehicle and possible claims arising from product liability laws.

ŠKODA Mobility Warranty
The Mobility Warranty provides you with a sense of certainty for journeys in your vehicle.
As part of the Mobility Warranty, if your car breaks down as a result of an unexpected fault when you are on the move, you can access services to ensure your continued mobility. These services include the following: Breakdown service at the breakdown location and towing to the ŠKODA Service Partner, technical assistance by phone or on-site operation.
If your vehicle is not repaired on the same day, then the ŠKODA Service Partner may, if necessary, arrange additional subsequent services, such as replacement transport (bus, train, etc.), the provision of a replacement vehicle, and the like.
Specific claims for free provision of services under the ŠKODA Mobility Warranty only exist if your vehicle has remained in a causal connection with a defect which is to be remedied on the basis of fulfilment under the ŠKODA Warranty.
Check the conditions for provision of the Mobility Warranty for your vehicle with your ŠKODA Partner. They will also inform you of the detailed terms and conditions of the Mobility Warranty in relation to your vehicle. In the event that your vehicle is not covered by a mobility warranty, he will inform you of the possibilities for subsequent conclusion.

Optional ŠKODA Extended Warranty
If you also purchased a ŠKODA Extended Warranty when purchasing your new car, ŠKODA AUTO will provide you with a free repair of vehicle damage caused by a defect in the vehicle during the warranty period.
The ŠKODA Extended Warranty for your vehicle is valid for the agreed period or until the agreed mileage limit is reached, whichever comes first.

---

1) Due to the requirements of the generally binding country-specific legal regulations, the date of the first registration can be specified instead of the date of the vehicle handover.
For the assessment of claims from the ŠKODA Extended Warranty, the conditions of the ŠKODA warranty described above apply to the appropriate extent.

The vehicle repair under the ŠKODA Extended Warranty can only be carried out by replacement or repair of the defective parts, whereby the ŠKODA service partner decides on the type of vehicle repair. The vehicle repair takes place in accordance with the availability of the ŠKODA Service Partners and within a reasonable period of time.

There shall in any case be no entitlement to further claims from the ŠKODA Extended Warranty. In particular, no claim for replacement, no right of withdrawal, no claim to purchase price reduction, or provision of a replacement car for the duration of repair and compensation.

The described paint warranty, the warranty against rust penetration and the warranty for the high-voltage battery remain unaffected by the ŠKODA Extended Warranty.

The ŠKODA Extended Warranty does not apply to exterior and interior foils.

Your ŠKODA partner will provide you with information about the detailed conditions of the ŠKODA Extended Warranty.

The ŠKODA Mobility Warranty and the ŠKODA Extended Warranty are only available in some countries.
